The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT, Consulting Actuary, New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours, THOMAS TENNENT, Mfr. Mathematical Instruments, 18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.
ADDRESS
JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

ESTABLISHED 1830.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 18, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12S.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

American Stationer Association,

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE promise of an American Exhibition in Europe to be opened in London in 1886, seems to be attracting a great deal of attention abroad, and is meeting with encouragement and favor from the English journals. A number of prominent Englishmen have already given their names as patrons and promoters of the exhibition, and with the encouragement so far gained, it would certainly seem that the exhibition is justified. That it shall be depends to a great extent upon our own manufacturers, and we advise all to make inquiry into its character and purposes, and if found desirable to give it aid and countenance.

A NEW contract for supplying the Post-Office Department with envelopes has been given out, and the successful bidders are the parties who were superseded by the contractor who was charged with furnishing inferior goods. The latter has set forth his grievance in the newspapers. From his showing he has reasonable ground for complaint of the treatment he has received; but as his statement is *ex parte*, we must wait for the other side before concluding how fairly or unfairly he has been treated. A grave charge is brought by him against former contractors; but, of course, their default is no justification for like conduct on his part. We have received samples of paper tested by the machine which is said to have disclosed the inferiority of the paper, and we have been informed how the tests were made. The variations shown in the tests are peculiar, but at the same time they give rise to a suspicion of the accuracy of the testing apparatus or its truthfulness. We are led, from what has been shown us, to ask whether the machine cannot be made to test as wanted.

THE commission appointed by the President to consider the extension of commercial relations between this country and the different nations of Central and South America has been in session this week and has heard suggestions from different merchants as to the methods of carrying out the policy of enlarging our trade in the direction indicated. Men of experience stated that our manufacturers are not as careful in accommodating buyers as those of Europe and that the system of extended credits to which Central and South American buyers have become accustomed is not practised by us. Another point is the facile intercourse between European markets and purchasing countries by the steamer lines which actually bring South America into closer contact with Europe than with the United States. Exorbitant freight charges hence were also men-

tioned as one of the obstacles to trade. Now, it seems to us that all of these points can be covered and the objections removed, if our manufacturers and merchants are earnestly desirous of widening their trade and securing the customers who ought to come into our own markets. It needs only a very slight exercise of intelligence to accommodate buyers as to quality and quantity of goods. While we do not believe in protracted credits, yet it is fair to concede that there are conditions under which they can be reasonably conceded. We know that it is claimed that the character of certain crops and the movement of certain products require time to be given, and if one set of merchants can accord credit safely, we certainly ought to be able to do it as well. The Commission will continue its investigation on the 29th inst., and it would be desirable that all merchants who look to increasing the number of their South American customers should attend and receive whatever suggestion may be made. The Commission will leave for Central America about the 10th of next month, and we hope that it will be productive of information and valuable results.

Roundabouts.

BY THE TRADE LOUNGER.

It is easier getting round now, and there is an evident desire with everybody to be busy. Ten days ago such a thought was impossible, for then people only wanted to lay off, go to the seashore, mountains—anywhere to get away from the grind of work in an intensely warm atmosphere. Business is the main idea to-day, and if it doesn't come, stationers will "mourn its loss."

Now that strict attention is to be given to trade, let us see what there is new or taking in the market. I have picked up a few notes of trifles which may be of interest.

Japanese magic mirrors are in the market. These are made of fine burnished metal, and when lightly breathed upon disclose geometrical patterns, landscapes or faces. Their manufacture is a secret, but is believed to consist in welding the pattern in one kind of steel or iron upon a plate of a different kind. One, which reproduced faces, sold at Philadelphia for \$110.

Some cheap but very handsome inkstands and stationery cases are now made of oak. One style contains three receptacles for paper and envelopes, a ribbon date-indicator and two fine cut-glass inkstands; also, an ebonized pen-tray. The box has a slanting top of a peculiar and very pretty pattern. Another style consists of a foolscap case with wing openings and good lock, the stationery

range containing eight receptacles. These goods are of English manufacture.

Many artists as well as dealers who supply artists' materials will be glad to learn of the introduction of a new seat for artists. The back is so made that it can be used as an easel, thus forming a handy combination. The seat is very light and portable, but at the same time rigid and strong, and may be folded up when not in use.

A great variety of very pretty parlor ornaments are now made of what is called calvertine faience, an American production. This ware has a soft, warm, ivory tint, ornamented with rich bands of hand-made work, the oxalis, pansy, oak and other forms being used. The ornamentation is touched in color with light fawn, olive or gray, and relieved with gold, thus making a very novel but beautiful finish, suggestive of Royal Worcester, yet not an imitation of that renowned ware.

Among the new forms of fountain pens lately introduced in England is what is called the penograph. This consists of a simple fountain holder, made of vulcanized rubber and used with a gold pen of a peculiar pattern. It is simple in construction, and, in general, quite similar to many American pens of this character.

Another style of fountain pen of English make is called the "Swift" reservoir penholder. It has not only the advantage of being self-feeding, but is used with an ordinary nib.

Book-markers made in triangular form are quite pretty. The material is fine calfskin, and the marker has an ornamentation in the shape of a floral design in hand-painting.

Some very pretty articles for the ladies' boudoir consist of a scented satin "correspondence satchel" lined throughout with satin, ornamented with a picture and containing four pockets for the reception of letters. The satchel is for hanging up on the wall or dressing-case and is very ornamental.

One of the new devices in calendars is called a calendar engagement blotting-pad. It consists of a desk-blotter, with a pad-calendar attached to its upper portion. It is very nice both for office and library use.

The St. Paul *Pioneer Press* talks considerable about "White Bear." It says that a party of book and stationery men, from Philadelphia, New York and Cleveland, have been at the "Leip." Inasmuch as the journal mentioned has something to say about the clerk at the "Leip," it is to be inferred that it is somewhat of a hostelry.

The gentlemen who have been after "White Bear" or at it, included Messrs. Pike, James, May, Bennett, Munhall, McQuillan, Ayers, Horender, Welch, Merrill, Sparrow, Drake, Freeman, Ford, Parker, McArthur,

and others. They are said to have been out for pleasure, and to have got it. Well, ordinarily, a white bear is likely to make it lively for people who visit him.

The Tuscarora (Nev.) *Times-Review* says that a most remarkable tree or shrub grows in a small gulch near some springs about twelve miles north of Tuscarora, is about six or seven feet in height, with a trunk which, at its base, is three times the size of a man's wrist. It has innumerable branches and twigs, and resembles somewhat the barberry tree.

The foliage of the tree at certain seasons of the year is so luminous that it can be plainly distinguished in the darkest night for a distance of more than a mile, while in its immediate vicinity it emits sufficient light to enable a person to read the finest print. Its foliage is extremely rank, and its leaves resemble somewhat, in size, shape and color, those of the aromatic bay-tree of California. The luminous property is evidently parasitic, and consists of a sort of gummy substance, which, upon being transferred by rubbing to a person's hand, imparts to it the same apparently phosphorescent light, while that on the leaf entirely disappears. The Indians regard it with superstition, and will not approach it even in the daytime if they can possibly avoid it. They have a name for it which, literally interpreted, signifies "witch tree." An old Shoshone said that there were but two others in the entire country.

Now, why wouldn't this make a good Christmas tree? Some of our enterprising men ought to investigate this.

Answers to Correspondents.

G. S. H. & Co. want addresses of manufacturers of advertising calendars.

Ans.—Hatch Lithographing Company, 34 Vesey street; Endicott & Co., 57 Beekman street; Brett Lithographing Company, 116 Fulton street; J. G. Hyde, 12 Frankfort street; Major & Knapp, 56 Park Place; Maverick & Wiesinger, 176 Fulton street; Stahl Jaeger, 136 Mulberry street; Runkle & Co., 102 Reade street; Ballin & Lieblin, 76 Park place; M. J. Anderson, 117 Fulton street; Chas. M. Cornwell, 247 Pearl street. All in New York. R. W. B. wants to know who makes building paper—*i. e.*, "paper to build houses of."

Ans.—Building paper is intended for sheathing or roofing houses underneath the clapping, flooring, &c. Manufacturers of this kind of paper are numerous and we advise you to consult Lockwood's directory, if this is what you seek. But if you want something which will take the place of wood entirely we must refer you to the Hamilton Patent Straw Lumber Company, Lawrence, Kan. (New York office Temple Court, Beckman street), which makes a material that can be sawed, planed, &c., like ordinary lumber.

M. W. W. & Co. ask for address of manufacturer of the Andrews blackboard.

Ans. We are not certain, but think that it is A. H. Andrews & Co., Chicago.

O'N. M. Company asks: 1. Who makes papier-maché

in forms similar to tablets, mirror backs, toilet goods and other stamped and embossed work? 2. Who makes cheap hard-rubber or vulcanite of similar forms?

Ans. 1. We don't know of anybody in this country. We believe that such goods are all imported. The celluloid and xylonite goods are the nearest to papier-maché, as they are made from paper under special treatment. 2. Parker, Stearns & Co., 87 Centre street, New York; Hodgman & Co., 459 Broadway, New York; Rice & Brothers, 474 Broadway, New York; Butler Hard-Rubber Company, 33 Mercer street, New York; Eastern Rubber Company, 29 Milk street, Boston; Goodyear Rubber Company, 362 Broadway, New York; Goodyear's Rubber Manufacturing Company, 205 Broadway, New York.

H. H. wants address of party controlling magnetic pen.

Ans.—E. A. Kingsland, 66 John street, New York.

The correspondent who made inquiry for manufacturers of needles in THE STATIONER of September 11, is informed that the address of R. J. Roberts is 95 West Broadway, New York, and not 65.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, September 17, 1884. }

THE MONEY MARKET.—The money market continues to rule easy, loanable funds are in abundant supply, and rates of interest are still low. Commercial paper quiet at 5@6 per cent. discount, with no difficulty experienced in placing good names. The movement of currency to the interior is slow, and thus far unimportant. The stock market has again presented but few features of interest. There is an unsettled feeling, because no one seems able to determine which way the current will run when a change takes place. The tendency of values has been toward a lower level, but the volume of trading has been comparatively moderate. Railway bonds are irregular and quiet. Governments easier. Sterling exchange is a shade easier, the posted rates having been reduced to \$4.83@4.85. The easier tendency is the result of less demand from importers and a better supply of commercial bills. Continental rates are firmer.

THE PAPER MARKET.—The moderate impetus noted last week in the number of orders received by the mills for papers to be made up has not shown any improvement. There is a general reluctance on the part of manufacturers, in view of the present condition of the rag market, with the probability of having to pay higher prices for stock to take orders for future delivery, and the expression "prices subject to quotation" is heard almost everywhere. While no general advance in fine papers has been established, in exceptional cases higher prices have been obtained, and the feeling is one of daily increasing firmness. Straw wrappings have been advanced a little, and prices are better sustained.

THE STATIONERY MARKET.—There is not that picking up in trade which, it was anticipated, cooler weather would bring about; but there seems to be a fair amount of business doing, and the market is steady. Business is unquestionably better than a few weeks ago, and, as in brisk times, there is a good demand for novelties of every description. The trade in scrap albums is about over with. Notwithstanding the dull season, there has been a large amount of these goods sold, and most dealers are very well pleased with results. Fancy inkstands, and similar novelties in stationery, are remarkably cheap this season. There was an immense quantity of them sold last year, and the market has been somewhat overstocked, resulting in cutting prices. The envelope trade remains about the same; prices are unchanged, but the tendency is to advance. It is quite possible that a healthy reaction may take place after election, which is thought by dealers to unfavorably affect the market.

Obituary.

ISAIAH WOLFERSBERGER.

Isaiah Wolfersberger, editor of the *American Progress*, died at his residence in Ellicott City, Md., on September 12, in the fifty-fourth year of his age. Mr. Wolfersberger was a native of Washington County, Md. He founded the Boonsboro' *Odd-Fellow*, and remained editor of that paper for several years. In 1858 he moved to Mechanicstown, Frederick County, and published the *Family Visitor* until 1863, when he went to Ellicott City and started the *Howard County Record*. In 1869 he sold that paper to John R. Brown, Jr., who continued its publication under the name of the *Ellicott City Times*. In 1871 Mr. Wolfersberger purchased the fixtures of the *Common Sense*, which had been in operation a few years, and started the *American Progress*, which he continued to publish until the time of his death. He always took an active part in county politics, and was for several years chairman of the Republican County Executive Committee. He at one time held a position in the Baltimore custom-house under Appraiser Anderson. Mr. Wolfersberger was highly respected in Ellicott City, both for his sterling qualities and for the great interest he always took toward the advancement of the welfare of the town.

JAMES F. SMITH.

James F. Smith, late with George Routledge & Sons, died August 30, aged thirty-eight years. Mr. Smith was born in this city, and as a boy entered the establishment of A. D. F. Randolph & Co., with whom he remained for a period of twenty odd years, and by his perseverance, energy and unflinching toil, step by step, worked his way up to an important position, winning by his faithfulness and personal qualities the esteem and confidence of those with whom he was associated. In 1879 he entered the establishment of George Routledge & Sons, of this city, by whom he was employed until within a few weeks of his death.

He was one of the original charter members of the Booksellers and Stationers' Provident Association, serving for two terms on the Board of Trustees, and always taking an active interest in its welfare. He will be remembered by those with whom he was associated, both in business and friendly relations, for his many manly qualities, and for his unflinching devotion to the business in which he was engaged.—*Publishers' Weekly*.

ROBERT HOE.

Robert Hoe, of the firm of R. Hoe & Co., printing press manufacturers, died on Saturday, at his summer residence, in Tarrytown, on the Hudson. Mr. Hoe was born seventy years ago in New York city, and was the son of Robert Hoe, an Englishman, who came to the United States in 1803, from Hose, in Leicestershire, and founded the business house of R. Hoe & Co., well-known manufacturers of printing presses. When quite a young man Robert Hoe, with his brother Richard M.,

succeeded to the business established by his father, which has become the largest of its kind in the world. He was always a public-spirited, liberal-minded citizen, identifying himself with all that was for the best interests of his native city and his country. While an active member of a number of business corporations, he also gave much of his time and means to individual charities. It is doubtful whether one of the more than a thousand hands in the employ of his firm can recall a harsh or unkind word spoken by Mr. Robert Hoe. Mr. Hoe was of a quiet and retiring disposition, and, although taking much interest in political matters, never sought any prominent public position, although he served as a member of the Committee of Seventy, organized in 1871 to reform the city government. He was a member of the Fifth Avenue Presbyterian Church, and leaves a widow, one daughter and one son. Mr. Hoe lived in Tarrytown during the summer for the past sixteen years. For the last year or two he had not been very strong. Two weeks since he was attacked with malarial fever, and never rallied. Mr. Hoe was fond of art, and gathered a fine collection of paintings. He was ever ready to help on young artists, and was one of the early promoters of the National Academy of Design.

The funeral was held at Tarrytown on Tuesday. The Rev. Washington Choate, of the Presbyterian Church, at Irvington, assisted by the Rev. Dr. W. S. Leavitt, conducted the services. The pall-bearers were: Collector Robertson, James W. Halstead, Alexander McLean Agnew, D. Willis James, James Fraser, John T. Terry, William L. Skidmore, Stephen D. Tucker, Chief-Justice Noah Davis, and John Sloane. Daniel Huntington and Frederick E. Church, who had signified their intention to act as pall-bearers, were unable to be present. The rooms of the house were filled with other neighbors and friends from this city and elsewhere, among whom were Henry E. Pellew, General Di Cesnola, James Fraser, Mrs. David Dows, Mrs. Gibbons, Mr. Sheffield and Mr. Coffin. The body lay in the southern parlor, and the clergymen stood at the rear of the hall. Mr. Choate read selections of Scripture, and the hymns: "Thine Earthly Sabbath, Lord, I Love," and "Abide with Me," the favorites of Mr. Hoe, were sung by a quartet.

The Rev. Mr. Leavitt offered the closing prayer, and after the benediction the body was taken to Sleepy Hollow Cemetery.

After a long course of experimenting, the Kerner stylographic pen has been brought forward this season in a new and improved form, which it would seem leaves no room for further improvement. The Kerner pen has long been before the public, and as originally brought out gave satisfaction. One principal defect observable in stylographic pens has been overcome, namely the air pressure, and other equally serious defects have been the complications in the point section, such as springs, gravity, weights, adjustable yokes, &c., to which, if they did not corrode, the ink clogs and renders the pen inoperative.

Polychrome Printing Machine.

The object of this invention is to print in two or more colors at the same impression.

In addition to the general printing surface of the form, one or more movable printing surfaces are applied, in connection with mechanism for causing them to sink below the general surface while the latter is being inked, to rise above the general surface in order to be inked with ink of a different color from that

applied to the general surface, and finally to assume a level with the general surface during the printing or impressing of the paper. The movable portions of the printing surface are preferably stereotype or electrotypes plates, and they are mounted in recesses in the printing form in such manner as to be guided accurately in their up or down motion and firmly held to the proper level while the impression is being taken.

The invention is equally applicable to the flat forms used in reciprocating presses or to the cylindrical forms used in cylinder presses, whether the latter have a continuous rotative or an oscillatory movement.

Curious Facts About Words.

Marsh tells us that the number of English words not yet obsolete, but found in good authors, or in approved usage by correct speakers, including the nomenclature of science and the arts, does not probably fall short of one hundred. A large portion of these words, however, do not enter into the living speech, the common language of daily and hourly thought. Some celebrated English and American orators have been able, upon occasions, to summon at their command one-half of this vast array of words, although they habitually content themselves with a much less imposing display of verbal force. Few writers or speakers use as many as ten thousand words; ordinary persons of fair intelligence not above three or four thousand. If a scholar were to be required to name, without examination, the authors whose English vocabulary was the largest, he would probably specify the all-embracing Shakespeare and the all-knowing Milton; and yet, in all the works of the great dramatist there occur not more than fifteen thousand words, in the poems of Milton not above eight thousand. The Old Testament uses but 5,642 words. The whole number of Egyptian hieroglyphic symbols does not exceed eight hundred, and the entire Italian operative vocabulary is said to be scarcely more extensive.

L. Prang & Co. are showing a line of colored lithographs mounted on cardboard, suitable for framing or art studies. Two designs consist of oleander blossoms and yellow roses. They are mounted on cards of an oblong shape, and are very meritorious in an artistic point of view. J. F. Murphy has contributed to the selection four interesting landscapes, showing respectively a sunset in February and glimpses of nature in January, December and March. These pictures all show great fidelity in execution, and great praise is due the artist for representing nature so truthfully. Mrs. E. T. Fisher has a group of zinnias, marigolds, also chrysanthemums. They are exceedingly fine floral studies, and without a doubt excel any previous effort of this kind in lithography. L. Prang & Co. have also a new design of marriage certificate. It shows a floral design consisting of red and white roses and orange blossoms and a scroll containing the marriage record underneath. The certificate comes in two sizes.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 3\frac{3}{4}$ retail at 50 cents each.
" $6\frac{1}{4} \times 3\frac{3}{4}$ " \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order.

Samples forwarded on application, to be paid for if satisfactory.

A prevailing novelty in dinner cards this season consists of cards with bisque figures, such as childrens heads, animal heads, &c. Robert Sneider has these goods. Mr. Sneider has brought out some new designs in fancy cardboard for fine society printing. Samples will be furnished on application.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1832.

SCHOOL BOOKS!

I have a large stock of SECOND-HAND SCHOOL BOOKS, sound and serviceable, at 60 per cent. discount. Also School Books, more or less shelf-worn, at SPECIAL BARGAINS. Also, FRESH STOCK as low as other houses in this city. Orders from the trade respectfully solicited.

\$25 Lantern
For \$12.

No. 4
\$12 LANTERN
For \$6.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unsuppressed methods for

PATENTED.

P. O. BOX 2773.

LEARNING AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard, ART—Copies of famous Statues, Bus-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight & Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'fr's, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

Trade Items.

The Edgar Company, book and news exchange, 75 Fifth avenue, Pittsburg, Pa., asks publishers, manufacturers, toy and fancy-goods dealers to send it their latest price-lists and catalogues.

A new pencil-holder for the pocket is simple in construction and possesses the advantage of never "defacing the garment," and also of not "becoming detached by putting the pencil into it, withdrawing it, or while the pencil is in the holder, defects common to most pencil-holders."

The B. B. Hill Manufacturing Company, Philadelphia, Pa., has just issued a new catalogue. It contains seventy-one pages of engravings and descriptive matter of railroad ticket stamps, seal and letter-copying presses, numbering machines, blotter baths, and a full line of hand-stamp goods.

The fall catalogue of Selchow & Righter has appeared. Like the catalogues usually gotten up by this firm it shows a complete line of toys, embracing all of the latest novelties for the holidays, with prices, descriptive matter, &c. The firm is agent for the American Playing Card Company's productions, and samples will be sent on application.

The *American Liveryman and Horse-Owner*, a new weekly publication issued at Chicago, is designed to cover a new field of trade journalism, being devoted to the livery trade as well as the interests of horse-owners, as its name implies. The first number contains twenty-four pages of reading matter, and presents a neat and attractive appearance.

Eberhard Faber has a new line of propelling and repelling pencils with celluloid cases in assorted colors and nickel mountings. The pencils are put up on a dozen in a box, and the body of the box has an easel back, thus enabling it to be used to display the goods to the best advantage.

William H. H. Judson, New Orleans, La., is the publisher of a paper called *The Bulletin*, devoted to industrial matters. It is a four-page semi-weekly and a principal feature of it will be notes regarding the World's Exposition. The second issue contains much interesting information.

The National Publishing Company, Philadelphia, has a very large demand for its quarto Bibles, and has been pushing its manufacturing facilities to their utmost. It has added for the present season many new styles in elegant bindings. It will be an object for the trade to place orders as early in season as possible to insure prompt attention.

Iverson, Blakeman, Taylor & Co. have issued what is called "The Old Style Calendar for this Present Year of Grace, 1885." It is printed with old style type on imitation old paper, with rough edges, and besides a monthly calendar contains astronomical calculations, changes in the moon and a great variety of curious selections of reading matter from old authors; also several interesting advertising pages, with elaborate margins of engraved and line work. It is worthy of study. It

bears the imprint of "Master George Falkner and his Sons, of Manchester, England."

The New York News Company is showing several new things this week. One is a pencil case in the form of a parasol. It will delight little girls. The case also comes for boys' use in the form of a huge marking pencil. These are novelties that will take. There is also a carrying string for school use, a case with ten fancy slate pencils ornamented on the top with a set of drawing subjects. Another form of case comes with a pencil pointer. The company has also a full line of gummed figures and letters.

The latest novelty in fine writing papers is that recently introduced by George B. Hurd & Co. It is called "linen cloth" paper, its name being derived from its close imitation of linen. It comes in four shades—white, cream, azure and rose, and is very neat in appearance. It will undoubtedly have a wide popularity. Samples will be furnished on application.

The Berlin & Jones Company has been extensively enlarging its premises by uniting 134 William street with the buildings in the rear of that number occupied as its factory. The firm now occupies 134 and 136 William street and two large buildings in the rear, giving it some 50,000 square feet of space. There has also been an entire rearrangement in the salesroom, bookkeepers' and cashiers' departments, the firm's offices, &c., besides a general renovation of the place.

Emma D. E. N. Southworth, the author of "Self-Raised; or, From the Depths," published by T. B. Peterson & Brothers, Philadelphia, considers it to be the best work she has ever written. It is a moral story, and one which addresses itself as giving an example of perseverance under difficulties and ultimate success. It is published in a large duodecimo volume of 658 pages, with a view of Prospect Cottage and its surroundings, the home of Mrs. Southworth, on the Potomac.

Jean Robie is unquestionably one of the foremost living flower painters. His pictures excel in their fidelity to nature, the warmth and richness of their coloring, and his subtle rendering of the spirit of the flower. His roses are unrivaled. Like every artist of genius, Robie has been very unwilling to permit the publication of copies of his most cherished works. It is a matter for just congratulation to Americans that he has, at last, accorded this privilege to one of the most famous art publishers. Louis Prang has undertaken to reproduce one of the artist's masterpieces as a satin print. The picture selected is of medium size and includes roses of various kinds, intermixed with spiraea, and arranged in a deep blue vase, which contrasts charmingly with a crystal bowl in the foreground, which reflects as it seems, every ray of light. The copy is said to be absolutely faithful to the original, and the most ambitious publication of the kind ever attempted.

Cassell's Family Magazine for October is a storehouse of amusement and interesting information. Mr. Harwood's serial, "Within the Clasp," a story of the Yorkshire jet hunters, has reached its fortieth chapter,

and gives an exciting situation; and the story of "John Ford" is continued. "A Word about Disinfectants" is apropos of recent cholera scares, and well worth reading and acting upon, on the principle than an "ounce of prevention is worth a pound of cure." The short stories of this number are "Discovered in Time," by the author of "Sylvia," and "La Filomela," by the author of "Mr. Kewthorpe's Accident." The poetry of the number is very pretty, and there is a graceful song set to music by E. Burritt. The Paris fashion letter is full of useful and practical hints on the (to the ladies) absorbing subject of dress; and "The Gatherer" is, as usual, filled with descriptions and illustrations of the most interesting inventions of the day. Altogether, *Cassell's Family Magazine* is so crowded with good things that one marvels that it can be sold so cheaply.

Langfeld, Turner & Andrews have recently introduced some new things in ladies' hand-bags with double frames and the wire-supporting gusset. They come in two sizes—eight and nine inches. The bags also come with a block bottom, giving them greater durability. The firm has also a line of ladies' hand-bags made up in a variety of fancy leathers with a coin purse attachment. The purse is attached to the inside of the bag, and coins may be put in from the outside when the bag is closed. This is an excellent safeguard against thieves, and will certainly be appreciated by every lady.

William Morris's Home.

Not far from Hammersmith Bridge, facing one of the few unencumbered bits of foreshore, dwells Mr. William Morris, in a house which looks as though it might have been enticing in some early day before its face was ruined and disfigured. Despite its air of tumble-down, Kelmscott House is a home of culture. From its doors issue poems, pictures, and new designs in wall-coverings, varied by occasional expressions of emotional socialism. Not many yards from the abode of all this sweetness and light is a miserable purlieu where ragged urchins play upon an unsavory pavement. This alley really forms part of the mall, and it abuts upon a slimy creek, where at high water a barge will occasionally put in. A wooden bridge covers this little creek, and it is shut in by dank green walls built down into the mud and ooze. The scene upon a bright day, when the water is up and the sun intensifies the gaudy greens and yellows of the barges lying under the bridge, is extremely picturesque. But if you stand upon that bridge at midnight in a gusty rain when the moon is waning or is hidden behind a bank of clouds, your sensations will be somewhat eerie. The river swirls sullenly past the entrance to the creek, the rain patters dismally upon the water, and one recalls with a shiver gruesome stories of mediæval tragedies upon Venetian lagoons. Collapsible bridges and dungeons which lead to the water's edge are bad things to muse over at bedtime; but one thinks of them involuntarily when seeking for river-side romances at midnight.—*The Magazine of Art.*

A Country Printer and a Poet.

"Talking of minor poets, I once had a singular patron in that department," he said. "The would-be wooer of the muse and of a charming young lady as well—was a farmer's man."

"A second Bloomfield, perhaps."

"Hardly. He was very illiterate—could only just manage to read and to write; and was past the age, I should imagine, at which much improvement was probable. But he was a sufficiently eccentric individual, if not a genius. He called at my printing-office first one Saturday evening, rather late. 'You be a printer, I reckon,' he said. I replied that I had that honor. He fumbled for some seconds in the depths of a capacious grocery basket, and ultimately produced a blurred and blotted sheet of paper, which, on examination, proved to contain some half dozen verses of the veriest doggerel 't was ever my lot to read, and evidently the compilation of a love-sick swain. 'What'll it cost to get this po'try printed?' he asked. 'That depends on how many copies you require!' I said 'Copies,' he repeated; 'I only want one, o' course.' Accordingly I gave him my terms; and he accepted them, and left the dingy manuscript. The next Saturday evening he called, received his precious production in all the glory of type, paid for it, and departed. A week later he returned with a second order. 'But'—and he shook his head at me with a deprecating gesture—"you'll not alter t'words this time; I wants it done 'zactly as I brings it." I am afraid it was hardly remorse so much as a sudden and overwhelming sense of the comedy of the situation that made me bite my lips and remain momentarily silent. I had taken the unwarrantable liberty of revising the 'poet's' spelling and grammar, so as to bring them into, at any rate, an approximate agreement with modern usage. I bowed, and without expostulation promised for the future implicit obedience. And again a tattered MS. was committed to my care. But for the printed slip of this the writer did not soon appear. Only after a three weeks' interval he once more invaded my office. From his dejected air it was evident something had gone amiss, and from the nature of the rhymes I had 'set up' at his command—addresses 'To my dear Luv,' &c.—it was easy to guess what the trouble was. And bit by bit—without the least shamefacedness—he told me his story. He was madly enamoured of his master's daughter, and fancied that in her frank, girlish smiles as they occasionally met on the farm precincts he read reciprocated affection. To her he sent his pathetic missive, with the result of parental contumely and dismissal. 'Ah, sir!' he sighed, 'maybe if you'd a' done that as I scribbled it, 'twould ha' touched her heart better.'"—*Cassell's Family Magazine for October.*

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated.

Caveats filed, Reissues and Design Patents secured, Trade-marks and Labels protected by registry at the U. S. Patent Office and in Canada and Europe, Rejected Cases investigated and reported upon, Interferences conducted, Opinions on Questions of Infringement, the Validity of Patents, &c., &c.

PERSONAL attention throughout is given to each and every case—a matter of no inconsiderable importance to those who wish STRONG CLAIMS and specifications CAREFULLY DRAWN. Business may be transacted either in person or by mail, and in every detail is kept inviolably SECRET and CONFIDENTIAL.

JAMES A. WHITNEY, 140 Nassau St., N. Y. City.

J. H. Bufford's Sons' Christmas Cards.

The line of satin art prints brought out by J. H. Bufford's Sons for the holiday trade this season certainly deserves great praise. While the number of designs is confined to a few, it is yet sufficiently large to give a reasonable variety. There is also (and perhaps for this very reason) an absence of carelessness in execution and general make-up so often apparent in the production of some houses which pay more attention to variety and number than to pure merit.

It is needless to say that all of the productions of this house are made of the best material and by the most skilled hands. Each and every card of its line has special features worthy of mention.

Among the first to attract attention is a hanging card of an oblong shape—a sort of satchel of pink satin with a white satin centre-piece containing a floral design and a Christmas greeting. This card is trimmed with silk fringe and is withal a very elegant piece.

A square card of blue plush has a hand-painted floral decoration and is trimmed with fringe of the same color, forming a modest yet rich and attractive design of Christmas offering that would please anyone of refined tastes.

A square card of blue satin, handsomely trimmed and bordered, has a pretty card-receiver in the centre, and is decidedly pretty, to say the least.

A card showing a rare combination of skill and taste is made of blue plush with a centre-piece of satin of the same shade, decorated with a hand-painting and surrounded with puffed satin, the whole set off with plush corners.

Another attractive design in square cards is made of plush and has in its centre a plush basket, forming a very novel and pretty card-receiver. This card, like those previously noticed, is elegantly fringed and bordered.

The firm has adopted an excellent idea in making up its line with a number of leading designs of one color. In pieces of this character, of course, the taste shown in the construction is the chief merit. A card of a deep crimson shade has a centre of plush surrounded with puffed satin, and an outer bordering of plush and fringe. The central piece contains a hand painting, and on the upper right hand corner of the margin of plush there is a hand painted spray of flowers. The card is altogether too rich and elaborate to enable one to do justice to it in a brief description.

Last but not least comes the satin dove card. This has been so frequently described and is so well known to the trade that a mere mention will suffice to let the trade know it is to be among the attractions for the coming season. Its popularity certainly will outlast another season. It is a card which pleases a great variety of tastes.

The firm has also a large variety of cheap cards which have been gotten up with as much care in every detail as its general line of satin goods.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, September 22, 1884.

There is no disguising the fact that all retail business in this city for the past two or three months has been depressingly quiet. At no time within the past twenty years have I seen the retail trade so quiet as within this period, and I fear that it will not be bettered for some little time. The general cry is: "Wait till after the November election." There may be something in such a belief, and I truly hope there is.

The iron and glass manufacturers have not been doing as large a business as usual, but have been fairly busy. While we may say that our principal iron, steel and glass trade is quiet, it can also be truthfully said that it might be worse, for in times past it has been. If Congress will only let the tariff question alone, Pittsburg is bound to be prosperous. You have possibly heard the assertion that all babies born in this locality come into the world, crying, "Tariff." Strictly speaking, I guess that it is not a fact, but they soon learn to know the vital importance of the word.

Our natural gas wells have become a more important factor than ever. Several good ones have been struck since my last letter, and each one is worth a fortune. One large iron mill paid over \$100,000 for coal last year. This year it gives \$90,000 for enough gas to take the place of coal, and then saves the expense of hauling out the ashes. One of the natural gas companies is clearing \$70,000 a month. The pipes are rapidly being laid along the streets, to carry low-pressure gas for the purpose of heating and lighting residences. In my opinion it will never prove a success for lighting purposes, for the reason that the blaze is too light in body and because the heat is too intense. Sufficient light in the summer months causes a room to become unbearably hot.

The old house of W. W. Edgar is now known as the Edgar Company, or Book and News Exchange. W. W. Edgar and W. O. Gilderfenny are the active members in the concern.

J. R. Welden & Co. are doing a nice school-

book trade, but they report the general retail trade very quiet. Their wholesale department, however, is full of orders, and all hands are kept busy.

H. Watts & Co. have a beautiful line of goods in stock. Their selection of small-sized pictures shows much taste, and makes a good advertisement to their artists' supply counters. Their business is quite active.

Henry Meyer has made more improvements in his store, and it now presents a better appearance than I ever saw it. Mr. Meyer embarked in the business just at the beginning of dull times in our city; but the enlargement of his store and stocks indicates a fair share of prosperity. He has a jewel in his clerk, "Joey."

Davis & Co. report increased business in the periodical line. "Harry" keeps an attractive window, and in my opinion that is a strictly first-class advertisement.

G. W. Reed & Co. say that trade is very dull with the exception of the school-book business, which has been exceedingly good. Mr. Reed thinks that matters will not improve very greatly till cooler weather. I concur with him in that view.

Frank Bacon, on Smithfield street, does a general news, book and stationery business. He also deals in second-hand books of value. He often picks up good books as well as good bargains.

S. A. Clarke & Co. have two men on the road, and a good many orders are sent in by them. Mr. Clarke says that their general retail business is dull, but they have been busy in the school-book trade.

The following well-known traveling gentlemen were in the city lately: Mr. Cutler, of Ward & Gay; Mr. Mendenhall, of George C. Whitney, Worcester; Charles Graves, of J. D. Whitmore & Co.; Jos. Knight, of H. B. Nims & Co.; H. C. Wright, of Philip Hake's, and Mr. Burlock, of the National Publishing Company.

The drummer "may be the most innocent man on the road, Rebecca," but if all are as decent and clean-cut as the representatives of our various book, stationery and publishing houses, the sentiment of Curtis is a true one.

Our public schools opened on the first Monday in September, and never were as crowded. New scholars, old books worn out, but espe-

cially the adoption of one or two new textbooks, have made the school-book trade a matter of considerable item this fall. Fair profits were realized, because cutting was not indulged in to a very great extent.

G. W. H.

CHICAGO CHATTER.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
113 East Madison Street,
CHICAGO, September 20, 1884.

Thirty years ago or more a journey across the prairies of Illinois and through Missouri was quite a serious undertaking—a long, weary, never-to-be-forgotten journey, necessitating many days of careful preparation, and fulfilling in the end the full anticipation of physical exhaustion. The stories of the past, as related by early settlers, are thrillingly interesting, and always prominent in the tale is the six-horse wagon that had come all the way from over the mountains and was en route for somewhere on the prairies of Illinois or the beautiful valley lands of Missouri.

Those wagons, with their gigantic teams and stalwart drivers, are things of the past.

The ubiquitous railroad has demolished them. Then a trip was for days; now a few hours only suffice for the journey. The Chicago and Alton Railroad, speeding as an arrow between Chicago and Kansas City, has done a large part in the wholesale destruction of the old road-wagon. The increasing heavy passenger traffic testifies to the good management and popularity of the road. The Chicago and Alton runs the finest palace reclining-chair cars in the world on all-through trains day and night, without any extra charge. Train porters have been placed on these cars to look out for the comfort of the passengers, and especially to render every service in their power to ladies and children and to aged and infirm passengers. The Chicago and Alton is the great excursion route between the north and south and to and from Kansas lands and Colorado, New Mexico and California health and pleasure resorts, and the mining districts of the great West.

A visit was paid to several of the book-binding establishments here yesterday, and I think it safe to say that the bookbinders of Chicago are ahead of any in the country in

point of size and capacity. An inspection of the various works of these establishments and the different processes gone through in completing a book is a very interesting study. Business in this line has not been as good as might have been expected during the last season, and the coming fall does not seem to hold forth many bright prospects, although to anyone visiting the binderies, notably among them those of Donahue & Hennebery, A. J. Cox & Co., and J. L. Regan, it would appear that the business was in the midst of a very prosperous boom; but while the fact remains that a large business is done daily by these houses, low prices, which in many cases are below the cost of production, have a very depressing effect.

During a stroll around the Exposition the other evening, your correspondent was attracted by a gathering of people in front of a very elaborately decorated part of the building—the exhibits of two of our leading novelty manufacturers, J. H. Bufford's Sons, and the Novelty Card and Advertising Company.

Handsome shape novelties, engravings, lithographs and photographs of the various candidates, and the excellent taste with which they are arranged, tend to give these exhibits the appearance of an art gallery. The Exposition is meeting with a deserved success, the attendance increasing daily, and wonder and astonishment at the sights seen are expressed at every turn.

The stationery business has settled down to a satisfactory basis, and, in fact, there is every evidence of a very prosperous season. Dealers in specialties have their hands full in attending to the orders that come in and are realizing satisfactory prices for their goods. An article which is meeting with a very large sale, and quite deservedly so, is the "Standard" self-inking stamp-pad. It requires absolutely no inking, is always ready for immediate use and will last a year and more. As implied by the name, the pad is self-inking. Each pad-box contains a quantity of congealed ink, equal to twenty bottles of ordinary stamp ink. The cloth covering the composition is kept constantly and evenly moist by gradually absorbing the ink contained in the composition. The pad is manufactured by F. E. Wallace & Co., Chicago, and samples will be mailed on request.

The names of the officers of the John Morris Company, recently organized here, are as follows: John Morris, president; Geo. N. Culver, vice-president, and L. D. Burrill, secretary. The directors are John Morris, C. R. Cummings, W. C. D. Grannis, Chas. E. Culver, and Geo. N. Culver. The eleven stockholders are John Morris, A. F. Seeberger, C. J. Connell, W. O. Hepwell, W. C. D. Grannis, C. R. Cummings, Geo. N. Culver, Chas. E. Culver, Hiram Hurlburt, C. N. Hurlburt, and Frank J. Smith.

John Morris, the president of the company, is a lawyer, who became the purchaser of the business of Culver, Page, Hoyne & Co., and at the time was supposed to be in the interest of the Union National Bank. A. F. Seeberger, C. J. Connell, W. O. Hepwell, W. C. D. Grannis and C. R. Cummings are either

officers or stockholders in the Union National Bank. Geo. N. Culver and C. E. Culver are brothers of Mr. Culver, of Culver, Page, Hoyne & Co. Hiram Hurlburt is the brother-in-law, and C. N. Hurlburt is the nephew of the same Mr. Culver. F. J. Smith is the lawyer who accompanied Mr. Culver to New York to effect the compromise with the creditors of his firm.

The firm of E. P. Donnel & Co. has served notice on George H. Sanborn's Sons, of New York city, to stop the manufacture of the patent gauge for table shears, for which E. P. Donnel claims to hold letters patent, dated September 26, 1882.

Politics are rife here at present. Ex-Governor J. P. St. John, Prohibition candidate for President, addressed 2,500 people at the Central Music Hall on Thursday night. The hall was filled to its utmost capacity, and an overflowing meeting was held at Dr. Hatfield's (First Methodist) Church, where Mr. St. John spoke later in the evening. Fully one-fourth of the audience at the Music Hall was ladies, and in point of appearance it can very favorably compare with any similar meeting that has ever been held here. Noz.

BOSTON BORT.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 DEVONSHIRE ST., BOSTON, SEPT. 23, 1884.

For some time past "Old Probs" has been experimenting with the weather and with varying success. At times he would get it too hot and then too cold, but he seems at last to have struck the proper thing, and in consequence we are enjoying a delightful "spell of weather."

It is too pleasant to remain indoors and outside attractions are sought for. What seem to be the most popular resorts just now are the two great industrial exhibitions of this city, and these are being quite largely attended by city folks. During the week the several railroads will inaugurate their customary excursions to the fairs, and then the thousands of people residing within a radius of a hundred miles will take advantage of the half-rate tickets and spend a day or two in examining the wonders of mechanism, science and art as they are displayed at these exhibitions.

These annual exhibitions are really great instructors, presenting as they do so many new inventions and novelties; and, because one finds here displayed so many processes in operation which show the manufacture of different lines of wares.

For the benefit of working-men the managers of the New England Institute fair have set Monday evening as "working-men's day" when the price of admission is 25 cents instead of "half-a-dollar," the fee charged capitalists, money lenders, bondholders and dudes.

This liberal action of the "fair managers" is heartily appreciated by the thousands of industrial workers, and they take advantage of the weekly occasions to visit the "Institute Fair" in great numbers.

This being a political year when everybody

is a working-man or else a working-man's friend, I joined the crowd of toilers last night and slipped in by the doorkeeper for a "quarter."

But somehow I didn't feel safe. I don't seem to possess that quiet, dignified air of a bloated bondholder, nor would one judge me to be a capitalist; I was never known to lend money, but do borrow when I can, and so I began to feel that the doorkeeper might discover his mistake in letting me in for a quarter. Thinking that he might take me for a dude, I got out my note-book and began to look about for something that might interest the readers of THE STATIONER.

The first exhibit which attracted my attention was that of the Useful Novelty Company. There was displayed several useful novelties, among which was an article called a "Combined Paper Weight and Postal Scale."

It is a very ingenious little article, one of those devices to which "multum in parvo" truly applies. The name of the device hardly expresses its usefulness or value, nor does it give a comprehensive idea of its uses.

Imagine a little box about 5 inches long, 3 inches wide, and 2 inches high, made of lava, vulcanite, or other such material as possesses weight, and ornamented with artistic figure designs, and you see a very pretty paper weight. In the top of the box is an opening, which shows a calendar, making a paper weight and calendar. Open the box, and on the inside of the cover is seen the rates of postage for domestic and foreign mail and for first, second, and third-class matter. Along one side of the box is arranged four small recesses, just large enough for stamps, each denomination being kept separately. Folded into the box is the scale itself, which is made of brass, handsomely gilded, and with fine steel bearing. It weighs delicately and correctly, and has no spring to get out of order. This little device, ornamental as well as useful, will certainly have a large sale. It is only to be seen to be appreciated, and the ready sale it enjoys at the fair shows what might be done with it in commercial circles if properly presented to the stationers of the country. Descriptive circulars, handsomely illustrated, giving a full and clear idea of the Combined Paper-Weight and Postal Scale, will be sent upon application to the Eastern office of THE AMERICAN STATIONER.

In the Women's department, I found one of the most attractive displays in the building. It is one which will interest the trade at this season, and such of our out-of-town dealers who will visit the city during the next six weeks for the purpose of stocking up with Christmas souvenirs in plush and satin novelties should take in the Institute fair, and examine the display of George C. Whitney, of Worcester, Mass. The exhibit is made in the Women's department, because every article exhibited is the handiwork of women, there being some seventy-five women employed by Mr. Whitney at his manufactory at Worcester. Although the products of this concern are varied, embracing lace valentines and Easter goods in their seasons, the display found here

(Continued on page 412.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (1) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

July 15, 1884.

Selling Agents for the AMERICAN CARD CO.'S PLAYING CARDS.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

GEORGE B. HURD & CO., FINE STATIONERY,

MANUFACTURERS OF AND DEALERS IN

79 BEEKMAN STREET, NEW YORK.

We carry a complete line of Z. Crane, Jr., & Bro.'s Unrivalled Papers, in both SUPERFINE and EXTRA-SUPERFINE Qualities. GRECIAN, ANTIQUE DISTAFF, PARCHMENT VELLUM, Etc. We use their Flat Papers in the manufacture of our LINE OF WEDDING GOODS, which embraces all the leading styles, and many new designs of embossing. We have a very handsome line of Papeteries, Card Cabinets, etc.

Also, many New Patterns in Fancy Writing Papers, as follows:

EMBOSSD HAMMERED (Large), in Azure, Drab, Shrimp and White.	BUCKRAM BOND, in White and Blue.
" (Small), in Café, Turquoise, Silver Gray, and Marguerite.	PERSIAN, in White and Cream.
" WATERED, in Shrimp, Turquoise, Azure and Opaline.	RAGGED EDGE Notes and Envelopes, in Cream and Silver Gray.
" PEBBLE, in Rose, Marguerite, Café and Turquoise.	" CARDS, for Visiting and Correspondence.
" MOROCCO, in Sea Shell, Drab, Opaline and Silver Gray.	BIRCH BARK, in Cream and White.
" PIQUET, in Cream and Silver Gray.	HAMMERED SILVER, in Cream and White.
" GROS GRAIN, in Cream and Silver Gray.	ALLIGATOR, in Russet.
" ALLIGATOR, in Café, Terra Cotta, Drab and Marguerite.	CELESTIAL, in Mazarin or Deep Blue.
	EGYPTIAN LINEN, Cream in all weights and sizes.

SPECIAL ATTENTION GIVEN TO THE MANUFACTURE OF FIRST-CLASS MOURNING GOODS.

Our line of BRISTOL BOARDS, both Pasted and Mill, are unsurpassed in quality, being made by Z. CRANE, Jr., & BRO., to match their paper. We manufacture from this stock VISITING CARDS, in Plain and Gilt Edge, Plain and Gilt Revel, and can furnish any special size desired.

Decorated Note Paper in Colors, Bronzes, Etc.

SANFORD'S Pneumatic Mucilage

(PATENT APPLIED FOR.)

The Most Practical Stand Ever Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

For Sale by Stationers and Jewelers in all principal cities. Trade List furnished on application.

(Continued from page 408.)

consists entirely of holiday novelties, and over a hundred different designs are shown.

From the representative in charge, I learn that the firm only started this line of goods about three years ago, adding it as an experiment to its other lines. Year by year the business of the house has steadily developed until now its Christmas novelties are as well known throughout the country as are its artistic valentines and Easter goods.

Satin and plush goods can be found most anywhere, but for originality of design, artistic embellishments and neat workmanship, the novelties displayed by George C. Whitney are unsurpassed. A banneret in a delicate shade of blue plush and white satin, trimmed in gold, having a hand-painted landscape and lettered in gilt, attracts no little attention from the many lady visitors who chance that way. In the display are cheap goods as well as the more costly. The low-priced goods are mostly of one or two colors, but very pretty withal. In the high-priced goods several colors of satin and plush are combined, and the combinations of colors are most pleasing to the eye, being artistically blended.

Another very unique card shown in this collection is in plush and satin and has a thermometer mounted thereon which adds utility to its beauty. All of the cards from this house have easel backs and are so mounted that the fringe on the lower side cannot be injured when placed upon a table or mantel. With such improvement in the card line, as this display shows is being made, the business has long years to run yet, and George C. Whitney, of Worcester, will certainly enjoy a good share of the trade.

The Thorwaldsen exhibit in the other gallery shows something in the card line that is very unique. The collection displayed is most interesting to cultivated visitors who are better able to appreciate such beautiful presentations of art. Thorwaldsen, as is known, was Denmark's famous sculptor, and his many productions are highly valued as being masterpieces of art. For the artist Grecian mythology has ever possessed a fascinating charm and a wide field for work, and most of Thorwaldsen's famous works depict scenes of that early age. The cards exhibited show photo reproductions of the sculptor's works and are very beautiful. The work of photography has been artistically done, making reproductions the equal of which is but seldom seen. The photos are neatly cut out and pasted upon heavy gilt-edge mounts which causes the subject treated to stand out in relief. In the display are some thirty different subjects all of them very handsome. Cards of this kind besides being art works are very instructive, because they "point a moral and adorn a tale" which if not known to the recipient causes him to look up its history and by so doing he acquires information which otherwise he might not possibly gather.

Take the story of "Amor and Psyche," a delightful love tale of Grecian days, and which is so prettily illustrated by the cards displayed. Does every love-sick swain know the troubles

of the too beautiful Psyche, and how Amor helped the poor girl out? These cards tell the story as they tell many others of equal interest. They have not yet been presented to the trade, as M. J. Reder & Co., of this city, have just received the agency for the United States for the Thorwaldsen reproduction.

In the upper front hall the Cross Pen Company has on exhibition samples of its many valuable novelties in the pen line. Through several styles of stylographic and automatic pens this company has become quite extensively known to the trade, but it takes advantage of the occasion to give its goods publicity among the people, and that helps the trade.

As "Jim Bludsoe" used to say when paper gave out: "To be continued in our next."

A. L. D.

WASHINGTON WAIFS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., September 23, 1834.

Of the weather it may be said, that the late departed August seems to have left a large portion of its unused caloric stock for impartial distribution during this first month of autumn. For the past four days the mercury has been climbing in the neighborhood of the nineties and the wayfaring man has had much cause to remark in vigorous language upon the freaks and fancies of this treacherous climate. Perhaps the short late hot spell has much to do with the paucity of things interesting whereon the correspondent might catch for the entertainment of the readers of the various journals throughout the country. In the great dearth of news in these parts the daily papers of the capital have been forced to work off on the ignorant public terrible stories closely affecting their temporal welfare, the most startling one being the statement that hogs dead of the cholera had been thrown into the upper Potomac and its tributaries by the thoughtless, wicked farmers of Virginia and Maryland, thereby poisoning the water which one hundred and eighty thousand inhabitants of Washington and its suburbs have to drink every day. This story, in well-worded head lines, staring paterfamilias in the face at his breakfast table, was the worst blow that the cause of temperance ever received in this community and was one calculated to drive even the peaceful Christian mother-in-law away from home out into highways and byways in search of the cool, foaming lager. Thanks to the timely investigation of the diligent microscopist this deadly pork rumor has been swept away and the adherents of the handsome St. John in these parts have been saved from the wily snares of the devil. The turbid waters of the pretty Potomac placed under the microscope revealed to the eye of the city chemist no poisonous microbes lurking in wait for the thirsty man's palate and stomach, but, on the other hand, it was found that the water just at this time was much purer and better than it has been for a long time past, and, more than this, the story was a slander on the noble men of the surrounding States, for no hogs could be found in the waters above the city. Now that this roorback has been disposed of, we daily

wait for something, and something certainly fresher than a dead hog to stampede the citizens of this much-abused capital.

Of trade it may be said that things are beginning to boom lively, and the outlook for a rushing fall and winter business is very promising. In my walks about the city, I encounter no man ready to growl the moment I show my face, because things are not going to suit him, but, rather, I find that all with whom I come in contact speak very hopefully and cheerfully of what they expect in the coming months. The sale of school-books has been unusually large in all of the places where I have visited, and the demand for stationery is quite brisk, as the people are returning from their summer jaunts. No one appears to dread the outcome of the approaching Presidential election, no matter which way it may turn, and they seem to think that business will pursue its lively way, be the Chief Magistrate Democrat or Republican. The theory of free trade or the beauties of a high protective tariff do not in the least worry the sober minds of the merchants of this city, for they realize that a Democratic administration and its big following must live here as well as the Republican patriots, and, this being the case, they will sell just the same and get the same prices.

Mr. Paret, recent partner in the firm of Paret & Whittington, has purchased the stock and interests of W. H. Dempsey, the well-known stationer, on the avenue, and yesterday, while paying Mr. Paret a visit at his new quarters, he showed me many evidences of his thorough preparation to meet the wants of his customers in the various improvements he is making in his new place. I believe that this will be the only house in the city handling exclusively stationery and the finer class of engravings and cards. Mr. Paret bespeaks a prosperous trade for the stationers during the coming season, and anticipates plenty of work in the engraving and stamping business, which class of work he has the best facilities for executing.

At Whitaker's, on the avenue, I found the clerks very busy with the school-book people, and was told by the always genial proprietor that he had been busy, or rather his clerks had been as busy as possible for the past ten days supplying the wants of the school children. Mr. Whitaker has just returned from a visit to the wilds of Pennsylvania, where he went to reduce some of his fast accumulating *avoids*; but he informs me that he has not been able to get rid of any noticeable quantity. He says that he looks for a cheering fall and winter to the retail dealers and jobbers.

Bt Brentano's I found the same evidences of liveliness in trade, and here I learned that the book sales were picking up very largely since the home influx of the wanderers by the sea and mountains.

The boys of the road are also coming in fast, and at times I was about to say thick, but I won't do it, and at times in twos and fours. Among those who have come under the observation of your correspondent were Henry J. Epping, of E. and J. B. Young & Co.; Mr. Hayden, of L. W. Fairchild; Mr. Fairfax, of the Plimpton Envelope Company, and repre-

sentatives from the firms of Dutton & Co. and Pott, Young & Co. BEN.

SPRINGFIELD SPILLS.

[FROM OUR REGULAR CORRESPONDENT.]

SPRINGFIELD, Mass., September 23, 1884.

The Englishmen and the bicycle tournament upon Hampden Park four days last week made a quiet business here in every department of trade, but will, no doubt, add to the treasury of the Wide Awake Bicycle Club. The defeat of "Our George Hendee" was a dampener, but the news comes to us to-day that Hendee has beaten Sellers at New Haven.

Trade generally, though not rushing, is, in fair weather, good, and in the lines into which the manufacture of paper enters is just now particularly good. The restrictions put upon the importation of rags, causing an advance, has compelled paper and envelope manufacturers to withdraw all former quotations. One advance upon envelopes has been made, and will, no doubt, be soon followed by another, and the Powers Paper Company, Morgan Envelope Company and Holyoke Envelope Company are driven with orders at the slight advance. The Kellogg envelope contract has been taken by the Plimpton-Morgan Company, and comments regarding it have virtually ceased. The National Papeterie Company has this time done itself proud in the finish, subjects and mounting of its large line of fine bronze art pieces. It has issued a catalogue and price-list of them, and at the prices will have many orders.

One large mill at Holyoke, just previous to the rise, purchased nearly a year's supply of a particular stock used by it, thereby making a large saving.

King's Handbook of Springfield, the publication, plates and copyright lately bought by James D. Gill, will contain over 400 pages. D.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, September 23, 1884.

With the cooler weather better times have come. Yes, better times; not what people call a boom, however—but better than the bad we have been complaining of and grumbling about, until everybody has grown tired of hearing everybody talk on this subject. The summer's rest is over, and the Presidential contest will soon be over. Summer and a presidential campaign have never been favorable to briskness in business, and, perhaps, they never should be. Perhaps, it would not be well for the world to have everything go on smoothly for ever. Just think how monotonous that would make life, and be content to stand a rest from being pushed by business once in four years at least.

The express companies report the smallest carrying trade that they have had within several years, but they also report that it is increasing with the continuance of cooler weather. Railroads are doing better in the movement of grain and livestock and they expect to do much better before they do much worse.

By the way, the readers of THE STATIONER

ought to be told that W. E. Dibble, a publisher who built a neat house on Fourth street, about three years ago, and sold it out at a profit of \$15,000, is now putting up a splendid business house on Walnut street with only a wide alley between it and the new splendid government building.

One of the best signs of the times is the increase of orders for mercantile stationery. Tests of this kind are always reliable in gauging the feeling of the mercantile world in reference to the immediate future of business. Orders of this sort are increasing in a quite encouraging manner.

John Holland has no rest from calls for his great staple product—his gold pens; nor, for that matter, is there any diminution of orders

for any line of goods that he turns out from his protean factory.

Trade in fancy stationery and in books is picking up. This, too, is a favorable indication that the dullness which has made so long a visit to trade is getting ready to depart.

Snider & Hoole are doing a fine trade in their Chicago house, which in a business point of view is their main house. The office, however, is at Cincinnati, but it would cause more regret than surprise if the office should pack up some fine day and make its permanent quarters in Chicago.

J. R. Mills & Co. have let the world know that they have a good thing for the business portion of mankind in their reversible envelope, and orders are flowing in for them from "everywhere." PRINCE WILLIAM.

L. L. BROWN PAPER COMPANY,

ADAMS, MASSACHUSETTS, U. S. A.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

Fixing Colors or Designs in Wood, Marble, &c.

This invention relates to means of causing or inducing the sinking or fixing of colors or substances adapted to produce colors into or on marble, wood, ivory, and other materials, into which colors or coloring material can be sunk, either when applied first on the surface in lines, shades, or washes, or in other suitable manner.

Colors or coloring material are applied to the object to be treated either by printing, painting, dipping, or in other suitable manner. That object is subjected, in the manner hereinafter described, to the action of heat and atmospheric air, to which sufficient moisture has been imparted; or, in place of atmospheric air so charged, other gases or vapors may be employed, as will be hereinafter explained. By this treatment with heat and an atmosphere highly charged with moisture or vapor, the color, marks, or other designs upon the object is caused to penetrate into or under the surface of the object, and into the solid to a greater or less extent, dependent in great measure upon the duration of the treatment and the conditions under which it is applied. Any surplus coloring matter which may be left on the surface of the object and not enter into the substance of the object, may, if desired, be removed by abrasion or otherwise, leaving the subjacent color or marking constituting the design indelibly fixed and unaltered in itself. So also may portions of the substance of the object be abraded without interfering with the design.

The objects to be treated (having already applied to them the colors or coloring-matters, designs or markings) are placed in a suitable chamber of copper or galvanized iron or other material adapted to the purpose, and of sufficiently strong construction, which chamber is accessible for placing, removing and replacing the objects through suitable tightly closing or fitting doors. This chamber is surrounded on all its sides and upper part by a cell or cells, formed by surrounding inclosing walls and roofs of similar material to that of the chamber they inclose, with space between each for air and heated vapor or other gas to maintain uniformity of heat in the operating-receptacle, and it has been found conducive to good results to form each surrounding case or layer of air-space of uniform dimensions. The outer wall of all is constructed strongly, and incased with wood or other suitable material, and to further aid the retention of heat the intervening space between the coating and the outermost chamber-wall is stuffed with suitable lagging, as hair-flock, or other matters possessing such like properties. The bottoms of the chambers surrounding the innermost or operating chamber or receptacle for the objects are all formed by a tray or plate, down to which the walls of

these cells or chambers reach and rest upon, or, it may be, nearly reach to it; but where these walls rest on this bottom plate openings through their lower parts are left, so that liquid which is contained in that plate or tray, while sealing off the vapor of one cell from the next cell, may communicate throughout those chamber-bottoms freely; but the bottom of the operating chamber is formed above the liquid-surface. This tray or plate and the liquid supported by it is heated by a water bath beneath it, and this water bath is in turn heated by means of gas-jets disposed beneath it at suitable distances apart, and in series or otherwise, controlled by a valve or valves, or regulators, which may be arranged to operate automatically upon a determined amount of heat being developed or temperature reached in the water bath or operating chamber. The wall which is outermost may be so continued down and over water bath and tray as to inclose them. By these means the heat is in turn imparted by the gas-burners to the water bath, thence to the tray of liquid; thence to the air-cells or surrounding chambers, and by them to the inner and operating chamber or receptacle, by which also great uniformity of heat is secured with great economy, owing to loss by radiation being prevented, thus affording facility for the maintenance of a constant given temperature for a period adapted to the end in view.

In some cases the walls of the air-cells are arranged with doors or openings capable of swinging on hinges, or otherwise leaving accessible the receptacle for the objects to be treated, and through these openings that receptacle can be withdrawn by running it out on rails upon wheels attached to the lower or other part of such receptacle, the portions of the rails between the inner and outermost cell-walls being removable at will; or this chamber may be a fixture, and in either case it is accessible for charging and discharging by suitable tightly-closing doors. One great advantage attendant on the use of a removable receptacle is the facility for opening it away from the air-chambers, and without the danger of the moisture of the air therein condensing upon and injuring the designs or colors. The receptacle being charged, closed, replaced within the heat or air cells, and those cell-doors also closed tightly, communication to such receptacle is made by means of a suitable metal or other pipe regulated by a stop-cock or regulator of supply with another chamber or vessel, which may be made of copper or other suitable material, and of size adapted to the circumstances, but conveniently and generally formed long, narrow and of moderate depth, inclosed perfectly on all sides, and provided with another pipe entering at the other or reverse end to the pipe connected to the operating receptacle, or so arranged as to give the proper traverse of the air or other fluid through the saturator for effecting the desired saturation thereof with the contained liquid. In this vessel or saturator at short intervals are disposed a series of porous diaphragms or surfaces of cotton cloth or other porous absorbent material adapted to facilitate saturation of the atmosphere or fluid passing

therethrough with the liquid supplied to such vessel and distributed by those surfaces. Proper distension of those surfaces is maintained by their being secured around the sides of the vessels and by dipping into the liquid to insure not only their being moistened by capillary attraction, but also that the passing air or fluid shall be saturated to the desired extent with such liquid as is driven into the vessel by one pipe or pipes, and passes out to the receptacle by the other or others. The amount of such moisture imparted to that air or fluid will, however, be mainly governed by and increase in ratio with the increase of temperature imparted to the saturating-box and its contents.

The air supplied for passage through the saturator to the operating-receptacle may be obtained from a suitable storage reservoir, gasometer, or other containing means, or be forced in by pump, bellows, or otherwise, as may be most convenient, with provision for adequate regulation by devices adapted to the purpose and well understood, and such air or other gaseous fluid is generally heated before being passed into the saturator. The receptacle being *in situ* and heated, as already described, the action takes place on the contained objects as follows: Upon the heated air in such receptacle reaching the desired temperature—say 140° Fahrenheit—the cock giving communication by means of the pipe to the saturator is opened, and the saturated air or fluid flows in under pressure from such separator, and at a temperature somewhat in excess of the receptacle and its contents, in consequence of the saturator-vessel being heated accordingly. The desired pressure of air or other gaseous fluid supplied should be maintained uniform.

It will be found in practice that the amount of moisture absorbed by the air or fluid forced through the saturator will be dependent on the temperature, the velocity of flow, and other conditions more or less conducive to the desired saturation. The pipe or pipes for the supply of the saturated air to the receptacle are provided with suitable orifices or other means of distribution either by subdivision or otherwise, and this saturated air, on entering the receptacle being released from pressure, expands, and consequent lowering of the temperature ensues, causing the temperature therein to assume the conditions favorable to action upon the colors of the designs or upon the coloring matter to form such design or markings, causing their penetration or sinking into the solid of the objects in a remarkable manner. Experience easily determines the particular conditions of pressure, degree of temperature, and length of time for exposure desirable for the different substances treated. The surplus expanded air or other fluid resulting in the chamber or receptacle passes out by a pipe or channel provided with a valve or regulator adapted to control its scope.

Colors which give good results in the production of designs in marble are obtained by heating coal tar with one of the known volatile solvents—such as benzole—to separate the insoluble matter, and then evaporating the solvent more or less, according to circumstances of shade required, or the basic salts of iron produced by partial precipitation with carbonates or oxides of the alkaline metals.

For producing designs in ivory, ordinary aniline colors give good results. When simply coloring marble, sulphate of iron is a useful coloring material.

This process and apparatus are patented.

THE BEST THING YET!

WILSON'S READY-GUMMED LETTERS.

THESE are cut in exact shape of letters, as shown. Their color is Bright Red, with black shading. Can be readily and firmly affixed to any smooth surface.

With these you can make your own Show Cards, Window Signs, Stair Cards, Bulletin Boards, Display Cards; Label your own Boxes, Shelves, Drawers, Letter Files, &c. Having just what you want and when you want it, at one tenth the expense of printed or painted work. Put up in "fonts" of over 250 letters, in neat boxes.

Ten-Line Size, ...	per font, \$0.75
Five-Line Size, ...	.50
100 of any Single Letter, Ten-Line Size, ...	.25
1 Cartoon (2,900 pieces), Ten-Line Size, ...	6.50
100 of any Single Letter, Five-Line Size, ...	.15
1 Cartoon (2,900 pieces), Five-Line Size, ...	4.00

A Cartoon contains 28 small boxes, being 100 of each Letter; and 100 each, &c., commas and periods. In connection with the Letters use Wilson's Ready-Gummed Figures, Gold Headings, Fancy Shaped Cards and Card-Pins. With these you can make your own price cards, window tickets, &c., much cheaper and far more attractive than the old painted cards. We carry in stock assorted boxes containing 10 of each figure, and 10 of each dollar, cent and decimal marks, making 130 in all, at the following prices:

10-Line Figure, red, white or black, 40c. per box.	Five-Line.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Mullane & Andrews, publishers, Neola, Ia., have sold out.

E. A. Norris, printer, Fitchburg, Mass., has sold out to A. G. Norse.

Atwood & Sherburne, stationers and printers, Boston, Mass., have failed.

Marcus Ward & Co., Limited, report a good trade in their line of linen papers.

Horace North, bookseller, &c., Augusta, Me., has sold out to S. J. Milliken.

E. L. Meyer, bookseller, &c., Hutchinson, Kan., has sold out to G. W. Hodges.

C. E. Snyder, wall-paper dealer, Detroit, Mich., has been burned out. Not insured.

Swinburne, Adams & Co., printers, Minneapolis, Minn., have dissolved partnership.

Charles E. Ramsey, stationer, &c., Kalkaska, Mich., has been succeeded by Charles E. White.

J. & J. Durel, stationers, bookbinders, &c., New Orleans, La., have dissolved partnership. James Durel succeeds to the business.

The Stylographic Pen Company, Providence, R. I., is about to issue a circular to the trade, which, it is expected, will be of interest.

Fred. J. Collins & Co., dealers in strawboard, Boston, Mass., have dissolved partnership. Frederick J. Collins continues the business alone under the same style.

H. M. Richardson has succeeded the firm of Richardson & McKee, manufacturers of children's carriages, Boston, Mass., under the style of H. M. Richardson & Co.

Phelps & Bryant, booksellers and stationers, St. Joseph, Mo., have dissolved partnership. E. E. Phelps will continue the business, assuming the liabilities and signing in liquidation. J. E. Bryant will remain with the house until January 1.

Berwald & Frisius, booksellers and stationers, Davenport, Ia., have dissolved partnership. John Berwald continues, and assumes the liabilities of the late firm, and collecting all accounts due.

A meeting of the creditors of the T. S. White Stationery Company, St. Paul, Minn., which failed in the spring of last year, was held in the rooms of the Stationers' Board of Trade on Saturday, September 20. The T. S. White Stationery Company was started in 1881. It subsequently got into financial straits and asked an extension from its creditors. The company's showing was so good that an extension was not only readily granted but in addition thereto some of the heaviest creditors were so confident of the soundness of the company that they took a certain amount of its stock. After the extension the company still failed to do a profitable business. It became embarrassed again and a Mr. Ward, of the firm of Ward, Hill & McClellan, of St. Paul, which was interested in the failure, came to New York and a meeting of the creditors was held. It resulted in a tripartite agreement between the creditors, the T. S. White Stationery Company and Ward, Hill & McClellan. The latter agreed to start a stock company with a capital of \$30,000, and proposed to take \$20,000 in stock and office fixtures of the T. S. White Stationery Company at the market value of the goods and pay for them in \$20,000 worth of stock, and also to sell the remainder of the stock of the old concern or such portion of it as they could on commission, the time for the disposing of the stock and closing up the transactions of the defunct company being limited to October 1 of this year. The assets of the T. S. White Stationery Company were valued at something like \$100,000, and the liabilities about the same amount, so it was believed that the company would pay dollar for dollar of its indebtedness. Lately, Ward, Hill & McClellan complained that there had been considerable shrinkage in the value of the assets, and from their showing the creditors could not realize over seventy-five cents on the dollar, of which twenty-six cents have been paid. It being near the time for the closing out of the company's accounts, it was deemed advisable to call a meeting of the creditors. Mr. Gordon, a large Boston creditor, was authorized to visit St. Paul and take such action on behalf of the creditors as he deemed necessary. One very unpleasant feature of the matter is the fact that the creditors who took the stock of the T. S. White Stationery Company are, under the laws of Minnesota, liable for such portion of the liabilities as is equivalent to the amount of stock they hold. This gives some of the creditors the belief that their claims will be settled at par.

R. E. A. Wiltry, printer, St. Paul, Minn., died last week.

Madison Finch, bookseller and stationer, Knoxville, Ia., has failed.

C. E. Snyder, wall-paper dealer, Detroit, Mich., has been burned out.

H. S. Perkins, dealer in pictures, Cleveland, Ohio, has made an assignment.

Adolph Krebs, of the Krebs Lithographing Company, Cincinnati, Ohio, is dead.

A receiver has been appointed for the *Chronicle* Publishing Company, Seattle, W. T.

The assets of Devoe & Co., manufacturers of photographic apparatus, Springfield, Ohio, are \$700.

The *Herald*, published by N. W. Smalls, Fremont, Neb., is not mortgaged, as has been reported, and the business is believed to be sound.

R. W. Webb has assumed control of the *Gazette* Company, publisher of the *Daily Gazette*, Las Vegas, N. M., and the style of the business is unchanged.

R. C. (Mrs. F. L.) Mitchell, printer, Duluth, Minn., is reported to have failed, offering creditors unsecured notes at one and two years. Liabilities, about \$12,000.

John E. Potter & Co., book publishers, of Philadelphia, have become financially embarrassed, and executions have been issued on judgments for \$10,000. Their notes have gone to protest, and an attachment was recently obtained against them in New York.

P. Lawrence, who was expected here from London a week or two ago, was detained on account of illness of his partner, but will, in all probability, arrive here within the next two weeks. Manufacturers are requested to leave samples of goods at No. 39 Dey street, the New York headquarters of Lawrence Brothers.

The following despatch was received from San Francisco, Cal., on the 23d inst.: "John W. Harbourn, of the firm of Billings, Harbourn & Co., of this city, has disappeared. The Anglo-California Bank has levied an attachment of \$6,000 on the firm's establishment. All the creditors of the firm are in the East." Inquiry among the leading stationers down town failed to discover any one who had had any business relations with the firm. The firm, about five years ago, bought out Charles Beach, who had been in the stationery business in San Francisco for a number of years. It carried on an exclusively retail business, so

CATALOGUE for Fall Season, Now Ready.

357 VARIETIES. } Finest Line in the country.

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

far as is known here. It is not rated at either of the mercantile agencies.

A. C. Miles & Co. have succeeded A. C. Miles, bookseller, &c., Pierce City, Mo.

Ackerman & Gudger, stationers, &c., Navasota, Tex., have been burned out; insured.

E. L. Eckley, publisher of the *Record*, La Grande, Ore., has sold out to Lou Cleaver.

The liabilities of W. T. Shanahan, picture dealer, Portland, Ore., are \$4,950; nominal assets, \$2,595.

F. S. Hasbrouck & Co., dealers in envelopes, New York city, have dissolved partnership. F. S. Hasbrouck continues the business.

E. A. Gear, dealer in paper-hangings, Oneida, N. Y., has assigned to William Barker. Liabilities, \$300; nominal assets, about \$500.

The *Printers and Lithographers' Weekly Gazette and Newspaper Reporter* will soon appear with a department of "Newspaper Intelligence," compiled by G. P. Rowell & Co.

The machine-room of Donaldson & Geer's paper mill at Ballston Spa, N. Y., was burned on Saturday. The fire originated in a kerosene lamp explosion. The loss is \$12,000, and is covered by insurance.

John Riordan, the owner of the extensive paper mill at Merriton, Province of Ontario, Can., and president of the Toronto *Mail Printing Company*, died on Monday at St. Leonards-on-Sea, England, whither he had gone for the benefit of his health.

A building, situated on 120th street, between Second and Third avenues, New York city, was destroyed by fire on Friday morning. On the second floor were the offices of three local newspapers, all of which, with their contents, were destroyed. The losses are: Edward H. Phillips, editor of the *New York People*, \$2,000; General Franz Siegel, editor of the *Volksblatt*, a German newspaper, \$1,500, and John P. Graff, editor of the *Local Reporter*, \$700.

M. H. Easton, wholesale paper dealer, Philadelphia, after an honorable career of seventeen years, has sold out his paper business at 723 Chestnut and 722 Jay street, and will hereafter devote his entire time to the Penn Printing Ink Company, of which he is sole owner. The purchasers are Brelsford, Raiguel & Co., late employees of J. G. Ditman & Co. The young men are well and favorably known and ought to make a successful house.

Negotiations have been completed for the purchase of the *Minneapolis Daily Tribune*, Minneapolis, Minn., from Gen. A. B. Nettleton by A. J. Bletchen, late business manager and co-owner of the *Kansas City Journal*, and William E. Haskell, son of E. B. Haskell, editor of the *Boston Herald*. The *Tribune* was founded in 1880, and has been very successful. The consideration is understood to be approximately par for the capital stock of \$200,000.

Beverly Ward has sold his stock in the *New York Commercial Advertiser* to Parke Godwin.

P. Lambert, stationer, &c., Penetanguishene, Ont., has been burned out.

Atwood & Sherburne, stationers, &c., Boston, Mass., have failed.

The *Davenport Gazette Company*, Davenport, Ia., has been attached.

The *Record Publishing Company*, St. Louis, Mo., is reported about to sell out.

T. N. James & Co., book publishers, St. Louis, Mo., have been burned out.

A. W. Hawkes, bookseller, stationer, &c., Austin, Tex., is closing out his business.

Owen Scott, publisher of the *Democrat*, Effingham, Ill., has sold out to G. M. Le Crone.

Clark & Underwood, printers, Newark, Ohio, have sold out to the American Printing Company.

A judgment has been secured against W. A. Rowland, publisher of the *Mansfield Advertiser*, Mansfield, Pa., and execution is issued.

A dissolution has taken place in the firm of Pond & Child, booksellers and stationers, Hartford, Conn., De Witt C. Pond succeeding the firm.

W. H. Mathews, formerly of Mathews & Co., and late with John Wanamaker, has formed a connection with W. H. Haskins, 913 Arch street, Philadelphia, and will be found by old friends at that location should they desire anything in the line of engraving, stationery or printing.

T. M. Simpson, Philadelphia, has now ready a nice line of samples of cut cards and card-board put up in convenient form, showing the price of each size of card of the various qualities, without the trouble of referring to price-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

list. The samples comprise several new qualities not mentioned in regular price-lists.

A. C. Osborne, bookseller, &c., Pene-tanguishene, Ont., was burned out last week.

Among the out-of-town tradesmen in town during the past week were N. A. Bierce, Detroit, Mich., and A. B. Yohn, of Indianapolis, Ind.

Herboth & Wittig, manufacturers of bags, satchels, &c., Newark, N. J., have dissolved partnership. Albert Wittig signs in liquidation.

George Virtue, publisher, Toronto, Ont., offers his creditors fifty cents on the dollar, half cash and half in four months. Liabilities, about \$12,000; nominal assets, \$18,000.

The Dennison Manufacturing Company has out an elegant catalogue showing many handsome and useful designs for jewelers. F. B. Gilbert, the Philadelphia manager, reports the outlook for trade from his office as encouraging.

Sower, Potts & Co., Philadelphia, report business good in their line, with promise of continued increase as the season progresses. Mr. Sower, of the firm, has been for some time on the sick-list, but is looked for at his post again in a few days.

The creditors of Hand & Ellsworth met on Friday last, and after discussion they finally agreed to accept fifty cents on the dollar, payable, 10 per cent. in cash, and four payments of 10 per cent. each in six, twelve, eighteen and twenty-four months, unsecured and without interest.

J. L. Shoemaker & Co., Philadelphia, will soon offer to the trade their new wire stitching machine, for which they claim many features of excellence over others heretofore introduced. Mainly simplicity, durability and cheapness has been sought after and obtained in its construction.

The creditors of Thomas M. Bell met on Thursday last and agreed to accept fifty cents on the dollar, payable in four and seven months, secured by a first-class indorser, the deferred payments bearing interest. The statement presented shows liabilities of \$12,547.19, and actual assets of \$11,091.13. About \$6,500 of the liabilities will have to be paid in full, being confidential and of a preferred character.

E. G. Locke & Co., Philadelphia, report the business outlook from their standpoint as excellent. Heavy receipts of goods for the opening season attest their confidence in the fall trade. They will show a large line of gold, silver, plain and embossed papers, together with a handsome assortment of sheet pictures for confectioners' boxes—not forgetting the usual display of holiday cards, some things rare and beautiful. Samples sent on application.

J. M. Bulwinkle, of Brooklyn, who was thrown from his carriage a short time ago, severely injuring himself, has sufficiently recovered to enable him to give his attention to business again.

The Weaver Mailing, Envelope and Box Company, Philadelphia, Pa., has been sold out by the sheriff and bought in by E. C. Tracy.

John B. Davids & Co. have in preparation two new inks—a jet-black ink and a copying ink of the same shade as Antoine's copying-ink.

Wright & Bryam, booksellers and stationers, San Francisco, Cal., have dissolved partnership. G. W. Wright continues the business.

Berwald & Frisius, booksellers, stationers, &c., Davenport, Ia., have dissolved partnership. John Berwald continues the business.

St. John & Wallace, booksellers, &c., Eureka, Kan., have dissolved partnership. Wallace Brothers succeed to the business.

The United States Music Engraving and Printing Company, Limited, Philadelphia, Pa., has been dissolved.

J. H. Cooper & Co., printers, Redding, Cal., have dissolved partnership. J. H. Cooper continues the business.

Phelps & Bryant, stationers, St. Joseph, Mo., have dissolved partnership. E. E. Phelps continues the business.

A. Gordon Lewis, publisher of the *Democrat*, Georgetown, D. C., has been damaged by fire. Partly insured.

A. Simon, stationer, New York city, has opened a new branch store at No. 4 West Fourth street.

John M. Gore, publisher of the *New Castle Democrat*, New Castle, Ind., has sold out to M. L. Reed.

Kehoe & Co., printers, Maysville, Ky., have sold out to J. N. Kehoe.

Moore Brothers, stationers, San Bernardino, Cal., have closed up their business.

E. A. Hayes, publisher of the *Register*, Torrington, Conn., has sold out to H. M. White.

Rufus Adams & Co., stationers, formerly 46 Pine street, have removed to 106 Broadway.

William J. Pell has succeeded W. B. Folger as proprietor of the Mercantile Printing House, 92 John street, New York.

Bollong & Flinn is the name of a new stationery firm at 45 Broad street. The firm is composed of Andrew Bollong and Hugh Flinn.

Among the articles which seem to have been attracting attention at the Montreal Exhibition are Dunham's combination tag and envelope and W. H. Hasbrouck's M. & H. tablets, office and desk pads.

Edward Posen & Co. are now offering the trade some excellent bargains in a large and well-selected stock of fine albums, among which are their well-known specialties the Ceramic and Renaissance albums. The Renaissance albums contain numerous tasteful interior decorations in the form of finely executed chromos on crimped paper, giving them the appearance of interwoven gold and silver. The Ceramic albums contain numerous chromos illustrating old decorated china.

HAVE YOU SEEN WHITING PAPER COMPANY'S "STANDARD" CORRESPONDENCE PAPERS AND ENVELOPES? THESE GOODS ARE SURE TO SUSTAIN THE COMPANY'S REPUTATION FOR MAKING THE BEST PAPER.

in its place will be published monthly two separate and distinct papers, one to be called the *Western Bookseller*, devoted to the interests of the book trade, and the other the *Western Stationer*, devoted to the stationery and fancy goods trades.

A YOUNG MAN WHO THOROUGHLY UNDERSTANDS Staple and Wedding Envelopes, fine Note Papers, Cards, &c., desires a situation; several years' experience with a prominent house. Address L. N., care of American Stationer.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIRS: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

ADDRESS
JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

THE STATIONER

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 25, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WE are now making ready for the holiday number of THE STATIONER. Those who wish to avail themselves of that issue are requested to prepare their favors at once and to forward them as soon as possible.

THERE is a fraud going around town, claiming to be a reporter connected with the Lockwood Press and getting money on false tokens—giving worthless checks. He is said to call himself Charles Webb. If he runs across anyone who sees this notification, please stop him.

A RECENT decision of the Supreme Court of Minnesota is of considerable interest to merchants. It was a question of false representation to secure credit on a purchase of goods. The action was brought by the plaintiff to recover certain goods which had been seized by the defendant, as sheriff, as the property of one Bauman. It appeared that Bauman applied to the plaintiff's traveling agent to purchase certain goods on credit, that the agent requested Bauman to state how he stood, and that the latter answered that he had \$3,000 in his business, consisting of merchandise and book accounts and \$300 in cash. This statement being submitted to the plaintiff, he, upon the strength of it, shipped to Bauman the goods which he had ordered. It appeared also that at the time the statement was made, Bauman was indebted in his business to the amount of \$2,100, a fact which he omitted to state. The question was whether the property in the goods passed to Bauman, or whether the sale was voidable at the election of the plaintiff. The latter view was taken by the court, which, in affirming judgment against the defendant, said: "It is doubtless the general rule that a purchaser, when buying on credit, is not bound to disclose the facts of his financial condition. If he makes no actual misrepresentation, if he is not asked any questions and does not give any untrue, evasive or partial answers, his mere silence as to his general bad pecuniary condition or his indebtedness will not constitute a fraudulent concealment. But this was not a case of mere passive non-disclosure. The object of the agent's inquiry clearly was to ascertain Bauman's financial condition and ability to pay. Bauman's statement was in response to that inquiry, and when he undertook to answer he was bound to tell the whole truth, and was not at liberty to give an evasive or misleading answer, which, although literally true, was partial, containing only half the truth, and calculated to convey a false impression. * * * Concealment of this kind under the circumstances amounts to a false represen-

tation." This is an equitable judgment and a common-sense decision. While it is true that a purchaser need not volunteer information as to his financial standing, yet there is in this case, as there frequently is in others, just that difference which will not exempt him from setting forth his actual condition. There are probably many lawyers who differ with this judgment of the Supreme Court of Minnesota; but as good law is founded on common sense, we may expect that this will stand.

Roundabouts.

BY THE TRADE LOUNGER.

There is a hum of anticipation in the air. If trade is dull, one wouldn't imagine it was expected to continue so, and, indeed, to look in at the different places of business, there would seem to the uninitiated considerable going on. But we all know how it is. If we are making ten per cent., we fret because it isn't twenty; and if we net twenty, we are bothered to know what keeps trade back and prevents us from making fifty. 'Twas ever thus!

* * * *

A Southern paper gives a very encouraging report of the business outlook in the South. The wheat and oat crops are fine, and perhaps better than for several years past. The corn crop is very large and the cotton crop is growing luxuriantly. The people are getting along satisfactorily, and are in a prosperous condition. All this, of course, will be of interest to the stationery trade.

* * * *

The same journal further remarks: "A few months ago the severe stringency in the money market made it impossible for the planters to borrow money as freely as in times past, and it was feared that they would be unable to continue the cultivation of their crops, and that heavy losses would thus be entailed on them. Instead of this, however, their inability to borrow necessitated a forced economy without causing any injury to the crops from the lack of cultivation, and it is now universally admitted that the cotton crop this year has been produced at a lower cost than ever before."

* * * *

One of our Wall Street men asks, Who ever knew abundant crops to make a people poor? Just so! Is there a truism involved in this query? Methinks that there might be some dispute as to the principle suggested.

* * * *

A new dictionary-holder is made so as to revolve, open, close and tilt to any angle desired. It can also be elevated from its regular height of 27 inches to 36 inches, and is very light and ornamental.

* * * *

A roller skate, which seems to possess several excellent points, has been brought out by a Chicago firm. The wheels are of Turkey boxwood, the trucks bear directly upon circular rubber cushions, which serve, it is claimed, to remove the jar noticeable in all other skates, and prevents the bending of the axles. The

tension can be adjusted without the slightest trouble.

* * * *

The manufacturers of shelf papers have grown tired of clashing with each other in cutting rates. A short time ago there was a general complaint that prices were so low that there was no profit to be made, and, moreover, that manufacturers would not combine to stiffen the market. Judging from the recent rise in shelf papers, it would seem that the difficulty has been remedied. Shelf papers have gone up materially, and still show a tendency to advance in price, it is said.

* * * *

I was under the impression that papier-maché goods, such as fancy boxes, toilet-cases, &c., had become, in recent years, an American production. It would seem, however, that this is not the case, as you state that such goods are imported. It seems to me that there is a wide field for American enterprise here.

* * * *

Bisque figures are now mounted on menu cards. Cards thus ornamented are novel and attractive, and will, doubtless, be among the prevailing designs this season.

* * * *

A handy-pencil attachment is called the adjustable calendar and eraser. It fits on any pencil and shows the day, the month, the date and the year. Besides being useful it is ornamental.

* * * *

Lansing, Mich., has a toy-gun factory which employs twenty men.

* * * *

It is astonishing what a number of poorly bound books there are in the market. These books have handsome exteriors and look as substantial as more strongly bound volumes, which, of course, they are far below in cost, but a few days' use soon causes their leaves to loosen and the cover to tear away at the back. The production of these books is something like a catchpenny game, inasmuch as they give the buyer an impression that he is getting something cheap, and it is surprising that reputable firms will have a hand in it.

* * * *

Real novelties in birthday, Christmas and other cards are now made mounted with sea-weeds collected on the English coast. The weeds are laid on the cards in their natural condition, without tinting or artificial preparation of any kind. They are also mounted on ivory and real ivory cards and in some cases are tastefully formed into initials, names, monograms, &c. Among other novelties in cards are what are called "butterfly cards," the "wings of the butterfly on each card being resplendent with the changing hues and tones of translucent pearl used in their manufacture.

* * * *

A movement is on foot in the publishing trade in London, Eng., to form a syndicate for mutual protection. Those at the head of the movement are trying to get the publishers to come to some agreement as to discounts. It is said that some of the wholesale stationery houses which carry books are in the

habit of giving a much larger discount than the publishers think proper to concede to the retailers. Some are in favor of abolishing the discounts altogether and letting the dealers make their own prices, putting on what they consider a fair profit. Most of the firms, however, are in favor of a uniform rate of discount.

Answers to Correspondents.

F. H. D. wants to know who has the papyrograph ink for sale.

Ans.—Papyrograph Company, 93 Duane street, New York.

W. W. E. wants the address of a manufacturer of paper scenery.

Ans.—L. W. Leavey, 14 Lafayette place, New York.

M. M. & Co., send design of Campaign badge and want to know where to get it.

Ans.—It isn't made here. Think it is a Chicago idea. Have sent to our Chicago office, which will supply the information if it can get it.

M. M. Co. sends sample of manilla paper—such as used for ice-cream boxes and wants to know who makes such paper.

Ans.—Hollingsworth & Whitney Company, Boston; Chemical Paper Company, Holyoke, Mass; Wilkinson Brothers & Co., 72 Duane street, New York, and several others.

D. wants to know who makes the Housekeeper's Calendar—having recipes for each day of the year.

Ans.—We do not recall the name of the manufacturer. Will some one suggest?

Subscriber asks: Who manufactures colored print or poster papers?

Ans.—Herkimer Paper Company, Herkimer, N. Y.; Springfield Paper Company, Rainbow, Conn.; Claflin Paper Company, South Toledo, Ohio; Cuyahoga Paper Company, Cuyahoga Falls, Ohio. There are a number of other manufacturers.

Post-Office Envelopes.

The contract for furnishing envelopes for the use of the Post-Office Department was awarded last week. The following is the schedule upon which the bids were made, and to which reference is made by the number of the items in the abstract of bids given below:

FOR OFFICIAL LETTERS AND RETURNS.

1. Letter size, $3\frac{3}{4} \times 5\frac{1}{2}$.
2. Extra letter size, $3\frac{1}{2} \times 6\frac{1}{4}$.
3. Official size, $3\frac{3}{4} \times 8\frac{3}{4}$.
4. Extra official size, $4\frac{1}{4} \times 10 \times 3-16$.
5. For returning dead letters, $3\frac{3}{4} \times 6\frac{1}{4}$.
6. For registered packages (as per sample of the department), $5 \times 10\frac{1}{2}$.
7. Tag envelopes for registered packages, $3\frac{3}{4} \times 5\frac{1}{2}$.
8. For international money-order advices, $4\frac{1}{4} \times 6\frac{1}{4}$.

The bids were all made on a one year's basis, and the aggregates were, therefore, greatly in excess of the amount which will be expended, as there will only be about seven months of the year during which the envelopes under the new contract will be furnished.

Morgan and Plimpton Envelope Companies, item 1, \$1.82 per 1,000; 2, \$1.95; 3, \$3.05; 4, \$3.60; 5, \$2.48; 6, \$4.80; 7, \$3.10; 8, \$3.12.

M. A. Reay, item 1, \$1.85 per 1,000; 2, \$2.18; 3, \$3.10; 4, \$4.34; 5, \$2.44; 6, no bid; 7, \$2.93; 8, \$3.65.

Holyoke Envelope Company, item 1, \$1.85 per 1,000; 2, \$2.08; 3, \$3.24; 4, \$3.75; 5, \$2.50; 6, \$4.87; 7, \$2.97; 8, \$3.25.

L. J. Powers, item 1, \$1.77 per 1,000; 2, \$2.12; 3,

\$3.27; 4, \$3.55; 5, \$2.62; 6, no bid; 7, \$3.05; 8, \$3.25. C. D. Marshall only bid on item 6, \$4.70 per 1,000.

The contract was awarded to the Morgan and Plimpton companies.

Henry Levy & Son have a very extensive line of bisque figures in various novel designs. They embrace cigar-cases, match-safes, mantel ornaments, flower-vases, &c. They have also a complete assortment of Pelesian ware fancy plaques, and a line of specialties in stamped and mottled leather, also a great variety of gilt goods, embracing odor-cases thimbles, puff-boxes, card-receivers, &c.

Market Review.

OFFICE OF THE AMERICAN STATIONER, I
WEDNESDAY, September 24, 1884. }

THE MONEY MARKET.—The financial situation is unchanged, the money market being easy, loanable funds abundant, and commercial paper quiet, with prime names discounted at $5@5\frac{1}{2}$ per cent., and good endorsements at $6@6\frac{1}{2}$. Weakness was a characteristic of the stock market at the close. The drop in nearly all the prominent stocks was somewhat serious, and what was worse, no rally worth mentioning occurred at the end. Of good and sufficient reasons for the decline, there was none. Government bonds were strong and higher for the 4s. Railroad bonds were moderately active and irregular. The market for sterling was very quiet, and actual rates were rather lower. Bills continue in limited supply, though the offerings of cotton bills are increasing.

THE PAPER MARKET.—It has been a matter of much comment in the trade for a fortnight or more that the paper market does not respond to the advance in rags, but this is not surprising when the condition of the supply and demand is taken into consideration. The time has now come when manufacturers must in self-defense obtain higher prices for their product if they shall be required to meet an enhanced cost of rags, which to give a conservative estimate have advanced within the past few weeks $\frac{1}{2}$ c. to $1\frac{1}{4}$ c. per pound, taking the range of domestic and foreign grades. We hear that several of the writing mills have advanced their quotations $\frac{1}{2}$ c. to 1 c., and $\frac{1}{4}$ c. more is asked for book papers, and this advance may become even more pronounced in another week. News has not as yet been affected as have the fine grades, but will in course of time share in the general appreciation of other grades. We learn that a city publisher has renewed a contract this week for another year's supply of about 2,000 reams per week of a fair quality of wood news. The price agreed upon has not transpired, but it is believed to be about $5\frac{1}{2}$ c., which is $\frac{1}{4}$ c. below the figure made a year ago by the same parties. The contract last year called for 80,000 reams, while for the ensuing year probably 100,000 reams will be required. The straw-board trade is experiencing a period of more activity, which in former years usually showed itself several weeks earlier. Prices are somewhat nominal, and range from \$30 to \$35 for No. 1 steam dried. Both manillas and straw wrappings are without any new feature, and continue to rule fairly steady.

THE STATIONERY MARKET.—The movement in staple goods shows scarcely any variation from last week's. There is a steady trade, however, but not as much as usual at this season of the year. Dealers in various lines of stationers' specialties report an active demand for their goods, but confess that they are unable to sell except with considerable effort and push. The moment, it seems, a dealer ceases to exert himself his trade slackens up. Owing to this fact, it costs more to do business now than is commonly the case. Many dealers are very much encouraged at present from the fact that collections are not so difficult as they were a few months ago. It is surprising how many buyers avail themselves of the usual discounts by paying cash. The trade in fine albums has opened up well. Dealers in this class of goods are taking large orders, especially in the large cities, where such goods are principally sold. As is usual at this season, there is an active trade in school stationery. Indeed, business in this line seems to be better than during this period in previous years. This accounted for on the ground that buyers, owing to the stringency of the money market, want of confidence, &c., in the early part of the year, held back their orders until the opening of the schools, when their stock on hand was quickly disposed of, and they were compelled to refill their empty shelves.

Foley's Patent Improved Stylographic Pen.

Great reduction in price; No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H.  B. Lawrence & Co., by same, 20 cs.
 Keuffel & Esser, by same, 17 cs.

The National Publishing Company, Philadelphia, is kept busy at this time of the year to meet the demand for its Bible and photograph albums. In its line of plush albums, the call is especially brisk, and it is turning out some elegant goods of this description, which, it claims, are superior in the quality of plush used in their general make-up to foreign goods of this class, while much lower in prices. Dealers who desire these goods for their holiday trade, should send in their orders early, to insure being filled in season.

Lawrence Brothers, London, who represent so many American manufactures in Great Britain, have extended their business so largely during the present season, that they have called their well-known traveling representative in this country, Richard Botting, to act in the same capacity for their London house. Mr. Botting is an Englishman by birth, which, together with his extensive knowledge of the trade in this country, gained by fifteen years' connection with the New York house, makes him well fitted for his new position.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

AUGUSTA AUTOGRAPHS.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., September 20, 1884.

Quite a change has taken place in our city since my last letter. All of the baseball players have disappeared, and now nothing is heard of it. Cotton is beginning to come in quite lively, and the chess-boards at the various warehouses have retired until next summer, for the young men have now to buckle to their work in earnest. Times are still very quiet. Nothing like the business being done that there ought to be at this time of the year. The crops have not turned out as well as expected, owing to the severe droughts we have had. Crops are very uncertain. A month or two ago everything looked booming, but a drought makes a very serious impression on it.

Our public, as well as private, schools (there are very few of the latter) open on the first Monday in October, and the former will be very full, for they, like anything else that can be had without cost, are well patronized, and in this, as well as many other things, the ones least interested have to bear most of the expense. The bookstores have all pretty well supplied themselves with good stocks of school-books, but complain that retail prices have been reduced again, while the wholesale are still kept up. There is nothing to be made at it. The unsalable stock takes off all the profits.

W. Richards & Son have been adding to their establishment a fine Cottrell printing press, intermediate size; they are delighted with it. They have also added to their bindery a new ruling machine, the most complete of the kind I have ever seen.

Friend Pendleton has been laying in a fine line of school books and stationery of all kinds, among the latter some beautiful lines of Crane's fine papers, which are lovely in quality. His baseball bats have retired to the back part of the store. The last game of the season will be played at the opera-house by Barlow & Wilson's minstrels, on next Monday night, the 22d.

The dramatic season commenced last Wednesday night, and for dull times, it was astonishing to see the crowd in it, from parquet to gallery.

The Bath paper mill that was partially destroyed by fire some months since, has been rebuilt, and will commence running on October 15 next.

Our boat club, after getting out a very handsome boat costing \$350, has never had it in the water yet, and it is in the store of one of the members where it is likely to remain until next summer unless it goes to some warehouse. There has been too much base-ball on the brain of some of the members, so the other had to give in.

My old friend George A. Oates has opened two nice rooms at 128 Eighth street, near Broad street, up-stairs, very easy of access, where he is going to try and do something again in pianos, books music and stationery, and if perseverance and attention to business will accomplish anything he is bound to succeed. He will be thankful to any of his old friends in his line for any assistance they can favor him with, and at the present time will be appreciated. He has been unfortunate, but there is plenty of pluck in him yet.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
 $6\frac{1}{4} \times 3\frac{1}{4}$ \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

PLIMPTON MFG. COMPANY,
HARTFORD, CONN.

WHITE'S EYE SHADE,

-3- WITH AUTOMATIC SPRING. +-

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

WILLIAM R. WHITE, Patentee and Manufacturer, No. 29 High Street, Boston.

The Globe Files Company has brought out since the issuing of its catalogue of September 1, two new specialties, one the "Congress Tie" envelope for deeds, insurance policies, contracts, receipts, &c., and the other a press board filing box for similar documents. The former is made of the best quality manilla tag board and provided with all the latest improvements. The filing boxes are made by a new method and are warranted to be more durable and better than metal end boxes.

Trade Items.

The *Overland Monthly* (Samuel Carson & Co., publishers, San Francisco), has been received. It is an interesting number.

Estes & Lauriat have sent out a caution to publishers and booksellers against publishing or selling any book bearing the title "Chat-box."

Horace Drew, of Jacksonville, Fla., who has been having a good time among his many friends and acquaintances in New York, will return home on Friday, the 26th inst.

The Silicate Book Slate Company has opened a branch office at 820 Market street, Philadelphia. The company is making up a large stock of the silicate writing-book covers, which it is having a good demand for.

The managers of the World's Industria and Cotton Centennial Exposition have opened an office in the Stewart Building, corner of Chambers street and Broadway, this city, for the convenience of Northern exhibitors. The fullest documentary information may be obtained there.

"Ogilvie's Handy Book of Useful Information," is the title of a modest little book of 128 pages, just received, which contains much information of practical value. It is bound in handsome leatherette, flexible covers, and can be had of J. S. Ogilvie, publishers, 31 Rose street, New York.

The Bureau of Education has issued a circular, containing suggestions respecting the educational exhibit at the World's Industrial and Cotton Centennial Exposition. Anyone wanting information of this kind will receive the circular by applying to the Bureau of Education, Department of the Interior, Washington, D. C.

John L. Boland, St. Louis, Mo., forwards his latest catalogue, which is one of the most charming productions in the way of catalogues yet presented. It has a fine plated paper cover, handsomely decorated with an artistic lithograph design; the pages are red-lined, the type work is very handsome, the illustrations are finely printed, and a steel-engraved frontispiece lends elegant attraction to the work. The catalogue is very complete and comprehensive.

The fall book sale, which commences on Tuesday, September 30, promises to be unusually large. The sale will be opened by Lee & Shepard, who are to offer a large number of miscellaneous books. They will be followed by John E. Potter & Co., Schaefer & Koradi, R. Worthington, J. B. Lippincott & Co., D. & J. Sadlier & Co., Fairbanks, Palmer & Co., and others. The fifth day will begin with the sale of the remainder of E. Claxton & Co.'s stock offered by the assignees.

Wolf Brothers, the enterprising envelope manufacturers, Philadelphia, are extending their business and putting on the market a general line of paper, having secured the agency of some of the most prominent paper manufacturers in the country. Their store will be much enlarged by taking in the adjoining premises and extending the factory so as to reach fifth story up stairs. Frank E. Miller, for some time in the employ of J. G. Ditman, will be associated with them after October 1.

No. 4
\$12 LANTERN
For \$6.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used, & the cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOGOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all untried methods for LEARNING, AMUSEMENT and PROFIT. The transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World. SCRIPTURE.

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Slide Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, with 12 Slides, \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, with 12 Slides, \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'fr's, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

The Besly Files.

The Besly File, manufactured by Brown & Besly, Chicago, is claimed to be superior for its great economy, as having a larger capacity than other files. When open on the desk

shows that some commercials, at all events, are judiciously sensitive on this point. Entering the premises of a tradesman, with whom he had not previously transacted business, a traveler exhibited his samples. The tradesman was not so polite as he might have

do that; I want to give you an order for—." "Then I must trouble you to send it direct to my firm, if you please. I cannot do business with a man who does not believe a word I say," was the response.

Some months afterward a second call was

No. 1.

No. 2.

or elsewhere, the top is clear and unobstructed. It is also provided with a simple and convenient method of transferring. A better idea of the file can be obtained from the illustrations. Cut No. 1 represents the file closed; cut No. 2 represents the file with the presser thrown back; cut No. 3 shows the manner of holding the file open at any one place; cut No. 4 shows the manner of removing the contents, and cut No. 5 shows the index complete.

:O:

Travelers and Truthfulness.

"Nothing is more important to a commercial traveler," says an English contemporary, "than a reputation for truthfulness. Aptitude and readiness, a knowledge of human nature, sagacity to apprehend the wants of a neighborhood and other qualities are valuable, but they are poor

been, but he was willing to buy, and several leaves of the sample-book were turned down to indicate approval and selection. Pres-

made, and the traveler was greeted with, "I hope you are in better temper than when you were last here." "The same temper, precisely, sir," was the polite reply. "There can be no business where there is no confidence. May I show you my samples?" Result—a good line, and satisfactory relations for many years.

A story of this kind is somewhat tame when put into writing, and we could not venture to recommend it without reserve as an example to be followed. Every commercial should, however, endeavor to deserve and gain the confidence of his customers. Each must do it his own way.

:O:

No. 3.

ently, however, a serious difference of opinion occurred. The traveler received something very much like the lie direct, and was

Among the recent inventions of interest to the stationery trade is that of J. F. Tapley, who is the inventor of a metal back for writing tablets, check and draft books,

No. 4.

No. 5.

substitutes for veracity. A tradesman who has once been deceived is hard to deal with. He buys to sell, and if he has been tricked by a traveler into a loss, he is not likely to pay much attention in future to his recommendations.

We overheard a story the other day which

assured that, like all his fraternity, his word was not to be taken. The commercial made no reply, but quietly and deliberately took up his sample-book and shook out the folds of the turned-down leaves.

"Stop, stop!" said the shopkeeper; "don't

&c. The back is adjusted by numerous teeth on either side, which firmly hold it in position. There is also a device in the back for hanging the tablet or check-book to a nail or hook if desirable. This clasp can also be used for goods samples.

Calendars.

Calendars are used so largely for advertising purposes that almost every printer in the land is prepared to turn them out at short notice. All of the leading lithographers make a business of furnishing them in any desired quantity and design. Railroad and insurance companies, patent medicine manufacturers, steamship companies, and other large corporations buy them for distribution in quantities ranging from ten to twenty thousand. Each company has its special design, which it takes care that others do not make use of. Calendars are ordered in the summer for delivery in December. "Some of the finest displays of art are made in calendars," said the member of a leading lithographing firm in this city, "yet many very attractive calendars are gotten up without any regard for art whatever. Art and advertising are two different things. An advertisement—and that is what a calendar amounts to—must be new and novel, and if it is so it will take, though it may have little artistic merit. A good picture is good always; but a calendar may be good one season, and the next season not worth a copper. A calendar, to be taking, must be bright, and the idea must be original. There is a great deal of art displayed, as I said before; but art is not the main thing."

"What do calendars cost? That depends entirely on the number of colors used in them and their general style of make-up. They vary from half a cent to thirty-five or forty cents apiece. The cost is also governed by the quantity ordered from the manufacturer. It costs less in proportion to turn out 500 calendars than it does 5,000. Some lithographic houses get up calendars to sell in small lots to small dealers, while others merely manufacture calendars to order—that is to say, do not keep any designs in stock.

"Some calendars which have a few colors and look very showy are crude affairs at best. Other designs have few colors, which are blended with great delicacy, and the different lights and shades are almost as truthfully portrayed as in a fine painting. The design presented may also be a very artistic one requiring considerable talent and skill to execute.

"Calendars are made in various forms, but the prevailing styles are flat and pad calendars."

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 126 and 128 Duane Street, cor. Church, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 14.

NEW YORK, OCTOBER 2, 1884.

WHOLE NO. 484.

Correspondence.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA, PA., October 1, 1884.

The stationery interests of Philadelphia are in better condition than some other important interests; but nevertheless there is a great deal of complaint made about dull trade, narrow margins and indifference of buyers. The causes of the existing depression are not hard to find, but the remedy is not apparent. Each stationer has his views as to what ought to be done; but it is impossible to effect any unity of action which would be productive of any general advantage. Most industries have their trade combinations; railroads have their pools, bankers their syndicates, iron manufacturers their compacts, coal men their combinations, cotton and woolen goods manufacturers, hosiery and knit goods manufacturers, each and all have their trade combinations for the conservation of their mutual interests; but the stationery interests, from the necessities of their condition, cannot unite to restrict production, or work to their mutual advantage through any possible trade combination. In fact, careful heads in the trade doubt the advisability of any combination, even were it possible. Competition must level all opposition, and on all sides are seen the indications of the disintegration of those artificially formed combinations devised to act as a barrier against competition.

Trade requirements are being closely studied. Times like this help to develop business ability. In booming times every one may prosper; but in the last year or two failures at the rate of ten thousand a year have overtaken the business interests of the country, no doubt, largely as a result of the unusual prosperity of the preceding three or four years. The older firms need not regret the activity of the competition with which they are surrounded. It is only the new firms, those with small capital, limited experience; or with other disadvantages which have cause to be apprehensive of the future.

The Electrical Exhibition is attracting thousands of visitors, who find a great deal within its limits to engage their attention.

Electrical science is very little understood, even by well-educated people, and even scientists will find a great deal in this wonderful display to interest and instruct them. This exhibition has given electrical science a new impetus, and will tend to broaden its foundation.

The colored Masons had their anniversary celebration and parade here yesterday. The parade was imposing and very creditable.

The volume of business transacted by our stationery manufacturers this year is fully up to that of last year. Possibly there are exceptions to this sweeping assertion, and possibly the manufacturers have given a brighter coloring to the commercial and trade picture than it deserves; but there is comparatively little complaint made, and a great deal of satisfaction expressed at the amount of business done since the opening of the year. In regard to trade prospects there is more room for complaint and the expression of uncertainty. An immense amount of stationery material is going into use; hosts of novelties are coming to the surface and being bought up by a public always ready to be pleased, and to testify its appreciation of anything new and good. The display of stationery this year is unusually fine. The demand for medium-priced goods is steady, but for high-priced goods more irregular.

Our stationery manufacturers generally unite in expressing themselves as satisfied with the volume of business, and with the profits realized, considering the unfavorable conditions with which the trade has been surrounded. Of course, a great deal of business has been done at little or no profit, and in many cases there is more competition than is wise. Your correspondent discussed trade probabilities and possibilities with several able and careful business men in the stationery interests, and is glad to be able to make a report based upon expressions made by them, and observations of his own.

Among our successful business men may be mentioned Chas. J. Cohen, who invites attention to his new card in another column of this paper. Mr. Cohen has spared neither pains nor expense to place before his customers the latest and choicest things in the stationery line to be found at home or abroad.

Leon Isaacs & Co. are running a line of

samples of maps of convenient size, and made up in a suitable style for advertising purposes. These are well worth looking at.

E. H. Miller reports a handsome order from Australia, for his "Paragon" paper cutter.

James Arnold has recently put in one of the Sedgewick automatic paper feeding machines. This is a marvel of mechanical genius and greatly facilitates operations in the large and growing business built up under the personal supervision of the above named gentleman.

Baker & Hayes, lithographers and printers, show a large assortment of holiday cards. This is a wide-awake concern, always presenting novelties to the public, and is doing a booming business.

W. M. Christy's Sons are receiving a great many orders for Waggener's time-balance book. They report the outlook improving.

Theodore Leonhardt & Son show a line of beautiful imported goods in holiday and advertising cards, chromos, &c. Many of the designs are very rare.

The Fairmont Printing Ink Works of J. K. Wright & Co. make a fine line of printing and lithographic ink in all colors. The firm report a large and improving business.

Mr. Cline, late with J. G. Ditman, is now engaged with Forestal & Co.

W. G. Perry, of 728 Arch street, shows over 5,000 different designs in holiday cards. By a neat arrangement of sample books, buyers can make selections for the coming season with the least possible trouble.

Langfeld, Turner & Andrews are very busy. They report sales of their wire-supporting gussets for ladies' hand-bags in increasing demand. They have a complete line of fancy leather goods ready for the holidays.

Thomas W. Price & Co. report August business the largest ever done for the same month, and notwithstanding the dull season, September showed an increased business. They report the outlook very encouraging.

Janentzky & Weber report the outlook for business as satisfactory. Their line is complete, and is already receiving much attention from buyers.

C. F. Rump has a handsome line of leather goods for holiday trade.

Buyers, visitors and friends will find A. G. Elliot & Co. at their new quarters, with everything ship-shape to meet demand for every-

thing in their line. Although well known to the trade, the old house of J. G. Ditman will present some new features, as well as faces, under the new management. Elliot & Co. have a sure thing. The change takes place to-day.

Charles Beck has an extensive line of improved chromo cards in job lots; also a new line of scrap pictures, embossed gold and silver papers, &c.

The firm of Belsford, Raiguel & Co., that was announced a few days ago as the probable successor of M. H. Eaton, 733 Chestnut street, will not be formed. Mr. Eaton will retain his business; Mr. Belsford will go with A. G. Elliot & Co.; he was formerly with J. G. Ditman & Co. Mr. Raiguel will go with Bulkley & Co., 237 North Front street.

Frank Miller, who has been for some years with J. G. Ditman & Co., will go to Wolff & Brother, 507 Minor street. PENN.

CHICAGO CULLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 East Madison Street,
CHICAGO, September 29, 1884.

Art circles in Chicago and patrons of art and casual buyers are equally interested in the picture display at the Exposition. It has become known that toward the close of the exhibit there is to be a general sale, and those who have money that they know of and taste that they believe they possess now wander through the rooms almost daily picking out this and that which they mean to go for. The art-rooms are well filled daily by connoisseurs, picture store agents—art professionals of all degree. There are some good pictures on display, and the aim of some people is to get them at the minimum price. Reference to the catalogue shows representations on the walls by many artists of renown in America, and of some fame in Paris, as is shown by the number of works that have been honored by the Paris Salon.

The Chicago and Northwestern Railway Company in its annual report for the twenty-fifth fiscal year ended May 31, 1884, states that the sales of lands during the year amounted to 140,076.34 acres, and 1,573 town lots, for the total consideration of \$734,756.63. The cash receipts from sales, annual collections on contracts, interest, &c., were \$706,784.57. The number of acres now under contracts of sale is 390,086.93½, and amount of land unsold remaining in all the grants is 1,456,148.52½ acres. Total number of acres unconveyed, including lands under contracts of sale, upon which partial payments have been made, and of lands unsold, is 1,846,235.46 acres. A sure evidence of the substantial prosperity of the towns of the company is afforded by the increase in the number of churches, school-houses and buildings of a public or quasi public character. The company has continued the wise policy of fostering such enterprises by the donation of lots and small tracts of land as sites for such buildings.

Last Monday Judge Moran dissolved the injunction restraining the sale of county

blanks, &c., by John Morris, particulars of which have been given in previous letters.

In an interview regarding the case, John Morris said: "The court held that it was not shown by the evidence that I had any previous knowledge of the existence of any such contract between Culver, Page, Hoyne & Co. and Brown, Pettibone & Kelly, and even with such knowledge the court knew of no law that could bind a third party to a contract between any other two parties."

Since then John Morris has made a demand upon Brown, Pettibone & Kelly for damages. He claims that by reason of the interruption of business in the sale of goods to counties in Illinois he was damaged to the extent of about \$1,200.

The stationery business continues to improve; prices are more satisfactory, and the volume of business is such as to warrant very favorable predictions for the fall trade.

Hubbard & Gray are doing a good business, especially in their latest novelty, the "Mother Hubbard Mucilage Patent Bottle and Safety Stand." This bottle contains a glass bar in its neck on which to wipe the brush, thereby preventing the gumming up of the neck and outside of bottle. The use of the stand, screwed to or hung on the side of a desk, will prevent the tipping over of the mucilage and the spoiling of valuable books, papers, &c.

Keene & De Lang report a large demand for their French inks, one order having been received last week for 840 quarts.

The Union School Furniture Company is carrying a full stock of school supplies, and reports a fair trade.

C. M. Barnes is doing a very good business in school-books. He has a very large supply of second-handed books he would like to dispose of.

The Rounds Type and Press Company, of 175 Monroe street, this morning filed its voluntary assignment to Samuel D. Ward. The debts aggregate about \$45,000, while the assets were stated to be \$35,000 by the secretary, C. D. Soule, at a creditors' meeting, held a month ago, but it is safe to say that the assets will not net nearly that much. There are no preferred creditors, and the different claims will be paid pro rata. The assignee is a gentleman of experience, and was chosen because he was acceptable to all the creditors.

The assets consist of printing materials, types, presses, an electrotype foundry, in furniture and fixtures, as well as of book accounts and bills due or maturing. There is a second smaller plant in Denver, Col., besides the one in this city. The creditors are: McKellar, Smith & Jordan, of Philadelphia, whose claims aggregate about \$22,000; J. B. Cottrell & Co., of New York, \$2,400; Holmes, Pyatt & Co., of Chicago, \$2,000; R. Hoe & Co., of New York, \$2,000, and a string of smaller claimants. The immediate causes of the failure are the hard times and stiff competition. The real cause, however, is of long standing, and is none other than the withdrawal of S. P. Rounds, who founded the firm thirty years ago, on his appointment to the office of public printer.

In regard to this, D. C. Cratty, the attorney of the bankrupt firm, said: "When S. P.

Rounds was appointed public printer in Washington he sold his interest in his old business here and disconnected himself entirely from it, as he could not attend to both things. This left the Chicago business in the hands of young men of insufficient experience, and they did not get along so well. About this failure I may add that some six weeks ago there was a creditors' meeting, and it was agreed by all present to appoint two trustees, Colonel White, of Philadelphia, and Edward Blake, of this city, being selected for the purpose. But as afterward some few creditors objected to this arrangement, it fell through." Noz.

CINCINNATI CIPHERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, October 1, 1884.

While politics are absorbing all attention, much to the neglect of business, there are men who devote themselves here in Cincinnati to getting ready for the good time that is surely coming. Manufacturing stationers are filling in the little nooks of time and using up odds and ends of material in making up trifles that will sell when the good time arrives, and that serve to save morsels of time that would otherwise go to waste while the "good time" is on its way here.

The dullness is not so dull as to prevent business men from wearing cheerful smiles—nothing of that sort. Men of versatile minds can find something to do—something that will pay more or less, and that is what such men are doing now. The late summer and the September transient sales at retail stationery establishments here have been really good. Only a little more than a month remains till the November election is over, and then everybody expects a little change, at least, for the better.

I have been handed the following: print it just as it is, to show the advantage of advertising in THE STATIONER:

P. P. CALVO U.
Apartado No. 26.
Cablegrammas—Calvou.

BOGOTA. BOGOTA, 13 de Junio de 1884.
MUY SEÑOR MIO—Suplico á usted se sirva remitirme á vuelta de correo el catálogo de sus manufacturas con los datos de los mayores descuentos que usted concede al por mayor dirigidos á

Su seguro servidor, PEDRO PABLO CALVO.

The above was addressed to "W. B. Carpenter & Co., Cincinnati, Ohio, U. S. of America."

The recipients attribute it all to advertising in THE STATIONER. How otherwise could they become known in far-off Bogota? Of course, W. B. Carpenter & Co. sent the writer their catalogue of prices and of discounts to dealers, &c.

Visitors are coming around. Among the recent callers here are the following-named from New York: Mr. Gibbs, with Willy Wallach; E. E. Bliss, with H. L. Judd & Co., N. Frank, with Charles Zinn & Co.; W. T. Birdsall, with Henry Lindenmeyr, New York; Mr. Bartlett, with Muller Brothers & Co.; J. G. Stafford, with S. S. Stafford; Mr. Hal-

(Continued on page 442.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 440.)

lenbeck, of J. Q. Preble & Co.; Theodore Olesheimer, for Theodore Olesheimer; Charles Plummer, of Evans, Plummer & Co.; Henry Birrell, with Ivison, Blakeman, Taylor & Co.; Eugene Dietzgen, with Keuffel & Esser; John B. Gunn, with Eberhard Faber; Mr. Dinsmore, of Carter, Dinsmore & Co. From Philadelphia—Charles W. R. Smith, representing the Hampshire Paper Company; B. A. Stone, with Langfield, Turner & Andrews; E. A. Bush, of Continental Manufacturing Company. From Holyoke, Mass.—W. A. Hall, for the Worthy Paper Company; George Tyler, for Holyoke Envelope Company. From elsewhere—Geo. A. Clark, of Reilly & Mackin, Newark, N. J.; F. K. McLoughlin, of Springfield (Mass.) Printing Company; Mr. Closson, of Plimpton Manufacturing Company, Hartford, Conn.; J. B. Sheffield, of J. B. Sheffield & Son, Saugerties, N. Y.; G. W. Dickerson, of G. W. Dickerson & Co., Essex, Conn.

There isn't much in the way of personals to be said about Cincinnatians. William Skinner is driving away as briskly as any of his confreres in trade, considering the times. George Stevens is doing quite a trade in fancy stationery, which is all but surprising in the present state of affairs. Ed. Bradley, of C. F. Bradley & Co., mourns because the days are growing short, which will soon prevent his baby from meeting him at the end of the bridge. John Becler, late with George Stevens & Co., has a position in the office of the Cincinnati Collector of Customs. Robert Clarke & Co. keep their show-windows all aglow with pictures, paintings, brilliantly bound books, fancy stationery, &c. They have a fashion of showing a fine oil painting in their windows now and then, and it is a sort of recommendation of a work of art for it to get a place there. Wilstock, Baldwin & Co. still have work in supplying the county with blank-books to replace those lost or damaged by the burning of the court-house.

PRINCE WILLIAM.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, SEPT. 30, 1884.

Continuing my tour of inspection through the Institute Fair, I find in the eastern gallery a prominent exhibit of school furniture and office supplies, which is made by Carroll W. Clark, one of Boston's largest jobbers. Such goods as are needed for the school-room, for office use, for library or for home purposes, are most tastefully displayed by the exhibitor. Within its carpeted enclosure visitors long to tarry; some inspected the merits of revolving book-cases, some trying the quality of Clark's new patent blackboards, and others examining the finish and style of the collection of school desks. Of patent book-rests quite a number are shown, but one in particular seems to attract the most attention because of its finish and its mechanical construction. This ingenious device is called "Hayner Combined Book and Dictionary Holder." Though some-

what similar to the general run of book-rests, it differs from them in many points. Instead of holding one book at a time, it is arranged so that two large books can lie open upon the stand. For those whose reading prompts them to make frequent reference to a dictionary, for a student when translating, or for professional men needing books of reference, this new book-rest is of special value. The leaves upon which the books rest can be adjusted to any angle desired, while upon the shelf or base of the holder can be placed other books, or even a lamp if wanted. The holder rests upon a tripod or stand, and is easily rolled from place to place. Its height is also readily adjusted to suit. For a revolving book-rest this takes the lead. It is really two in one. Its ornamental appearance is fully equal to its usefulness, making a unique article of library or home furnishing.

From the eastern gallery I stroll along to the front hall, passing many beautiful displays of various descriptions, until a gathered crowd attracts my attention. The object of this interested assembly I find to be the Remington standard type writer, which is dexterously operated by a young lady attendant. Sample sheets of type writing, done while waiting, are handed to eager takers, who, as they move along, marvel much at the beautiful results of the wonderful little machine. By the use of the Remington type writer good business men need not expose bad penmanship.

Crossing the hall I find a novelty which strikes me as being of special interest to the trade. It is a binder. Not a big cumbersome binder with heavy board covers and interlocking back attachment, but a simple device for every-day use. Such as every business man would find handy in the counting-room for binding loose paper together. Such as literary people have a pressing need for to bind manuscript. Just such a device as every family has frequent use for. This is what the "Ready" binder is. In explanation of this little binder I would say that it consists of two plated stout wires, twisted about each other in the middle, whose ends are so bent as to form clamps which close tightly together. Between these clamps papers to be bound are placed, small rings sliding along the wires compress the clamps, holding the paper securely in place. By sliding the rings to the twisted part of the wires the clamps are opened when more papers can be added, or a portion may be removed without displacing other papers. This little binder is always ready for use. It will hold one sheet or hundreds. It does not mutilate the paper, nor is it expensive; in fact, it is very cheap. In size the "Ready" binder ranges from three inches to a foot and a half in length. This binder has heretofore been presented only to the local trade to whom large quantities have been sold, but the manufacturers, R. E. Bean & Co., Franklin, N. H., are now prepared to extend their business and so present an illustration of the "Ready" binder with its claims to the attention of the trade through the business columns of this issue of THE AMERICAN STATIONER. The binder will sell if only shown to customers. Very few visitors pass the exhibit

without carrying a "Ready" binder with them. It is just what is wanted.

Near by stands a show-case containing samples of "Coughlin's Novelties." The display is made by the manufacturers, the Coughlin Elastic Blotter Company, of Lowell, Mass. The elastic blotters for office use, the black-board erasers for schools and the pencil sharpeners and holders, all patented and made by this company, are staple articles with the trade, and too well known to need extended comment. The goods exhibited are very nicely finished, and are attractively arranged so that the attention of passers-by is immediately called to the display.

Alley & Keyser, of this city, have a show-case containing beautiful samples of holiday souvenirs in the card line. Every card displayed is hand-painted, and some of them are most artistically done. In the collection are Easter novelties, Christmas souvenirs, birthday remembrances, and menu cards. These goods are in satin, plush, wood and gelatinoid, and many new striking designs are shown. The goods are very rich in effect, and their bright colors lend a pleasing charm to the surrounding exhibits.

A little farther on looms up a tall, richly carved, plate glass show-case, which bears the firm-name of John A. Lowel & Co. This case displays a collection of menu cards and calendars, some hundred different designs being shown. No color work here! Nothing but finely executed steel-plate works is displayed, such as the house produces the year round.

In book-binding, J. G. Roberts & Co., of Boston, display samples of work which is most creditable to this house. The different processes of the art are illustrated by samples of work showing the many manipulations to which a folio is subjected before ready for the dealers' counters. Some extra large-sized albums, elegantly bound, are also displayed. J. G. Roberts & Co. make a specialty of albums, but manufacture only albums to order for colleges, societies, clubs or organizations wanting some special size or design.

King & Merrill, I notice, are also represented by a display of "King's Nonpareil Pens," and "King's Nonpareil Ink."

To see so many exhibits of stationers' goods and novelties at the Institute Fair is very gratifying to such members of the trade as have had occasion to visit the exhibition, from some of whom I have heard encouraging comments relative to the extent of the trade and its kindred industries.

Among those who visited the city last week, and who took advantage of the accommodation offered at the Printers and Stationers' Exchange, was William A. Carrie, representing the house of J. C. Hall & Co., manufacturing stationers, of Providence, R. I. Sisson's magic binder and patent triplex order-books for salesmen and telegraph companies are among the specialties of this house, which Mr. Carrie is handling with the city trade, and for which he reports ready sales. A. L. D.

Labor to keep alive in your breast that little spark of celestial fire called conscience.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 302,918. Attachment for Ticket Printing, Numbering, or Counting Machines.—Stephen D. Layman, Boston, Mass.

A ticket-reversing attachment for printing, numbering or counting machines, consisting of a flattened curved tube provided with a slot in its side, the metal at the edge of the slot being curved or bent inwardly to produce friction on the tickets.

No. 302,933. Bill-File.—Peter W. Peckham and Samuel D. Cooper, New York, N. Y.; said Cooper assignor to said Peckham.

No. 302,942. Paper-Floor Block.—William E. Rockwood, Indianapolis, Ind.

Consists of layers of paper or similar material having the edges turned upward and solidly cemented and compressed into blocks, and further united by dowels which pass transversely through two or more of the outside layers, or entirely through said block. The blocks may also be connected by the dowelpins, if desired. The dowels also provide means for nailing the blocks to the foundation supports.

No. 302,943. Paper Floor.—William E. Rockwood, Indianapolis, Ind.

Consists of layers of paper or similar material laid side by side, with the edges upward, and solidly cemented and compressed into blocks, and further united by transverse rods secured by nuts.

No. 302,953. Combined Inking-Pad and Register.—R. Manson Smith, Baltimore, Md.

The combination of a vertically-moving inking-pad, yielding mechanism to sustain the pad in an elevated position, registering device, and means to connect the pad with the register, whereby in the depression of the pad the register is put in operation.

No. 302,989. Device for Stringing and Filing Papers.—Wm. E. Elam, Americus, Ga.

A device for stringing and filing papers, consisting of a frame provided with a slotted base and an extended arm, to which is connected a latch, and a wire for stringing the papers detachably connected to the frame.

No. 302,996. Side-Stick for Printers' Galleys.—John F. Funk, Springfield, Ohio.

No. 303,007. Combined Calendar, Paper-Weight, &c.—William Alfred Haywood, Savannah, Ga.

The combination, with a cup having the numerals of the days of the month produced on the top edge of a tubular section within the cup, and having the names of the days of the week on its top edge, and of a cup held within the tubular part, and having the names of the months on its upper edge or rim, and of means for locking the two cups and the tubular part together in the desired position.

DESIGNS.

No. 15,237. Font of Type.—John Graham, Chicago, Ill., assignor to Marder, Luse & Co., same place. Term of patent, 3½ years.

No. 15,238 to 15,242, inclusive. Wall-Paper.—Paul Groeber, New York, N. Y. Term of patents, 3½ years.

WHITING PAPER CO., HOLYOKE, MASS., MAKE MORE FINE PAPER THAN ANY OTHER CONCERN IN THE WORLD. THREE MILLS. DAILY PRODUCT, TWENTY TONS. ALL DESCRIPTIONS OF LOFT-DRIED PAPERS.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. ☞ Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

The *Houston Post*, Houston, Tex., has been attached.

McNish & Co., printers, Pittsburg, Pa., have sold out.

M. Callisher, stationer, &c., Eureka, Nev., has been burned out.

A. L. Farrand, printer, Philadelphia, Pa., has sold out at auction.

Orville Espy, publisher of the *Mirror*, Seattle, W. T., has suspended.

The *Herald Publishing Company*, Seattle, W. T., has suspended publication.

P. B. Pettijohn, publisher of the *Asotin Spirit*, Asotin, W. T., has sold out.

C. A. Brewster, bookseller, &c., Chesterfield, Ohio, has sold out to John Penrose.

C. Vail, bookseller and stationer, Humboldt, Kan., has sold out to Peter Hillinghausen.

A judgment for \$2,542 has been entered against the *Graphic Company*, New York city.

A. W. Morris, publisher of the *Journal*, Defiance, Ohio, has been succeeded by Morris & Good.

The fixtures belonging to George T. Smith, bookbinder, Newark, N. J., have been sold at auction.

Lee & Phelps, newsdealers, &c., North Adams, Mass., have dissolved partnership. A. A. Lee continues the business.

Keubler & Wolf, publishers, Mansfield, Ohio, have dissolved partnership. D. L. Keubler succeeds to the business.

William F. Fell, only partner of William F. Fell & Co., printers, Philadelphia, Pa., has assigned to William McLean.

J. W. Grier, printer and publisher, Thornbury, Ont., is closing out his business at that place and removing to Clarksburg.

The Atlantic Publishing Company (not incorporated), Toronto, Ont., has been dissolved. R. E. Meagher retires, and the business is continued by the remaining partners. The style is unchanged.

Robert H. Ingersoll has a fine line of novelties at his new place of business, No. 45 Fulton street. He is offering in addition to his specialties in hand stamps and printing outfits a variety of toy-printing blocks for use in schools and other places. These blocks by the use of white ink give clear impressions on the blackboard, and hence are excellent for object teaching. One of Mr. Ingersoll's new toys is called the Universal Type Writer, which consists of a series of rubber-faced type showing characters, letters and figures, arranged on two nickel-plated steel rods, the whole arrangement being inclosed in a neat case. The characters, letters, &c., may be used in various ways forming an endless variety of amusement and instruction.

Henry Levy & Son have a fine line of artificial flowers, including rhododendrons, water-lilies, moss roses, calla lilies, tea roses, begonias, &c. These come in rustic pots filled with real moss, chemically prepared, enabling it to be kept any length of time in any climate; they also come in rustic baskets for hanging on chandeliers or in the window. The firm has also a complete line of French artificial flowers in decorated papier-maché and hammered brass pots. The baskets are filled with trailing plants and wild-ivy, and the flowers are remarkable for their close imitation to nature.

S. S. Stafford is doing a brisk business notwithstanding the dull season. He is 'way behind his orders, and the demand for his inks is so great that he finds it impossible to fill them with the promptness often desired.

The duplicating of so many orders, from samples for the family Bibles, published by the National Publishing Company, Philadelphia, seems to be good evidence of the popularity of its editions.

W. H. Hasbrouck is having a good sale for his fine leather and plush-covered blotter tablets. Dealers who have not received samples should send for them at once.

Claridge, Allen & McBride, publishers of the *Texas Stockmen*, San Antonio, Texas, have dissolved partnership, the firm is now Claridge & Co.

J. W. Carter, of the firm of Carter, Dinsmore & Co., returned from Europe on Friday last by the steamer *Adriatic*.

J. W. Kendall, publisher the *Canton Carrier*, Canton, Kan., has sold out to Biddellcome & Lee.

C. C. Gaw, publisher, Grant City, Mo., has sold out.

M. Kauffman, stationer, &c., San Francisco, Cal., has been attached.

H. L. Street, bookseller and stationer, Sonora, Cal., died last week.

Harry Swift, publisher, Chapman, Kan., has been succeeded by Swift & Curtis.

Atwood & Sherburne, stationers, &c., Boston, Mass., have become insolvent.

W. E. Ward, publisher of the *Plumas National*, Quincy, Cal., has sold out.

John G. Overshiner, publisher, Daggett, Cal., has closed out and removed to Calico.

Currier & Brown, printers, Malden, Mass., have dissolved partnership. G. A. Brown continues the business.

Billings & Pierson, successors to Billings, Harbourne & Pierson, booksellers and stationers, San Francisco, Cal., have assigned.

J. G. Wirsching & Co., newsdealers, stationers, &c., Fort Collins, Col., have dissolved partnership. J. G. Wirsching succeeds to the business.

N. Gesell & Co., manufacturers of shades, &c., Newark, N. J., have dissolved partnership and a new firm has been formed under the same style.

The Easthampton Paper Company, Easthampton, Mass., has failed and called a meeting of creditors. It was incorporated in April, 1883, with a capital of \$30,000.

George W. Weaver, the publisher of the *Ilion (N. Y.) Citizen*, on the 26th inst. printed the first newspaper in the world, the type of which was entirely composed by a type-setting machine. The entire edition of 5,000 copies was printed by the aid of an electric motor, the same which, on March 14, printed Mr. Weaver's *Journal*, the first in the known world to accomplish the feat. Hundreds of visitors went to see the operation.

A destructive fire occurred at Natrona, Pa., twenty miles from Philadelphia, on the Western Pennsylvania Railroad, on September 30, by which the Pennsylvania Salt Manufacturing Company's acid manufactory at that place was damaged to the extent of \$100,000. The fire started at midnight, in the vitriol department, and the building, 230 feet long, 85 feet wide and 55 feet high, together with valuable machinery, was entirely destroyed. The building burned was fully insured, but in what companies and for what amounts the manager is

unable to say, as the insurance was all placed by the Philadelphia office.

C. Littlejohn & Co., paper-stock dealers, Boston, Mass., have failed.

O. H. A. Chamberlin, printer, Dunbarton, N. H., has moved to Pittsfield.

Ford & Gray, stationers, &c., Ione, Cal., have dissolved partnership. H. D. Ford continues the business.

William B. Guild, publisher, Newark, N. J., is to be succeeded by the Newark *Daily Journal* (incorporated).

The Stevens Lithographing and Engraving Company, St. Louis, Mo., has been incorporated with a capital stock of \$20,000.

A judgment of \$468 has been found against J. A. Scheleunes, manufacturer of morocco cases, Philadelphia, Pa., and execution has been issued.

The fall announcement number of the *American Bookseller* has been issued. Its record of new books, while unavoidably somewhat incomplete, is very large and contains few omissions.

The *Phrenological Journal and Science of Health* for October continues the series of articles begun in the August number on the subject of candidates for the presidency, with crisp and realizing sketches of Benjamin F. Butler and John P. St. John. Besides, there is a long list of other interesting reading matter together with the usual departments of health, agriculture, scientific notes, answers to correspondents, &c.

Attention is called to the advertisement on another page of the New York Stationery and Envelope Company, which manufactures and exports fine stationery and commercial envelopes, mourning papers, rubber stamps, &c. The company also carries in stock a full line of Marcus Ward & Co.'s royal Irish linen papers, which are made up in envelopes and letter papers of various sizes, or in any size to order. In addition to its line of stationery it carries an extensive line of Christmas and birthday cards, consisting of satin art-prints as well as cheaper productions of the lithographic art, imported and domestic. The firm is composed of gentlemen who have push and enterprise. Its motto is first-class goods at bottom prices.

F. H. Loss, Jr., 46 Murray street, is receiving weekly from Europe, direct from the factories, rich novelties for the holiday season. These include repoussé brassware, umbrella racks, pen and jewel trays, crumb brush and trays, ash receivers, papier-maché tea-trays, glove and handkerchief cases, crumb sets, artistic carved goods, glove, jewel and handkerchief cases, with and without music; ink-stands, book-racks, card-racks and many other novelties not to be found elsewhere. Prices are reasonable.

A receiver has been appointed for the Wilcox & O'Donnell Company, printer, New York City, and a judgment of \$167 has been recorded against the company.

Charles Sutphin, dealer in paper bags, &c., Chattanooga, Tenn., has sold out.

J. G. Wood, newsdealer, &c., Bolivar, N. Y., has sold out.

C. A. Lippman, manufacturer of children's carriages, Buffalo, N. Y., has been burned out.

James D. Whitmore & Co. have just placed upon the market an invention of great merit, and an article which is expected to have a very large sale at all seasons of the year. It is called the "Monogram Tablet," and is made in the form of a pad, with a cardboard top hinged and with an attachment of blotting-paper and black lines. The whole is mounted on gold-beveled cardboard, and is made in all of the various sizes of paper used for correspondence and commercial purposes, and also in all of the various qualities of paper which this house carries. It is claimed to be, without exception, the most elegant form of paper pad made. Although it has only been shown in some of the larger cities, the sales have been so great that a new department has been established in the house, with all of the necessary machinery for the rapid production of such goods, and a large force is kept busy day and night in their manufacture. This tablet is covered by letters patent, which have just been granted, and the claims of the patentee were allowed, it is stated, without question or argument. J. D. Whitmore & Co. give notice that, as all their claims are fully covered by patents, they will spare no expense in the protection of their rights in the premises, and all infringements will be prosecuted at once and to the full extent of the law. Members of the trade visiting the city are invited to call and

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

inspect this line, of which there are about thirty different styles, or samples will be sent on application to the manufacturers.

W. G. Johnson & Co., Pittsburg, forward their catalogue of counting-house conveniences. It represents a number of first-class specialties.

M. H. Eaton, Philadelphia, gives notice that he has not consummated the sale of his paper business and he will therefore continue it at his old location.

The October issue of "Our Little Ones" (Russell Publishing Company, Boston), has come to hand. It is full of juvenile entertainment and will be welcomed by its youthful readers.

The Esterbrook Steel Pen Company has brought out a new candidate for public favor, which may be deemed a writing-master's pen. Elasticity and fineness are characteristics of this pen, and it has been christened A 1.

Baker & Hayes, 125 North Fourth street, Philadelphia, have published a number of new advertising specialties of a taking character. The samples shown are felicitous in design and attractively presented. The trade ought to find a good sale for these novelties.

In another column appears the advertisement of Charles J. Cohen, Philadelphia, the well-known importer, whose visit to Europe this spring gives every assurance to the trade that the stock offered has been well selected, and that the lowest current prices have been secured. The extensive show-rooms are reported to be in admirable order, and the whole establishment is bristling with active trade.

The first annual convention of the Newsdealers of the United States was held on September 30 in Clarendon Hall, this city. Nineteen States were represented, and the number of delegates present was ninety. Forty were from this city. The meeting was called to order at 11 A. M. by W. H. Kuykendall, president of the Brooklyn Newsdealers' Union. C. W. Zeiber, of Philadelphia, was made chairman, and George F. Robertson, of New York, John King, of Philadelphia, and William Hanrahan, of Providence, secretaries. The session was private, and was principally devoted to discussing the organization of a Newsdealers' National Union.

J. B. Colt & Co. offer their popular line of magic lanterns this season in a greatly improved form, and they are said to have the best line of goods of the kind to be found in this country or abroad. Mr. Colt has, after considerable study, made a magic lantern, which seems to be perfect. The firm's prices, moreover, are low.

One of the cheapest linen markers offered to the trade is the "Universal Pocket Linen Marker," of Robert H. Ingersoll. It is used for both monograms and initials. The marker comes in a handsome slide-cover box, with a bottle of the best linen-marking ink. The price is so low that it can be retailed very cheaply.

The Anniston News and Stationery Company, Anniston, Ala., under the management of Frank Coker, receives by every mail the freshest daily newspapers and magazines in the country, and has them delivered by proficient and expert newsboys in Anniston and other towns.

T. N. Hibben, bookseller and stationer, Victoria, B. C., has taken C. W. Kammerer and W. H. Bone into partnership, and the firm will continue the business under the style of T. N. Hibben & Co.

The liabilities of Atwood & Sherburne, stationers and printers, Boston, Mass., who failed last week, are about \$3,000; nominal assets, \$6,000.

Cook & Shadinger, booksellers and stationers, Bourbon, Ind., have dissolved partnership. John C. Shadinger continues the business.

The Woodruff Publishing Company, publisher of the *Herald*, New Britain, Conn., has been succeeded by Woodruff & Brandegee.

Soule & Bugbee, publishers of law-books, Boston, Mass., have dissolved partnership. Charles C. Soule continues the business.

Shelton & Co., stationers, &c., Olympia, W. T., have been attached for \$4,000 and their store has been closed.

A stationery and bookstore has recently been started at Anniston, Ala., by Kinsey & Stanley.

Among the tradesmen in town during the past week was E. C. Palmer, of New Orleans, La.

H. R. Northrop, newsdealer, &c., Bethel, Conn., has sold out.

An assignment has been made by H. S. Perkins, dealer in pictures and frames, Cleveland, Ohio.

Bradley & Co., publishers, of Philadelphia, have been involved through Bradley, Garretson & Co., and are asking an extension. They claimed a capital of about \$50,000.

General W. A. Thorp, a prominent bookseller of Detroit, Mich., was found lying in his store, on Woodward avenue, on the morning of October 1, with a bullet-hole in his head. He was conscious, but could not speak, and will probably not recover.

At Philadelphia, Pa., September 30, a fire broke out in the paper warehouse of R. H. Forestall & Co., Fifth and Minor streets. The flames were confined to the lower part of the house, which was flooded with water. The loss from fire and water will reach \$300, which is believed to be covered by insurance.

William Garretson, doing business as Bradley, Garretson & Co., book publishers at Philadelphia, has become financially embarrassed, and has been endeavoring to get an extension from his creditors. His liabilities are reported at \$185,000, and the actual assets it is said will not exceed \$55,000. He has been in business many years, and has fourteen branches, in Chicago, San Francisco, Columbus, Ohio; Nashville, Brantford, Ont., and other cities.

A Superior Marking Ink.

The following recipe affords a marking ink which flows freely from the pen without running or blotting, becomes perfectly black upon application of a moderate heat, and will not destroy the texture of the finest cambric: Nitrate of silver, 1 ounce; carbonate of silver, crystallized, $\frac{1}{2}$ ounce; tartaric acid, $2\frac{1}{2}$ ounces; strong liquid ammonia, $\frac{1}{8}$ ounce; archil, 1-16 ounce; white sugar, 4 ounces; powdered gum-arabic, 12 ounces; distilled water, $\frac{1}{4}$ ounce. Dissolve the nitrate of silver and carbonate of soda separately in distilled water; mix the solutions; collect and wash the precipitate on a filter; introduce the precipitate, still moist, into a Wedgewood mortar, and add to it the tartaric acid, rubbing them together until effervescence has ceased; add liquor ammonia in sufficient quantity to dissolve the nitrate of silver; then mix in the archil, white sugar and powdered gum-arabic, and add as much distilled water, if required, as will make five measured ounces of the mixture.—*Exchange.*

pictures, &c., is to take a soft sponge, wash it well in clean water, and squeeze it as dry as possible; dip it in some spirits of wine, and rub over the glass, then have some powder blue tied up in a rag, dust it over your glass, and rub it lightly and quickly with a soft cloth; afterward finish with a silk handkerchief.

Compliments cost nothing, yet many pay dear for them.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. I cannot err and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TEN'ENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, OCTOBER 2, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum, 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE results of a meeting of the writing-paper makers at Springfield, yesterday, are given elsewhere. It will be noted that the manufacturers have made a definite advance in the prices of their goods, an action warranted by the limitation of the supplies of rags under the Treasury Department order forbidding their importation.

It has sometimes been stated in connection with paper exports to countries south of us, that in some of them the tariff is so high as to protect their paper industry. This may be true in the case of Mexico where paper has been made since 1829 and where a dozen paper mills turn out in all 25,000 pounds per diem; but this does not prevent Mexico from importing 70 per cent. of the paper which she consumes, the remaining 30 per cent. made at home, being confined to common printing paper. In Venezuela, whither we export annually about \$24,000 worth of paper and stationery, and no more, only one paper mill has recently been built, and that has so far been a failure. The consumption of paper there is large and the tariff is low, common unsized news entering duty free, as also ink. All other papers, except cigarette paper, pay only 2½ cents per pound; paper-hangings pay 7½ cents per pound; cigarette paper, 1 cent per pound. Stationery, except envelopes, pays 12½ cents per pound; envelopes pay a high duty, viz.: \$2 per pound; playing-cards are charged 50 cents; paper collars 12½ cents. There is certainly no reason why we should not enlarge our exports of paper and stationery to Venezuela, whose population exceeds 2,000,000 souls, and is one of the most cultured in South America. It is a country between which and New York several American and British steamship lines keep up weekly communication, and where American commerce has taken a firmer foothold than in most Spanish-American countries.

THE question has been asked: How are we to secure a change in the attitude of trade? The inquiry leads directly to another, which, if answered, points the way to the change desired. How shall we secure a return to confidence? It is plain that there is great want of confidence. No one imagines that large quantities of goods cannot be disposed of if people are only willing to take the chances of getting paid for them, but the hazard is too great to trust far or long, and people who would pay if they had the money do not care to incur liabilities which they may not be able to meet. If the system of paying cash for goods was more generally enforced, we should have a safer basis on which to

do business. It is claimed by some that an easy, expansive credit system is advantageous, but we have not yet been able to demonstrate practically that this is true. If people find that they can secure credit easily, they are likely to trade upon it unduly, and, going beyond the limit of capacity to pay, they bring on the crisis of distrust and failure. The custom of giving credit to almost everybody and for an indefinite time has prevailed in country places. Farmers, as a rule, keep running accounts at country stores, and sometimes such accounts go for years without balancing up. If the farmer is the independent citizen which he is said to be, he can afford to pay for what he buys. The drag on trade is the slowness of collections, as a rule. If the consumer pays his bills, the merchant can pay the man from whom he buys. The improvement sought must originate with the people. We believe in cash sales or short-time credits. It seems to be desirable to urge them. What do merchants say?

Roundabouts.

BY THE TRADE LOUNGER.

Quiet has been the distinguishing feature of the week. Why? Because it was near the end of the month! Why? Bless you, I don't know; never did know. Suppose it is because people work so hard in the beginning that they want to take a rest before going in for more labor. There are, to be sure, suggestions why business should fall off every thirty days and then make a fresh start, but logically, it is difficult to resolve why it should. Never mind! I shall not bother about it. I work hard all the time. When I don't work, I think—and think that thinking is about as hard work as a man can put himself to.

People in the trade seem to be jolly enough. Haven't heard a "croak" this week, and yet they say that trade is dull. It always will be as long as a man is not working overtime, going without his meals and sleeping in a street car.

That excellent paper maker and our good friend, the president of the Board of Trade, has got his watch back, I am told. Must have taken some skillful negotiation to get it out of the hands of the pickpockets. I wonder if my watch could be turned up. I mourn its loss and have done so for several years.

A few bits of trade ideas have been picked up during the week. Here are a few of them: Fancy leather comes now stamped in imitation of carved ivory. It is made up in card-cases, porte-monnaies, &c.

A favorite style of menu and guest cards, orders-of-dancing, &c., this season, is in the form of folders, decorated with various designs, printed in bronze of various colors and embossed.

A recent novelty in toys consists of a series of rubber-faced type arranged on parallel rods. The types print, besides all the letters of the alphabet, a great number and variety of figures, such as houses, soldiers, railroad cars, ships, trees, &c. Each type may be used any number of times in succession, and the set may also be combined in such a manner as to afford considerable amusement. For instance, a regiment of soldiers may be represented passing through a forest and approaching a town, a ship may be shown sailing at sea, or a railroad train at full speed, &c.

* * * *

The trade in Boston are very angry because the school committees there are supplied with lead pencils at manufacturers' prices, with the extra percentage off which the jobbers have been getting for cash. The pencils, it is said, are supplied by a pencil maker, who disclaims doing anything that had not already been done by certain other manufacturers.

* * * *

A great many novelties now come from Bombay, India. They consist of fancy cord and work-baskets, having a frame work of bamboo ingeniously covered with different colored threads, beads and beetles' wings. There are also a large number of fancy articles in carved goods, as jewel, cigar cases, &c., also the same articles in numerous novel shapes, finished with marquetry work. These goods are made by the natives of Bombay, and are said to be entirely different from anything of the kind previously introduced in this market.

* * * *

The price of school-books in Minnesota is to be governed by law after October 1. The Superintendent of Public Schools of that State recently issued a circular to county auditors notifying them of this fact and also of the prices at which the various text books are to be sold. The enactment gives the trade an advance of 10 per cent. above the prices set forth.

* * * *

Phytochromotopy. What a word! It is a new-fangled way of designating a process of producing impressions of leaves and plants on paper in such a way as to reproduce their natural colors.

* * * *

A Louisiana writer is of the opinion that the time will soon come when the flooring of stores and other public buildings will be built of strong, waterproof and indestructible paper tiles. He is also inclined to believe that street cars, the rails they run on and even the ties on which the rails are laid will be built entirely of paper. He thinks the same regarding furniture, dwellings, &c.

* * * *

A Georgia paper, commenting on the same subject, expressed the view recently that paper garments of every variety would be eventually manufactured. But it fears opposition to the general use of such material for clothing on the ground that no man would care to wear a suit of clothes liable at any moment to melt away if he is caught in a shower, or be torn in shreds when he is passing through a cloud.

Obituary.

JOHN AIKENHEAD.

John Aikenhead, who had been connected with John Gibson, of 82 Beekman street, New York, for more than twelve years, died after a short illness at Morristown, N. J., on September 4, 1884. Mr. Aikenhead was well known in the stationery trade, and his death will cause deep sorrow to his many friends throughout the country. He was a genial friend and a thorough business man. Had his life been spared (he was not more than forty years of age), he would in all likelihood have occupied a prominent position in the commercial world.

JAMES FITZGERALD.

James Fitzgerald, the well-known Holyoke (Mass.) bookseller and newsdealer, died of consumption on September 27. He had been in broken health for more than two years and of late declined rapidly. He was born at Ware, and when two years old met with an accident which resulted in a deformity of his body. He began business at Holyoke in July, 1872, in the basement of Orrell's building, afterward removing to Hutchins's block, where he was burned out in 1876. Owing to ill-health he was obliged to give up trade two years ago, and was succeeded by his brother. He won many friends, but his fidelity to business was in part responsible for his failing health. His funeral was held at the Sacred Heart Church on Monday afternoon.

Answers to Correspondents.

H. & J. want to know who has the new dictionary holder referred to in "Roundabouts" September 25.

Ans.—It is made, we think, in Boston. See our Boston letter in this issue. We do not know who controls it. Will try and tell you next week.

H. S. inquires: Who makes the "Vineyard" roller-skate?

Ans.—Samuel Winslow, Worcester, Mass.

C. asks for address of manufacturer of rubber marking-pencils.

Ans.—No pencils of the kind are now in market.

D. who asked last week for the Housekeepers' Calendar is informed that it is published by Charles Scribner's Sons, New York. It is adorned with a portrait of Marion Harland.

Meeting of Writing Paper Makers.

The writing paper makers' branch of the National Paper Makers' Association had a special meeting at Springfield, on Wednesday, to consider the question of reducing the production of fine papers, to counteract the bad influence on the market caused by the prohibition of the importation of foreign rags, which has increased the cost of paper-stock. After thorough discussion the following was unanimously adopted:

Resolved, That we will not offer our paper for sale or receive any orders therefor except at an advance of price from one or two cents per pound.

Resolved, That rather than sell our paper at a less advance than that named in the foregoing resolution we

will lessen our production until the price of paper advances sufficiently to cover the extra cost of rags and other material.

GOLD INK.—*Rundschau* quotes from Rhein-feld, in the *Seif. Ztg.*, the following process: Take equal parts of iodide of potassium and acetate of lead; put them on a filter and pour over them twenty times the quantity of warm distilled water. As the filtrate cools, iodide of lead separates in golden scales. This is collected when the filtrate has quite cooled, washed with cold water on a filter, and rubbed up for an ink with a little mucilage. The ink thus made must be shaken every time it is used, and is at best a rather unstable preparation.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, October 1, 1884. }

THE MONEY MARKET.—The money market is, abundantly supplied with loanable funds, and interest rates have undergone no quotable change. Call loans at the Stock Exchange have ruled 10/3 per cent. on stock collateral, and at the banks 5/6 per cent. has been charged for the same accommodation. Commercial paper quiet with prime endorsements negotiable at 5/5½ per cent., single named paper at 6/6½. The stock market has been moderately active, but irregular with a tendency toward a higher range of values. The fluctuations have been due chiefly to manipulation, as with exception of the bond issue by the New York Central, which was made last week, the situation has undergone scarcely any change. Railroad bonds moderately active and generally higher. Governments higher. Sterling Exchange is a shade easier, the posted rates having been reduced to 4.83@4.85, but the market has ruled quiet.

THE PAPER MARKET.—The first month of autumn having come and gone, an inquiry into the conditions and prospects of fall trade elicits the general opinion that, thus far, the results obtained have not come fully up to anticipations of a month or two months ago. In July, many of our leading city houses expressed themselves satisfied that the coming autumn would witness a moderate but distinct revival in business. The autumn has come, and there has been some increase in purchases, but thus far the total sales appear to be behind that of a year ago, and somewhat less than had been looked for. In short, the beginning of fall has not met anticipation, and there is, thus far, no sign of much improvement in the early future. The advance in price at the mills, noted last week as having been made in fine writings, is felt very little as yet by the dealers, as most of them are fairly well supplied with stock; but those dealers who may not be so fortunately situated will find that when they seek to place new orders the advance of 1/2c. to 1c. is quite a general thing. Dealers' selling prices have not yet been changed; but this will not make the case very long. The finer grades of print papers, book more particularly, hold to about the same prices as of late; but these cannot be produced at the present cost of rags and other raw material, and the paper cannot be sold at current prices, except at a loss to the manufacturer. The result will be that unless prices advance in proportion to the advance of stock a good many mills will be compelled to shut down, or continue running at a loss. News and manillas both hold their own very well, and are firm at quotations in dealers' selling lots. Straw boards are without any new feature. Straw wrappings are in a much better position than they were a month ago, most of the mills having stopped on account of the scarcity of straw and the low price of paper, so that surplus stocks are being worked off and prices are firmer.

THE STATIONERY MARKET.—The general report of dealers is, that trade is dull, somewhat more so than a week or two ago. This is attributed to the fact of its being the first of the month, and, therefore, the decrease of business at this time is not a discouraging symptom. Trade in the various lines is about the same as lately reported, there being little or no variation.

THE BEST IN THE WORLD!

THE LAMBIE DICTIONARY HOLDER

EASILY TAKES THE LEAD,

And a recent improvement puts it FAR AHEAD of all competitors. We solicit a comparison of this Holder with every other, and are willing to abide by your judgment as to its merits.

Wood for Book Covers.

There is a process of "carving" wood by softening it, and then pressing it in molds. In a Parisian process, known as Xyloplast, the wood is softened by steam and imbued with certain ingredients, which impart to it sufficient ductility to enable it to receive bas-relief impressions from four to five millimetres in height. For medallions, bosses, &c., mastic is forced into the hollows, so that all tendency in the compressed wood to split or open is completely overcome. For bookbinding purposes, much seems to be expected from this process, as it is applicable to the scented or odoriferous woods—cedar, teak, cypress, rosewood, &c.—which repel worms.—*Ex.*

Charity and pride have different aims, yet both feed the poor.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

A Patent Issue.

NEW YORK, September 26, 1884.

To the Editor of *The Stationer*:

My attention has just been called to an item in the Chicago letter published in *THE AMERICAN STATIONER* of September, 25, 1884, stating that my clients Geo. H. Sanborn & Sons, of this city, had been notified to stop the manufacture of the patent gauge claimed by a certain Chicago party.

Such a notice has been given and I have examined carefully the Letters Patent and both machines, only to find, however, that the claim of infringement is preposterous to the last degree. I have written the attorney who gave the notice to that effect and requested him to "bring suit at once if you (he) desire to test that question in the courts." Your item may, however, injure my clients. I therefore suggest to you the propriety of making proper explanations in your next issue.

J. A. SKILTON.

A Difference of Opinion.

WASHINGTON, D. C., September 26, 1884.

To the Editor of *The Stationer*:

Allow me a few lines in your valuable paper in answer to your Washington correspondent's "waifs."

I, for one, cannot comprehend how he should form his opinion of trade in our city by quoting three of our Pennsylvania avenue firms, and not consulting the judgment of such old and representative stationery men as Wm. Ballantyne, W. H. Morrisson, J. Bradley Adams, Robert Beall, J. D. Free and E. Morrisson, none of whom will confirm his reports of present trade or fall prospects, and all of whom know a change of administration (to this city) means a dropping off of sales for the fall of 1884. 'Tis true that school-books have been in good demand at very light profits, but we have not yet felt the boom of prosperity he seems to have found on the avenue. Being a regular subscriber to *THE STATIONER*, I thought I might venture to write a few lines to let you know the opposite views of some of our stationery men.

Visiting boys now in Washington are: Mr. Morton, of Hard & Parsons; Mr. Bainbridge, of C. T. Bainbridge & Sons; Mr. Abbot, of Baker, Pratt & Co.; Mr. Pratt, of Baker, Pratt & Co.; Mr. McDade, of Boorum & Pease; Mr. Brown, of Brown & Sanson; Mr. Spear, of Harrel Manufacturing Company, Boston; Mr. Allen, of White, Stokes & Allen; Mr. McFetridge, of Charles Moritz, Philadelphia; Mr. Knott, of Ph. Hake.

The past week has been made lively in attending to these hungry drummers. It is a common saying nowadays South that where McDade is, Knott is near by, and *vice versa*.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.Just the
ARTICLE
WANTED;
Handy,
Durable
and Cheap.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

R. E. BEAN & CO., Franklin, N. H.

BLACKHALL'S LIFTING ROTARY PERFORATOR

— WILL TURN OUT 100 REAMS PER DAY. —

Five Lines of Work, Line Through or Lifted at Stub Line.

THIS MACHINE HAS BEEN BEFORE THE TRADE FOR THE PAST FIVE YEARS, during this time it has carried for itself a reputation (among the best trade all over the world) that places it at once as the leading machine for the purpose. Hundreds of references can be given. It cuts a clean round hole—in three sizes) and is driven by Steam or Fly-Wheel.

For those who prefer a fine close Perforation giving a slotted line, I can supply Cutters that will give a clean cut like this. These who have my machines in use, and wish to have this sort of cut, can apply these Cutters to their Machines without trouble as they fit on to the shaft in the same way as the usual Cutters. Either or both kinds supplied with the Machines.

Price of Perforator, with five sets of Cutters	\$600	Round Hole Cutters, per pair	\$20
		Slotted Cutters, per pair	15

WHITE'S EYE SHADE,

-3- WITH AUTOMATIC SPRING. +-

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

Art Year-Book.

The Art Year-Book of the New England Institute is the first publication of the kind issued in this country. It is an outgrowth of the annual illustrated catalogue of the Fine Arts Department which, in 1883, reached its highest attainment, appearing as a sumptuous volume of about 150 pages, and containing seventeen full-page etchings, eleven albertypes and numerous photo-engravings, besides articles on various phases of American art.

The Art Year-Book may be regarded from three points of view; (a) The information its

pages give with regard to artists, exhibitions of the year, active art industries, graphic processes, and the position, purpose and policy of the New England Institute—its history, its art exhibitions and its general work. (b) The illustrations it has of art objects referred to in the text and of the work of noted, or technically skillful artists; (c) the practical value that it is to everyone interested in bookmaking, in that it has examples of etching, steel-engraving, wood-engraving, artotype, albertype, heliotype, phototype, lithography, photo-engraving, zinc-etching, hand-made paper, super-calendered paper, fine-laid book paper, parchment paper, and printing in relief from all these varieties of paper either in one color or in two or more colors. Almost every illustration is by a special artist of note.

The catalogue of exhibits that follows shows that the art collection contains 384 numbers, and that a specially interesting exhibit is made in connection with it of ancient and modern Mexican easel art.

The strength of criticism lies only in the weakness of the thing criticised.

The Paper and Printing Trades Journal.

(QUARTERLY.)

Subscription: **Two Shillings per annum**, post free. Postage Stamps received in payment.

EVERY Printer, Stationer, Papermaker, Bookseller, Author, Newspaper Proprietor, Reporter, in fact, everyone interested directly or indirectly (and who is not?) with Printing and Paper ought to subscribe. Useful Trade Tables, Trade Information, Heaps of Wrinkles, and Amusing Gossip in every issue.

WHAT SUBSCRIBERS SAY.

I could not do without it.—J. SPRINGER, Iowa City, U. S. A.

We are delighted with the Journal.—S. F. CHERITT, Grahamstown, South Africa.

In my establishment the Journal is devoured with avidity.—J. JENNINGS, Glos'ter.

It does not take a long time to see that it is worth its price.—S. B. SCHANTZ, Bethlehem, Pa.

Imparts the right sort of information, and every printer ought to have it.—B. PRICE, Bilston.

The Journal has a wonderful knack of making one understand what good printing is.—W. PERRETT, Glasgow.

Thanks to the invaluable services of the Journal to the world of typography.—W. WINGET, Torquay.

WHAT ADVERTISERS SAY.

CROWN POINT PRINTING WORKS, LEEDS.
Piles of applications for samples resulting therefrom.
ALF COOKE.

OXFORD WORKS, CHELTENHAM.
Your capital notices have brought in a large number of orders from printers.
THOMAS HAILING.

3 KING ST., FINSBURY SQ., LONDON, E.C.
From the first advertisement, I had over two hundred inquiries, most of them leading to good orders.
J. D. CARTER.

4 FALCON STREET, LONDON, E.C.
From one advertisement alone I had over thirty orders for wood letter and metal type.
F. WESSELHOEFT.

TO * BUYERS * OF * ADVERTISING * SPECIALTIES.

It was our intention to have kept you better posted as to what we were doing, during the last eight or ten weeks, but the sale and production of our Campaign Cards has absorbed all of our time, day and night. In the meantime our artists have produced a full line of

* CARDS * AND * SPECIALTIES,

too extensive for us to describe in detail. Send us \$1.00 for a complete line of Samples of Cards, or \$2.00 for Samples of all our productions, covering CARDS, FOLDERS, BOOKS, CHROMOS, &c., (even this does not cover the cost.) If the samples do not please you, you can return them and we will refund your money.

**No. 2,
\$25 Lantern
For \$12.**

**No. 4
\$12 LANTERN
For \$6.**

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of

all unsurpassed methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World. SCRAPTURE.

Subjects from both the Old and the New Testaments. TEMPERANCE, showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Slide Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MEN-OF-ALL KNOWLEDGE AND WITH VERY LITTLE TROUBLE. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'fr's, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

Binding in Human Skin.

At a sale of rare books and manuscripts in Paris recently, there was disposed of a fourteenth century illuminated Gothic edition of the Bible, with gold clasps, set with turquoises and bound in human skin. A copy of the "Imitation of Christ," now in the Carmelite library at Paris, is similarly covered. The human skin is said to preserve its brilliant whiteness forever, while all other parchments will turn yellow. It possesses, besides, the advantage of being easily embossed, the Bible in question being beautifully ornamented with *fleurs-de-lis*, sceptres, &c. On the other hand, it absorbs ink so freely that it is impossible to write upon it. The character of the skin is determined by the microscope. The human skin and its hair are readily distinguished from those of other animals.—*Ex.*

HUGHES' NEW WALL MAPS

Prepared expressly for School use under the personal supervision of WILLIAM HUGHES, F.R.G.S. (late Professor of Geography in King's College, London), whose name is of itself a passport to the accuracy and merit of any work on Geography. The NAMES are introduced with great judgment, and free from the common fault of overcrowding. The physical features are boldly and distinctly delineated, and the political boundaries are carefully colored. They are adapted to any series of geographies, no keys being required.

Mounted on Strong Cloth, with Rollers, Colored and Varnished. Size uniformly 54×68 inches.

World on Mercator's Projection.
World in Hemisphere.

North America.	England and Wales.
South America.	Scotland.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c, relating to memorandums made, such as life insurance notices, cards of appointments, &c.

Japanese Faïences and Porcelain.

At the Berlin Museum of Industrial Art there is now to be seen an interesting collection of Satsuma faïences, exhibited by Messrs. Wagner, who have for some time past devoted special attention to the artistic and industrial productions of the far East. According to the *Glashütte*, this collection includes vases of different forms and sizes, boxes, dishes, tablets, flasks, &c., as well as a number of figures. Among the later objects special reference is made to a group of children playing and a ship with the seven deities of fortune; this being one of the best known and most highly appreciated representations of Japanese art. In addition to the preponderating quantity of modern works of the best quality (surpassing in artistic merit the bulk of imported wares), the display includes some older specimens; the contrast thus rendered possible between the earlier and later productions of Japanese art being in itself an interesting feature of the collection.

The peculiar ivory tone of the glazed body (sometimes darker and sometimes lighter) is common to both periods, and this appearance forms indeed a distinctive mark of the Satsuma manufacture. Not unfrequently plain glazed articles are met with (either smooth or *craquelé*) or such ornamentation as consists of a heraldic device, or similar object, and of a slight gilding. For the most part, however, that fine yellowish tone is only a foundation on which the further pictorial decoration rests; this ornamentation being characterized by masterly execution and harmonious arrangement of color. This decoration is formed by colored painting on enamel and by gold applied in various ways. The subjects treated embrace the whole range of Japanese pictorial art, including historical, religious, and *genre* themes as well as landscape, floral, and animal effects. It is relatively easy to distinguish the older works from the more recent productions, which display an ornamental execution and an elevated tone as to coloring. Particular interest attaches to a few vessels in which a network of white enamel threads heightens the effect of the representations behind them. In another instance a small bottle-shaped vase is surrounded by a fishing-net composed of white threads, behind the meshes of which fishes are noticeable; being painted with considerable precision and evidently after close study of the originals.

Attention is called by the same journal in a subsequent article to the Japanese porcelain known as *Owari*, this name being the designation of a province in which it is extensively manufactured. The government has always claimed a certain right of direction as to the sale of this porcelain, and a commission of ten leading manufacturers was appointed for regulating its disposal. This arrangement has been altered since 1868. A ceramic school was established in 1882 at Seto-Nura, in the province of Owari.

Good housekeeping lies at the root of all the real ease and satisfaction in existence.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

WILMINGTON WHITTLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., October 6, 1884.

The close of September indicated some improvement in trade here, and much satisfaction is expressed concerning the outlook for October.

Visits among the printers find them the most busy men in the trade, the demand for legitimate work being reasonably good. With the approach of the November election they are confident that the printing, &c., usually required for campaign work will largely swell the volume of business.

With the stationers there has been no important change. The little spurt of activity which they experienced in the early part of last month received a decided check by the spell of intensely hot weather which followed. Since then they have jogged along in the beaten path, securing only a fair amount of sales.

The long-predicted advance in the price of envelopes has come, and dealers are in receipt of a circular from the manufacturers, declining to quote prices while the market remains unsettled. A well-known stationer here admits that the price of paper has long been too low and that it will stand the contemplated rise. He thought also that higher prices indicated better times. It has been suggested that the importance and necessity of saving rags should be impressed upon our housewives. What a splendid chance for a "corner in rags" lies within the possibilities of our mothers and sisters!

Travelers going north or coming south on the B. & P. R. R., the B. & O.'s new road, will cross the Brandywine on a magnificent bridge of iron and stone 108 feet high. The natural and romantic scenery greeting one while crossing this historic stream is grand. The high, rocky banks, at this season crowned with lovely foliage, and the several hives of industry nestling at their base, add much to the beauty of this famous place, and affords charming subjects for the canvas. A prominent enterprise in this locality, and within

view from passing trains, is the Augustine Mill of the Jessup & Moore Paper Company.

Recently accepting an invitation from a friend employed at the mill, a long desired opportunity was presented to your correspondent for observing the *modus operandi* of paper-making.

A walk up the south bank of the Brandywine to the wire suspension bridge, built by contributions of the mill employees, and over it to the Augustine Mill is a pleasant and favorite route.

Receiving permission from the watchman to enter, I was soon in charge of my friend. The tour through the mill inspecting the different processes in paper-making, from the dirty rags to snowy sheets, was one of much pleasure. The operation of the Fourdrinier machines was of special interest.

A fact worthy of mention is that much of the machinery used here bears the stamp of a well known Wilmington firm.

To the trade the Augustine is known as a three-machine mill. Its daily capacity is 30,000 lbs. of news and book paper.

At the door flows the stream, and its strength is a valuable auxiliary to an immense steam power. A branch track of the Pennsylvania Railroad gives facilities for rapid transportation to all markets.

Commercial travelers are again on the war path and as "thick as hops," numerically speaking. From the "metropolis" we have shaken hands with the affable John Fergusson, from R. Worthington, and the energetic H. P. French, of French & Choate. We have said "How are you?" to O. S. Bunnell, J. M. Rounds, Jr., with Molten & Munch, E. H. Longmire, from Charles Moritz; Charles L. Baker, of C. L. Baker & Co; the trim Harry Jones, of the Thomas W. Price Company, and last but not least, the good-natured Charley Wentzel, from J. G. Ditman & Co., all of the Quaker City. From Boston, Mass., came Mr. Tilton, representing Downes & Atwood. The "Monumental City" was represented by the sedate Alexander Glenn, Jr., from D. W. Glass & Co., and the indefatigable Maurice I. Lobe, of M. I. Lobe & Co.

The notice in your last issue of the decease of John Aikenhead, late with John Gibson, was read with surprise and pain by many of the trade here. It was my pleasure to know

Mr. Aikenhead, and during the several years of our intercourse always found him the same kind and genial gentleman. I voice the feelings of the trade, "that we have lost a dear friend."

TRACY.

BOSTON BRIEFS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Oct. 5, 1884.

Although the near future gives promise of a good trade, business is not at present very active. Jobbers are busily preparing for the anticipated demands which cannot be much longer deferred.

The small quantities of goods generally supposed to be held by retail dealers throughout the country, who must very soon begin to stock up, is about the only encouraging sign jobbers have to entertain. It is very generally remarked that the fall trade has had a tardy opening, though the volume of business to be done during the next three months is expected to bring up the average. Last year at this time much more activity was noticed than is now manifest, and the only cause that can be assigned for the pending dullness is political agitation.

Why it is that a national political canvass should so disturb the commercial industries of the country is a question for political economists to explain. That it does, is a settled fact. Political discussions seem to occupy a large share of the public mind while other matters are taken up as side issues. Go where I may and I meet business men whose object seems to impress others with the proper understanding of the "great question of the day," that their hearers may be induced to "vote the right ticket." Now, is it because of love of country that men neglect business, or is it because business being dull they have a little spare time to devote to a discussion of the country's needs? That is the question.

The backwardness of the fall trade cannot be due to a scarcity of money, judging from the daily outlay for political demonstrations; the people have money, and they are spending it. Here in New England the several railroads are running daily excursions to Boston, the attractions being the two great industrial exhibitions now being held in this city. These excursions are being well patronized, and very

few visitors leave the city without inspecting the mechanical inventions, art collection and novelties as displayed at these exhibitions.

At the "Old Mechanics' Fair," held under the auspices of the Massachusetts Charitable Mechanics' Association, I find among the extensive collection of exhibits a good representation of the stationery trade and its kindred industries.

Thomas Groom & Co., importers and jobbers of fine stationery goods and blank-book manufacturers, have a very attractive exhibit in the main hall. Among the goods displayed are two large account books—a royal ledger and journal which, for thorough workmanship and artistic finish, cannot be excelled by any manufacturer in the country. These books are elegantly bound in full calf, with paneled sides and mitred borders. The paper is the very best made, while the ruling and printed headings show great neatness. These large royal books are each provided with nickel-plated Bramah lock—which is claimed to be the best lock made. For private library use, this house manufactures octavo sets of account books, a set of which—cash book, journal, and ledger—is exhibited. These books show the same careful attention to detail, being full bound, with mitred borders and having printed headings. These octavo sets are furnished with an elegant rosewood case, into which they can be closely packed. The cases are mounted with nickel-plated trimmings. A number of smaller books are also displayed, the entire collection numbering some seventy-five. All of these blank-books were manufactured by Thos. Groom & Co., the entire work being done at their State street establishment. The goods displayed are taken direct from stock on hand, and show the high grade of goods carried by this house. These blank-books are open to competition, and are entered for the medal. For similar displays in years gone by, Thos. Groom & Co. have received no fewer than five medals. And there is little doubt but what another will be received at the present exhibition. The display is not equaled by any other exhibit of its kind in the fair. Hanging from gilded rods just above the glass showcase in which these account-books are displayed, are two handsome signs, bearing the inscription, "Thomas Groom & Co., No. 82 State Street, Boston, Importers of Stationery and Blank Book Manufacturers." The lettering is in gold, being deeply carved into wood through a surface of black silk velvet. The signs are covered with heavy plate glass and beautifully framed. None can pass the display without giving it some notice, it is so attractive.

On the other side of the main hall is a display of bottled mucilage and liquid glue, made by Whittemore Brothers & Co., of this city. To the trade, Whittemore Brothers & Co.'s "Triumph" mucilage is extensively known as a staple article of real merit. Its display here is for the purpose of keeping it before the people, whose wants in this line must be supplied by their local stationer. The demand for the Triumph mucilage and liquid glue is claimed to be on a steady increase, that is, if the manufacturers can judge by the large

number of orders which they are constantly filling for the trade throughout the country. At the last exhibition in this city in 1881 the Triumph mucilage received the medal for its merits.

Carroll W. Clark, jobber of school furnishings and office supplies, has an exhibit in one of the galleries. The display is quite comprehensive, embracing as it does such a varied collection of office specialties and school supplies. Shannon files and cabinet cases are given a prominent position and show to good advantage. Haynes' combined book and dictionary holder attracts no little attention from visitors, who pronounce it a very unique device for the library. Standing in the centre of this exhibit is a globe which is quite conspicuous owing to its great size, it being 36 inches in diameter. This globe is mounted upon a beautiful mahogany frame provided with rollers, and so nicely adjusted that a child can easily manipulate it, notwithstanding its great size. The globe is also furnished with a magnetic compass. The territorial divisions are hand-painted in bright colors, and all the bearings are silver-plated. Though exhibited by Carroll W. Clark, who has furnished the schools of New England with numbers of globes, this globe is manufactured by Gilman, Joslyn & Son, of Boston. Its cost, as stated by a placard attached, is \$300.

George H. Whitney, of Worcester, exhibits in a large show-case samples of Christmas cards and holiday novelties. The collection embraces satin and plush goods in original designs, all beautifully hand-painted.

Moulton & Goodwin are represented by a display of their specialties. This house is the selling agent for the Union Cabinet and Paper Company, and the many different styles of toilet cabinets made by the company are shown. The Union cabinets are all handsomely finished in nickel or bronze with ornamental wood ends, and are really an ornament wherever placed. Their utility has long since been recognized, and in consequence thereof the factory is kept running full time to fill orders as fast as Moulton & Goodwin can place the goods. Rolls of "Perfection" toilet paper are also displayed by this house. This paper, coming in a continuous roll, and being used in the Union cabinet, can be cut off as wanted without waste. So that promotes economy in the use of U. C. paper, and economy is wealth.

A. L. D.

PHILADELPHIA PARAGRAPHS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA, PA., October 7, 1884.

The stationery trade here shows signs of a little improvement. Your correspondent visited a number of the leading stationers to-day and the reports from each are more encouraging than they were a month ago. The school demand has been fully up to that of former seasons, and although almost over, as far as the bulk of it is concerned, yet even now there is a good deal doing from day to day. The commercial demand is also improving, but in this line trade seems to be withheld, possibly until political questions shall be decided and

general business shall assume a more settled state. The recent advance in paper, subsequent upon the rise in rags because of the stoppage of foreign importation, will probably lead to an advance in the prices of writing papers, envelopes, blank-book stock, &c. This advance has not yet taken place, but it is regarded as very probable, and that before very long. Some houses are anticipating this phase and are ordering more freely of staple goods so as not to be caught napping. But even the possibilities of higher prices will not induce any very heavy investments. No great rush is expected, and the dealers seem to think that they, if compelled to pay more for their goods, will be able to obtain a correspondingly greater price from their customers in turn. But those who have been wise enough to provide now against this emergency will be just that much better off than those who have not. There is bound to be a certain amount of steady demand, and although it may be delayed for a little while, it will come in the long run. In the meantime no decline is at all likely, but on the contrary, even the most despondent think that there will be a fair business done between this and next spring.

There is likely to be a good trade in holiday goods. Many of our concerns are sending out their travelers now, and already orders are being taken for this class of goods in a way that goes to show that there will be fully as much done this year as last. The importers have selected their stocks for this season with great care, and the display, as far as variety and taste are concerned, has never been as fine as at present. Taking into consideration the fact that prices are lower this season than ever, it goes to show that the hopes of the trade as to the volume of business that will be done are based upon a pretty solid foundation. Numerous and attractive as the various styles of goods are, it will be strange if the multifarious tastes of the American public cannot be satisfied. Not only have the marts of foreign countries been thoroughly ransacked to provide such goods as would meet the wants of the trade, but the finest articles of our domestic manufacture have been selected with a view of catering to every possible desire of a public that is daily growing more fastidious in its selections. For the next three months a large portion of the stationery business will be in Christmas goods, and, coupled with the regular demand from business sources, it will not be a matter of surprise to our people to find that in spite of low prices and narrow profits, the bulk of business in dollars and cents will equal and even exceed that of preceding years. It always seems that no matter how dull times are, there is generally enough money to be had to keep the holiday goods moving pretty freely.

J. B. Lippincott & Co., 715 Market street, are doing quite an active business in the stationery line this fall. The withdrawal of Moss & Co. and E. Claxton & Co. from the business has left just that much more trade to be divided among the other stationers, and this firm has managed to secure its share. It has a large and varied stock on hand, and is at

HENRY BAINBRIDGE & CO.,

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c. relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 per doz...\$24.00 | Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | **DISCOUNT TO TRADE.**

(Continued from page 472.)

present getting out a forty-page catalogue of its holiday goods, of which it has this year a larger and better selection than ever.

Wolf Brothers, 504, 506 and 508 Minor street, have recently extended their building to make room for their rapidly growing business. They have added one room, 90x64 feet, and another 20x60 feet. They are very busy at present in their envelope department, and think that prices will steadily advance while the supply of foreign rags is shut out. Their business has run ahead of last year's already, and they hope that it will continue to the end of the year. In their paper department they are meeting with a very encouraging demand for their new lines of "Bernard" folded paper and their Mill 10, No. 1 engine-sized flat paper. They have recently received a valuable addition to their working force in the person of Frank Miller, who has until recently been associated with J. G. Ditman & Co., now withdrawn from the business.

Paul, Baker & Bossert, 530 Market street, have been doing a very fair amount of business during the past month. In response to the query as to whether the election was having its effect upon the stationery trade, Mr. Bossert said that he thought that the depression which seems to occur in every electoral year was not so much the effect of the political excitement as the result of our system of overproduction, which about once in four years reached a culminating point, and brought about the cutting of prices and failures, which were unavoidable when people began to sell goods for less than cost. They had felt the effects of this periodical depression, but were always prepared for such times, and were careful not to overload themselves. So far this year, though perhaps hardly up to what they would like to be, they had no reason to think that they were any worse off than their neighbors. They were doing their fair share of what business was to be done, and were ready to do more when it turned up.

Elder & Bentley, 432 Market street, report quite an improving demand in holiday goods. Their travelers are out now, and are meeting with very encouraging success. They say that what they sometimes style the "cross-road trade," by which they mean the smaller dealers throughout the country villages, have not yet put in their appearance this fall. This class usually buys twice a year, and is almost always in by this time. But like all other tradesmen, seems inclined to put off buying to the very last possible minute. This firm also handles wall-papers, and is doing a very lively business in that line, being sold away ahead, and is likely to be kept busy for some time to come.

Chas. J. Cohen, 505 Chestnut street, has, perhaps, one of the largest and most varied stocks of holiday goods in the city. With a thorough knowledge of the wants of the trade and an enterprising spirit that is bound to bring him success in spite of hard times and close competition, Mr. Cohen has spared no pains nor expense to provide a line of goods that look as if they must almost sell themselves. From the cheapest of tiny paper-cutters up to

the most elaborately embossed bronzes, and embracing every imaginable article of elegance and usefulness in the stationery line, the display surpasses all of Mr. Cohen's previous efforts, and already he is beginning to find a ready sale for his novelties. In his manufacturing department Mr. Cohen is also very busy, and is confident that there will be a good business done between this and the end of the year.

PENN.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 East Madison Street,
CHICAGO, October 6, 1884.

A visit among the stationers here reveals nothing new regarding the trade beyond the fact that a perceptible improvement is noticed.

Keen & De Lang, 130 LaSalle street, report that they have received some very large orders for their inks this fall. They are expecting a rapid increase in their business in De Lang's inks as the trade become acquainted with their merit. Where their inks are known their trade increases constantly. Samples of their French copying-ink will be sent free to stationers on application.

The Tablet and Ticket Company is meeting with a good demand for its gummed letters, figures, cards and card pins, which are much better than the old painted or printed cards, as they are cheaper, more convenient and are neater and more attractive. Any person can make a number of different combinations in colors, &c., out of each hundred cards.

The Exposition is rapidly drawing to a close; the attendance has been very good throughout. Among the many exhibits the following named may prove of interest to stationers.

C. W. Sherwood's patent paper files are on exhibition. They comprise three distinct systems of handling office papers, which Mr. Sherwood challenges anything in the world to equal for simplicity, convenience, rapidity and economy in filing any quantity of letters, invoices, &c. By the board letter-file method the paper is punched as it goes on file, and may be called filing according to dates, or a daily, weekly, semi-monthly or monthly file, by indexing accordingly. For keeping papers where you put them, ready reference and general convenience, this file cannot be excelled. By using a cabinet filing case with the board letter-file (and, when the board is full, binding the contents with a McGill fastener or cord) you have a system of filing that entails no additional expense as long as you are in business. This system is decidedly advantageous and convenient for filing together, checking and receipting invoices and statements. The box letter-file method has indexes, and is so cheap that when a file is full it will be labeled and laid away and a new one substituted. It is cheaper to buy a new box file than a transfer case. The box letter-file has many good points. It can be used singly, or one for each month in the year, or in cabinet cases, and stored away like the volumes of a book. Therefore, after much labor and expense, many evils

have been eradicated, such as springs, wires, elaborate transfers, &c., and a thoroughly simple and pleasant system adopted without any red-tape processes. The tray letter-files correspond in method of filing papers to some popular systems now before the public, but have the merit of being cheaper, more simple, no springs, no clips, filing more paper in less space, no fear of spilling letters on the floor, and doing away with the necessity of transfer cases. When a tray is full, indorse the dates, lay away and substitute a new tray. It can be used singly or in cabinet cases, and stored away, like the volumes of a book, as fast they are filled. If transfer cases are wanted, the box file will be used as a transfer case for the tray file, making the handiest and most simple transfer case invented.

Nicol & Smith have a very interesting exhibit of specialties, among which may be mentioned the "Daisy Diamond Bag," which is a unique and pretty receptacle for the safe keeping of diamonds and precious stones when not in use. It is the only thing ever invented for that purpose which has proven a success. The interior is divided into four compartments, which prevent the jewels from coming in contact with each other. The bag or pouch may be worn about the neck by the simple adjustment of a tasseled cord or ribbon concealed in the dress. To ladies traveling, this little pouch is of the greatest value, for it is impossible to lose jewelry by theft or carelessness.

The portable pencil pocket, a very useful article, is manufactured by the same firm. Pencils never drop out of it, and points are always protected. Salesmen or business men of all kinds find this pocket valuable, and should not be without one. It can be placed in any vest pocket, and is different from all other holders, as there are no clasps or fastenings of any kind in sight. It will hold as many pencils as can be placed in the pocket.

An article which is being extensively used by portrait artists is exhibited by C. C. Minor & Co. It is called "The Metroscope," and is used for obtaining enlarged drawings from small pictures. They also exhibit an "Air Brush" used for rapid and beautiful shading.

Speaking of the Exposition brings to mind the World's Exposition to be held at New Orleans this winter. Vast preparations are already being made for representation there. The names of stationers who are preparing exhibits will be given at a later date.

The Illinois Central Railroad Company is preparing to accommodate the heavy increase of passenger traffic to that point, and its passengers are assured of a pleasant and comfortable journey.

Noz.

CINCINNATI CATAclysms.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, October 7, 1884.

A spell of hot weather which set in during the last week in September and extended through the first week in October has just given way this morning to a cold wave. The hot weather was with one consent accused of making business drag. Before the hot wave rolled over this way, business had picked up delightfully, and then that hot wave dashed

upon it and made it wilt. What business needs now is cool weather to brace it up. At all events, that is what the dealers say.

Manufacturers of mercantile stationery have no glowing stories to tell of a pressing demand by business men for commercial stationery. In this case it may be set down that business men in general are not expecting an immediate revival of trade. General mercantile trade is dull. Exchanges of commodities are not made swiftly. Retrenchment of expenses is the rule everywhere. Country dealers are not asking credit, and city dealers are not giving it. Business men generally attribute the present stagnation to something other than too much credit. For this reason they expect a revival of trade with a rush whenever it does come. How soon that thing, much to be desired, will come, is the interesting problem the solution of which they are patiently awaiting. Of nothing are they more certain than that "Old Time" will sooner or later work it out according to his own sweet will.

The Exposition closed last Saturday night, with the prestige of being the third in the series in respect to attendance. There was a remarkable lack of stationery goods in its displays. Stationers exhibiting in former years have been scattered all over the building, instead of being massed in one single group. They seem to have become tired of this sort of thing.

The Dennison Manufacturing Company reports a fair summer trade and the beginning of a good fall trade.

J. R. Mills & Co. say that orders still come thick and fast from all parts of this country for their reversible wrapper-envelope. For that matter, they are getting orders for this device from foreign countries in quantities that have exceeded all their early expectations.

The Charles Stewart & Co. Paper Company is having as fair a trade in its wide range of goods as any one could reasonably desire in these times.

There is no apparent relaxation in the demand for the Globe files. They seem to be wanted by everybody, and all cutting short of business by the dullness among early customers is more than compensated by the rapid extension of the demand for these goods in fresh fields.

John Holland finds little or no abatement in the call for his gold pens. The growth of his Territory keeps up the volume of his sale.

A. H. Pounsford in addition to his large list of staples is doing a good trade in fancy stationery.

PRINCE WILLIAM.

TORONTO TALKS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, October 3, 1884.

I went out one evening not long ago to hear a lecture by one of the big guns of the British Association. In one of his illustrations he told us that the world moved at the rate of 68,000 miles an hour, or 18 miles in a second—this beats Jay-Eye-See. We had heard this before somewhere, and never having tested it further than many another passenger in the same boat has done, I suppose we may take

it for granted. But somehow I can't manage to get over an infinitesimal fraction of that space of ground in weeks. It is almost two months since I wrote you, and although the heavens which have not tumbled in, and other calamities which might have followed have not occurred, here I am to all appearance a fixture. In the nature of things one should have moved on. Many additions should have been made, not only to knowledge but to the mammon of this world, and upon careful consideration I don't think that I have done either, and so am forced to present myself in the old garb, with which you ought to be familiar by this time, and which I leave for your fertile imagination to fill up.

Well, since I wrote you we have got through several things. The dog-days, for instance. And the dwellers on our Coney Island, as well as those who have flown further afield, are flocking home like swallows in the springtime. The Corps d'Observation of the British Association has come and gone, our Industrial Exhibition is over, and we may be said to be settling down again to the matter-of-fact affairs of every-day life. I made two attempts to see the exhibition, that is, that part of it contained in the main building, but the press of people was so great that I was glad to get out. I have very many dislikes, and a standing out one is to be crushed in a crowd. If I was about seven feet tall, or if my legs were arranged on the telescope principle, so that I could elongate myself, and had I the neck of a giraffe, so that I could get my head over to the front, it would not be so bad, but being of moderate stature and my vision not keen enough to see through a mass of men and women, I gave it up, and so can say only what all admit, that in every respect the show was ahead of anything of the kind we have ever had.

I am not a covetous man, that is to say, keeping the decalogue in mind. I don't covet my neighbor's wife, nor his ox, nor his ass, nor his servant—especially the latter; as a rule, they are very unmerchandiseable; but when your Boston man wrote early last month about a cool, agreeable temperature down there, when we were almost melted, I am afraid my desire were not quite square. I was in Ottawa on the first of last month, and while there the thermometer ranged from 90° to 95° in the shade. On my departure, I fell in with a small flying detachment of the great army of British savants who had gone on before, at the station. The train was late, and the heat oppressive. I watched their movements with some interest. At length, one of them asked me a question, which I answered, with some trepidation, because, you know, I never came in contact before with such a volume of British wisdom. Presently, half a dozen got around me, and, altogether, we had a very nice time. I was amused with many of their questions, and hope I gave them a few additional items about Canada that may be of service. But the heat—that was a realization altogether out of their calculations, and as we sped along in the confined car, I rather enjoyed their astonishment and the frequent use of handkerchiefs to remove the dripping perspiration.

I said: "Well, I suppose you have come to the conclusion that Canadians do not live all the year round in snowbanks." "Ah," said one, "it is precious hot, to be sure. I never experienced anything like it before." Well, those wise men have come and gone, and we hope large results may flow out of the visit.

Was it Dr. Johnson—if not, who was it?—who was wont to say to his friends, "Come, let us have a walk in the Strand," as if that were an Elysium where gods and goddesses aired themselves. I have been around there some, and have seen a good deal of common clay mixed up with the porcelain—but nearly a century makes a difference, and then another difference is affected by the kind of spectacles you look through. Mine, no doubt, have defections—but all I saw was a busy crowd passing to and fro, a kind of thing you can see in many another place. Now, come and let us have a walk along King street, not to look into the pretty faces that skip along, nor to peer into gorgeous windows, but to see some of the brains that set all this in motion. And first let me introduce you to the Rev. W. Briggs, who has just returned from a summer vacation in Europe, manager of the Methodist Book and Publishing House. Since we were here last you will notice many attractions. The rapidly increasing business of this house has compelled it to put in another engine, a larger boiler and more presses, with an additional Campbell book printing-press. Aside from its newspaper—which of itself is a big thing—its magazine, Sunday-school papers, and all that, it published last month the following named books: "Alderside, a Border Story of Seventy Years Ago," by Annie S. Swan; "Jack Halliday, a Grassmarket Hero," &c., by Robina F. Hardy. They have in press, "Studies in John," by I. Cynddyllow Jones; "Honest John Stallibrass," by J. Jackson Wray, &c., &c.

Next, Mr. Hutchison, of Russell & Hutchison. Our friend, you will observe, is a little under the weather; has been laid up with a severe cold. However, there is no let up in the business of the establishment. That goes on. They have now, and have had all the season, all that they can manage, and frequently more. In fact, the pressure of business upon them is so great that Mr. Hutchison says that they will be compelled to enlarge their premises.

This is R. Brown, of Brown Brothers, one of the hardest workers we have in the city, but you will observe that he is looking fresh and vigorous. Mr. Brown has only recently returned from Chautauqua, where he, with his family, must have enjoyed themselves, judging from appearances. I interviewed him today, and was told that there was no falling off in any of their departments. Their diaries, wallets, pocket-books, satchels, &c., were increasing in demand, and they had all they could do to meet the wants of customers. In their bindery they had been compelled from the press of work to put in new machines, and the want of space in their present premises was becoming a serious difficulty.

Let us have a rest now. Next week, if you are equal to the task, we will go out again.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 303,009. Opaque or Semi-Transparent Enameled Glass or Colored Glass.—Ernst Franz Wilhelm Hirsch, Radeburg, Saxony, Germany.

A globe or shade for a light, composed of opalescent glass that will allow the flame to be visible through it, and having the whole or a portion of the inner surface obscured, so as to render the flame invisible, but at the same time allow the light to pass through.

No. 303,012. Pen-Holder and Wiper Combined.—Peter Davis Horton, Grass Valley, Cal.

A pen-holder having a wooden stock, with a rabbit or recess in the lower end thereof, conforming to the heel of the pen, and a sliding tube adapted to slide over the heel of the pen, and hold it in position within the recess, and also to entirely cover the pen when not in use. A pen-holder provided with a cap and chamber at its upper end, within which cap is placed a roll of bibulous paper as a pen-wiper, and adapted to be shut within the chamber.

No. 303,013. Pen-Holder.—Peter D. Horton, Grass Valley, Cal.

No. 303,026. Device for Casting Printers' Leads.—Arthur H. McClure, Buffalo, and Adam Pfirsch, Aldegany, N. Y.

A device for casting leads, slugs, and other like printers' articles or furniture, consisting of a pair of hinged jaws or frames provided with handles on their opening and closing sides or portions, and fitted on their faces with plates adjustable with relation to each other, and constructed to form an open-ended mold of the required size and shape when the frames are shut to or closed.

No. 303,048. Mileage Ticket.—Charles Wesley Reiff, Philadelphia, Pa.

No. 303,057. Engraving Machine.—Jakob Schweizer, Soleure, Switzerland.

An engraving machine comprising a carriage for the pattern or model, and a carriage for the plate to be engraved, both having a longitudinal, reciprocating and a lateral movement, means for imparting the movements to said carriages, a burin arranged over the plate to be engraved and normally depressed into contact with the plate by a spring, an electro-magnet arranged and adapted to lift said burin when electrically excited, an electric circuit of which said electro-magnet forms a part, a metallic point, in said circuit arranged to press upon the pattern or model, and said pattern or model made from some conducting material, and its raised lines adapted to be brought into contact with the metallic point, and thus close the electric circuit.

No. 303,107. Stamp and Envelope Moistener.—David Greenleaf, Beaumont, Laredo, Tex.

No. 303,113. Ring for Games.—Milton Bradley, Springfield, Mass.

A ring for game purposes, consisting of a centre of wooden material having a braided covering of textile material, and having its meeting ends united by a dowel and suitable cement.

Foley's Patent Improved Stylographic Pen.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Noel Davenport, stationer, Cotton, Cal., has sold out to M. Archibald.

H. L. Wilson, publisher of the *Journal*, Lafayette, Ind., has sold out.

Stoy & Harrison, publishers, Lake City, Fla., have sold out to C. A. Finley.

The Davenport *Gazette* Company, Davenport, Ia., has been sold out by the sheriff.

Cypher Brothers, booksellers, &c., Monongahela City, Pa., have sold out to E. J. Kelly & Son.

The Middletown Publishing Company, publisher of the *Daily Herald*, Middletown, Conn., has sold out.

Gathwright & Gwynn, stationers, Sheldon, Mo., have dissolved partnership. The firm is now Charles Gathwright.

Charles T. Miller has connected himself with the Philadelphia Office of the Lockwood Press, and will call on its friends and patrons in that field in the interest of the extra number of THE AMERICAN STATIONER.

The Tower Manufacturing Company is offering a line of imported albums and ink-stands at low figures; also a full line of Peter Thompson's toy-books, which come in a variety of new designs in interior illustrations and illuminated covers, both in paper and linen.

Judgments for \$29,000 were entered against William F. Fell (& Co.), printer, Philadelphia, Pa., in favor of the estate of W. C. Mollerns, a former partner, who died in May, 1883. He says the merchandise liabilities are about \$10,000, and he proposes to pay in full, if given time; nominal assets, \$45,000.

Potsdamer & Co., Philadelphia, have just completed their line of new designs in etched folds. As all of their old designs were destroyed by fire the line is entirely new, and it seems almost impossible to conceive anything more elegant than those shown this season. These goods are calculated to sell readily in competition with steel engraved, for menus and for circular purposes. Send for handsome circular price-list.

The Acme Stationery and Paper Company will soon have ready what it calls a papeterie tablet. This will consist of a tablet, letter size, of fine unruled bond and plated cream papers, enclosed in a cover of Whatman's double elephant paper, one side of which will be decorated with a water-color painting. The decorations will be of many different designs, no two covers being alike. Each tablet will be put up in a handsome box, containing eighty envelopes. The article will be a production of which the company may well feel proud, and it will be a novelty which will undoubtedly command a wide sale.

Among the out-of-town tradesmen in town during the past week were Mr. Broughton, of the firm of Broughton & McCann, Hannibal, Mo.; E. E. Phelps, of Phelps & Bryant, St. Joseph, Mo., a representative of the Free Press Association, Burlington, Vt.; J. D. Gould, Corunna, Mich.; Mr. Burke, of J. W. Burke & Co., Macon, Ga.; Mr. Burke, of J. W. & E. W. Burke, Athens, Ga.; H. H. Shepard, Kansas City, Mo.; George Rayneal, Jr., Washington, D. C.; Mr. Eyrych, New Orleans, La.; J. B. Harrison, Pittsfield, Mass.; Mr. Righter, Charleston, S. C.

Charles P. Bartelson, 825 Arch street, Philadelphia, has got out for the holidays a very laughable sketch entitled "The Toothache," as imagined by Horace Mayhew and realized by George Cruikshank. This is a delightfully funny little book for children. It is highly illustrated in colors disclosing some striking and funny situations.

The "Publishers' Trade List Annual" for 1884 has been received. It is a volume as large, if not larger than any of its predecessors; it contains the latest catalogues and indicates careful preparation. It is issued from the office of the *Publishers' Weekly*, 31 and 32 Park Row.

The Globe Files Company, C. M. Ward, agent, 28 Bond street, has issued two new sheets for substitution in its catalogue. These refer to document-boxes and Congress tie-envelopes, in which the company has introduced the latest improvements and which are desirable goods.

J. A. Joel, 82 Nassau street, has issued an illustrated price list of Grand Army goods of all kinds, electrotypes, &c., which will be available to parties in need of such articles.

The Monroe Dry Plate Company, Rochester, N. Y., has been dissolved. George H. Monroe continues the business.

Daniel F. Keeler, stationer, Park City, Utah, has assigned.

A new map and guide to Kansas City, Mo., has just been published by H. T. Wright, of that place.

Jerome B. Bell, proprietor and editor of the *Sunday Star*, Wilmington, Del., has been sued for libel by Edgar M. Hoopes, of the *Morning News*. Bail, \$10,000.

J. Q. Preble & Co. give notice that in consequence of the advance in the price of paper the prices of their goods are subject to change without notice.

Visitors to the city wishing to see John Thompson in the play of "On Hand," will find that actor located at his own theatre on Eighth street, near Broadway.

J. A. Chain, of Chain, Hardy & Co., Denver, Col., will be in New York for about two weeks after October 10. He will make his headquarters at 224 East Twelfth street.

Judgments amounting to \$50,092 have been found against William Garretson, of Bradley, Garretson & Co., publishers, Philadelphia, Pa., and execution has been issued. The firm asks an extension on some accounts of six months. Its liabilities are reported at \$185,000. It has fourteen branches in various cities of the United States and Canada.

The managers of the Franklin Institute, Philadelphia, struck a bonanza when they secured Jules Viennot to take charge of the press matter and advertising for the Electrical Exhibition. Mr. Viennot obtained for them the highest possible results from a financial standpoint, and acquitted himself in a most satisfactory manner to all concerned as well as with great credit to himself.

The advertising novelties lately issued by Baker & Hayes, 125 and 127 North Fourth street, Philadelphia, comprise some very pretty combinations of color-work. The designs, No. 426, represent fruit and flower pieces, with plate, china, &c. No. 415 is a series of girls' heads. The hobby-horse series depicts in an amusing way a number of men who have become public characters. No. 606 is a folding series with gold background, and the same comes in single cards in No. 421. Nos. 419 and 420 are comic juveniles; Nos. 410 and 412 are bright floral designs; No. 406 is a commentary on banking—from a wine-supper to a crust in a prison-cell; No. 411 is a pretty "good-luck" series on azure ground. There are a number of other designs, together with

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

very good portraits of the different presidential candidates.

J. A. Schleunes, manufacturer of morocco cases, Philadelphia, Pa., has been sold out by the sheriff.

Etris & Adair, dealers in paper hangings, Philadelphia, Pa., have been sold out by the assignees.

F. S. Hasbrouck & Co., manufacturers of envelopes, &c., New York city, have dissolved partnership. John F. Diemer continues the business.

Isaac F. Bloodgood, treasurer of the Isaac F. Bloodgood Co., Limited, sand and emery paper manufacturer, Williamsport, Pa., has failed, but it is thought that it will not affect the company. His liabilities are reported at \$60,000 and nominal assets, \$20,000.

Bradley & Co., publishers, Philadelphia, Pa., ask an extension. They were involved through Bradley, Garretson & Co., who owe them \$30,000. The liabilities are about \$30,000, and nominal assets, \$40,000, which would probably not sell for over \$10,000 if forced.

F. H. Loss, Jr., has just received by steamer Gellert a large invoice of novelties in Swiss carved goods for the holiday season. These include book slides in walnut and cherry beautifully carved in relief, stamp boxes with owl heads and other curious designs. Wall brackets, inkstands, Christmas card-holders, a variety of sizes of owls, musical boxes, satin wood, jewel glove and card cases—adapted for fine retail trade and not to be found elsewhere.

One of the most serious fires that ever visited Holyoke broke out in the basement of No. 2 Mill, belonging to the Newton Paper Company, at an early hour on Saturday morning. Eight heating engines and two machines were burned, leaving one machine and three engines. Three stock-houses were burned, in which were stored about 500 tons of paper-stock of various kinds. Treasurer Clark states that the value of the property that the fire reached—mills, stock-houses, stock, &c.—was \$150,000. The total loss will probably reach \$75,000. The fire is presumed to have resulted from spontaneous combustion. The insurance is \$45,000. It is understood that the mill will be rebuilt. The No. 1 Mill is left standing.

The friends of Charles H. Lamport, who for a number of years was treasurer of the National Blank-Book Company, will be glad to know that he can be seen as of old at Boorum & Pease's, Reade street, New York.

C. Littlejohn & Co., paper-stock dealers, Boston, Mass., have filed a petition in insolvency. The liabilities are about \$1,700, to pay which they have a small stock. The firm consists of Clement Littlejohn and Robert M. Belt. Mr. Littlejohn owes on his private account \$2,000, and has no assets.

Charles McDonald, for many years connected with Smith's bookstore, and subsequently with Price & Snyder's, Chicago, Ill., has recently established himself in the news and periodical business at No. 55 Washington street, in that city.

The Providence Press Company, publisher, Providence, R. I., has sold out to Z. L. White.

E. A. Church & Co., wall-paper dealers, &c., Lincoln, Neb., have been succeeded by S. E. Moore.

Charles M. Holton, publisher of the *Record*, Yakima, W. T., has sold out to the *Capital* Publishing Company.

Stimson & Stimson, wall-paper dealers, Terre Haute, Ind., have been succeeded by the J. W. Roberts Company.

William Wood & Co., publishers, New York city, have dissolved partnership. William H. S. Wood continues the business under the same style.

Notice of a special meeting of the American Paper Makers' Association is about to be issued by Secretary D. P. Crocker. The meeting is called for Wednesday, October 22, at the Metropolitan Hotel, New York. It is held pursuant to Article 12 of the By-Laws, to take into consideration the peculiar condition of the trade at this time.

The proposition made at the recent meeting of Hand & Ellsworth's creditors to accept 50 cents on the dollar is receiving the signature of very nearly all of the creditors, very few in number or amount yet lacking to complete the settlement. The firm has received a number of letters from its creditors very similar to the following written by a prominent Eastern manufacturing firm: "Enclosed please find the compromise as requested. We hope you may be successful in securing all the signatures and soon get started again, and be as

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

successful as your close application to business has warranted you should be."

E. Williams & Co., printers, Attleboro, Mass., have become insolvent.

Edward L. Fitzgerald, paper-stock dealer, Boston, Mass., has been damaged by fire.

Mark H. Musgrave, publisher of the *Courier*, Rathdrum, Idaho, has been burned out; loss, \$1,000.

Zesbough & Corrigan, dealers in picture-frames, Minneapolis, Minn., have dissolved partnership.

F. R. Scott, newsdealer, &c., Warren, Pa., has been damaged by fire and water. His loss is estimated at \$1,000.

Wall Brothers, manufacturers of inks and extracts, Denver, Col., have closed out and removed from the place.

Christy, Walcott & Co., manufacturers of paper-hangings, New York city, have formed a limited partnership, with special capital of \$195,000, to June 30, 1887.

Mintzer Brothers (agents), book-mounters and gilders, Philadelphia, Pa., have dissolved partnership. William G. Mintzer continues the business under the style of the Exchange Nickel Plating Works.

The National Publishing Company, Philadelphia, reports large sales for its new line of family Bibles, with the contrasted Testaments. The new, bright designs of the bindings, and the superiority of the letter-press, command for them a ready sale.

Joseph L. Lyon, late with William Mann, 529 Market street, Philadelphia, has associated with him William S. Nash, and purchased the business of Geo. W. Arms & Co., northeast corner of Fourth and Chestnut streets. The old business will be increased with a full line of counting-house stationery.

One of the most varied and extensive lines of both cheap and satin Christmas and birthday cards is that offered by John Gibson, whose line is not only comprehensive, but is decidedly attractive, the materials used in its make-up being the best in the market. The line is very artistic, consisting of both hand-painted and regular satin goods, and each design shows a degree of freshness and originality that will delight the eye of the most exacting buyer, whether a dealer or consumer.

Jean Robie, the Belgian flower painter, has a surprisingly versatile genius. He writes as easily as he paints, and portions of his travels in Ceylon and British India have been published in the *Independence Belge*. He is exceedingly able as a colorist, and his flower-pieces have an enduring charm, but are so subtly rendered that their reproduction is extremely difficult. A very successful effort has recently been made to reproduce one of his latest works by color printing on satin. As a publication it is unique, and suitable either for an easel picture, panel decoration or for framing.

Keuffel & Esser are making a drive on palettes of their own manufacture this season. The palettes are made of numerous kinds of hard and fancy woods and come in all shapes, and are finished in oil or are finely polished. They have also a line of folding palettes, which are becoming quite popular with artists, as when not in use they can be folded, thus preventing the fingers or clothing from being soiled by the paint. The firm's facilities for manufacture are such that it can afford to offer these goods at low prices.

The *Trade Journal* Printing and Publishing Company (Albert Rubincan, proprietor), printer and publisher of *The Trade Journal*, Philadelphia, Pa., has been sold out by the sheriff.

Sackett, Wilhelms & Betzig, lithographers, New York city, have dissolved partnership. The firm has been succeeded by Sackett, Wilhelms & Betzig (incorporated).

Studebaker Brothers, publishers, Riverside, Cal., have dissolved partnership. J. A. Studebaker continues the business.

Mr. Davis, of Putnam, Davis & Co., Worcester, Mass., has recovered his health, and is now attending to business.

Christian H. Hershey, of the firm of Hey-singer & Co., dealers in novelties, Philadelphia, Pa., is dead.

Le Count Brothers, San Francisco, have secured the agency for Caw's inks on the Pacific coast.

Wm. A. Throop, of Lapham & Throop, booksellers and stationers, Detroit, Mich., is dead.

A. Eibank, publisher of the *Zeitung*, New Braunfels, Tex., is dead.

Robert Hornbeck, printer, Riverside, Cal., has been succeeded by L. M. Holt.

Alexander Major, newsdealer, &c., Portland, Me., has been adjudged insane.

T. N. James & Co., publishers, St. Louis, Mo., have asked for a partial extension.

Cornelius White, paper stock dealer, Cambridge, Mass., has been damaged by fire.

L. Basch & Sons, dealers in paper-stock, Columbus, Ohio, have been damaged by fire.

W. H. Edwards, president of the *Courier* Company, East Saginaw, Mich., has sold out.

Gough & Weber, manufacturers of books, &c., Kansas City, Mo., have dissolved partnership.

Paul Wachenhusen, bookseller, &c., Silver City, N. M., has been burned out. Loss, \$1,200; partly insured.

The business of H. Manneck's Son & Co., manufacturers of paper-boxes, New York city, is in the hands of a receiver.

Hardman & McMillan have succeeded Mrs. A. W. Hardman, publisher of the *Hoosac Valley News*, North Adams, Mass.

Alles & Conant are rushed with orders for their line of plush and fancy wood work-boxes, writing-desks, &c. Their factory is in operation from an early hour in the morning till eleven o'clock at night, and they are so crowded with orders that they have been obliged to refuse to pledge the fulfillment of new orders with the promptness demanded.

STAFFORD'S AMERICAN INKS.

Annual Sales, Five Million Bottles.

Stafford's Commercial Ink is a limpid writing fluid, with a very dark blue color at first writing. It makes as distinct a mark as any black ink, and turns to bright permanent black in a few hours.

To adapt this popular ink to the requirements of all classes of trade, I offer it in the 2 oz. Widemouth Bottle, as per cut below at the prices named.

I would earnestly call your attention to this article as the cheapest ink, considering its quality, ever offered.

ACTUAL

SIZE.

2 oz. Widemouth Cone, with Wood-Top Cork.

STAFFORD'S COMMERCIAL INK,

Packed in Boxes of 3 dozen each.

1 Gross, Nett,	\$3.00
5 " " per gross,	2.60

Please Write for Quotations for Large Quantities.

S. S. STAFFORD,

218 Pearl Street,

NEW YORK.

Stafford's Commercial Ink is used by the U. S. Government in all the departments, and by three-fourths of the Banks, Insurance and Railway Companies, and the largest consumers in the United States, England and Canada.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. ☞ Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, OCTOBER 9, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum. 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE American Paper Makers' Association is to meet in New York on the 22d inst. The position of the paper-stock market demands that consideration which it is thought that the general body can properly give, and it certainly justifies the meeting. As one of the outcomes of the prohibition of the importation of rags, the contractors for paper for the public printing find it difficult to meet their contracts, owing to the scarcity of rags, and it is possible that the late action of the Government may cause the contracts to be thrown up.

A COMMITTEE has been appointed by the Board of Trade and Transportation to consider the different regulations, State or otherwise, which exact a license fee or tax from commercial travelers. We think that this matter has passed beyond the stage of consideration, and that action is what is most needed. The initial step has been taken by a member of the stationery trade in Cincinnati, and subscriptions are being taken to contribute to the expense of carrying the question through the courts. We print a list of contributions already made in this city, and we urge upon the trade the importance, not to say propriety, of helping to increase the amount already contributed. We observe that one paper thinks that it is more expedient to appeal to Congress for the passage of a law which will do away with obnoxious taxation of the sort referred to. We believe that legislation is a last resort, and that if the courts put the stamp of illegality upon the system of special taxation it will be more authoritative and binding. In the first place, it will be difficult to secure the passage of an act of Congress. Every Representative will oppose any movement which may excite the prejudice of his constituents. Local feeling will prevent independent action. It may—probably will—take years to push a bill through. To our mind the Courts afford the readiest means of relief if there is sound constitutional objection to the license tax. Let us try the Courts first, and should they decide that such taxation is constitutional, let us then seek the aid of the Legislature even if it takes the remainder of the century to secure it.

A STRONG effort is to be made to secure a change in the bankruptcy laws of this State for the suppression of preferences in assignments. The undue proportion of preferred claims in insolvency, as shown by recent failures, is the inciting cause for this proposed action, and we cannot but say that the proposition to narrow down the possibilities of fraud and to secure protection for those who are known as general creditors, is just. There is more

than strong suspicion that many preferences are fraudulent; in fact, we might say, that there is certainty that they are; but the trouble has been and will be to secure that proof which, under proper rules of evidence, will subvert such preferences in cases where fraud is believed to exist. With no legal restraint upon the right to prefer creditors, the debtor has practically command of the situation so far as his honest debts are concerned. A system might be adopted that where loans have been made or advanced on any collateral—stock or otherwise—a limit should be fixed for the loan, and should default be made on the day of payment judgment should be entered, thus giving notice to other creditors. Perhaps the Pennsylvania system is the best. In that State, no personal mortgages are given, and where loans are made a judgment note is given, and this pending lien or confession of judgment, while not necessarily implying that the debtor is insolvent, operates as a first lien or preference, and at the same time notifies all other parties that there are certain liabilities for which the party incurring them is responsible.

Roundabouts.

BY THE TRADE LOUNGER.

Running into a place the other day I was impressed with the idea that there was some sort of excitement going on. On gently hinting that trade did not appear to be dull the member of the firm accosted remarked that he had all that he could do and had to work overtime to keep up with orders.

Yet there are people who say trade is very, very dull. *****

This last remark was made to me by a man who doesn't advertise. The party first referred to is well known in the columns of THE STATIONER. *****

I thought to myself: "Here's a commentary!" *****

Envelopes are going up—not like a skyrocket. By the way, the advance in the price of paper begins to make the blank-book men, as well as envelope makers, stronger in their views. It may be a good thing for some manufacturers, if they have produced well ahead. *****

I see that "A. L. D.," whose initials appear at the tail of your Boston correspondence every week, has been "putting up" some prizes for a shooting match of the Boston Press Rifle Association—and he a newspaper man. I think that the whilom cramped circumstances of newspaper men must have greatly changed of late years. Once the newspaper man was too poor a crow to pick; but now—well, "you can't most always sometimes tell." *****

American enterprise is something truly remarkable. A company was formed in New York some time ago for furnishing to out-of-town newspapers illustrated New York correspondence. On the opening of the political campaign the same company began to supply political articles illustrated by caricatures of noted politicians, and now the same company is prepared to supply serial stories, with illustrations. Some of these stories are from the most popular writers. This is way ahead of patent outsides and insides.

* * * *

A new device for the counting-room is a ruler and rotary blotter combined. It consists of a rotary blotting cylinder made of sheet metal, concaved and flanged to receive the roller, and provided in front with a straight edge or rule. The advantages of the combination are that in ruling, the edge being above the ink in the pen, there is no danger of smearing and the blotter takes up the ink as wanted.

* * * *

Quite an attractive holiday novelty this season is a mirror, the frame of which is made of "alligator plush," the glass being French plate, beveled, upon which is painted a marine view in black and white. Another novelty is in the form of a clock-shelf for attaching to the wall. The shelf is covered with a satin lambrquin, decorated with a bunch of flowers and other attractive designs.

* * * *

Referring to the general complaint which has been made this season of dull trade, a dealer thus expressed his mind a few days ago: "If every one had as little to complain about as we have, they would not complain. Business has been exceptionally good with us. We deal exclusively in novelties, which always sell well, good times or dull times. You can sell novelties when you can't sell anything else. The trade are always ready to take hold of something new."

* * * *

Another tradesman, conversing on the same subject, said: "We don't touch novelties at all. Our line is purely staple. We have as much as we can do to attend to that. We don't spend any money in traveling either. Our goods and the prices we ask for them do the traveling. We have found that a superior class of goods at reasonable prices will sell in any season, and, notwithstanding the extreme depression this fall, we can really sell more goods than we can manufacture."

* * * *

A line of writing sets, match-boxes, thermometer holders and various other knick-knacks made of soft wood in a manner to represent tusk-ivory is in the market.

* * * *

There have been few real novelties in inkstands introduced this season. The most of those which have been brought out recently have so few claims to anything of an original character, that the majority have not been thought of sufficient value to patent, their manufacturers being content to allow them to be classed with staple goods.

* * * *

One exception is a patent "self-opening and closing" inkstand, which consists of a handsome flint glass ink bottle resting in a rack of rather novel design. The cover of the mouth of the stand is balanced so that a pen-holder, when placed in the rack, closes the bottle, thus preventing any dust or dirt from coming in contact with the ink as well as preventing the ink from molding. When the pen is taken from the rack the cover flies up, and when put in place again it closes over the mouth of the bottle as before stated. The advantages of this contrivance are apparent. The action is perfect. The rack of the stand is metal, finished in various styles, such as verd—antique and gold, plain Florentine bronze, Florentine and gold bronze, &c.

Answers to Correspondents.

H. & J. last week inquired about the new dictionary holder.

Ans.—You can address Carroll W. Clarke, Boston, Mass.

S. wants to know where he can get Wyckoff's combination rule.

Ans.—We don't know. We believe that it is not now manufactured.

W. L. A. wants addresses of parties dealing in campaign goods.

Ans.—H. B. Claffin & Co., New York; W. H. Hall, 261 Greenwich street, New York; Nason Manufacturing Company, New York.

S. C. W. wants to know where he can buy a line of good and cheap collar and cuff boxes for the holiday trade.

Ans.—Henry Levy & Son, Metzger & Jordan, Loeb & Co., Berlin & Jones Company, Alles & Conant—all in New York; Charles J. Cohen, Philadelphia.

Mortgages, Etc.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

Market Review.

OFFICE OF THE AMERICAN STATIONER, 1
WEDNESDAY, October 8, 1884.

THE MONEY MARKET.—The money market continues to rule dull and easy, the available supply of loanable funds having increased rather than diminished, in consequence of the disbursements made by the government and private corporations since the 1st inst. It is scarcely probable that any change will be experienced in this respect so long as the banks continue to carry so large a surplus as they now have. Commercial paper is without quotable change, good indorsements being negotiable at 5@6 per cent. discount. The stock market has ruled dull and irregular, and while prices generally are a shade higher than at the close of last week, the market has been lacking both in tone and character. Railroad bonds moderately active and firm. Governments a shade higher. Sterling exchange has ruled dull and unchanged, the posted rates being still 4.83@4.85 per pound.

THE PAPER MARKET.—The anxiety shown by many consumers of paper to provide for supplies against an advance in prices has somewhat quickened the demand, but this is met by manufacturers by a general advance in quotations nearly through the entire list, embracing writing and wrapping papers. At the same time manufacturers are reluctant to accept orders for goods for future delivery. In writings, dealers have pretty well discounted the action taken by the Manufacturers' Association last week, and the advance declared was not unexpected. In book papers many manufacturers have given notice of an advance of 1/2c. from October 1, and little or nothing in the way of super-sized and calendered is offering by dealers under 9c., and even news has been marked up 1/4c. at some of the mills. Manillas, although firm in price, and the cost of their manufacture has been increased through higher prices for butts and bagging, no general advance has yet been made. Straw wrappings have also been marked up.

THE STATIONERY MARKET.—The trade in staple goods continues quiet and the volume of business done is rather small. The number of tradesmen visiting town, moreover, is noticeably small for this period of the year and the bulk of business is in the shape of orders by mail. The present dullness is believed to be caused not from the fact that buyers are not in want of goods, but because they are purposely holding back their orders on account of a lack of confidence in the market. The trade in school stationery continues active, but business is mostly in small orders received from dealers who are restocking. There is a good demand for plush boxes, but it is mostly in the line of staples. Cheap goods of this character sell well, and seem to be in good demand among consumers. The advance in the price of fine writing-paper has stimulated trade in this line somewhat. Jobbers are selling old stock at former prices and buyers are taking advantage of this by ordering now. There is also more activity in the trade in envelopes in consequence of the advance in writing-paper. Many manufacturers have advanced their prices from fifteen to twenty cents a thousand and buyers are ordering now from a fear of a further advance.

WHITING PAPER CO., HOLYOKE, MASS., MAKE MORE FINE PAPER THAN ANY OTHER CONCERN IN THE WORLD. THREE MILLS. DAILY PRODUCT, TWENTY TONS. ALL DESCRIPTIONS OF LOFT-DRIED PAPERS.

GOODS ALMOST GIVEN AWAY!

The "Universal" Pocket Linen Markers.

No. 1.

No. 2.

SELF-INKING RUBBER INITIALS.

The Greatest Offer ever given to the Stationery and other Trades.

LOOK BELOW AND SEE OUR PRICES.

WE SELL THESE GOODS AT THEIR ACTUAL COST TO ADVERTISE OTHER GOODS.

HERETOFORE a comparatively incomplete and unattractive article of this kind could not be procured by the public for less than 25 cents to 50 cents, saying nothing of the detail and delay necessary. We now offer this Pocket Self-Inking Linen Marker to sell for 10 cents and 15 cents. Each Initial is put up in handsome, slide cover box, with bottle of the best Linen-Marking Ink and Ink Pad, in fine metal ink cup for the pocket. Style No. 1 contains a good supply of the finest Gold Bronze for use on Stationery, &c. Packed 36 assorted letters (full alphabet 26, and 10 extra of the most common) in a case, 4 cases to the gross.

PRICE: { No. 1, per case, \$4; per gross, \$12; 10 gross, \$100 } TERMS: C. O. D., when 25 per cent. accompanies order.
{ No. 2, per case, 3; per gross, 9; 10 gross, 75 }

Testing the Legality of Travelers' License Fees.

On August 21 last, a letter was published in THE STATIONER from the Stationers' Board of Trade, appealing to the trade for contributions for the purpose of making a test case in the courts "of the debated question of the right of State or municipal authorities to compel commercial travelers to pay license fees." In response to this appeal, the firms named below have subscribed the amounts set opposite their names. The subscription list is in the hands of A. S. McDade, with Boorum & Pease, who has been authorized to receive contributions for the purpose named. Subscriptions may be forwarded to him at No. 28 Reade street, this city. The defendant in the test case is Sabin Robbins, of Ross, Robbins & Co., Cincinnati, Ohio. As the expense of defending in the courts will be considerable, further contributions will be needed, and it is hoped that many other firms connected with the book and stationery trades will send in their mite, as the matter to be decided is of the greatest importance to all. A

decision is expected in the case this fall or winter.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

DAYTON DOTS.

[BY OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, October 6, 1884.

We are getting our summer weather this month, the thermometer ranging about 90° every day. Frost has been delayed, and crops of every kind are safely housed.

I cannot say very much in favor of lively trade; there is not much of it; everyone is complaining; the weather is too fine for the dry-goods and clothing people, and stationers have not much to do at this time of year.

The Presidential campaign has its influence on business, and that not favorable. Our State is doubly blessed in this respect, having a State election in addition.

Reynolds & Reynolds are now in their addition to their old quarters, and appear to be full of work.

R. S. Rogers & Co. are crowded with orders for their pencil-holding school and other pads. They have applied for patents on them, and expect next season to have an immense sale for them, as they merely introduced them this season. Their recent "ad." in THE STATIONER is bringing inquiries and orders from all parts of the United States.

Travelers in stationery are very scarce. Mr. Alfred, of Hard & Parsons, was here, and showed some nice goods; in fact, it is a habit of his to do so.

I was surprised and pained to see the notice of the death of Mr. Aikenhead in the last STATIONER. It seems only a few days ago that he was here in his usual health. He was a favorite with everyone, and will be missed in the trade.

Mr. Walkins, of the American Lead-pencil Company, has called, and while trade was not very brisk with him, he reports a fair number of orders taken.

Mr. Gunn, of Eberhard Faber's, was also here, and another pencil man, who shall be nameless, as he was after the scalp of "Miami Valley," for what was intended for a pleasant notice in a former number of this paper.

Among the paper mills there is a fair amount doing, and prices of news and book are steady with an endeavor to advance about a quarter of a cent., but which it is hard work to get. The wrapping paper trade is flat—flatter than a prairie—at least, it is so throughout the

MIAMI VALLEY.

We find beauty in itself a very poor thing unless beautified by sentiment.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustments of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all un-
surpassed methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the world. SCRIPTURE.

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the drunkard. AGRICULTURE—Copies of famous Statues, Bas Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS and OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE. To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'rs, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

International Magazine Courtesies.

While Harpers and the *Century* Company are filling England with their magazines, it is no more than fair that England should send some of her representative periodicals to this country, and it is only a part of the game of turn-about that Cassell & Co., Limited, should publish two of their magazines with a special eye to the American market. The *Magazine of Art* has been published here for some years past, so that it is looked upon almost as an American periodical. The American edition has an American editor, who gives full American notes at the end of the magazine, and the body articles are international in their interest, and during the coming year they will be even more so. Quite recently *Cassell's Family Magazine* has been introduced to American readers, and has found almost instant favor. This magazine is sold for the absurdly low subscription price of one dollar and a half a year, which is so little for what is given in it that I don't see where the publishers get their money back, but I believe they are perfectly satisfied. It does not appeal to the same audiences as *Harpers'* and the *Century*, but to a larger one, and I should not be at all surprised if it got as big a circulation

here in time as it has in England, where I believe it outstrips all rivals in this matter. Cassell & Co. have another set of periodicals, which they have not introduced in America as yet; one of them, the *Quiver*, is the most successful semi-religious magazine in the world. It is an illustrated magazine "for Sunday and general reading," and its contributors are some of the best known theologians of England; but it has stories and general articles as well, and I do not see why it should not find a big sale in this country, for it is well known here and only wants to be introduced to become popular. This idea of an interchange of periodicals seems to me to be a very good one,

because it makes the two countries better acquainted with each other.—*New York Correspondence Philadelphia Press.*

S. S. Stafford's blue-black commercial ink writes blue and turns black. It has acquired an extensive sale for commercial purposes, and is, to say the least, a very superior article.

It is not yet decided what disposition will be made of the valuable collection of etchings and prints left by the late Mr. Claghorn, of Philadelphia. When Seymour Haden was in this country, he declared that nowhere in the world did he know of a collection of his own works as complete as that possessed by Mr. Claghorn. The collection is said to be worth about \$250,000.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

NEW LIST AND DISCOUNTS OCTOBER 1, 1883.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. JAMES D. SLOAN & CO.,

PHILADELPHIA, PA.

Tact in Advertising.

A Cincinnati paper says: Fraudulent advertising is, of course, as unjustifiable as other forms of iniquity, yet a regard for truth is not incompatible with a due consideration of certain human characteristics. All men and all persons, women especially, who are fond of what is new or peculiar, yield to the blandishments of a supposed extraordinary bargain. The human mind, it is true, is capricious, like the weather. It has its seasons of cold and warmth, its days of sunshine and of cloud, but as in spite of these fluctuations we live on, in the conviction that harvest will follow seed-time and winter give place to spring, so the careful observer of motives and persistent watcher of tastes and fashions will profit by his vigilance. The wise farmer takes into account the normal succession of the seasons, and he is also prepared for unseasonable visitations and setbacks. The clear-headed man of business can hardly fail of being successful if he acts like the agriculturist. Making sure to tell what the people want, he should let the greatest possible number of them know the fact, and should make them acquainted with it in the most direct, persistent and impressive manner. George Robbins, the famous London auctioneer, once sold a country house by a timely mention of an ancient hanging wood in its vicinity. The hanging wood turned out to be an old gallows, and though George was decidedly wrong in playing upon words to deceive the purchaser, he was as decidedly right in supposing that customers would multiply by rousing their æsthetic sensibilities. It is easy to imitate his shrewdness without going beyond bounds, yet the profits of advertising, like those of business in general, must be gained by thoughtfulness and tact.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Records, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

Correspondence.

RICHMOND RIPPLES.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., October 7, 1884.

The paper trade generally has experienced considerable improvement in the way of orders within the past two weeks and business is still holding up its hands with even better prospects "when the clouds roll by," and pour upon the face of nature in this section that which is exhilarating but not intoxicating. An ample quantity of the latter fluid can be had here at all times, but the former has been sadly economical in its dispensation in this latitude for the past two months. A good shower of rain just now would not only bring happiness to man and beast individually, bless the parched earth and the fruits thereof, but start a business boom which would force nimble fingers to fight for living issues of profit unhampered by that treacherous and unfaithful ally who sings pæans yet stabs you in the dark—the mosquito. Millions could be collected for his extermination, but not one cent for his defense.

But enough of this digression, although facts alone have been stated. Stationers are all well stocked with everything of the latest style and the newest novelties, and besides the orders that are coming in in some force, a few merchants drop in occasionally and make purchases. The book stores have been right busy filling orders for school-books, but the retail business in miscellaneous bound food for thought has and is not going off with that alacrity dealers desire. The latest publication issued is a handsomely bound volume, printed by Whillet & Shepperson, entitled, "Selections from the Miscellaneous Writings of the late Dr. Geo. W. Bagby," more familiarly known under the *nom de plume* of "Mozis Addams."

W. E. Simons & Brother, blank-book manufacturers, have sent a splendid exhibit to the North Carolina Exhibition. It consists of forty large ledgers and journals, fifteen of which were made to order for banks in this city, together with a varied assortment of stock-work which they make especially for the trade. No handsomer display has ever been

gotten up in this city, and they will have even a more elaborate display at the New Orleans Exposition. The State Fair takes place here in about two weeks, when the city will be crowded with visitors, including merchants, throughout Virginia and the adjacent States.

SENTINEL.

BALTIMORE DOTS.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, October 11, 1884.

The sudden change from intensely hot weather of the past ten weeks to a chilling rain, frost and a 20° lower temperature, caused many of our citizens to hunt up overcoats (some of which were deposited with their uncle at a heavy interest), and other winter apparel. It is a very welcome change, provided it will infuse new life in our business circles.

The only really profitable trade that did not complain of hard times were the houses of those Celestials (who boast in characters of red), Fung Loo, Whing Ho, Fi High, Tung Ling, and others of the same denomination who have espoused the cause of American ideas, especially the art of manipulating the sweat and heat of the day from the wilted collar and demoralized undergarment.

We cannot boast, however, that this agreeable change will continue; we hope so, but fear to commit ourselves. We had this same game played on us about three weeks ago, and we candidly believe that it got hotter than before—at least, our laundry bills so stated.

I have made it a point to sound the views of several of our Baltimore stationers on the subject of trade and matters generally pertaining to their branches of business, and find all, with one accord, express the same views, and these do not seem to inspire any great amount of electricity in the general market. There seems to be a drag somewhere, but how to locate the spot seems to be very difficult.

Many of our leading stationers attribute this lack and falling off in business to the warm spell; some note it as the result competitive, under-estimating; and I am free to say that this style of trade, under-estimating, as carried on in our city, is not only a very serious obstacle to the trade and the dealer, but a more serious one to the consumer as well, for while

he (the consumer) obtains his goods at from 10 to 20 per cent. less than was offered him by a more conscientious dealer, and imagines that he is getting the same quality of goods, he is in reality paying from 30 to 40 per cent. more and obtaining a much inferior article than was first offered. Consumers and small dealers do not for a single moment look at the quality, but at the figures, when quality and not price should govern them in making selections. Good articles will always command good prices.

In regard to trade in general, the dullness and stagnation not only exists in the stationery line, but in every branch of business, there is no exception, except as noted. It is general, and the pall seems to have settled upon every branch of industry until the cloud has become so dense as to almost obscure every ray of hope for a general revival.

I have maintained for some time past that this flatness is, to a large extent, artificial, and still hold the same idea. The Ohio election next week may—I say may—figuratively have some effect, but we cannot expect a real, genuine push and go-ahead revival in trade before the Presidential election is settled, and even then, should our general trade fail to improve, stock and prices may recede further.

Our stationery market has been unduly forced, and an overgrown plant is seldom the healthiest or strongest.

The recent action of our City Council, abolishing the school fee of \$1 per quarter from pupils attending our public schools will have a slight tendency to decrease the sale of school-books. Heretofore, every pupil, male or female, white, black or indifferent, who attended the public schools, was required to pay \$1 per quarter for the use of the books and stationery provided for their instruction. Now this is abolished—no more fee, but free—and the teachers' motto now will be: "Economy in the use of everything pertaining to the schools," perhaps even instruction itself. The Grammar, Speller, Arithmetic, &c., must last a little longer than formerly; a little water must be given to the ink jug oftener; pencils that even a mule could not break must be issued, and no sharpening will be permitted. While all this lifts a great burden from the poor, whose only resource for education lies in the public schools, it also causes the burden of

school-books to rest calmly and quietly on the shelves of many of our booksellers, and only to be diminished as the slow demand requires.

It is stated that the *Catholic Mirror* has gone over to the Protestants, John B. Piet & Co., of this city, publishers and owners of the *Catholic Mirror* and *Sunday School Chimes*, having failed, and the firm dissolved by the order of the court, Mr. J. O'Brien, receiver, has (singular to state) sold the papers to J. J. Nicholson & Sons, bankers, of Baltimore, who will hereafter publish the *Mirror* and the *Chimes*.

As the Messrs. Nicholson are Protestants, Bishop Nicholson of the P. E. Church being a brother, it is curious to see how "the Church" takes the dose.

W. J. C. Dulaney & Co. report trade exceedingly dull except, in their country orders for school-books. This firm carries a large stock of everything in the stationery line, but its principal trade lies in its school-book line.

J. H. Medairy & Co. report trade dull except in small lines, but express belief in a favorable change this fall and winter.

Oliver W. Clay & Co. Limited, report all sales slack.

Marcus W. Wolf & Co. report their line of business fair with several large orders on hand for fall shipment. This firm carries a large and varied assortment of every article in the stationery line. Among its novelties may be mentioned a very unique ornament made to represent a wash-board covered with red plush; on the top is a finely mounted clock, and a thermometer, the whole forming an easel. This house has also a combination toilet set, brush, comb and hand glass. Should the brush or glass become soiled they are so constructed as to be easily taken apart and cleansed. Their stock of papeteries and albums compares favorably with the leading houses of the country. Many of its specialties this firm imports direct.

I will keep THE STATIONER fully posted in everything that may or is likely to occur.

VEXCES.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PESS, }
504 WALNUT STREET,
PHILADELPHIA, PA., October 13, 1884. }

A visit to a number of our leading stationers this week shows that there is a slight improvement in the stationery trade since last writing. There is still a certain amount of demand from the school trade; commercial demand has picked up a little; and the demand for holiday goods shows decided signs of an increase. Among the firms visited I select a few, and give their statements as to the general condition of business.

Armstrong, Craig & Co., at the corner of Third and Vine streets, are among our wholesale manufacturing stationers. They state that while business for the current year has been of a very quiet character, they have no reason to complain as to their own individual trade. Prices have been low, but there has been a moderately steady demand which only fell off a very little during the hot months.

Within a year or so past this firm has largely increased its facilities for manufacturing, having put in a large engine and boiler, fitted up with all the latest improvements. The members of the firm are practical men, and give their personal attention and inspection to all work that they send out. This care in looking after the condition of their goods and their willingness to oblige their customers in every possible way, has enabled them to build up a steady line of custom which stands by them even in the dull times.

John C. Clark & Sons, 230 Dock street and 138 South Sixth street, are one of our most enterprising firms. They have a large and well-established legal and commercial business, and are often busy when other concerns are not doing very much. Their fall trade has picked up considerably during the present month, and they consider the prospects very favorable for the rest of the year. They handle at this time of the year a very fine lot of fancy stationery, and their styles for this season are, if anything, more desirable and attractive than any ever before presented.

William Manns' Son, 529 Market street, is as usual quite busy in nearly every department of his immense establishment. In the fancy stationery line, in particular, a very active trade is being done. In the blank-book department there is also a very fair business, though perhaps not quite up to that of last year. Still, the difference is very slight, and by the end of the year they may be ahead in volume. Mr. Mann attributes the slowness in the commercial demand to the generally depressed state of all mercantile business.

Alvah Bushnell, 105 South Fourth street and 324 Chestnut street, reports fall trade as starting out very well considering the depressed condition of general trade. Despite the dullness there has been quite an increase in the volume of business within the past few weeks, and no efforts have been spared on Mr. Bushnell's part to make his stock attractive. With a wide acquaintance among the business portion of the community, Mr. Bushnell has succeeded in building up a trade which is likely to stand by him now that he is in a better shape than ever before to meet their numerous wants. Almost everything known to the stationery trade may be found in his stores, and he looks forward to a season of activity for a few months to come, at least.

Leon Isaacs & Co. are now prepared to supply the trade with Page's latest new standard maps, in the construction of which every available source of information is made use of. They are all engraved, printed and colored in a clear and attractive style, and are very superior in both execution and information.

E. G. Locke & Co. report large sales of their new line of sheet pictures for candy-box tops.

Kohn & Rosenbaun are out with a new catalogue, elegantly gotten up and containing 96 pages highly embellished with new designs showing the very latest and rarest things in portrait and picture frames, easels, albums, chromo-stereoscopes and everything pertaining to their line. This handsome volume will be sent to the trade on application.

Theo. L. Warrington, steel-pen manufac-

turer, reports handsome orders, with a fine prospect of an increase. The Warrington steel pen has a reputation the country over, and once introduced into use is rarely changed.

Collis & Lees show some of the handsomest specialties in holiday goods to be found in the market. Their special favors in perfumed satin sachets are rare and beautiful, and should be seen to be appreciated. For birthday, Christmas and holiday presents they are unexcelled.

Rowland Whitman shows a very complete and elegant line of imported fancy papers, cardboards and card relief pictures, borders, laces, &c., and as a consequence the demand for them is brisk.

Buyers of bric-a-brac, house decorations, highly ornamental as well as useful, will do well to send for a list of new goods, late importations, recently published by Charles J. Cohen. It contains many suggestions which will assist in the selection of suitable purchases for autumnal and holiday presents.

The Guarantee Chemical Company reports a steady demand for its mucilage, which is held up in quality without regard to extra expense to manufacture. True merit will tell.

Baker & Hayes continue to bring to light new and striking novelties; the latest is a handsomely printed and bound pamphlet, replete with appropriate stories and poems for children.

Really one of the handsomest and most unique menus that has appeared this season was gotten up for a "private spread" at the Bellvue, the result of a friendly wager. This elegant souvenir was bound in leather, silver-tipped, and contained an illuminated page for each course, bearing a design representing the principal article of the course. The Dreka Stationery and Engraving Company furnished the genius and mechanical excellence seen in this beautiful little souvenir. P.

CHICAGO CHIPS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER, }
113 East Madison Street,
CHICAGO, October 13, 1884. }

Trade, in the book and stationery line, continues to wear a satisfactory aspect. A gratifying feature of the book trade has been the large increase in the demand for the highest grade of standard works, while the more trashy kinds of cheap publications show a declining sale. Buyers of the better class of books have also demanded a more expensive style of workmanship than heretofore. This demand extends to the trade in all parts of the country. The dealer on the Western frontier is no less persistent in his orders for finely and perfectly finished work than his confrère in the same line in the large towns and cities in the oldest and most populous portions of the country. The largest improvement in sales has been in the West and South, although orders have been coming in freely from every part of the country.

The demand in stationery also is for better goods. A leading dealer said that he had never before sold such a large percentage of

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST.	Pen-Rack Stand, No. 1.....per doz...	\$9.00	Japanese Finish, No. 3 ...per doz ..	\$24.00	Extra Pads.....per doz...	\$3.60
	Paper-Weight Stand, No. 2..	8.10	Mounted on boards.....	4.80		DISCOUNT TO TRADE.

(Continued from page 504.)

high-grade articles as during the current year. "There is," he said, "a great disposition to ignore poor stock, and we have sold a line of goods to border towns that we never before supposed could be introduced there."

There has also been a considerable enlargement in the number of articles, called for from Western and Northwestern buyers, which indicates a growing disposition among customers in the newly-developing portions of the country to gratify their tastes for finer goods which have heretofore been sold exclusively in the more wealthy sections. This is especially the case in regard to expensive writing materials and cards, which have met with an unusually large demand.

In addition to the liberal volume of sales, dealers say that their business was never before so nearly on a cash basis as at present; hence they regard the outlook as full of promise.

It has only been within the past two years that the art of engraving on type-metal by photo-chemical means has reached that degree of artistic and mechanical excellence which places it on an equality with the work of Eastern establishments. The Levytype process of photo-engraving, as operated by the Levytype Company, of Chicago, gives the highest artistic results. For many purposes, it surpasses the slower and more costly method of engraving on wood—producing more natural and finer artistic effects, as in the landscape, architectural, portrait, and figure work. By the Levytype process, wood engravings, steel engravings, lithographs, and other engraved work in lines and crayon can be reproduced at small cost.

A visit was paid to a few stationery houses during the week, among them the pioneer establishment of the J. M. W. Jones Stationery and Printing Company. This is the oldest and most extensive establishment of the kind in Chicago. The house was established thirty-five years ago, and has been under the general management of J. M. W. Jones, the veteran stationer of Chicago, and a leading business man for a period of twenty-six years. No mercantile house could enjoy a higher reputation than this in the estimation of Chicagoans, and no concern is more entirely deserving of popularity. The house possesses every facility for conducting a first-class business, and now offers to the public as fine a stock at as low prices as was ever exhibited in this city.

The Skeen & Stuart Stationery Company does a large and rapidly extending business in wholesale and retail stationery, printing, blank-book manufacturing and lithographing. Its establishment is one of the largest of the kind in the city, and is supplied with every appliance which such a business could by any possibility require. Its stock is complete in every detail, its prices cannot be discounted, and its work is perfect. The specialty of this company is commercial stationery, printing and blank-books.

The largest and oldest wood-engraving establishment in the West is that of Baker & Co., of this city, which was established in 1857. A quarter of a century of prosperous

business attests the excellence of its work. It is a live house and keeps up with the times.

The increasing heavy passenger traffic on the Chicago and Alton Railroad, and the demand upon its dining-car system, suggested that a large car would add to the comfort of its patrons. Accordingly, the management ordered the construction of a car, to be built at their shops (which, by the way, are an interesting feature and a most important financial adjunct to the welfare of Bloomington), under the supervision of M. L. Lynch, superintendent of dining-cars, and the immediate direction of F. C. Roberts, whose long experience, excellent taste and ability has been of great advantage to the company. He has presented numerous valuable suggestions and patents, which have been incorporated into the construction, and, as a result, a palatial marvel was placed upon the track, July 19, 1884, christened the "Charlton," in honor of the general passenger and ticket agent of the Chicago and Alton Railroad, to whom is due, in a great degree, the distinction of placing its passenger department at the head of rival lines, leading in all matters which will insure the safety, comfort and ease of the traveler. The Charlton is the most magnificent and palatial dining-car in the world. It is seventy-three feet long from coupling to coupling, the longest car ever built. It is mounted on two compound trucks of six wheels each, thus reducing the jar to a minimum. The finish on the outside is in the same plain, rich style common to all Alton coaches, with a handsome oval panel, bearing the name of the car. The Charlton will run between Mason City (through Bloomington) and Pontiac, supplying breakfast for the Denver express going East, dinner for the two day-trains between Chicago and St. Louis, and supper for the Denver express going West. Noz.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Oct. 14, 1884.

Stationers and printers as a class are generally pretty level-headed, but there are times, no doubt, when they fail to exercise their judgment, or if they do not, they reason from a false premise, and hence arrive at erroneous conclusions. I am led to the above statement, because of some observations lately made by members of the trade who seemed to think that the demands for paper did not justify the recent advance in prices.

The account that Mark Twain gives of his early ancestor who was discovered by Noah floating about the waters during the flood is quite apropos to the present condition of the paper trade, as ascertained by some who should be better posted. It will be remembered that Noah endeavored to persuade this early member of the Twain family to come into the ark and be saved from the threatening dangers of the overflow. "Much obliged to you, Captain Noah," calmly observed Mark's progenitor, "but I think it's only a little shower we are having, and I can pull through all right in my own canoe."

The conditions of the flood were not quite

understood at the time, nor are the conditions which now affect the paper trade thoroughly understood by the general trade of the country.

What troubles the paper makers just now is the scarcity of raw material or rags. Since the 1st of September, no foreign rags have been permitted to land in this country, and this embargo on rags will certainly last until the month of December, and possibly for some six months longer. The domestic supply of rags is very limited, and owing to the demands domestic rags have advanced about 75 per cent. already with positive assurances of still further advances.

This accounts for the advance in paper and such goods as are manufactured from paper.

Manufacturers have advanced their prices to save themselves from loss, and not for the purpose of getting bigger profits for their products, as I have heard it stated. And right here let it be mentioned that the advance on paper is not in proportion to the advance on rags, though still further advances can be confidently counted on.

I have just returned from a tour through the mills at Holyoke, and from what I could learn, manufacturers are determined to make the most of the situation. Mills are carrying very small quantities of paper, while the supplies of paper-stock are very light.

The manufacturers of writing-paper are to meet in New York on the 22d of this month to discuss the situation, and it is most likely that writings will be still farther advanced, and possibly manufacturers may conclude to shut down for a time, rather than run their mills at present prices.

Envelopes have, during the past thirty days, experienced three different quotations, advancing in price each time, and even higher prices may be looked for.

Under such conditions it is mistaken judgment for dealers to delay their orders in the hope of getting quotations shaded. If they can get all the paper and envelopes wanted for the demands of their trade they will be doing well to stock up at present prices, for figures will be no lower for some time to come.

Speaking of envelopes, calls to mind my visit to the Holyoke Envelope Company. With Mr. Tyner, treasurer of the company, I made a tour through the different departments of this extensive factory, where forty-four machines are kept constantly running, turning out daily from 65,000 to 70,000 envelopes to each machine. Some of these machines are from a pattern designed by this company expressly for its own use. This machine is called the "Monarch," and is covered by some twenty-seven patents. It is certainly the most complete envelope machine now in use, and its daily capacity is several thousands greater than that of any other machine in use. The Monarch machine gums, folds, counts and dries the envelopes all ready for boxing, and in a manner truly wonderful. This machine is the invention of Mr. James Ball, superintendent of the Holyoke Envelope Company, who is also the inventor of the first gumming envelope machine ever made. These machines are made by the company in its own machine shops, one being turned out every

two months. The present capacity of the Holyoke Envelope Company is about a million and a quarter envelopes per day, but in a short time the daily output will be two millions.

Besides its line of envelopes, this company manufactures an extensive line of papeteries. One of the latest novelties in this line is the Hemstitched stationery, which is an exact imitation of a hemstitched handkerchief. The borders have polka dots in blue or red; and there are envelopes to match. This line has had an immense sale.

At Westfield I found the mills well filled with orders, the only complaint being the low prices which writings are bringing as compared with the advance in raw material.

Among the mills visited at Westfield was that of Crane Brothers whose linen bank ledger, record, and thin linen laid papers are so popular with the trade. Crane Brothers are also manufacturing a line of paper novelties for the holiday trade, among which are some elegant designs for umbrella stands and flower vases. These useful household novelties are very artistically finished, presenting all the features of imported pottery, and selling at such low figures that a big trade awaits these goods as soon as they are introduced. The process of their manufacture is patented. I had the pleasure also of inspecting a line of goods which Crane Brothers are preparing for the World's Exhibition at New Orleans. The manner in which their display will be presented is truly characteristic of these enterprising manufacturers. To comment at length upon the designs of their promised exhibit at this early day would only tend to lessen its value, but it is unique, and its novelty will not fail to attract much merited attention at that exhibition.

City jobbers report that trade for the past few weeks has been somewhat spasmodic—rushed to death one day as if a trade tornado struck the town, and then a summer calmness would settle down upon them. And "such is life."

Now, Mr. Editor, I rise to a personal explanation. In the "Roundabout" items of last week the "Trade Lounger" has taken the liberty of commenting upon the action of "A. L. D." in presenting to the Boston Press Rifle Association a certain amount of "solid cash" as prizes for the Newspaper shooting match, which takes place at Walnut Hill, this city, on Tuesday of this week. From the language of that curious scribe he would have the trade infer that "A. L. D." was a bloated bondholder and that a few of his coupons were generously donated for targets. This, sir, is libelous, and if allowed to stand unrefuted will tend greatly to lessen his supply of pencils, paper, envelopes, pens and ink during the coming holiday season. The "Trade Lounger" should remember that some men are born to greatness, some achieve it; while others have it thrust upon them, and to this latter class does "A. L. D." belong, and it is doubtful if he ever gets "greatness" by any other means. No, no, Mr. Editor, let it not go out to the world that "A. L. D." ever had so much idle cash to his account; for, "of those who have much, much is expected," and your Boston correspondent

already trembles at the amount expected from him. Those prizes, Mr. Editor, were contributed not *by* "A. L. D.," but *through* "A. L. D." in behalf of the proprietor of the Lockwood Press, and to the proprietor of the Lockwood Press belongs all the honor. To whom the cash belongs will be told next week. The special prizes that worry the "Trade Lounger" are booked as follows:

Five dollars for the poorest score of seven shots in the individual match, all of which strike the target—Lockwood Press, New York city.

Ten dollars for the best single score in the individual match—Lockwood Press, New York city.

Ten dollars for the best score in team match—Lockwood Press, New York city.

A number of other prizes are offered by friends of the Boston Press, but the "Lockwood Press" shows up the "noblest Roman of them all." A. L. D.

TORONTO TALKS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, October 10, 1884.

If you have quite recovered from the effects of our last stroll, we will resume it again, and this morning we will look in on Mr. Irving, of the Toronto News Company. You observe that our friend looks bright and happy. I presume you have frequently noticed the difference in the expression of the eye and face of the successful and unsuccessful man. Mr. Irving stands on the side of the former, and from small beginnings has pushed his way to the head of a very large business, which he says is rapidly increasing from year to year. At the present moment, he says, they have all they can do, and notwithstanding the predictions that Christmas cards had reached their culminating point, their trade this season was quite up to and, he thinks, ahead of any former year.

Mr. Gage, of W. I. Gage & Co., I informed you took a vacation in the Northwest, and if reports are true, he nailed a very nice thing out in that direction. You see that he looks fresh and vigorous. Mr. Spencer, the agreeable manager with whom we have to do just now, says that they are pushed with work, and are compelled to work overtime, and if we may judge from our walk through the establishment, the indications confirm what Mr. Spencer says.

Coming to Copp, Clark & Co., Mr. Clark, of this house, so far as I know, is one of those men who find recreation in attending to business early and late. If he indulges in summer vacations, I have never happened to find him doing it. He speaks hopefully about trade. They have had a good season. Their Christmas and fancy-goods trade is quite up to the mark, although collections, he adds, with them are slower than they would like.

Mr. Reid, of Buntin, Reid & Co., has received great benefit from his frequent visits to his beautiful farm on the Grand River this summer. One is forced to the conclusion from his cheerful mien that there must be some good living about that farm-house some-

where. I am not envious at all, still I would not object to a firkin of butter, a load of turnips and so on. Mr. Reid says that business with them is tolerably good; collections at the present not quite satisfactory, but that upon the whole things are looking better.

Mr. Ellis, of Barber, Ellis & Co., has vacated his island residence and returned with his family to the city. His morning and evening ablutions during the hot time in Old Ontario has toned him up wonderfully, and he is open for anything that there is money in. Their envelope trade is booming, and the other departments of the house are giving them all they can do. No complaints to offer.

Davis & Henderson, both of whom have had their accustomed outing, and being thoroughly recuperated, are prepared to wrestle with any hard-headed buyer that comes along, and show him that to go any farther would be a useless waste of time, as well as the vital forces which enable him to get around and chaffer the trade. They report business ahead of last year, and are satisfied.

Grand & Joy.—The large hauls of fish made by both members of this firm in the Muscoka Lakes during their holidays has set them up—I mean physically—and as a result they are pushing a vigorous trade. Catalogues from some of your manufacturing stationers and of stationers' supplies would be appreciated by them.

James Bain & Son.—I am not informed in what direction the members of this old house sought a short respite from the worries of business; the end has been reached, and they are at their post, keen and prompt as ever. The times and seasons seem to make very little difference with them. You may go in any day in the year and put the question, How's business? and the reply comes: Very good; we can't complain. And I don't know any reason why they should.

Alexander, Clare & Cable, lithographers and engravers, are full of work, and this is to be accounted for from the fact that what they turn out is executed to the thorough satisfaction of their clients. I have sent you specimens of their work. They are progressive, and by their promptness and diligence have secured a firm hold of those who are looking for anything in this way.

Williamson & Co., booksellers, keep up the reputation they have always had for the best assortment of general literature in the province. Their premises have been greatly improved, and as a central book store they have probably the best stand in the city. The opening of our schools just now makes them very busy, with all manner of school, college and text books. During our exhibition last month they were very busy, and report a good business throughout the summer. They are finding a large sale for "Chavassé's Manual," which has been published in several languages. Their second edition published by themselves is nearly exhausted.

And now, if you are not tired, I am, and beg to be excused.

If we do meet again, why, we shall smile;
If not, why then this parting was well made.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

No. 306 Broadway, corner of Duane St., New York.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PENHOLDER.

F. M. Libby, Portland, Me., has secured a patent for a new penholder. The holder is made of hard rubber and is the same as a common rubber holder with the exception that instead of the plug contained in the end of the latter a screw is used; thus the pen shank, instead of being rigid as in the case of penholders with plugs, works on a fulcrum formed by the screw-head which gives the pen the peculiar softness and elasticity of a gold pen. This holder is also said to overcome the difficulty of the common holder arising from splitting, by which it is usually spoiled. If from any cause it happens to split the screw can be turned farther into the holder and the split end of the latter can be cut off. This operation leaves the holder in as good condition practically, as if it were new. Still another advantage of the holder is that the screw can be removed at any time when clogged with ink and cleaned and replaced. With the ordinary hard-rubber holder in case the plug in the end becomes clogged, it is necessary to let it soak in warm water before the holder can be used. By drawing the pen out some distance its action becomes more elastic, and by pushing it in it is held more rigidly. Should the end of the holder after long use form itself in such a manner that the pen goes in too easily, the screw can be one-quarter turned, thus bringing the end of the holder back to its original form. If it should be desired that the nib of the pen should point slightly upward, the screw can be turned outward, and inward if desired that the nib should have a downward tendency.

WEBER'S UNIVERSAL DRAWING-BOARD.

A new drawing-board, designed by Mr. Weber, of Janentzky & Weber, Philadelphia, is now being introduced. In this board the panel is made of best quality of pine wood, and has no end-pieces glued or fastened to it, but is held straight by two ledges, dovetailed to the bottom of the board, thus allowing the board to shrink and expand. The edges of the board are grooved, to admit four bars made of hard wood, with V-shaped tongues fitting the grooves. The bars are hinged to the back of the board, and, when closed, are held firmly by brass buttons, and thus form a straight-edge for the T-square, adding greatly to the strength of the board. Those parts of the hinges which are screwed to the board have their butts partly cut away, in order to accommodate shrinkage and expansion. The size of the board, including the bars, indicates the size of the paper to be used. The corners being clipped, the paper is laid flat on a table, and damped on the back. The board is then placed on the paper, face down, and the bars turned back. The paper is now turned over the edges, in opposite directions, closing each

bar as the paper is turned in, while the tongues draw the paper into the grooves from the top of the board.

In addition to the advantages above set forth, the manufacturers call attention to the following points in connection with this board :

1. It possesses absolute durability through the mode of constructing the board and attaching the frame.
2. The board is unable to get out of angle, while the frame, adding to the strength, will always form a true edge for the T-square.
3. It invariably makes a perfect and smooth stretch, and does away with the gluing of the paper to the surface of the board.
4. It will stretch any quality of drawing paper and saves much time and annoyance in mounting the same, as well as expense for repairing.

NEW PATENTS.

No. 303,177. Polychrome Printing Machine.—Henri Chatel, Paris, France, assignor to the Société Anonyme D'Impressions Simultanees en Plusieurs Couleurs, same place. Patented in France February 23, 1882, No. 147,524, and June 27, 1882, No. 149,791.

In a press for polychromatic printing, the combination, with the general printing surface having an invariable level, and with its inking apparatus, of one or more printing surfaces which are movable relatively to said surface to levels above and below the same, an inking apparatus for said movable surface adapted to ink the same when projected beyond the general surface, and with mechanism for raising said movable printing surface while it is being inked, for depressing said surface while the general printing-surface is being inked, and for bringing it to the same level with the general surface while the paper is being printed.

No. 303,129. Type-Case.—Alphonse Adolphe de Calonne, Paris, France, assignor to La Société de Typographie par Procédés Rapides, same place. Patented in France March 16, 1883, No. 128,370; in Belgium, March 17, 1883, No. 60,790, and in England, April 17, 1883, No. 1,954.

A type-case having a series of inclined drawers, and divided horizontally into separable parts or sections to facilitate the handling, said parts or sections being constructed and arranged so that when set together or assembled they constitute one entire case.

No. 303,146. Composition of Matter for the Production of Artificial Slate.—Hugo Gallinowsky, New York, N. Y., assignor of one-half to Louis Klueber, same place.

No. 303,184. Copy-Holder.—Albert L. Pitney, Washington, D. C.

No. 303,226. Apparatus for Printing, Numbering and Delivering Tickets.—Thomas King and Robert Wilson, London, County of Middlesex, England. Patented in England July 24, 1883, No. 3,625.

No. 303,250. Blotter.—John F. Adams, Irvington, N. Y.

A blotter, consisting of a roll having an absorbent surface and mounted to turn freely between the arms of a yoke, said yoke being provided with a ring which is adapted to encircle the finger of the user.

No. 303,255. Paper-Folding Machine.—Frederic G. Beach, Albion, N. Y.

No. 303,260. Bill-File.—George L. Broomhall, Paterson, N. J.

No. 303,291. Book-Case.—Arthur J. Judge and Thomas F. Farrelly, St. Louis, Mo.

No. 303,304. Fountain Writing-Pen Holder.—Moise Marcoux, St. Eugene de Grantham, Quebec, Can.

No. 303,308. Knife-Eraser.—George W. Miller, Meriden, Conn.

No. 303,310. Ink-Bottle.—Isaac Elijah Moore, Warren, Mass.

An ink-bottle provided with a circular waste-intercepting flange or lip extending upward from the upper part of the body and around and at a distance from the neck, and having as its upper edge a series of ears or recesses:

No. 303,313. Prescription-File.—Robt. H. T. Nesbitt, Leavenworth, Kan.

No. 303,314. Machine for Sharpening Pencils.—Charles A. Neuert, Boston, Mass.

The combination, with a rotating pencil-holder or chuck, of a grinding-wheel the face of which is divided into sections the surfaces of which are adapted to reduce or cut away the material of the pencil at different rates of speed, the section of the greatest reducing power being arranged nearest to the chuck, while the section having the least power of reduction is farthest removed from the chuck.

No. 303,346. Memorandum-Book.—Miles Vernon, Brooklyn, N. Y.

No. 303,381. Tag-Holder.—Gregory H. Scharf, Toledo, Ohio.

No. 303,398. Tag.—Nathan M. Phillips, New York, N. Y.

No. 303,440. Index.—Max Levy, San Francisco, Cal.

An index consisting of independent sets of leaves bound into a single cover side by side with the letters of the alphabet printed along their left edges, and letters which may combine with these as second letters of names printed in a line upon the succeeding sheets below, which are exposed to the right.

No. 303,448. Ticket-Holder.—Patrick H. Murphy, Saugatuck, Conn.

No. 303,457. Inkstand.—William O. Rastetter, Dalton, Ohio.

An ink-bottle surrounded by a removable casing, on which tubes are formed, in the lower ends of which corks or other stoppers are inserted to form feet for the inkstand to rest on to prevent slipping and scratching.

No. 303,469. Paper-File.—Robert P. Traxler, San Francisco, Cal.

No. 303,472. Paper and Card Cutter.—James E. Tylee, Ashland, Neb.

No. 303,495. Box or Receptacle for Artists' Colors.—Charles Davis, Blackfriars Road, County of Surrey, assignor to Winsor & Newton (limited), Rathbone Place, England. Patented in England June 13, 1883, No. 2,939, and January 3, 1884, No. 581; in France, November 19, 1883, No. 158,646, and in Belgium, December 15, 1883, No. 63,357.

No. 303,500. Device for Illustrating the Principles of Music.—Geo. W. Dibert, Imbertown, Pa.

No. 303,519. Letter-File.—John M. Jenkins, Cincinnati, Ohio, assignor to the Globe File Company, same place.

No. 303,521. Eraser for Blackboards.—Adolph H. Kempen, Austin, Tex.

No. 303,542. Type-Matrix Holder and Gauge.—James G. Pavyer, St. Louis, Mo.

No. 303,551. Hammock-Chair.—Rollin H. Arnold, Honeoye, N. Y.

No. 303,561. Paper-Bag Holder.—Fieldon B. Cunningham, Burlington, Kan.

No. 303,580. Toy Gun.—George L. Miller, Youngstown, Ohio, assignor of one-half to Samuel Weil, same place.

REISSUES.

No. 10,506. Hand-Stamp.—Benjamin B. Hill, Philadelphia, Pa. Original No. 261,229, dated July 18, 1882.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

C. E. Barrett, bookseller, &c., Des Moines, Ia., has assigned.

A receiver has been appointed for George W. Hills, publisher, New York city.

George J. Lewis, publisher, Ketchum, Idaho, has sold out to C. C. Clawson.

A. T. Andreas, publisher, Chicago, Ill., has confessed judgment in the sum of \$450.

Shelton & Co., stationers, &c., Olympia, W. T., have filed a petition in bankruptcy.

Thomas P. Connolly, bookseller and stationer, Halifax, N. S., has assigned in trust.

An assignment has been made by C. Hall Windsor, bookseller and stationer, Norfolk, Va.

An assignment has been made by W. T. Goodhue, dealer in wall-paper, &c., Minneapolis, Minn.

Leach & Co., printers, Cabool, Mo., have dissolved partnership. The firm is now Moore & Comstock.

Hamilton & Morse, printers, Wellington, Kan., have been succeeded by the Wellingtonian Company.

The Missouri Wheel Company, manufacturer of bicycles, St. Louis, Mo., has been attached for \$2,000.

Cannon & Volker, booksellers and stationers, Ogden, Utah, have dissolved partnership. The firm is now Cannon & Sons.

Nicol & Smith, manufacturers of novelties, Chicago, Ill., have dissolved partnership. Robert Nicol succeeds to the business.

Baker, Short & Ragon, publishers of the *Echo*, Greenville, Ky., have dissolved partnership. J. G. Barkley withdrawing from the firm.

Moulton & Goodwin, paper dealers, &c., Boston, Mass., New England, have made an assignment for the benefit of their creditors to Walter H. Roberts, of the law firm of Brickert & Roberts. Their liabilities are thought to be about \$25,000, and assets nominally in excess of this figure.

With reference to the causes of the embarrassment of Bradley, Garretson & Co., publishers, Philadelphia, Pa., it is stated that five or six years ago William Garretson, who was doing business under the firm name of William Garretson & Co., secured as a partner Arthur Bradley, whose father was one of the most widely known publishers of his day. The firm then became Bradley, Garretson & Co.; but in a little while Mr. Bradley withdrew, and now carries on business with J. N. Eisenbrey & Co. At the request of Mr. Garretson, he was permitted by Mr. Bradley to continue the business under the old title of Bradley, Garretson & Co. The business was extended, and agencies were organized throughout the United States and Canada. Besides the Philadelphia house, there are twelve agencies in the United States and Canada. Some \$8,000 to \$10,000 was expended in advertising in newspapers, and \$36,000 in circular advertising. Their agents number from 5,000 to 7,000. The assets are comparatively small as compared with the liabilities. But the value of the assets of such a business lies largely in the ownership or mastery of the machinery. The agencies established are only valuable to those controlling them, and are the means of deriving a valuable revenue from the stock of publications on hand. Bradley & Co. are likewise embarrassed, they being creditors of Bradley, Garretson & Co. to the amount of about \$30,000, with assets estimated at \$40,000. It is expected both firms will be allowed to go on, as arrangements are now being made with the creditors to that effect.

The New York edition of the B. & O. Red Book is out, and a very cleverly compiled little volume it is. The scope of state information is somewhat larger than heretofore essayed in the Red Book series, and to attempt an enumeration of the contents in full would require considerable space. Suffice it to say that the publication is worth far more than the stamp and the trouble of forwarding of one's address to C. K. Lord, Baltimore, the requisite for receiving a copy.

C. Hall Windsor, bookseller and stationer, Norfolk, Va., has made an assignment. His liabilities are stated at \$16,000; assets, not ascertained. He is rated at between \$1,000 and \$2,000.

An assignment has been made by Ira Wilkins, picture dealer, Denver, Col.

The Union Paper and Cabinet Company, of Lebanon, N. H., has failed.

Jouffroy Brothers, bookbinders, New York city, have dissolved partnership.

McNish & Co., printers, Pittsburg, Pa., have sold out to Miller Brothers.

Joseph L. Reilly, newsdealer, &c., Huntington, Conn., has been attached.

Cameron Brothers, publishers of the *Arizona Live Stock*, Tucson, Ariz., have sold out.

The liabilities of C. E. Barrett, bookseller, Des Moines, Ia., are \$3,170; assets, \$3,500; preferences, \$2,100.

E. A. La Grave & Co., publishers, Ione, Cal., have lost a member of their firm by the death of E. A. La Grave.

The insurance adjusters settled the loss on the Newton Paper Company's buildings, at Holyoke, on Friday for \$35,586.

J. H. Keeney & Co., stationers, &c., Bridgeport, Conn., have dissolved partnership. J. H. Keeney continues the business.

A fire occurred on Friday morning on the second floor of R. Hoe & Co.'s factory, No. 504 Grand street, this city. The factory was damaged \$2,000.

The New England agency for the Albany Perforated Wrapping Paper Company is held by Carter, Rice & Co., Boston, and not by Moulton & Goodwin, who were reported to have failed last week.

The connection of D. C. Ireland & Co. with the *Commercial Herald*, Portland, Ore., was severed with the issue of October 2, the paper named having been purchased by and consolidated with the *Portland Journal of Commerce*.

W. O. Hickok, Harrisburg, Pa., manufactures a line of bookbinders' and paper-rulers' machinery of interest to the trade. These goods maintain a high standard in the market because of their excellence in workmanship and quality of material used in their construction, which is always the best. Catalogue will be furnished on application.

J. H. Bufford's Sons have a large line of cheap advertising cards, which it would do well for the trade to examine at this time. The cards come in sets of three and four designs, each, and embrace a great many varieties. Among them are four designs in the form of an envelope with the flap open, showing a bird's nest, with bird embossed; three designs consisting of a pretty picture of a pair of kittens nestling amid leaves with a butterfly hovering over their heads; four designs, winter scenes with children in the foreground; four designs, embossed cards, showing a num-

ber of birds perched on the branch of a tree, &c.

E. B. Waite's paper mills, at Little Falls, N. Y., were destroyed by fire on Sunday afternoon, causing a loss of \$38,000; insurance, \$20,000.

The game and toy-book manufactory of Peter G. Thompson, Cincinnati, Ohio, was burned on the 8th inst. The loss is estimated at \$75,000; insured for \$55,000.

Representatives of the trade are still seeking rest and recreation, notwithstanding the lateness of the season. They are those, however, whom business prevented from enjoying their vacation earlier in the season. W. D. Barclay, of George Nesbit & Co., is one of this number. He has just returned from a two weeks' vacation in the North.

A fire was discovered on Sunday in the cellar of S. Gross & Co., publishers, 1011 Marble street, Philadelphia, Pa. The flames began in the cellar of the building and spread up the hatchway to the first floor, badly damaging everything in the cellar and on the first and part of the second floor. A large stock of paper and cardboard on the first two floors was destroyed. The loss will be difficult to estimate. The damage by fire and water to the building will probably be \$1,000. The loss on stock and machinery will be much heavier. It is said that greasy paper was sometimes thrown into the cellar, and the theory was advanced that this stuff was lighted by the explosion of benzine which had been kept in the cellar in small quantities.

Surrogate Rollins heard argument on the 13th inst., in opposition to the probate of the will of the late Francis F. Taylor, stationer, of 51 Exchange place, who disappeared suddenly on September 3. It was learned that a man named F. F. Taylor had been at the Cataract House, Niagara Falls, on September 6, and had been missed three days later, when a hat and coat were found in the rear of the hotel near the rapids. A week later a body was found, and on it was a collar with the initials F. F. T. It was believed to be the body of Mr. Taylor, and it was sent on to this city, where it was seen and identified by Mr. Charles E. Hamma and Frederic M. Underhill, the latter being the executor of the will. Mr. Taylor left a wife and child, and bequeathed all of his property to his wife. The will was offered for probate on September 23, and Surrogate Rollins appointed Mr. George F. Langbein as special guardian for the child. Mr. Langbein objected to the will on the ground that there was insufficient proof of Mr. Taylor's death. Mr. Hamma testified that he recognized the body from the shape of the head, the face being unrecognizable. Mr. Underhill testified that he recognized the body in the same way. Other testimony was given showing that Mr. Taylor had sent several dispatches from Niagara Falls. Mrs. Taylor had no doubt that the body found was that of her husband. The lawyers discussed this testimony, Mr. Langbein still asserting that the identity of the body had been insufficiently established. The surrogate reserved his decision.

E. Bastien, printer, Montreal, Que., has assigned in trust.

Among the out-of-town members who visited trade during the past week was G. W. Clark, of Montreal, Can.

Hicks & Brother, publishers, &c., Grenola, Kan., have dissolved partnership. R. E. Hicks succeeds to the business.

J. B. Turck, of F. B. Turck & Co., dealers in stationers' specialties, Chicago, Ill., has confessed judgment in the sum of \$683.

Hastings & Todd have prepared an assortment of embossed calendars which come in beautiful designs. These are intended for the trade.

The effects of Bradley, Garretson & Co. (William Garretson), book publishers, Philadelphia, Pa., recently sold out by the sheriff, have been bought in by John Garretson.

The recent improvements which have been made to the Kerner stylographic pen have brought forward a large number of testimonials to its worth. The Kerner Company, however, is determined to keep right on improving its production so long as it is susceptible of improvement.

The Polytechnic Association, a branch of the American Institute, holds meetings every Thursday evening in Room 24, Cooper Union building. Papers are read and discussions are had on different subjects connected with the useful arts at each of these meetings and all persons interested are at liberty to attend. Thomas D. Stetson, 23 Murray street, is pres-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

ident, and D. R. Garden, Cooper Union, is secretary.

The *Herald Company*, San Jose, Cal., has sold out.

The *Mesa County Democrat*, Grand Junction, Cal., has suspended.

Milo Bright, bookseller, &c., Akron, Ind., has sold out to Aaron Johnson.

M. Ferenbach & Co., manufacturers of stationery, New York city, have been attached.

Frank Rohm has become proprietor of the *Davenport Gazette Company*, Davenport, Ia.

William P. Hoffman, publisher of the *Bedford Sentinel*, Liberty, Va., has been burned out.

A. Jeffery, bookseller and stationer, Silver City, N. M., has removed to San Antonio, Texas.

H. F. Wicks, publisher of the *Journal of Commerce*, Denver, Col., has sold out to J. A. Fleming.

The Chicago Picture Company has removed from 473 Wabash avenue to 108 Washington street in that city.

The Ohio Wall-Paper Company, Cincinnati, Ohio, has been burned out. Loss, \$15,000 to \$20,000; fully insured.

W. Harper & Co., dealers in wall-paper, &c., Milwaukee, Wis., have dissolved partnership. Richard Smith succeeds to the business,

Burdick & Ross, dealers in paper-stock, blank-books, &c., Syracuse, N. Y., have dissolved partnership, Colin A. Ross having assigned.

William T. Newberry, proprietor of the Royal Printing House, Philadelphia, Pa., has been damaged by fire and water about \$4,000. Fully insured.

C. M. Ward, agent for the Globe Files Company, reports a brisk demand for the "Congress" tie envelopes and the document boxes. Both of these articles are made of the best quality of material and in the most approved manner, and their large sale is an evidence that they are giving satisfaction. They are made to order, and a number of regular sizes are kept in stock. These goods are as low as anything of the kind in the market. Prices, &c., will be sent on application.

A. A. Weeks, 82 John street, has one of the finest and most complete assortments of stationers' hardware and glass ink-stands in the city. His line of goods is all of his own manufacture and it embraces flat glass, screw, cap, stoppered, bankers' Paragon inkstands, board-clips, brass hand-clips, bill and harp-files, pen-racks, call-bells, security and mail letter-boxes, sponge-cups, iron and glass paper-weights, and a great variety of other goods of this character. Mr. Weeks has shown considerable ingenuity in the new designs of inkstands which he has just brought out.

James Campell & Sons, publishers, Toronto, Ont., have suspended. They are rated at between \$40,000 and \$75,000. Their liabilities are placed at \$250,000. Their assets are as yet unknown. The Merchants Bank is interested to the amount of \$100,000.

The printing establishment of S. Gross & Co., 1011 Marble street, Philadelphia, Pa., was damaged \$2,000 by fire on Monday of this week.

Ohlke & Leader, dealers in picture-frames, &c., Kingston, Ont., have dissolved partnership. P. Ohlke continues the business.

The *Herald Publishing Company*, Davenport, Ia., has been consolidated with the *Gazette Company* of the same place.

C. Jourgensen has recently improved the exterior of his establishment by a handsome new show-window.

Billings & Pierson, booksellers and stationers, San Francisco, Cal., have applied for relief in insolvency.

The paper mills of Cary, Nash & Ogden, Port Dickinson, N. Y., were burned on Wednesday evening.

E. G. Jones, publisher of the *Evening Chronicle*, Portland, Ore., will remove to Yaquina.

Phillip Jacobs & Son, paper-stock dealers, St. Louis, Mo., have been damaged by fire. Insured.

S. L. Ives, bookseller and stationer, Mound City, Kan., has sold out to A. C. Pike.

A. A. Childs, of the firm of A. A. Childs & Co., picture dealers, Boston, Mass., is dead.

Joseph Herr, bookseller and stationer, Abilene, Tex., has been burned out.

Wall & Davidson, paper manufacturers, City Mills, Mass., have been damaged by fire.

Kingsley, Dresskell & Co., paper dealers, Cleveland, Ohio, have removed to 157 Seneca street, in that city.

The Snow paper mill at Wachusett, owned by Crocker, Burbank & Co., was badly damaged by fire on October 15. The loss will be about \$50,000. The engine, boilers and part of the rag room were saved. The insurance is \$20,000, including the following policies:—Imperial, of London; North British and Mercantile, Guardian, of London; Liverpool and London and Globe, Northern Assurance, Fire Association of Philadelphia, Springfield Fire and Marine and Home, of New York, \$2,000 each; Niagara and Phoenix, of New York, \$1,500 each.

The new rose shade will fit any lamp or gas globe. It is made of English tinted paper in the form of a full-blown rose, and can be had in different tints. It can be had of F. H. Loss, Jr., who is also offering for the holiday trade a large invoice of satin wood novelties, which he has just received by the steamer Wisconsin. These include jewel-boxes, handkerchief-cases, card-cases, with floral decoration, ebonite, olive-wood, terra cotta and tartan napkin rings, half-hour glasses, egg-timers, &c., at very low prices.

New Bartlett Copying-Presses.

Readers of THE STATIONER were advised some time ago that Samuel C. Tatum & Co., of Cincinnati, had purchased the right to manufacture the Bartlett patented copying-presses, and the cut will illustrate the main features of their press. As may be seen, the Bartlett press embodies an almost entire departure from the ordinary principle. Instead of the top plate lowering to give the pressure, the lower plate is raised against the stationary upper plate. This arrangement allows of much simpler construction, and the press is

admirably adapted for export as well as for domestic trade, being absolutely interchangeable, as well as capable of being sold at very low prices. At the same time, from its perfect self-adjustment to uneven thicknesses, it is very much less likely to break or get out of order, and is much stronger, for the same weight of iron; or, strength being equal, the Bartlett press is considerably lighter than the ordinary presses for the same size. The manufacturers have paid especial attention to the matter of design, and their Bartlett copying-presses will, it is claimed, fully sustain their well-known reputation in this line of goods.

The frontispiece of *Cassell's Family Magazine* for November is a capital drawing by Sydney P. Hall, to illustrate the amusing sketch, "The Proctor and his Bulldogs," by "An Oxford Graduate," and one evidently who has had some bitter experience with the Proctor and his two-legged dogs. The out-of-door articles this month are: "A Canoe Voyage Down the Wharfe," pleasantly described by the one who wielded the paddles; "Life in Old Virginia," the interesting experience of an Englishman who tried farming in "Ole Virginny," and who seems to have suffered, as the saying is, from "too much climate," and "The Garden in October," in which the luscious tomato is scientifically discussed. In the way of fiction there are the two serial stories, "Within the Clasp" and "John Ford," each hurrying to its dénouement; "Gretty's Trust," a romance of the Swiss mountains, by Gordon Stables, M. D.; "His Life's One Holiday," by Lillias Campbell Davidson, and "A Modern Pygmalion," by Catherine Childer. The miscellaneous papers of the number are exceptionally interesting.

Hope is like the sun, which, as we journey toward it, casts the shadow of our burden behind us.

The NOVELTY Paper Fastener.

(Patented in Europe and America.)

Drives and Clinches a Staple or Suspension Ring at a Single Blow.

For Fastening Papers, Binding Books, Ringing Show Cards and Pamphlets, &c., &c., with 400 Steel Staples and 50 Steel Suspension Rings, boxed,

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. ☞ Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, OCTOBER 16, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum, 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

LAST week we referred to the initiation of a movement to suppress fraudulent assignments by the passage of a law forbidding preferences. It is natural that opposing opinions should obtain on all questions of public importance and without trying to ascertain whether there are peculiar reasons which induce opposition we wish to say to those who differ with us that there is only one distinctly marked issue in the proposition to which we have alluded.

If it shall be asked : What is that issue ? we have only to say that it involves the question whether the public by the strictest means at its command shall not limit the possibilities, not to say probabilities, of fraud in the creation of debts and in the matter of assignments. This is not a project which interferes with private rights. The same liberty to create debts and the equal right to loan money will remain unchanged, but it is intended to place it beyond the power of debtor by collusion with a friend or amicable arrangement with a not too scrupulous creditor to defeat the claims or prejudice the rights of people who are entitled to share equally in the proceeds of a bankrupt's estate.

WE have already pointed out that a system of procedure can be adopted which will secure creditors properly entitled to preferred liens on the property of an insolvent and yet give notice to other parties, who are then at liberty to extend credit or not at their pleasure, with full knowledge of the debtor's circumstances if they choose to adopt such ordinary precautions as the law might provide. It may be said that there is now ample opportunity for the seller to inquire into and learn the standing of the buyer; but experience does not demonstrate this, and anything which imposes a reasonable restriction upon the system of preferring creditors ought to be adopted. The suppression of preferences would be only a partial relief to the business community; but it would be a step in the direction of sustaining mercantile integrity and confidence. Until we can get a general bankrupt law we must seek to secure such minor advantages as will help to strengthen the morality of commercial intercourse.

THERE appears to be a "dead set" in some quarters in opposition to the commercial traveler. We don't see just how merchants can afford to dispense just now with these useful adjuncts of trade. When they are ready to content themselves with mail orders or the uncertain visitations of buyers to the central markets, they may get along without the "boys." But in the meantime, wouldn't it be well for

the latter to consider whether, in "pushing" things, they haven't exceeded their limits, and done much to excite opposition, if not to demoralize trade?

Roundabouts.

BY THE TRADE LOUNGER.

Certainly politics are a drawback to trade. People have done nothing but talk about Ohio for the past week, and when you suggest something about business they push you aside and say : Don't talk business ; it is politics that concerns us most now.

* * * *

But, for all this, the folks are ready for trade. The preparations have been made, the goods are laid out and all that is wanted is to get over the ides of November and then to brace in to work. Of course the goods are expected to take the fancy of the buyers. There are constantly new things to note, and choice has a wide range.

* * * *

A pretty case to hold cabinet photographs, and which is intended to lie on the table, is made of plush folded like a book. It is lined and has body given to it by having one thickness of wadding between the lining and the outside. The plush is folded over at the sides and forms a sort of pocket, which holds the pictures in place. It may be ornamented with embroidery, and a pretty design is a pomegranate and leaves ; or it may have the initials of the owner in silver upon it.

* * * *

A novelty in the shape of a pincushion is made in the form of a work-bag. It is nearly square. It is faced with pink silk, the covering being of olive plush. On the upper side is a spray of flowers of arasene embroidery—just a rose and buds of some like simple design. The bag is shirred, and a pink bow is put on over the shirring. This may hang beside the toilet table or lie upon the dressing-case. It is a pretty ornament.

* * * *

In a new paper file or holder, the upper end of a plate projects an arm, in the outer end of which is held a short rod having a button formed on its lower end. From the lower part of the plate a rectangular bent wire extends upward, the free end of which is pointed. A tube, or a rod having its lower end hollowed out, is provided at its upper end with a cup in which the button closely fits. When a paper is to be filed, the tube is moved upward and slightly to one side, when the paper is passed upon the wire in the usual manner. The end of the tube is then placed on the pointed end of the wire to prevent the paper coming off.

* * * *

Among the latest novelties in stationery in the English market is an automatic spring letter-case, intended as a substitute for letter-clips, files, spikes and other similar articles now in use. The case is in the form of a book, having a steel back, which is bent so that the edges touch each other, thus forming a strong clip.

* * * *

Another novelty is a fountain pen of very simple construction, the action of which is on the principle of gravitation and capillary attraction, the ink being supplied to the nib by a patent capillary tube, which extends to the top of the pen instead of underneath, as in other fountain penholders. The tube can be lengthened or shortened to suit any length of nib.

* * * *

An extremely novel style of ladies' work-companions is in the shape of an elegant imitation mandoline, with leather front, the back being in striped satin. The bowl of the instrument lifts off, exhibiting the full fittings neatly arranged on the base of the front part, the bowl itself forming a pocket, with satin cover for knick-knacks.

* * * *

Among new styles of albums is a portrait album. Each alternate page has groups of well-executed portraits of persons distinguished in politics, religion, literature, art, &c. Between the illustrated pages are supplementary leaves for additional portraits.

* * * *

The latest thing in card receivers for fashionable drawing-rooms are handsomely decorated harlequins and columbines in bisque, holding aloft the salver for cards in one hand and keeping their masks before their faces with the other. This is a good idea to catch on to, for it makes the bisque figure useful as well as ornamental.

* * * *

A Cleveland firm recently sent out a circular to the trade, which contains the following prognostications regarding the business outlook: "The proverbial impatience of American business men seems to demand that because now that the crops are assured the stimulus should be immediately felt, and, indeed, if trade were very active we might expect such a result, but with the existing depression we have no reason to hope for a return of confidence and a revival in business until a large portion of the crop is marketed, which will not probably be until after the first of the coming year."

* * * *

The circular continues in the following strain: "We had very poor crops in 1881, but such was the activity in the iron trade that immediately succeeding the poor agricultural return, we had a very lively fall and winter business, and did not begin to feel the evil effects until the spring of 1882. Reasoning by analogy, therefore, it will not be surprising if we do not experience the good results from our large crops until we are well along in the next year."

* * * *

Fine card printing is getting to be quite a common thing. The time was when this class of work was monopolized by orders of dance, wedding and menu cards, but that day has gone by. Many business firms now take especial pride in getting out their cards in the finest style of printing and engraving, and not a few of them are adopting delicate tints, such as cream, pink, &c. The engraved work also is especially noteworthy for tastefulness in design and fineness.

* * * *

Quite a great deal of complaint is being

made by commercial agents over the treatment they receive from the representatives of various houses in this city when they call to solicit orders for their respective lines of goods. Such treatment is out of place in these dull times, when everybody should have plenty of time to devote to commercial travelers.

Answers to Correspondents.

E. G. asks: Where can I obtain the Kosmian safety ink?

Ans.—We don't know.

O. W. C. & Co. want the address of maker of Todd's ink.

Ans.—W. B. Todd, Philadelphia, Pa. Tower Manufacturing Company is the New York agent.

McC. & Co. ask: Who manufactures hard rubber or composite checks, and whether the rubber are cheaper than composition?

Ans.—Lyon & Brothers, No. 2 Bond street, New York, make goods of this character. We presume that any of the hard-rubber manufacturers (of whom there are quite a number) would supply the rubber. Composition checks are said to be the cheaper.

K. & M. want to know who makes corks with black enameled tops.

Ans.—Boody, Sharpless & Co., Chambersport, Pine County, Pa., are said to be headquarters for them. E. B. Estes & Sons, 280 Pearl street, New York, make the black enamel tops without the corks.

J. B. wants to know if any first-class publishing house issues a nice Christmas annual which can be used as an advertising medium.

Ans.—We don't know of any. If there is a house that does we can give the name of a customer.

S. & T. ask if there is a pocket price-book with printed list of staples for a stationer's use.

Ans.—C. N. Ayres, Detroit, Mich., makes a book of this description.

W. & H. ask: Who gets out calendars for the trade?

Ans.—We have answered this inquiry several times. Go to any of the large lithographing or printing houses. See also an item in our gossip this week.

B. P. Co. wants to know where to buy letter, note and bill-heads, bristol board, &c., cheapest, and whether the large paper houses East and West charge about the same price.

Ans.—We cannot tell you who is cheapest. Presumably prices are about the same in one good house as another. You should confer with leading jobbers East or West, and if you don't know them, refer to Lockwood's Directory.

S. asked last week where he could get Wyckoff's combination rule.

Ans.—William Mann, 529 Market street, Philadelphia, can supply the article.

The meeting of the American Paper Makers' Association will be held in this city on Wednesday next. The book division at the West will meet in Chicago on the same day, and the writing division will meet at the same time and place with the National Association.

A representative of the trade, who has just returned from Philadelphia, speaks admiringly of the recent display of the blank-book firm of Wm. Murphy's Sons, of that city, at the Pennsylvania State Agricultural Fair. One of the books exhibited numbered 3,000 pages, meas-

ured 25x52 inches open, 12 inches thick and weighed 175 pounds. It, moreover, contained a registry capacity for 126,500 names. It is needless to say that the firm named was awarded the highest prize.

John McVean, a well-known citizen of Le Roy, N. Y., was some weeks ago seized with a mania for collecting advertising cards. He had collected over 1,500 different cards, of which he was very proud. His ambition was to be known as having the largest assortment in the country. A few days ago he read in a newspaper that another collector had more than 3,000 cards. This made him exceedingly despondent. On Monday of this week he was missed. A note was found in his room bearing the words: "Life's greatest pleasure is gone." Yesterday his dead body was found hanging in an out-of-the-way building. He was fifty years old.

The line of plush boxes shown by James D. Whitmore & Co. this season is fully equal to any line heretofore shown by this house, and is claimed to surpass any other goods of like description offered this season. The line is replete with novelties, for which very large orders have been taken. The firm makes certain styles in very large quantities, and at prices which will enable jobbers to handle the goods to advantage. Parties visiting the city are invited to inspect these goods before placing their orders.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, October 15, 1884.

THE MONEY MARKET.—Financial affairs have undergone no change since the last week, the available supply of loanable funds having been abundant at the low rates of interest so long current. The banks ask 5@6 per cent. for call loans on stock collateral. Commercial paper has ruled quiet and steady at 5@6 per cent. discount for prime indorsements. Speculation at the Stock Exchange has been neither active nor of special significance during the past three days, and the market has drifted along in much the same condition as at the close of last week. Railway bonds quiet and steady. Governments a shade higher. The market for foreign exchange has ruled quiet, with little or no pressure to sell. Posted rates for sterling 4.82@4.85.

THE PAPER MARKET.—The current of business in the paper trade is without any improvement, the demand continuing sluggish. In some instances dealers are able to secure an advance in prices, but any great enhancement in values must be brought about through a better demand for paper and a reduction of stocks in dealers' hands. On the part of manufacturers it is reduced to a question of higher prices to meet the heavy advance in rags or to stop the mills. The manufacturers will meet in New York on Wednesday, October 22, to take into consideration the peculiar condition of the trade at this time.

THE STATIONERY MARKET.—There are fewer complaints of poor business this week. A majority of dealers, however, report trade as in about the same condition as usual, while, on the other hand, many report a decided improvement. Some even assert that they are doing better than last year. This class of tradesmen, however, belong to the fancy-goods trade. The trade in general stationery of a staple character shows little, if any, improvement, and is mostly in the form of small orders, which are about evenly divided among commercial travelers and dealers themselves. The toy trade is quite fair, but not as satisfactory as is wished. Orders are very small, and only that class of toys are in demand for which there seems to be an immediate sale, as holiday toys go off rather slowly, although prices are low. There is very little doing in the ink trade. There is a little better movement in writing papers and envelopes. The advance in the price of paper has indirectly affected the blank-book trade, and it is understood that manufacturers are in favor of a revision of their prices.

The *Arcadian Recorder*, Halifax, N. S., says that St. Mary's Church, at Aylesford, was crowded on October 2, on the occasion of the marriage of Andrew Mackinlay, of the firm of A. & W. Mackinlay, of Halifax, to Miss M. E. Harris, sister of T. D. Harris, M. P. P. for Kings County, and sister of Mrs. B. W. Chipman, of Halifax. The ceremony was performed by Rev. Dr. Avery. The bride looked charming in a princess dress of ivory-white satin, court train, white veil, orange blossoms, gold and diamond jewelry (gift of the groom). The bridesmaids—Miss B. Mackinlay, sister of the groom, and Miss Sophie Harris, sister of the bride—wore dark green costumes with hats to match. The best man was Arthur Curran. The bride received some eighty valuable presents; those from Red Cap Snow Shoe Club and F. Company, Princess Louise Fusiliers, were much admired.

We judge ourselves by what we feel capable of doing, while others judge us by what we have already done.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the TRIUMPH MUCILAGE,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), er gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1832.

A Trade-Mark Decision.

The first decision of the Patent Office under the new trade-mark law has been rendered by Assistant-Commissioner Dyrenforth, in the case of Lyon, Dupuy & Co., *ex parte*, on appeal from the examiner of trade-marks. A syllabus of the decision is as follows:

1. No applicant may register a trade-mark unless he can establish, first, that he has the right to use it, and no one else has; second, that it is not identical with the registered or known trade-mark of another person, and, beyond this, he must show that he is using the trade-mark which he so owns in commerce with foreign nations or Indian tribes.

2. The statute does provide that the trade-mark sought to be registered shall be used in foreign commerce; but it does not in terms provide, nor in fair intendment convey the idea that a party may acquire the right to use somebody else's trade-mark merely by using it in such trade.

3. Where the records of this office disclose that certain parties registered a trade-mark under the law of 1870, that such trade-mark was their property, that they had been using it in this country for ten years next preceding the date of their application for registration, and there is no evidence that they ever abandoned such trade-mark—held that section 3, of the act of 1881, and the spirit of the whole statute, authorize the Patent Office to take notice of the facts recited in said records in determining "the presumptive lawfulness of claims to the alleged trade-mark" by subsequent applicants for registration, and the examiner was justified in rejecting the application for registration on the facts disclosed in said record.

L. Prang & Co. have just brought out a pleasing novelty in the shape of a lithographic representation of the butterfly printed on two sides of the sheet in such a manner that when the shape is cut out it is a perfect imitation of a real butterfly. Ten varieties and sizes of butterflies are printed on a sheet. They are

especially intended for bouquets, to which they can be fastened by a fine wire, but they can also be used for ornamenting pictures or for pinning against the wall or fastening to the window-pane. Their realistic effect is remarkable. L. Prang & Co. have also in preparation a new series of art studies, consisting of landscapes, floral designs, &c. They also announce that they have a large number of the novelties of the late Palmer Art Company still on hand, which they will dispose of at very low prices.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

WHITE'S EYE SHADE,

—3— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

WILLIAM B. WHITE, Patentee and Manufacturer, No. 29 High Street, Boston.

Bank Note Printing.

The following particulars of the processes employed in this country are by a writer technically acquainted with the subject. He begins with the remark that the chief object in the manufacture of bank-notes is to render forgery impossible, or at least easy of detection. This is sought to be effected by peculiarity of paper, design and printing; or by a combination of these means, as is done in the Bank of England and other banks.

The mechanical design, however, has chiefly been relied on for security. It has been the constant aim to make the impression such as to render the genuine note readily distinguishable by the public for its high art, and to the bank officials by secret peculiarities in its execution. Until about 1837, copper-plate printing was the only process in use for bank-notes. In that year, however, Perkins effected his valuable improvements in practical engraving. In 1855, electrotpe printing was introduced in the Bank of England by Mr. Smee, and since that time the notes have been produced by surface printing by the electrotpe.

The design is engraved in relief on separate pieces of metal—copper, brass and steel. From the aggregated pieces a matrix is obtained by electro deposition, and from this a plate is obtained by the same means. When backed and mounted the plate is used for surface printing.

In America and in the Bank of Ireland the plates are prepared according to Perkins' method. The separate designs forming the complete bank-note are first engraved by hand on separate steel blocks, which are afterward hardened, and are preserved as permanent patterns not to be printed from.

These engravings are transferred to the steel rollers under heavy pressure, the rollers being afterward hardened and used as dies to impress the engraving upon the printing plates. The engraved plates for printing the bank-note are made of soft steel, and are never hardened after being engraved. Being of large size—20 inches by 16 inches—they would most probably lose their flatness in hardening. Another reason for not hardening the plate lies in the fact that, when worn, the soft plates are easily repaired by reapplication of the rollers thereto.

The printing plate, when receiving its first impression from the master roller or die, is fixed upon the table of a strong press, from which a pressure of 10,000 pounds can be obtained, the pressure being regulated as required by means of a weighted lever. The position of two register points in the plate is accurately noted by means of a micrometer microscope, and registered in a book kept for the purpose.

The master roller is then passed over the plate by the machine under the heavy pressure, being very steadily guided by a special parallel motion arrangement. The table is provided with complete adjustments of peculiar delicacy, and the pressure of the engraving roller upon the plate is not produced by the roller descending upon the plate, but by the table being raised up to the roller.

When a plate requires renewing, it is again

fixed upon the table in the same position as before by means of the micrometer microscope and the register of its position; the roller being passed over, it deepens those parts of the impression which the continuous printing has worn away.

Chromotypes.

Chromotypes form a new development of the art of photography. The process is not complicated, and the results are attractive. The following is the *modus operandi*.

The negatives for chromotypes should be thinner than those for ordinary uses, and surrounded with an opaque margin either of paint or paper.

The papers are sensitized by immersion in solution of potassium dichromate (1 part salt, 32 parts water) for about 1½ minute. The duration of immersion depends, however, on the temperature and the nature of the paper. The more sugar the latter contains, the shorter may be the time of immersion; the paper must remain in the solution till it spreads out quite flat. The drying must take place at low temperatures, otherwise a hard brittle paper is obtained. It is also of importance that the sensitizing liquid should contain no free acid, otherwise a covering is got which does not dissolve in water.

The exposure should last but two-thirds of the time required for silver prints. A piece of silvered paper serves as a photometer; when it has turned brown the light may be shut off. Of course the intensity of the negative has to be taken into consideration; over-exposure is better than under-exposure.

The development, or transference of the chromate layer with its invisible image to glass or metal, is effected in the usual way. When the paper has been fastened to the plate the latter is put into a water-bath of about 30° Centigrade, which is then slowly raised to a little higher temperature. The developed image is then transferred to paper prepared with a solution consisting of

Gelatine.....	24 grams.
Chrome alum.....	0 8 "
Water.....	576 "
Glacial acetic acid.....	12 "

The paper is steeped in water at 40° C. and then brought into contact with the developed image.

It is more convenient to dispense with this second transference, and to place the image at once upon its permanent surface. In this case special negatives are required.

The art might be adopted more frequently by stationers and manufacturers of fancy articles. Chromotypes on tinted and coarse-faced paper appear very elegant. The images prepared as above described are ready for coloring with water-colors, &c. If it is intended to paint with much color the image should be covered with a watery solution of shellac, which hardens the gelatine.

When it is desired to produce an image on ivory, it is necessary to wash the image after exposure to light in order to remove the residual chromate, otherwise a yellow tinge would be imparted to the ivory.—*British and Colonial Printer and Stationer.*

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used, & the cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$30 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses Tubes, Slide-kest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unassisted methods for LEARNING, AMUSEMENT and PROFIT. The Transparencies for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 (12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other slides in stock and made to order. For Home Use the ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or (dealers) we will cheerfully show Lanterns in operation.

The Globe Files Company has a very fine line of desks, which it is offering the trade at the lowest prices. Its regular stock is made of black walnut, but it makes desks of other woods at short notice. Its line embraces high-roll, cylinder, low-roll, flat-top desks, &c. The desks are substantially built and finished in the best manner, and have all the latest improvements.

Obituary.

HENRY T. ANTHONY.

Henry T. Anthony, of the firm of E. & H. T. Anthony & Co., died at his residence, No. 108 Lexington avenue, this city, on Saturday morning, October 11, from the effects of injuries received by an accident on the Wednesday evening previous. Mr. Anthony was well known to artists and photographers, both in this country and in Europe. He had been for forty years a partner in the firm of E. & H. T. Anthony, dealers in photographers' supplies at 591 Broadway. He was seventy-one years old, and was born in this city, September 18, 1814. After receiving the usual preliminary education he entered Columbia College when fourteen years of age, whence he graduated in 1832. In selecting a vocation, that of civil engineer offered the most promising field, and among his early engagements he had charge of the construction of one-fourth of the Croton aqueduct, made the first survey for the Erie Railroad, and had charge of the construction of the Hud-

son River Railroad on Manhattan Island. He engineered a number of other railroads and public works. After he went into business with Edward Anthony, his brother, he turned his attention to the manufacture of photographers' materials. His knowledge of chemistry enabled him to make many improvements in the materials used in developing negatives and in printing photographs. He was the inventor of the process of fuming albumenized paper with ammonia, which is said to be one of the most important aids to photography. He also made a formula for collodion, which is used everywhere.

Mr. Anthony was the first to make instantaneous photographs. He was never married. When in this city he boarded at 108 Lexington avenue. Much of his time was passed at fashionable resorts.

The Ideal Pen Company, No. 10 Murray street, is manufacturing Waterman's "Ideal" fountain pen. The pen-holder takes any ordinary gold or steel pen, to which the supply of ink from the reservoir in the holder is regulated automatically by the act of writing. The feed is said to be even, and the holder is readily handled and kept in order. A warranty for five years is given to each purchaser of the "Ideal."

A Chicago Bookseller "Watched"

The Chicago *Telegram* says: While in a bookstore on Deerborn street, the other morning, looking over some old tomes, Mr. Sizer, the proprietor, showed us a watch and a letter encased in glass, of which he is justly very proud, and told us its history as follows:

"During the first of August a lady stepped into his store and asked if he had a certain volume of poems. After looking through the antiquarian books, Mr. Sizer informed her that the book she wanted was not in his stock. She then said that that was just what she expected, since she had hunted for it in hundreds of bookstores and always had that same answer given her. Too, she had had other book dealers advertise for her; one had succeeded in finding a copy, but it was not complete. She had about despaired of ever finding it, and wanted to know if he thought he could find it for her. He said he would try and asked her to give him a description of the book as near as she could remember it. She described it as being a cloth bound book, 12 mo., published in Philadelphia in about 1840, and that in the right book the last poem would be entitled 'Leonore.' After looking through his old reference catalogues, Mr. Sizer found that such a book had been published about that date and informed the lady that he would do his very best to get it. One thing he told her, he would like to know, 'to about what expense she would warrant him in going.' She immediately gave him *carte blanche* for any sum under \$25, and told him she would only be too happy to get the book at that price, and then told him why it was that she so much wanted that particular book. A copy of it had belonged to her mother, and when her mother had died, it was given to her daughter as a death-bed gift. To accommodate a relative she had loaned the book, and when asking that it be returned, it could not be found. They had spent much time and trouble in trying to find it, but had never succeeded. Immediately Mr. Sizer began to advertise far and wide. At the end of two weeks one answer was received to his advertisement and two inquiries from the lady as to whether he had found the book or not. At the end of three weeks he had received three answers and two copies of the book. One of them answered the description in every item, and he immediately forwarded it to the lady, first having had it insured and sent by express. At the end of three days an answer was received, enclosing a check, and saying that a token of appreciation had been sent by registered letter. Upon opening the letter he was surprised to find a fine full-plate, expansion balance watch, one of the Springfield Watch Company's best, and having engraved upon the outer case this dedication: 'Presented to Wells B. Sizer, August 21, 1884, by Mrs. — — —, as a token of gratitude for having found a treasured book.' Of this memento he is very proud, and says that never in his knowledge has a bookdealer been so liberally rewarded for having secured a prized volume." The entire outfit is worth anybody's trouble to see.

Commercial Immorality.

At the Eighteenth Street Methodist-Episcopal Church last Sunday evening, Dr. King preached a sermon on "Commercial Morality and Immorality," from the text: "A false balance is abomination to the Lord; but a just weight is his delight." He said in substance: "It is common in these days to wait until some conspicuous case of dishonesty comes to light and then righteously and violently assault it. But are there not more obscure dishonesties in trade that are constantly sapping the foundations of commercial morality? That in the midst of a general advance toward a higher civilization in government, in science and in religion, the average commercial conscience is becoming alarmingly obtuse, is proved by constant developments. The ethical code of business raises men to its level, or pulls them down, according to its character. While figures can't lie, the moral nature back of them can. The making up of goods shorter in lengths than they profess to be; short weight and short measures in the varied branches of retail trade; the shrinking of textures from their marked width; selling from samples superior in quality to the filled order; taking advantage of the fact that scales weighing large quantities (of coal, for example) are not accessible to the consumer; selling below cost at one time, expecting to more than make it up on future orders; exposing the best fruits or other produce upon the surface to conceal the rottenness beneath; baskets and cans and bottles with their bottoms mysteriously elevated; brilliant colors to conceal shoddy; imitating trade-marks to deceive purchasers; circulating false information for the purpose of raising or depressing the value of stocks; creating an artificial scarcity in the necessities of life; appealing to the avarice or to the fears of men; convenient failures or assignments to cut off honest creditors—these are called the "tricks of the trade." And many men say that they must conform to these codes of morality, or they cannot succeed in the rivalries of business nor support their families. But this attitude puts an end to all questions of morals. "Take heed what ye hear, with what measure ye mete it shall be measured to you; and unto you that hear shall more be given," says the authority from which there is no appeal. "Divers weights and divers measures, both of these are alike abomination to the Lord." "A just weight and balance are the Lord's. "How futile are all excuses for dishonesty in the face of the inspired word. The gospel cannot be divorced from business. "All things whatsoever ye would that men should do unto you, do ye even so unto them." Every short measure makes shorter the moral stature. Every short weight diminishes weight of character. Every deception for gain dwarfs the soul. "Let me be weighed in an even balance that God may know mine integrity," says Job. Many a man who justly condemns the great defalcations and breaches of trust is himself engaged in "tricks of trade" as morally disreputable as the conspicuous sinner's conduct. What is the cause of this modern carnival of business crimes? The low

tone of morality in many branches of trade. The truckling obeisance made to wealth and show, as such. The making haste to be rich in order to secure homage and make display. Men see that the world not only, but the church, bows down to wealth, and thus they covet this power that can work such miracles.

I have spoken these words that I might, if possible, arouse the conscience of the thoughtless and guilty. But I would not close without saying that honor to the business man is as important as valor is to the soldier, or charity to the Christian. And, thank God! there is a mighty host of men of honor among us who "hold fast their integrity, who make this world worth living in."

Scouring Paste.

The following may not be the identical scouring paste so extensively being pushed, but it gives me equal or better satisfaction in using:

	Parts.
Oxalic acid.....	1
Peroxide of iron, jewelers' rouge.....	15
Powdered rotten stone.....	20
Palm oil.....	60
Petrolatum.....	4

Pulverize oxalic acid and add rouge and rotten stone, mixing thoroughly, and sift to remove all grit; then add gradually the palm oil and petroleum, incorporating thoroughly. Add oil of myrbane, or, as I prefer, oil of lavender, to suit. I apply with a piece of flannel, rubbing off with a piece of soft paper, and polish with a chamois. For cleaning metal I have never seen its equal.—*J. W. Colcord in Pharmaceutical Record.*

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 17.

NEW YORK, OCTOBER 23, 1884.

WHOLE NO. 487.

Correspondence.

CHICAGO CHIPS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, October 23, 1884.

"Trade is good," said a leading stationer to-day. "I was very much surprised to find that this year's sales have aggregated more than they did up to the same time last year. I had not expected any such result, as everybody had been complaining of dull times and slow sales, but it seems we have been an exception to the rule; our factory is running full time and our store hands are kept constantly busy throughout the day, so, naturally, I am very confident, and predict an active trade for the entire season."

The Western branch of Horace Partridge & Co., Boston importers and jobbers of toys and fancy goods, has done a very successful business since its opening here. The manager, Mr. Holman, reports trade as very active, so much so that he finds it hard work to keep up with his orders. This firm claims to be the largest importer of fancy goods in the United States. Its assortment is very large, embracing a complete line of staple goods and a large number of novelties.

Coffin, Devoe & Co. have one of the most complete assortments of artists' materials to be found. In addition to their regular stock, they have now a full line of plaques of every description in wood, composition, and brass. A novelty which they are now showing is a line of plain and decorated satin-faced plaques. The decorations are very pretty and effective, consisting of landscapes, birds, and floral designs. The frames are satin and plush, embossed and with handsome cord and tassels. These goods are very attractive, and should sell rapidly. This firm has also something new in a stretcher key, which will be found very useful to artists, as it is quite an improvement over anything being shown in that line.

E. P. Donnell & Co. have out their first new cutting machine. One of its special features is its ability to cut clear through the paper without the use of a cutting-block, the knife passing below the bed of the machine.

At the warerooms of A. H. Andrews & Co.

your correspondent was shown the latest, simplest and best device ever made to show the relationship of the earth, sun and moon; it is called "Andrews' Lunar Tellurian." It shows the moon revolving around the earth and the inclination of its orbit to the orbit of the earth. Leading teachers pronounce it the best apparatus of the kind. This firm manufactures sixty-five varieties of globes including several styles of fine library globes and the celebrated McVicar Tellurian Globe, also slated globes for illustration in the study of spherical geometry, trigonometry, surveying and map-drawing. It has just perfected new plates and patterns and has increased its facilities for manufacture and is prepared to furnish these goods at rates which defy competition in first-class work. Its globe case is sent without extra charge with all 8 and 12 inch globes. This is very conveniently arranged with hinges for packing away or enclosing the globe; when hung on the wall or set on brackets it forms a neat cabinet in the schoolroom for specimens, apparatus or books.

The inter-State industrial exposition closed on Saturday night, after a moderately successful run of six weeks. The attendance was not as large as last season, while the exhibits were considered superior.

Noz.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, Pa., October 21, 1884.

There has been a slight but positive improvement in the stationery trade of this city during the past week. This is not confined to this branch of trade alone, as nearly every line shows a better feeling than has been manifest for some time past. It is not confined to our local demand, but seems to have been felt in all parts of the country. Travelers upon the road have been sending in their orders for larger amounts of goods. Nearly every department of the stationery business feels the fresh impetus that has been given, but it may be said that the principal increase has been in the orders for holiday goods. Fancy cards of every description, inkstands of every imaginable shape and style, writing-desks and all the paraphernalia of the office have been called

for in a way that indicated the possibilities of a good business between this and the first of the new year.

Embossed work, bronzes and plaques, Japanese handiwork of various description, and thousands of articles that were not dreamt of in the catalogues of our forefathers, now go to make up the stock of the stationery store of to-day. The ground to be covered is wide, and calls for a good deal of judgment on the part of both wholesalers and retailers in the selection of their stocks. These new articles are very often expensive. It takes more money now to stock a stationery store than it did twenty five years ago. They æsthetic taste of the American public has been carefully cultivated, and articles which were formerly found only in the dwellings of the wealthiest classes, and often very rarely in these, are to-day seen in many a dwelling of only moderate pretensions. But while the price of these articles of *virtu* is comparatively high, it is much less than in former years, and the margins of profit are by no means so large as outsiders would think. Competition has extended to this as to every branch of the stationery trade, and it is this competition which has brought this line of goods within the reach of the masses.

In the staple goods of the stationer profits are even yet more narrow. Writing papers and envelopes were never offered to the public so cheap as at the present time. Our American manufacturers have made decided improvement in the manufacture of fine writing paper in the past few years. To-day our stationers can offer to their customers a paper that will equal, and if anything surpass, the celebrated Irish linen paper of Marcus Ward & Co., and it is offered as low as the foreign article.

The manufacture of fancy articles is making rapid strides in this country. We are gaining ground day by day, and yet the volume of imported goods is by no means small. In some things we cannot yet compete with our cousins across the water, but we will keep on trying. We do not mean to take a back seat. And in the great struggle for business and popularity, the Philadelphia stationery manufacturers do not intend to be left in the rear. They will push ahead, step by step, profiting by their failures and striving to do better each time, until they march in the front

ranks with the rest of the world. The stationery business, like all others, has been feeling the effects of the depression which seems general. Our dealers have had a long spell of dullness, and are glad to welcome the slightest sign of renewed activity. The fall trade is usually a pretty good one, however, and hope is once more bright.

A. M. Collins, Son & Co., 527 Arch street, report an increased demand for fine cards for holiday purposes. Business has been rather dull for some time past, but at the present time the outlook seems rather more hopeful. Prices are very low, and are likely to remain so.

W. G. Perry, 728 Arch street, reports quite an improvement in business during the past week. Fancy stationery of all kinds has been in request. Business is not yet as brisk, however, as he would like to see it.

F. Pulaski & Co., 1026 Chestnut street, are doing a very fair business in the finer kinds of fancy articles. They cater more particularly for the very finest trade and the demand is fair for the time of year. A little later on they expect to be very busy.

Louis Dreka, 1121 Chestnut street, finds an improved demand for his fine lines of stationery. The traffic in holiday goods has already begun, and the outlook is more encouraging than it has been at any time this year.

Altemus & Co., 26 South Fourth street, are having a fair trade both in retail and wholesale lines. The year's business has barely been up to that of last season, but the balance of the year may show up more favorably than that of 1883.

E. J. Spangler & Co., 507 Minor street, report a little improvement in the demand for envelopes. Traffic in this line has been very quiet for nearly the entire year, and the profits have been cut down to the narrowest possible limits, but they think they have managed to secure their share of business and that the worst is probably now over. They do not think any further decline in prices possible, and if any change is made it must be for the better.

The Lockwood Manufacturing Company, 251 and 253 South Third street, makes a similar statement with reference to the envelope manufacturing business. The prices of envelopes are lower to-day than they have been for years. The volume of business has been about equal to that of last season. Few bad debts have been made, because of the cautious dealing of both buyer and seller. Hand-to-mouth has been the watch-word of the envelope business, as of all others. It is very probable that the political agitation of the country may have had its effect upon general business, and if so, when the matter is definitely settled there may be a revival of traffic which will show a tendency for the better. It will be very welcome when it does come. People are getting very tired of dull times and no profits. The cost of production has been reduced until there is no room to reduce any farther. Hence, if lower prices for the finished article prevail, it will have to be sold at a loss. This cannot be kept up indefinitely; our manufacturers would soon get tired of that sort of thing. It is probable, however, that

bottom has been reached, and that the next step will be an upward one. At all events, no fears are now entertained of a decline. The thing to be done now is to hold on, and await the coming of better times, which it is earnestly hoped are not far distant.

The death of Christian H. Hershey, senior member of the Philadelphia Novelty Company, which occurred on September 29, will not make any change in the management of the business, which will be carried on as before. The company's new illustrated and descriptive list of stationers' hardware and novelties is very full and complete, and should be in the hands of the trade everywhere.

Thos. M. Simpson shows a new line of goods, comprising bronze-bordered show-cards in two sizes—11x11 and 11x14—of entirely new design in border, on good stock, assorted in colors; also bronze-bordered cards in three popular sizes, suitable for neat business cards, or which may be used as tickets for any entertainment. Any of these goods can be furnished at about the price of ordinary plain stock. He has also a line of ball tickets, programmes, silk tassels, invitation cards, &c., a price-list of which will be sent on application. Mr. Simpson offers cottage chromos—5½x7½ inches—in twenty different designs, both varnished and plain, which he is closing out at low figures.

Molten & Munch are out with a handsome circular, announcing material improvements in their "Linwood" flat paper, also a well-assorted line of all kinds of ruled and flat papers, and also invite attention to a full line of envelopes of all sizes, qualities, &c. P.

BOSTON CHIPS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Oct. 21, 1884.

Notwithstanding the season is getting well advanced, the fall trade shows little animation so far. The depression so frequently commented upon is not alone confined to the stationery trade, but seems to prevail all branches of business alike. And to this dullness of commerce, generally, is the quietness which now prevails among stationers largely attributed.

Staple goods and commercial stationery are in very light demand; but fancy wares, souvenirs and holiday novelties are meeting with better sales.

Although numerous orders are being booked, they are subject to future delivery, and in consequence daily transactions are not marked by long rows of cases upon the sidewalks awaiting shipment.

Carter, Rice & Co. have been doing a very large trade, notwithstanding the dullness of the times. One peculiarity about this house is that when business is conceded to be dull an extra effort is made to push business. And then again, its line of staple goods is always so complete that printers and stationers at all times feel confident of filling their orders without delay. This house is also continually adding to its stock new specialties, for which a demand is readily found. Its "royal" and

"antique" cover papers which were presented to the trade some few months ago, have had a big demand, and the demand still continues.

Another specialty which Carter, Rice & Co. are just now introducing to the trade is gummed label paper, designed especially for printing upon. These gummed papers will lie flat, and can be printed and cut without experiencing the trouble from curling which has heretofore resulted from the use of gummed papers. These papers are in all colors. Those of the trade having occasion to use gummed papers would find samples quite convenient, and these will be sent upon application to the house.

In box stationery this enterprising house is bringing out a line of goods which is certainly somewhat novel, and to which the attention of the trade will be shortly called. Each box contains twenty-five sheets of note-paper and twenty-five envelopes to match. Now, one would suppose that there were fifty pieces in each box; but that is not so. Each sheet of paper is part of an envelope, or is it the envelope which is a part of the sheet of paper? At any rate, they are a part of each other, and, not being "apart," come and go together, and together count one. With the aid of a diagram, this explanation would be more lucid, but a sample of the "combination envelope and letter sheet" will be sent to those interested, and then its merits will be more readily understood.

William A. Davis, of mucilage fame, whose "Treasury" brand is so favorably known to the trade, has lately returned from a business tour through New York City, Philadelphia and Baltimore. Mr. Davis reports that trade in his line has been very good for some time back. Comparing September just past with the same month of last year he claimed that the volume of business shows an increase of nearly 50 per cent. This increase in trade is not on mucilage alone, but is shared also by his inks.

The increased cost of gum-arabic has had a tendency to stiffen the mucilage market, but the jobbing price has been only slightly advanced—not at all in proportion to that of raw material.

Knight, Adams & Co. are busily preparing for the fall trade, and are showing an elegant line of rich goods for the holiday season. This line comprises Vienna wallets and cigar cases, brass goods in endless variety of designs, photograph albums, ink-stands and paper weights, novelties in leather, plush and olive wood and other articles too numerous to mention. This stock is all freshly imported and was personally selected by Mr. Knight during his late tour in Europe. Knight, Adams & Co. being direct importers, the trade can save intermediate profits by dealing directly with this house.

In the card line J. Beard is offering special inducements to the trade—that is, if low figures are any inducement. Christmas cards, plain, fringed and in satin mounts, are in great variety; birthday cards are shown in a thousand designs; over five hundred styles of embossed pictures are among the display, as

(Continued on page 540.)

HENRY BAINBRIDGE & CO.,

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 Japanese Finish, No. 3 per doz ..\$24.00 Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 Mounted on boards..... " .. 4.80 DISCOUNT TO TRADE.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

(Continued from page 536.)

well as a variety of shape novelties. This house issues no catalogue, for the reason that many lines of cards are cleared out before its catalogue could be issued. No free samples are sent out either—can't afford the time requisite to mail them; but a personal visit to J. Baird's Essex-street house will give big returns to those who are looking for bargains in cards.

Samuel Hobbs & Co. report that the demand for Hubbard's pens is steadily increasing. It is with this house that Mr. Edwards, the New England manager of the Globe File Company, makes his headquarters. Mr. Edwards is meeting with success in this section, having placed a number of large Globe letter cabinets during the past month.

Charles H. Whiting reports that his late publication, "Our Unjust Tariff Laws," has had an immense sale, with steady demands still noted. This work is from the pen of Henry Loomis Nelson, clerk to the speaker of the House of Representatives, and presents the tariff question in a very clear and concise manner. So simply is the question discussed that one of ordinary intelligence can readily understand its arguments.

The bulk of the school-book trade is about over, and jobbers in school supplies are taking a little merited rest. Since the first of September John A. Boyle, manager of the Boston School Supply Company, has been almost worked to death. The value of the business transacted with the schools by this house alone is close on to \$100,000, and this represents the sales of Warren's geographies, Monroe's readers and Green's grammars. Cowperthwaite & Co., the Philadelphia publishers, complimented Mr. Boyle very highly upon the satisfactory manner in which the business was conducted, and stated also that the statement just rendered by the Boston School Supply Company was the largest single account which their publisher ever sent out. To have so much business crowded upon the house in such a short period of time required hard work and long hours.

"Ye olde English Chrismasse cards," for which H. H. Carter is the sole American agent, are still in favor, and many thousands are being sold. Mr. Arthur W. Carter, who represents the house on the road, has recently returned from a business trip through the country, and reports a very good trade, particularly in these "antique cards." After a few days' rest, Mr. Carter will take the road again with fresh samples. Look out for him!

A. L. D.

PITTSBURG POINTS.

FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, October 20, 1884.

The Associated Press agent sent out to nearly all the dailies of the United States the report that the immense iron works of Oliver Brothers & Philips would shut down because of a strike to be inaugurated by the day laborers of the mill. There was a notice given the men that their wages would be reduced to 98 cents per day; but a conference with the

employers by a committee of the men had the happy result of the firm's withdrawing the order for a reduction, and everything is serene again.

There is no doubt but the higher priced mechanics must submit to a decrease in their wages. There are hundreds of men in the various mills of this city who make from \$8 to \$20 apiece daily. The low price of iron and steel will not warrant any such remuneration for the workmen. I know from a close personal acquaintance with quite a number of our manufacturers, that they have always been willing to pay high wages and are now anxious to give all that they possibly can to their employees, but the demand for their material is light and the margin of profits are exceedingly small, it is an absolute necessity to save somewhere, and it appears now that the skilled workmen must stand a reduction.

Strikes don't pay. This summer the great bulk of the coal miners in this section of Pennsylvania struck for three cents a bushel, an increase of half a cent per bushel. Within the past few weeks most of them have gone to work, and in two of the river pools at half a cent less than they received before the strike.

Pittsburg is not reaping any benefit from the war of railroad rates now going on in so many sections of the country. True, we have the Baltimore and Ohio Railroad here, but the famous and magnificent Pennsylvania Railroad and its two Western connections, the Pittsburg, Fort Wayne and Chicago and the Pan Handle railroads, are so well liked, their patronage keeps up, notwithstanding they maintain their regular rates. Without any feeling of prejudice, I do think the Pennsylvania Company's roads are the best equipped, the safest and most pleasant railways to travel on in the United States.

Frank Bacon has made another addition to his book and news store. His rooms are now double their former size, and with the new stock just added, the appearance of the store has been greatly improved. Frank has been attentive to his business and deserves all his prosperity.

The old and well-known establishment of J. Eichbaum & Co. presents a neat and busy appearance. The printing and book-binding departments are kept busy, and the general retail room is brightening up with the fall trade. James Wilkinson has added so many new and beautiful things in the fancy and art lines, that the front part of the store is as attractive as any large jewelry establishment.

W. W. Edgar thinks that the weather is too beautiful to make a good periodical trade. The people would rather be out of doors than in the house perusing magazines, books, &c. Guess he is nearly correct.

Clarke & Co. have made quite a reduction in the price of novels and all kinds of goods. The inciting cause of lowering the prices was the innovation made in that kind of business by a large notion and millinery house engaging in the book trade. Last week Rosenbaum & Co., on Market street, brought on a large stock of all kinds of miscellaneous publications, histories, novels, works of poetry, &c.,

and opened a book department. They sell them exactly at cost, and the ordinary mortal can hardly believe his own eyes when he looks at the marked prices. They did not know the profit in the book trade was as large as it is. I understand that Rosenbaum & Co. have undertaken this as an advertisement to get people to come to their store to buy cheap literature, and when they get them there, sell 'em notions, &c. Frank Echoes, formerly head clerk at W. N. Edgar's, has charge of the new department.

In 1875 N. P. Bennett, the well-known bookbinder, began business for himself. By good work and his own pleasant address, Mr. Bennett has built up a large and lucrative business and is fast growing into the ranks of the opulent. A recent visit to his establishment caused me to remember him here.

Trade of all kinds is somewhat brighter than when I last wrote, and we expect a decided improvement after the national election.

So many new oil wells have been struck lately that considerable excitement has been stirred up in the various oil exchanges. The Christie Well flowed 5,000 barrels a day for awhile, and the Philips about 3,000. The superstitious folk who thought the oil and gas were placed in the earth to assist in the great conflagration of our sphere, ought to be easy on that score now. Both the oleaginous fluid and the gas are found in new places and in greater abundance than ever. G. W. H.

TORONTO WALKS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, October 17, 1884.

Come along! Don't grumble about its being too early. We know how you night-workers cling to the bed of a morning. A great mistake! "Early to bed and early to rise," in the matter of health and vigor, is, from a physiological point of view, sound sense. Try it! Now, look you, the sky is as clear as a bell. Not a speck as big as your hand mars the broad expanse of the blue etherial dome, and the sun is cropping up bright and glorious. You observe, that when his rays have fallen on the sidewalks the frost has vanished; but around the corner there, you will see it sparkling still. Step out, man! The air is dry, invigorating, wholesome, full of ozone. Get your blood in motion, open your mouth, fill your lungs, and see how soon those pale cheeks will have a rosy flush. And when we get back, you shall have breakfast. And, mark my word, you won't stick up your nose at it; nor push this aside, or that; nor growl at the cook, but will walk into it with a will, and rise up another sort of man.

Let us drop into the Standard Book and Publishing House. There have been some changes here since we called. Rev. Mr. Dyke, the former manager, has gone back to his old congregation, and has been succeeded by Rev. Mr. Roberts, of Hamilton. Rev. Mr. Richardson, manager of the book department, says that the fall trade is opening well, and business prospects are good for the holiday trade. The business of the house is rapidly extending, es-

pecially in the department of theological books.

Now, let us pass over to Jordan, and cross it together—not the river by that name we read about not far from Jerusalem, but a street in this city—and ascend to the premises of W. B. Blackhall, blank-book manufacturer, &c., and patentee of the new marbling process. We are informed by Mr. Blackhall that they are not only very busy in the stationery department, but also in the manufacture of their marblers, which they are shipping to England, Australia, New Zealand, &c., as fast as they can make them.

Last, though not least in this connection, Hart & Co. We have been in there several times and found him busy, and he has said, "Call again," and this is the last call. "Is Mr. Hart in?" "No; he has just gone out; will be back in a few minutes; will you wait?" "No; haven't time." We are glad to know that this firm is full with work, and that they are building up a fine business; but sole leather costs something, and, in all good-nature, we fling out our boomerang, hoping to hit more heads than one.

There now, thank fortune we are done with Toronto for this time. Come over the way for a moment. You observe that sign, "Jack the Giant Killer, Shoemaker, &c., &c." You have heard about his wonderful shoes, I presume, way down in New York. What size do you take—13¾ did you say? All right; that's a comfortable base to stand on. Another pair, Jack—16⅞; that will do. Are you ready? Step out, now. Did you ever see the like of that? Here we are at one stride right in front of T. J. Day's great store in Guelph. Walk right in. That's him with his coat off. He's a worker. Let me introduce you? Mr. Day, the editor of THE AMERICAN STATIONER. Shake, all round. Glad to see you, as well as my old and esteemed friend, &c. Mr. D. is an Irishman. "How's biz?" "Good, sir; good! We are ahead of last year by a *large* amount." "How about holiday trade?" "Prospect never better. We have gone in for a lot of American novelties, and they are going off like hot cakes. We expect to do a much larger trade in Christmas cards. But the Dutton fringed books—that's the best hit yet! They are selling every day, and we shall have to order more."

Another stride brings us to J. I. Anderson & Co., London, and we find our friend now in a happy state of mind. Men are not prone to growl when they are in the swim. Mr. A. says business is better than last year. They have the agency for the Globe files and letter filing cabinets, which are going off well. They anticipate a considerable increase this year in Christmas cards and holiday goods.

One more step will bring us to Hamilton. Mr. Eastwood, who has just returned from a summer trip on the Continent, you will observe, looks a little more rotund and cheerful than when we saw him last. Their Mr. Cloak is now in your city looking up some special lines for the holidays. They report trade good and prospects good.

R. Duncan & Co. are perfectly satisfied, they have all they can do. The R. Duncan

Lithograph Company, occupying large premises at the rear of their store, is full of work, and is turning out first-class works, too, never better. I made several attempts to see the manager, "Charlie," but failed; he was out on business, and had to come away, much to our regret, without even a shake. And now we will step back to Toronto and have that feed.

I am sorry to have to close my letter with a bit of news of another character. I refer to the failure of James Campbell & Son. The event is one which has been looked for by well-informed people for some time, and it is feared that a number of persons both here and outside will be seriously embarrassed, if not compelled to close up in consequence. It has been well known that the firm has been in the habit for a considerable time of making accommodation drafts on customers, whenever they could get them accepted, and now that the end has come these bills will crop up and be a source of trouble and perhaps ruin. There is a good deal of sympathy for the senior of this house. He is an old man now, and came to this county nearly forty years ago, I think as a representative of Nelson & Sons, Edinburgh, and soon after started in this city as a wholesale bookseller and publisher and for many years controlled the trade in Camden, and during your war supplied large numbers of books to the trade in New York, Boston and Philadelphia. I do not think he has had much if anything to do with the financial working of the house for several years, and if it had not been for the sterling character of the man and the respect held for him both abroad and at home, the event which we mention now with regret, would have come before this.

C. H.

CINCINNATI ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, October 21, 1884.

Speaking as a prophet at second-hand, one might utter very contradictory auguries of the future of business in the Queen of the West. One man says: "Business is not so bad as some of the grumblers make it out;" another says, "It is positively awful; I've been here twenty years and I never saw the match for the present dullness." And so it is in respect to the time when the change for the better will come. Brown says: "Oh, never mind, we shall have better times late in the fall, after the presidential election is over." Jones says: "I don't look for much change before next fall, if it comes so early. It wouldn't surprise me if we should have something worse before we get anything better. So we had better make up our minds to expect the worst, and to grin and bear it when it comes." In each case the very hopeful man has blue eyes and blonde hair, and the very despondent one has bilious features and dark hair.

How the situation looks depends as much on the observer's temperament as on his point of view. On one thing men are all of one mind—and that is, that "there is a good time coming;" but they find it awful hard to "wait a little longer." The theatres and other places of amusement are thronged whenever there is

anything good on the boards, and so they have been all the fall. Men who bet are evidently short of money. There has been no betting on the election worth mentioning, and during the fall meeting at the Latonia race-track, just across the river in Kentucky, the bets on the running races, though numerous as usual, were pitifully small. All classes of mercantile business are feeling a certain disagreeable stagnation. With manufacturers and mechanics the case is variable. Manufacturers of wrought iron, and of wares in which wrought iron is the principal material, are quite busy. Carriage manufacturers are at a standstill. Manufacturers of shoes should soon start to work on spring and summer work for next year, were the business situation nominal, but they will not start till late next month. Builders all have their hands full. Banks are accumulating money, but they are not making anything worth while. There is talk that some of the more youthful banks will call in their circulation and cease to exist. While the banks are accumulating funds, they are cautious about giving out loans.

The book and stationery trade has no better lot than other branches of business. The light work of the manufacturers of mercantile stationery is a fair index of the general depression of trade. Peter G. Thomson, as everybody has heard through the daily press, has suffered by the destruction by fire of his fine printing establishment, where he turned off illuminated toy-books. Robert Clarke & Co. are selling books quite satisfactorily. C. F. Bradley keeps his presses moving. He is one of the oldest men in the business, and one of the earliest to enter into it. When it comes to the age of the man, and the length of his time in business, A. H. Pounsford will prove a rival of Mr. Bradley. T. C. Woodrow is one of the youngest men in the trade. W. B. Carpenter is below middle age, though he has the grave manner and bowed form of a man of many years. Wm. J. O'Neil is the spryest man of the guild. It won't do to say who is the best-looking man, but there is one in the firm of Wilstach, Baldwin & Co., to whom a jury of ladies would very likely award that distinction. Howard Hinkle is probably one of the youngest men that ever was at the head of so immense an establishment in this city as that of Van Antwerp, Bragg & Co. At the book-house of Robert Clarke & Co., in the firm, and in the store but not of the firm, are about as many well-read men as one would be likely to find in any other book-shop, let him search a dozen cities. In the great paper houses most of the men are under middle age. In the house of Chatfield, Woods & Co. there is a mixture of youth and mature middle age. Of course, Charlie Stewart is a boy, and the company of that firm is composed of his juniors. Louis Snider's Sons, as the style of the firm implies, are the youthful inheritors of a long-established business. Edwin Hoole, of Snider & Hoole, looks young, acts young and is young.

To give business and business men a parting salute, it may be said with truth that they are not despondent; it may also be stated with some emphasis that all are hopeful, and nearly all are very cheerful.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

A writer in the *British and Colonial
Printer and Stationer* contributes an interesting
article on the above subject. He says :

The new process of photogravure, which
only Goupil, of Paris, and Schuster, of Berlin,
execute, is carried out in the following man-
ner, and from my own experiments, I consider
the results very good :

First Experiment.—For printing, a reversed
positive is used. The plates may be either of
zinc or copper ; the latter is preferable. These
must be polished nicely with pumice-stone
powder until they are perfectly smooth and
even. All scratching must be avoided, and
neither oil nor the finger put on the surface,
and all dust kept away from it. Prepare in a
perfectly dark room the following solution :
Beat the albumen of four fresh eggs to snow,
and put in 6 ozs. of water. To this add 2 drs.
bichromate of ammonium, 1¼ ozs. alcohol,
and so much liquid of ammonia as to turn the
color to light yellow. This solution must be
filtered three times through very thick filtering
paper, and it may then be kept for months.

The polished plate, before being used, is
washed with clean water, and dried as quick as
possible on a hot metal plate to keep it from
oxidizing. Take some of the solution, pour it
on, and spread it all over the surface ; set it up
on one corner and allow it to drain, then put
it on the hot metal plate again to dry it very

quickly. All this must be done in a perfectly
dark room. The plate must show the colors
of the rainbow to be good for use. Expose
it under the diapositive in full sunlight for
half a minute and in dispersed light about
four minutes. When taken back to the dark
room the picture is developed by pouring on
a solution of red, green or violet aniline in
water and letting it stay on for a few seconds.
Wash it off under the hydrant, and the picture
will appear colored. The parts not affected
by the light will wash out. Dry the plate on
warm metal.

The plate now wants to be etched, and a
solution of 8 ozs. sublimate chloride of iron
or sesquichloride of iron in 16 ozs. absolute
alcohol has to be prepared. This is put in
a porcelain pan. The plate, after having
covered the corners and back side with
asphaltum and left in for from fifteen to
twenty-five minutes, will now produce great
depths. The plate is taken out after that
time, the film taken off by means of a woolen
rag and pumice-stone powder, and printed
like a steel plate. The results from plates
carefully prepared and treated are the best—
of course it depends a good deal on the
printing, too.

Second Experiment—Photo Relief Plates.—
A reverse negative is needed. Coat a piece
of perfectly level plate glass with a solution
of :

1 oz. gelatine—Nelson's No. 1.

6 ozs. water.

1 oz. finest pumice stone.

¾ oz. saturated bichromate ammonium.

2 drs. chromic acid, a few drops of liquid
ammonia, salicylic acid and glycerine, and
dry it.

Expose under the positive for twenty-five
minutes and swell it in cold water. Then put
it in hot water for about one minute to dis-
solve some of the gelatine on the surface and
to lay free the grains of pumice stone. Of
this a plaster cast is taken as in photo-engrav-
ing and an electrotpe taken from it. Print-
ing has to be done very carefully. The re-
sults are very good, but the plates will soon
wear out and have to be washed off very
often. Very good rollers and the finest ink
must be used.

For etching processes I found it best not
to use any gelatine in connection with bichro-
mate of potash or ammonia, as it is very hard
to remove the gelatine afterward. Sugar,
starch, fish glue, gum-arabic, especially the
latter, gives the very best results, though it
takes a little longer time to expose it. For
photo-lithography and photo-zincography, as
well as for zinc etching, I have found it a good
way to coat the stone or zinc first with the
benzol-asphaltum solution, and when dry with
the bichromate of albumen or gum-arabic, as
described, and expose it about one minute
then develop with aniline, wash out the albu-
men with water, and the asphaltum with spirits
of turpentine. This process has proved to be
very advantageous for very fine work.

Cheerfulness in large doses is the best med-
icine one can take along in his out-door
tramps.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Charlotte Leavers, stationer, Philadelphia, Pa., is dead.

N. Leonard, newsdealer, &c., Richmond, Va., has sold out.

H. Eastland, bookseller and stationer, Hillsboro, Tex., has sold out.

J. L. Shoemaker & Co., Philadelphia, have removed their leather works to Frankford.

E. A. Parker, publisher of the *Pike County News*, Barnesville, Ga., has been damaged by fire and water.

T. B. Taylor & Son, publishers of the *Times*, Cumberland, Md., have sold out to Averitt & Miller.

Bollong & Flinn, stationers, New York city, have dissolved partnership. Hugh Flinn continues the business.

The plant of the Montreal *Herald* Printing and Publishing Company (incorporated), Montreal, Que., is offered for sale by tender.

Case & Bissell, manufacturers paper pails, &c., Binghamton, N. Y., have dissolved partnership. E. A. Bissell continues the business.

A fire broke out on Saturday on the premises of Thomas Fitzgerald, paper-stock dealer, at No. 34 Old slip, New York city, and did \$200 damage.

A fire broke out from some unknown cause on Saturday, at No. 90 Walker street, New York city, and spread to No. 88 Walker street, occupied by John Keller, steam printer, whose loss on building and stock, machinery, &c., is \$25,000.

Edward J. Bermingham, publisher of the *Medical Gazette* and other publications, at No. 28 Union square, New York city, made an assignment Saturday to Charles L. Bermingham, giving preferences for \$16,436, as follows: Louis Bermingham, \$10,127, holders of eight promissory notes, made by the assignor to the order of Charles M. Green Printing Company, aggregating \$5,912.68. He made an assignment last January, but obtained an extension from his creditors, and resumed.

Arthur W. Carter, representing H. H. Carter, of Boston, was in town last week and called on THE STATIONER. Mr. Carter is showing various novelties in cards for the Christmas trade. Included in his line is a very unique card which is styled "Ye Olde Englishe Chrystmasse Cardes," which is very antique in appearance, representing what Christmas cards might have been centuries ago, if Christmas cards had then been in vogue. He reports excellent sales.

On Sunday, fire was discovered in the second story of Rice's box and toy factory, at No. 242 Plymouth street, Brooklyn. Everything but the walls of the factory was burned. The first floor was unoccupied; the second floor was occupied by the Rice Box and Toy Company, and the third by Wm. H. Beach, manufacturer of wall-paper. Their loss is given as \$100,000, with only partial insurance.

Selchow & Righter have issued their catalogue for 1884-85. It is a neatly printed pamphlet of 127 pages. It contains cuts and descriptions of all the staple toys in the market as well as of the latest novelties in this line; also a full list of prices.

Burdick & Ross, dealers in paper-stock and blank-books, at Syracuse, N. Y., have dissolved partnership, and C. A. Ross has made an assignment, giving preferences for \$3,700. Liabilities, \$5,200; nominal assets, \$4,000.

Kohn & Rosenbaum, dealers in frames, easels, albums, chromos, &c., Philadelphia, have issued their first catalogue and price list. They have a large line of goods in velvet, bronze, gold, &c.

Grant, Barfoot & Co., lithographers, Toronto, Ont., made an assignment in trust on Saturday with direct liabilities of between \$50,000 and \$70,000. Their assets amount to \$40,000.

Swanney & Leavenworth, booksellers and stationers, St. Catharines, Ont., have dissolved partnership. John Swanney continues the business.

Stewart, Warren & Co., manufacturing stationers, 476 Broadway, are removing their manufacturing department to 143 Elm street.

William A. Brennan, proprietor, *Journal*, Summerside, Prince Edward Island, has been burned out.

Cornwell & French, paper manufacturers, Foster Station, Mich., have been burned out.

O. S. Tompkins, of the firm of Tompkins & Brother, printers, St. Louis, Mo., is dead.

C. C. Ganung, printer, Elmira, N. Y., has sold out.

The Novelty Manufacturing Company, Sterling, Ill., has assigned.

M. C. Libby, of the Libby & Williams Paper Company, St. Louis, Mo., is dead.

A. J. Gregg, publisher of the *Prohibitionist*, Sacramento, Cal., has been attached.

W. C. Gerard, publisher of the *Lebanon Patriot*, Lebanon, Ind., has sold out to Keiser & Atchinson.

The Art Exhibit Publishing Company, New York city, has been dissolved. Theodore H. Tilton continues the business.

The Mutual News Company has started in business at No. 54 Beekman street, New York. George F. Williams is president of the company.

The Philadelphia Book Die and Engraving Company (not incorporated), Philadelphia, Pa., has dissolved. George Etter settles up the business and continues the same.

H. Manneck's Son & Co., manufacturers of paper boxes, New York city, have dissolved partnership. Emil A. J. Manneck continues the business under the style of H. Manneck's Son.

Lloyd & Porter, proprietors of the Philadelphia Printers' Supply Company, Philadelphia, Pa., have dissolved partnership. William A. Porter settles up the accounts of the firm and continues the business.

The *Hatter and Furrier*, New York city, has been leased by L. D. Gallison, who will hereafter publish it. Mr. Gallison for some time had the direct management of the journal under the late publishers. The publication office has been removed to 658 Broadway.

The Mutual News Company has been organized with a capital of \$500,000, and duly incorporated under the Laws of the State of New York for the purpose of dealing in daily and weekly newspapers, monthly and semi-monthly magazines, and other publications; also books, stationery and specialties of all kinds. The directors of the company are John W. Mackey, James Gordon Bennett, George Jones, George F. Williams, Gilbert E. Jones, Isaac Bell, Jr., Gardiner G. Howland, John Townshend; George F. Williams is president, Gardiner G. Howland treasurer and John F. Cowan secretary. The principal office of the company is located at 54 Beekman street, New York, and branch offices will be established in all leading cities of the

the country.

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

United States, the Dominion of Canada and Mexico.

Thomas P. Connelly, bookseller and stationer, Halifax, N. S., has assigned.

The *Gazette* Printing Company, Little Rock, Ark., has been burned out. Insured.

The *Times-Mirror* Company, Los Angeles, Cal., has filed articles of incorporation.

E. Williams & Co., printers, North Attleboro, Mass., are reported in insolvency.

Alexander Craig, printer, New Haven, Conn., is advertising his business for sale.

Henry R. Curtis, dealer in stationery, &c., St. Paul, Minn., is closing out his business.

A dissolution has taken place in the firm of Hall, Weisbrodt & Co., publishers, Cincinnati, Ohio. The firm is now O. O. Hall & Co.

The German News Company, Chicago, Ill., has been closed by the sheriff on confessed judgments for \$1,757. Liabilities about \$6,000.

A company to manufacture printing-presses to print on both sides of the paper direct from the type has been organized at Brockton with \$150,000 capital.

C. F. Petterson, dealer in picture frames, Boston, Mass., is reported failed and offering 20 cents on the dollar. Liabilities, \$2,300, of which \$1,000 is secured by mortgage.

Simpson & Wright, paper dealers, New York, have dissolved partnership. George H. Simpson will continue the business and settle all outstanding accounts.

The Globe Files Company has brought out a new form of filing case designed to take the place of pigeon-holes in bank vaults as generally used to file and classify the checks of depositors as they accumulate. The file is in the shape of a tray or drawer, and is 25 inches long, 21 wide, and five inches high, outside. It is divided in the centre by a perpendicular partition, on each side of which are fifty adjustable spaces for papers as large as $9\frac{1}{2} \times 4\frac{1}{2}$ inches, to stand on edge. The movable partitions are attached to the file by being strung on metal rods, and can be changed or shifted at any time by removing the rods, which is easily done. They are provided with suitable space for label strips. The first partition or "follower" is heavier than the interior ones, and has attached to its bottom a clamping device, by means of which the contents of the file can be held firmly together or separated for reference. The "follower" is also provided with a very neat nickel plated pull and label-holder combined, so constructed that the label can be changed at any time. The whole wooden portion of the file is of solid walnut, handsomely oil-finished, except the interior portions, which are of cherry. The metal work is neat, strong and nicely finished.

J. G. Lewis, wall-paper dealer, New Orleans, has failed and is asking an extension. He claims liabilities of \$4,800 and assets of \$7,000.

Jonn B. Piet & Co., Baltimore, deny the statement that the *Catholic Mirror* has been sold to J. J. Nicholson & Sons.

S. P. Strout, bookseller and stationer, Jamestown, Dak., has sold out.

S. A. De Cardona, publisher of *La Cronica*, Los Angeles, Cal., has been attached.

J. C. McMichael, publisher, Barnesville, Ga., has been burned out; loss, \$3,500; not insured.

Benton, Nichols & Co., manufacturers of paper boxes, New Haven, Conn., have been burned out; insured.

G. D. R. Hubbard, printer and dealer in printers' supplies, New Haven, Conn., has been damaged by fire; insured.

A. Wiley & Co., publishers of the *Times Telephone*, Eureka, Cal., have dissolved partnership. Wiley & Heney succeed to the business.

The November number of the *Magazine of Art* closes the volume for the year with unusual attractions. The frontispiece of the number is from F. A. Bridgeman's last salon picture, "The Bath at Home, Cairo," and is very suggestive of that artist's gorgeous oriental coloring. This picture accompanies an article on "The American Salon," by Mr. W. C. Brownell, who was until he left this country for Europe the art critic of the *New York World*. Richard Heath continues his papers on "Head-gear in the Fifteenth Century," with their droll cuts, and J. Penderel Brodhurst describes the delights of a day "By Stream and Chase." A page illustration is devoted to Glindonis' Prince Henry before Judge Gascoigne. A complete record of the art news of the month, both in Europe and

THE BEST BLOTTING

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

America, will be found in its usual place in the Magazine.

P. Lawrence arrived from London by the steamship Alaska on Sunday last.

An attachment has been issued against A. Buswell & Co., bookbinders, manufacturers of blank-books, &c., San Francisco, Cal.

The Crescent Label Company, of St. Louis, Mo., made an assignment on Wednesday. The assets are \$50,000. The liabilities are not stated.

Henry Levy & Son have a very novel and attractive line of paper-knives, with fire-gilt blade, ram's-horn, fawn-foot and porcelain handles, the latter finely decorated.

S. S. Stafford has been obliged to increase his manufacturing facilities by the addition of twelve new hands, which shows, of course, the increasing popularity of Stafford's brand of inks.

W. S. Dunn & Co. are offering a very attractive line of wooden brackets, easels, cabinets, papeteries, &c. They have one of the cheapest lines of brackets in the city, and their line of cabinets is not surpassed.

The Globe Files Company has made an improvement in its Congress tie envelope by a new tape-fastener, which holds the tape firmly without the aid of eyelet-holes, and at the same time allows it to slide freely, thus permitting easy adjustment.

A new edition of "Books for the Young" has been issued from the office of the *Publishers' Weekly*. This is a carefully compiled and classified catalogue of books which afford good reading for children, and it is invaluable in its suggestion to parents. Its preparation is due to Miss C. M. Hennis, librarian of the Hartford Library Association.

Some of the largest creditors of the Easthampton Paper Company, Easthampton, Mass., are the Chicopee National Bank, \$9,981; Easthampton Bank, \$7,473; Benedict Pardee & Co., of New Haven, \$868; Train, Smith & Co., of Boston, \$339; Rice, Barton & Fales, of Worcester, \$1,272; Cranston & Co., of Brooklyn, \$500; taxes, \$381; Burr Brothers, of Philadelphia, \$1,405; J. H. Lyon & Co., of New York, \$581; Southwick Brothers, of New York, \$704; Fitchburg Steam Engine Company, of Fitchburg, \$213.

The use of writing pads has given rise to a multiplicity of forms adapting them to the varied purposes especially of commercial stationery. Latterly, tablets designed especially for society use were introduced and more recently a manufacturer went a step further and brought out a more expensive form of fine writing tablet than had hitherto been shown. The Acme Stationery and Paper Company not to be outdone in this line of effort, has produced an "Ornamental Writing Tablet," which like all of the productions of this company is simply A No. 1, and seems to supply a real demand for a line of elegant writing tablets. The tablet is a combination of the best of everything that goes to make up a writing pad. It is filled with eighty sheets of bond and plated cream papers, which are enclosed in a cover of Whatman's 200-pound imperial paper, tastefully decorated with a water-color painting executed by one of the finest water-color artists in the city. Indeed, the painting is of such a fine character that the cover may be preserved for framing when the pad is used up. The tablet also contains a cloth-faced blotter and has a back of leatherette, both plain and embossed. It is put up in a neat box, containing eighty baronial No. 1 envelopes, the whole being packed in the most tasteful style. Withal, it is elegant, yet simple—in fact, its very simplicity will delight the better class of society people. It is needless to say the trade are rapidly taking hold of this novelty in writing tablets.

Fowler & Wells have published "Three Visits to America," by Emily Faithful. The author of this volume needs no introduction to an American public; her work in behalf of struggling women during the past twenty years has been attended with so much success that she has acquired wide-spread celebrity in spite of herself. Her three visits to this country were made for the purpose of studying our society, our industrial methods and organizations in behalf of poor and unfortunate Englishwomen. Sketches of conversations occur all through the book, most of them with well-known people, all of whom cordially aided Miss Faithful toward the attainment of her mission. What will most interest the American reader are the chatty comparisons made of our social mannerisms with those of old England, and the tendencies that she thinks

are clearly to be seen in popular sentiment as concerns trade, government, labor, the woman question, art and so on. The eminent utility of what Miss Faithful says here and there makes the book valuable, and therefore desirable; while it will entertain every one who takes it up, it will be sure to instruct those who are thoughtful.

The following named are some of the out-of-town tradesmen who have been in the city during the past few days: Mr. Lee, of Iowa City, Ia.; D. R. Conger, Weedsport, N. Y.; E. W. Swindells, Austin, Tex.; A. D. Aldridge, Dallas, Tex.; Cunningham, Curtis & Welsh, San Francisco, Cal.; Morton Phillips, of Phillips & Bulwer, Montreal, Quebec; Albert F. Davis, Providence, R. I.; N. D. Lapham, of Lapham & Troop, Detroit, Mich.; T. W. Wadsworth, Rondout, N. Y.; W. E. Seebold, New Orleans, La.

Cassell & Co. will begin at an early date the publication of "The Artist's Library," the object of which is to furnish art students, art designers, art manufacturers, and all interested in art, a series of valuable hand-books on the history and practical operation of art. The works are by well-known foreign writers, and published under the patronage of the Administration of Fine Arts, at Paris. They are translated by competent authorities, and edited by John Sparkes, principal of the South Kensington Art School. Numerous engravings will be given in each volume.

and
Jan. 29, '84.

Just the
ARTICLE
WANTED;
Handy,
Durable
and Cheap.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. ☞ Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, OCTOBER 23, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.
Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

ENVELOPE manufacturers have heretofore given warning that prices are subject to change without notice, and now comes a further notification that new prices will be made as soon as they can be fixed. When the change may occur is, therefore, kept within the range of uncertainty. At present, however, the manufacturers are willing to fill orders at existing quotations.

WE present a brief report of the proceedings of the meeting of the American Paper Manufacturers' Association, held yesterday. It will be seen that the paper makers have adopted resolutions favoring a reduction of the output. This may be only in anticipation of what may be forced upon them in case the restrictions upon the importations of rags shall be prolonged. The effect upon the market cannot be declared at this moment, for the reason that while the resolution favoring a limitation of the output has secured the assent of the Association, its details have yet to be arranged, and the action of the committee having it in charge cannot be forecast.

THE Chicago *Tribune* remarks: "One of the most valuable lessons to be learned from the discipline we are now undergoing is that of the danger of imagination as an element in business operations." This is so, and we believe that people are taking this very common-sense view of all enterprises which, inciting as they may be in their promise, are nevertheless dependent upon the fulfilment of conditions of which no one can predict certainty. There have been too many delusions and too much listening to the voices of charmers, and it will be a moral regeneration when the entire community shall devote itself to the certain outcome of a safe, if slow, business, disdaining the illusory promise, however tempting, of a bold speculation or a possible demand which is as likely to fail as to result in performance. People may complain of the slowness of trade, but in caution there is safety, and the buyer who is not induced to surpass his requirements by tempting offers of extended credits or seemingly low prices knows that he stands on sure ground and in the mind of him who offers goods gains confidence and added stability.

THERE are two important exhibitions in which it behooves American manufacturers to take part. One is, of course, that at New Orleans, for which, so far as we have yet learned, our stationers and paper makers have not yet made any decided preparations. When the influence of the Exhibition of 1876 on all of our lines of industrial production is brought to mind, it does seem strange that there

should be any indifference to the undoubtedly great exhibition which is to be opened at New Orleans in December. If manufacturers, as individuals, do not feel justified in going to the expense of preparing exhibits and having them properly displayed, we think that the least they can do will be to unite in making a collective exhibit which shall represent, to some extent at least, the character of the manufactures of every city, town or locality where industrial production has achieved any importance. The exhibition which is to be opened at Antwerp, Belgium, also presents an interesting field for all who are anxious and willing to extend their trade in foreign markets and who care to aid in enlarging our exports with a fair chance of profit to themselves. From late accounts it is evident that European paper makers and manufacturers of stationery and fancy goods will be well represented at Antwerp. If the American trade intend to compete with their foreign rivals, they have no time to spare in making up their minds as to applying for space. Ten days hence it will be too late to consider it. We would certainly like to have it known that certain products of our paper mills, some creations of our fine lithographing establishments, and some of the very handsome presentations in the way of leather and plush goods, were put on view alongside of the goods coming from the European factories.

Roundabouts.

BY THE TRADE LOUNGER.

The paper makers have been in session, haven't they? There was quite a crowd gathered at the Metropolitan Hotel, and the hall where the meeting was held was well filled. It will not do, of course, to anticipate the regular report of the proceedings which will I presume be given in THE STATIONER, inasmuch as I saw a "chiel" up there taking notes.

* * * *

The paper men of this city shared in a political parade a few days ago. The enthusiasm of politics seems to affect the older as well as younger members of the trade. There is a good deal of moral force to a respectable body of business men which an observer cannot fail to appreciate. I was much impressed with this feature the other day.

* * * *

But politics don't count here, and no more reference will be made thereunto. We must return to our Southdowns—i. e., get in on trade, which is—well, good, bad or indifferent, just according to circumstances or as different individuals choose to view it. There is a steady call for goods on small orders, and while the demand is not what was expected, people jog along without much worry.

* * * *

"We do not send any more of those goods abroad," said a dealer a few days ago,

alluding to a stylographic pen which a customer was examining. "The reason is, they have got them on the other side of their own make, and an American pen which would retail in London for five shillings would not find a purchaser, because one of English make could be bought for three shillings. The fact is, we can't compete with English manufacturers in their market, although their pens can be sold in this market as cheaply as those of our own make, notwithstanding the tariff."

* * * *

Some of the English publishers in dealing with American publishers do not scruple to violate their good faith with the latter, according to late experiences. It is said that a case occurred, in which a London house sold the stereotype plates of a book to an American house, an edition of 250 copies of the same work in sheets to another, and supplied a third with 50 copies bound, each publisher supposing that he had a monopoly of the sale of the book in this country.

* * * *

A new form of tag-pin has been brought out by a Chicago firm. The head of the pin consists of a coil of wire, thus enabling the pin to be used in innumerable ways for fixing tags on goods, suspending cards from a line, &c. A new card-holder is in the form of an inverted hook, with a ring attachment. The cards can be held at any desired angle by bending the ring forward or backward. It may also be used to suspend articles from a string. A Michigan man is the inventor.

* * * *

A polished brass writing-set comes in four pieces, consisting of a cut-glass inkstand in a handsome brass vase, a pen and paper-knife tray, and two candlesticks in the form of pillars.

* * * *

One of the recent innovations in inkstands has a wooden frame, in which is set three bottles, filled respectively with red, black and copying ink. The stand has a glass pen-tray attachment, and a drawer in its lower part for stationery, &c. It is intended especially for office use.

* * * *

A very pretty design of a lady's *nécessaire*, recently introduced, is made of plush and silk, and contains pockets for a memorandum-book, pencil-case, scissors, nail file and comb. A handkerchief-pocket is also made of plush, and comes with waist-belt fastener and catch.

* * * *

A fancy newspaper rack consists of prettily shaped frames of wood, bound with plush and mounted on a plush base, having a nickel handle in the centre.

* * * *

A novelty in wall brackets is of gothic shape, and contains a beveled-edge mirror. It is finished with plush, and having two shelves, is suitable for displaying china.

* * * *

A Boston firm has brought out a new registering device, which it claims is the most simple and accurate machine of the kind now offered.

* * * *

What is called a perforated paper tablet is a new article of stationery invented by a Nebraska man. The tablet has six divisions, formed by perforated lines. The object is "to provide a device by which several distinct and separate tablets or blocks of various sizes may be embraced in one article, so as to enable the user to take only the amount necessary for his use at one time without the trouble or cost of keeping on hand a variety of different sized tablets, as is usually the case with accountants and others."

* * * *

Ivory greeting cards for Christmas come mounted on gilt beveled-edge panels with gold blocked mottoes and stout backs, and are very artistic. The card is held on the mount by brass studs, which greatly add to the pleasing effect. The card is handsomely embellished with numerous designs in flowers, fruits and landscapes. There are also ivory cards, which have various pretty tints, and are artistically enchased.

* * * *

Another form of novelty in Christmas cards is a gilt beveled-edge card pierced to receive a lady's or a gentleman's card, a pocket at the back holding the card in its place. To the left of the opening is a spray of mistletoe, while across the top is neatly lithographed "With kind regards and best wishes for a Happy New Year from," and underneath the opening a space for the name of the person to whom the card is sent.

* * * *

There has also been introduced this season silk tapestry-edged folding cards and damask cushion cards. The former have elaborate floral designs printed in very bright colors with Christmas greetings in prose and verse. These goods are of English origin.

* * * *

Here are some late customs rulings: Cards for photographs, unprinted, are dutiable as manufactures of paper, at 15 per cent. ad valorem, and when printed, as printed matter, at 25 per cent. ad valorem.

* * * *

So called microscopes, claimed to be dutiable as toys, found to be brass cylinders with a magnifying lens in one end, and a receptacle for objects in the other, although small, are entitled to entry as toys, but subject to duty at 45 per cent. ad valorem, as a manufacture of metal paper. Pictures stamped or molded from the pulp and having metal frames, the metal being the component material of chief value, are dutiable as manufactures of metal.

Obituary.

D. B. COOKE.

D. B. Cooke, formerly of the publishing house of W. B. Keen, Cooke & Co., of Chicago, died at his residence in that city on Wednesday. Mr. Cooke was a native of Ohio. His father died when he was still quite young, and at the age of twelve he secured a situation with W. W. Derby & Co., Cincinnati, publishers, remaining there until 1851, when he went to Chicago and started a book store, on the site of the present Tremont House. Three or four

years afterward he purchased the business and removed to No. 113 Lake street, where he opened one of the finest book stores in the West. This was burned in 1856, and Mr. Cooke lost heavily. He started in business again, but soon gave it up and entered the employ of the American Express Company, where he remained six years. In 1866 he entered the publishing firm of S. C. Griggs & Co., Chicago, and three years later he formed a similar partnership with W. B. Keen, staying with him until the fire of 1871. About six years ago he returned to the employ of the American Express Company, where he remained until his death. He made a fine reputation as a publisher in the West.

Answers to Correspondents.

L. & B. want to know who makes the "Keystone" rubber-stamp pad.

Ans.—E. M. Bayne, 523 Chestnut street, Philadelphia, is the patentee and manufacturer. Dietz & Schmitt, 15 Park Place, New York, are the New York agents.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, October 22, 1884.

THE MONEY MARKET.—The superabundance of money and low rates of interest are the characteristic features of the money market. The rates for call loans have continued $1\frac{1}{2}$ per cent., but the banks have asked $5\frac{1}{2}$ per cent. for this accommodation, which has likewise been the range for discounts. Of course, only the best indorsements are negotiable at these quotations. The stock market has continued under the influence of the war in passenger rates between the trunk lines, which was commenced last week by the West Shore. The tone has been generally weak. Railway bonds have been moderately active, but generally lower. Governments are higher. Foreign exchange has ruled easier, the leading drawers of sterling having reduced their posted rates $4.8\frac{1}{2}$ to $4.84\frac{1}{2}$ in consequence of the light demand for remittance.

THE PAPER MARKET.—We are still making slow progress toward a more satisfactory and cheerful condition of affairs in the paper trade, but there is nothing to seriously impede this progress, and the near future still presents many hopeful indications. Notwithstanding the fact that almost every manufacturer is turning out the full capacity of his mill, most of them have all the orders that they can handle, and instances are told where some of them have refused orders for goods to be made for future delivery, not caring to take the risk of a still higher rag market. The advance in fine writings of one to two cents per pound, one cent in engine-sized and super-calendered book, and one-quarter to one-half a cent in News, has now become quite well established. Dealers who have stocks on hand at the old prices should bear in mind that when they have disposed of these they cannot duplicate them except at an advance, and it is even very probable that there will be a further advance to meet the enhanced cost of rags.

THE STATIONERY MARKET.—In staple goods trade is moving along about the same as usual. There have been quite a number of out-of-town dealers in town during the past few days, and while orders have been small they have been more numerous than usual. While the trade in staples shows a slight improvement owing to the presence in the market of a greater number of buyers than usual, the greatest attention is being given to holiday novelties, this being the season when a large number of small dealers are selecting their stock in that line. Novelties in house-furnishing goods, now carried by many stationery and fancy goods dealers, also wood carvings, fancy brass goods, &c., seem to be moving briskly. There is also a good demand for wall ornaments in fancy goods, such as brackets, cabinets, &c. Moreover, in fine writing pads a very good trade is being done. These goods are put up for the best class of trade, and a dealer who has a line of "toney" customers to serve cannot err by laying in a stock.

WHITING PAPER CO., HOLYOKE, MASS., MAKE MORE FINE PAPER THAN ANY OTHER CONCERN IN THE WORLD. THREE MILLS. DAILY PRODUCT, TWENTY TONS. ALL DESCRIPTIONS OF LOFT-DRIED PAPERS.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

R. H. Ingersoll is making a very cheap initial stamp and indelible ink outfit for marking clothing. It is very salable. It is known as the "Universal" self-inking pocket linen marker.

Henry Bainbridge & Co. are having a large demand for the daily memorandum calendar advertised on another page of THE STATIONER. This calendar is without doubt a very useful aid to the business and professional man. It has been on the market for some years, but it still seems to be preferred to devices which have come after it. It is neatly and substantially made and is sold at a low price.

An attempt is being made in England, in a modest way, to utilize electricity as a motive power for tricycles, the prospectus of a company having been issued. It is proposed that 100 persons bind themselves to buy an electric tricycle at \$250, or, in other words, that shares of \$250 each be issued, each holder of a share being entitled to be supplied with an electric tricycle. The first machine to be produced is an electric tricycle carrying two persons and fitted with battery and motor sufficient to pro-

pel it on level ground at the rate of six miles an hour.—*Exchange.*

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

Special Postal Convention with Mexico.

The special postal convention between this country and Mexico, the execution of which has been pending for some time past, has been signed by Postmaster-General Hatton, on the part of the United States Post-Office Department, and Mr. Romero, the Mexican Minister, on the part of the Interior Department of his republic. The convention still requires ratification by the Mexican Senate, which is now in session, and approval by the President of the United States. It will, if ratified and approved, of which there is no doubt, go into effect on January 1 next. Under this convention the postal systems of the two republics, as to their international postal relations, will be unified. United States domestic postage rates and conditions will apply to mail matter for Mexico, except samples of merchandise, ores, &c., packets of which, though liable to the domestic rates, are to be restricted to 12 ounces weight and 12 by 8 by 4 inches in dimensions. The Mexican rates on matter for the United States will be as follows: Letters per 15 grams (nearly ½ oz.) six cents Mexican silver currency. Post-cards each three cents. Second-class matter (same as that in the United States) four cents per 480 grams. Third and fourth class matter, including samples of merchandise, &c., two cents per gram. The sample conditions as to size and weight of packets are the same as when sent from the United States to Mexico. The fee for registration in both countries will be ten cents. Third and fourth class matter in Mexico comprises generally the same matter thus classified in the United States domestic mails, but includes commercial or business papers which in the United States domestic mails are first-class.

A clause in the convention provides for the gratuitous use of the territory of either country for closed domestic mails of the other passing from one point to another over such territory. Since Mexico became a member of the Universal Postal Union—April 1, 1879—the mails between the United States and that republic have been exchanged in accordance with the provisions of the Postal Union convention.

Under these provisions mail matter is required to pass through the designated exchanging post-offices of the countries of origin and destination of the mails in order to undergo exchange treatment, involving its examination as to conformity with prescribed conditions, rating up deficient postage due and collectible upon it, detaining that which is prohibited from any cause and making it up in mails with letter bills, descriptive lists, &c. When made up by the sending office of exchange it is forwarded to the receiving exchange office of the country of destination, at which it undergoes further exchange treatment before it can be forwarded to the addressees.

Since the inauguration of the lines of railways which now connect the two countries, and their use for the transportation of the international mails in preference to the slower sea routes by which almost all the mails were

heretofore forwarded, it became apparent to the United States postal authorities that in the interest of expedition of mail matter, for which there has been a growing demand by citizens of both countries, it would be necessary to provide a method of exchanging the mails which would dispense with the exchanging treatment at the border offices, and thus avoid the delay (often as much as twenty-four hours) which resulted therefrom.

As contracting parties to the Universal Postal Union convention the two republics have the right, by a provision of said convention, to maintain and conclude special postal arrangements with a view to improved postal relations, and this provision has now been availed of in order to promote the most rapid transit possible of international mails by dispensing with the formalities of exchange heretofore necessary.

Another of Zola's works—"The Mysteries of Marseilles"—has just been published by T. B. Peterson & Brother, Philadelphia. This is another of the so-called "intense" stories of "realistic" character which have a commonplace foundation, with unnatural situations.

THIS CUT
SHOWS
No. 2.

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used, & the cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses Tubes, Slide-rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unassisted methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE.

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. For Home Use the ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

The American Paper Manufacturers' Association.

A meeting of the American Paper Manufacturers' Association was held at the Metropolitan Hotel, New York, on Wednesday, October 22, at 2 o'clock, P. M., to take action regarding the present unsettled condition of the rag and paper market in consequence of the restriction of the importation of rags by the order of the Treasury Department, issued August 30 last, which went into effect on September 1. The meeting was largely attended by paper manufacturers generally, including the writing paper and the manilla paper divisions of the association.

W. H. Parsons, the president, occupied the chair, and D. P. Crocker was present as secretary. Mr. Parsons called the meeting to order, and after a few preliminary remarks he presented a formal address, setting forth the reasons which had called the meeting together and urging prompt action to have the order prohibiting rags modified so as to only exclude rags from infected districts.

Augustine Smith submitted a preamble setting forth that the order prohibiting the importation of rags was doing a great injury to the paper manufacturing and publishing interests of the United States, that in the opinion of the memorialists it was entirely uncalled for in the interests of the public health, and offered the following resolution:

Resolved, That a committee of three be appointed by

the chair who shall nominate a committee of five to take such action in the matter as they deem for the best interests of the association.

This resolution was adopted.

Augustine Smith, O. H. Greenleaf and Wellington Smith were appointed to nominate the committee of five referred to in the resolution, and after deliberation reported the names of W. H. Parsons, D. P. Crocker, Warner Miller, W. A. Russell and Wm. Whiting.

The report was adopted.

Wellington Smith said that the government's action was based on no data and was therefore arbitrary.

Leslie G. Wead offered resolutions expressing the indignation of the association at the course pursued by the Treasury Department.

Wellington Smith and other members said that while a good many paper and other manufacturers felt as Mr. Wead did, yet it might be unwise to antagonize the government from which they might have to ask favors.

Mr. Wead was certain that the paper makers could not make anything by appearing as suppliants before the Treasury Department. By standing up for their rights they might get more than by calling government officials good fellows and all that. He, however, withdrew the resolutions.

Mr. Sheffield presented a resolution to the effect that it was the sense of the association that the manufacturers should curtail their production 50 per cent., and that the details of such action should be referred to the respective divisions of the association for their immediate action.

This resolution was, after some discussion, carried.

Mr. O'Hara presented a resolution that the paper makers should agree to curtail to the extent of about one-third of the present production in the book, writing, and all papers in which a considerable portion of rags are used, after a period of three months.

This was amended to read in the last clause after a period of thirty days. After some discussion the resolution was rejected.

The meeting was then adjourned.

Meetings of the writing paper and the manilla paper divisions of the association were held after the adjournment of the general meeting. Mr. Greenleaf presided at the former and Moses Newton at the latter, at which a resolution was passed that it was the sense of the meeting that the product of the manilla manufacturers should be reduced one-third, and that a circular should be sent to all of the manufacturers embodying the resolution and asking them to indorse it. The writing-paper division held an informal discussion with closed doors and adjourned without taking any action.

The sun is photographed every day at several different observatories. Recently Dr. Huggins has succeeded in obtaining very good photographs of a wonderful celestial object which is invisible to the eyes of man, except during total solar eclipses, that is, the corona of the sun. By an ingenious arrangement he so diffused the daylight in the atmosphere as to catch on a sensitive plate the faint impression of those marvelous streamers of light that surround the sun and sometimes extend outward millions of miles from its surface.

Photography has been turned to new uses in Paris in cases of alleged adulteration of pepper, farina and other articles of commerce. Hitherto the evidence of experts who have examined such commodities with the microscope has been accepted as conclusive; but the new system introduced by the chemists of the municipal laboratory has changed the method of procedure. They now conduct their analysis of minute samples of commodities under a strong light, which permits the use of a photographic microscope. The photograph thus taken is sufficiently large to be easily inspected by the court, and thus the judges are able to verify the investigations, and also give to the prisoner the benefit of any mistake which may be discovered in the expert testimony.

BANKERS' PORCELAIN SPONGE CUP.

THE outside bowl is 5½ inches in diameter—the inside 3¾ inches in diameter, fastened in bottom. The inside has three slots. This bowl will hold more water than any other known, and on pressing the sponge, when wetting the finger, the water will flow in outside one, and the sponge again soaks it up through the slots of the inside one.

Platinum and its Uses.

"The demand for platinum," said D. W. Baker, of Newark, N. J., to a reporter, "is so great that we never can get more than we want of it. The principal portion, or, in fact, nearly all of it, comes from the famous mines of the Demidoff family, who have the monopoly of the production in Russia. It is all refined and made into sheets of various thicknesses, and into wire of certain commercial sizes, before it comes to us.

"A popular error respecting platinum is that its intrinsic value is the same as that of gold. At one time it did approximate to gold in value, but never quite reached it, and is now worth only \$8 to \$12 an ounce. The great difficulty in manipulating platinum in its excessive resistance to heat. A temperature that will make steel run like water and melt down fire clay, has absolutely no effect on it. You may put a platinum wire no thicker than a human hair into a blast furnace where ingots of steel are melting down all around it, and the bit of wire will come out as absolutely unchanged as if it had been in an ice-house. A distinguishing characteristic of platinum is its extreme ductility. A wire can be made from it finer than from any other metal. I have a sample in my pocket, the gauge of which is only one two-thousandths of an inch." Mr. Baker exhibited the sample spoken of. It looked like a tress of silky hair, and had it not been shown upon a piece of black paper, it could hardly have been seen. He went on:

"The draw-plates, by means of which these fine wires are made, are sapphires and rubies. You may fancy for yourself how extremely delicate must be the work of making holes of such exceeding smallness to accurate gauge, too, in those very hard stones. I get all my draw-plates from an old Swiss lady in New York, who makes them herself, to order. But, delicate as is the work of boring the holes, there is something still more delicate in the processes that produce such fine wire as this. That something is the filing of a long point on the wire to enable the poking of the end of it through the draw-plate, so that it can be caught by the nippers. Imagine yourself finding a long, tapering point on the end of a wire only one-eighteen-hundredth of an inch in diameter, in order to get it through a draw-plate that will bring it down to one-two-thousandth. My son does that without using a magnifying glass. I cannot say positively what uses this very thin wire is put to, but something in surgery, I believe, either for fastening together portions of bone or for operations. A newly-invented instrument has been described to me, which if it does what has been affirmed, is one of the greatest and most wonderful discoveries of modern science. A very thin platinum wire loop, brought to incandescence by the current from a battery—which, though of great power, is so small that it hangs from the lapel of the operator's coat—is used instead of a knife, for excisions and certain amputations. It sears as it cuts, prevents the loss of blood, and is absolutely painless—which is the most astonishing thing about it. I am assured that a large tumor has been cut from a child in this way, and that the child laughed while the operation was being performed, and that without any anæsthetic having been administered."

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

The Manufacture of Glue and Isinglass.

The large quantities of waste and cuttings of leather, calves' feet, sinews, &c., have always been used in Russia for the manufacture of glue. The simple method employed therein stamps it as a domestic industry of the peasants. As there are in Russia a vast quantity of small tanneries, which are owned and managed by peasants who have always large quantities of refuse of skins, leather, sinews, &c., at hand, it was, of course, natural to use them up on the spot in the manufacture of glue, which is really the case in most of the leather factories. According to official reports, there are in European Russia—the domestic manufactories of glue not included—150 boiling-houses of glue, of which each produced to the amount of 1,000 rubles at least, and five boiling-houses of glue in the kingdom of Poland, which produced about 131,000 pud of glue (about 45,000 cwt.). In the year 1879 there were exported from Russia 10,000 pud of leather waste, besides 55,000 pud of bones and 21,000 pud of horns and feet. At the same time Russia imported about 3,000 pud of gelatine for fining beer and wine, to the amount of 445,361 rubles, and 31,870 pud of joiners' glue to the amount of 125,696 rubles. The importation of these chemicals is only to be explained by the fact that the Russian make of glue is of the lowest kind, so that all the better kinds of glue have to be imported—thus joiners' glue is greatly enhanced in price because the raw material is exported from and the manufactured article reimported into Russia. In Russia the making of glue is only carried on in winter and spring, and in the most primitive manner. No wonder that only a bad and dear glue is obtained, while abroad a glue is made from the same material, which is almost equal to the best isinglass.

Russia exports sufficient isinglass to cover the entire consumption of Europe, as it sends abroad 11,736 pud, worth 375,000 rubles. Isinglass is made from the bladder of the sturgeon and other kindred fish, which is sold at an average of 120 rubles per pud. The making of isinglass is the simplest thing in the world. The bladder of the fish is cut into pieces, worked, spread on board, and dried in the sun. The muscular and fleshy parts are taken off and the isinglass is ready for commerce. If it is bleached with the fumes of sulphuric acid it improves in appearance and fetches a better price. But even this simple proceeding is greatly left to foreigners. The Russian prefers to sell the unbleached isinglass, which very often, well made up, carefully sorted, and with a nice wrapper, is re-exported to Russia at a much higher price.—*Ex.*

Phytochromotypy.

Phytochromotypy is a process of producing impressions of leaves and plants, and is effected as follows: The plant is first dried and flattened by pressure between unsized paper, or it may be done rapidly with a hot iron. The surface to be copied is then brushed with a solution of aniline color in alcohol and allowed to dry, which will take place very rapidly. If the impression is to be taken on paper, immerse the latter in water for a few seconds, and remove the excess by pressing between blotting-paper. Place it then on some non-absorbent surface, and apply the plant colored side down; place over it a sheet of strong paper, and while it is held securely in position stamp the whole surface with a wad of cotton. A cold iron may be lightly passed over the paper instead of using the cotton, and if a few sheets of tissue-paper are interposed between the paper and plant, its outlines and veins principally will be copied, while without it the whole surface may be impressed on the paper. If the paper which is to receive the impression is moistened with alcohol instead of water, the impression will be brighter, and the paper will retain its lustre or glaze better. If a very light coating of glycerine be spread upon the colored plant when perfectly dry, and the excess removed by unglazed paper, one or more prints may be immediately taken upon dry paper or other dry surface. If the print shows blots when a strong color is used, pass over the surface with a pencil with a solution of saltpetre, which will moderate the impression. Different parts of plants may be colored differently to conform to nature or individual taste. Defects may be touched up with a pen dipped in the color.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

BOSTON ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 DEVONSHIRE ST., BOSTON, OCT. 27, 1884.

This is a hard week for business and next week will be another. This being the last week of the campaign, political movements are taking all the spare time, and the success of next Tuesday's issue is discussed everywhere, in all places and at all times and by everybody.

The question among tradespeople is not "What can I sell you?" but "How are you going to vote?"

The last efforts of the "two great parties," in the way of parade demonstrations, will take place this week, when for two nights the town will certainly be painted red.

With such issues at stake as are now before the people, and right on the eve of the Presidential election, it cannot be expected that trade should show much activity.

But the expectations for the coming holidays are great, and it is confidently expected that after the issues of November 4 are decided, a big volume of business will be immediately set in motion.

In anticipation thereof, manufacturers and jobbers of holiday goods are making ample preparations.

The Thorp Manufacturing Company reports that the sale of its various publications in the autograph and scrap album line far surpasses its expectations. The mental portrait album, which was only recently presented to the trade, has had a most flattering reception, its sale being very large. This is the only house in Boston making a specialty of manufacturing a line of albums. It is a new concern, incorporated not a year ago, but its members are fully conversant with this line of business, and are possessed with pluck, energy and enterprise. Without these business characteristics, no such publications in the album line as the "Longfellow" and the "Hour" would have appeared. In scrap-albums the Thorp Manufacturing Company has presented this season a line of goods, which, for originality of design, beauty of finish and workmanship, surpass anything heretofore placed on the

market. Not only did these novel publications take with the jobbing trade and with the dealers, but they took largely with some of their New York competitors.

To state the case briefly, a prominent New York publishing house has placed on the market a line of goods which was modeled after the style and design brought out this season by the Thorp Manufacturing Company.

It is certainly very flattering to Boston manufacturers to have their goods so highly indorsed by their enterprising New York competitors, and it shows that these goods possess a high order of merit, of which the Thorp Manufacturing Company is justly proud, but to have the styles and designs of its album so closely copied and placed in competition with the original production is not so heartily appreciated. The Thorp Manufacturing Company claims that it should certainly have been allowed the control of its own designs for the year (in keeping with a time-honored custom among publishers), and after that let those copy who must.

Another specialty largely handled by the stationery trade, in the manufacture of which Boston takes the lead, is eye-shades. The largest manufacturer here, and the maker of the finest line of eye-shades, is William B. White, and he is also the patentee. White's eye-shade is pronounced to be the most perfect shade on the market. It is self-adjusting, being provided with an automatic spring. Its upper edge being perforated, admits of ventilation, making it cool and comfortable to the head. In construction White's eye-shades are the most durable, the most handsome, as well as the cheapest eye-shades in the market. They are made in three sizes: No. 2, wide; No. 3, medium; No. 4, narrow.

When eye-shades are wanted, address William B. White, No. 29 High street, Boston—that is, if the best is wanted.

Ward & Gay are discussing politics only as a "side issue," as they are too busy getting their holiday goods into proper shape for inspection. Among the novelties which this house is displaying are albums in great variety, sandal-wood goods for office and library use, leather and plush ware, and a rich assortment of holiday specialties.

In the card department Ward & Gay are showing an elegant line of plush goods, which

are decidedly very unique. One line is styled the "Thermometer" series, and consists of twelve pieces to the set. Each piece is of a different design. Some are patterned after an anchor, some in shape of a nobby French shoe, others are in shape of a cross, and others are modeled after the crescent and star. They are decorated with reptiles and insects of silver and gold; upon each design is mounted a small thermometer, while each is further embellished with satin trimmings and tassels. These goods are manufactured by this house exclusively for its own jobbing trade, and are having an extraordinary large sale among dealers.

A. L. D.

ROCHESTER OCCASIONALS.

[FROM OUR OWN CORRESPONDENT.]

ROCHESTER, October 27, 1884.

The political situation occupies the attention of business men, and interrupts trade to some extent, although the volume of business is still very fair. Mr. Blaine has been to see us, and attracted large crowds. Governor Cleveland has passed through our city on his way to his home in Buffalo. Governor St. John has addressed a large audience here, and been in and out among us while he obtained his stationery supplies at our stores. Governor Butler made the tour of our city and addressed us in a public square. When, next week, we have chosen between all these candidates, we propose with the rest of the American people to address ourselves to merchandise once more, and make the book and stationery trade hum.

Mason & Co. have just published their large volume of the History of Rochester, including the semi-centennial of our thriving city. E. Darrow & Co. have published a new edition of Elwood's Grain Tables, and Martin's Interest and Average Tables for averaging mercantile accounts, and are receiving orders for them from all parts of the country and Canada; they are also preparing a neatly rewritten edition of the "Pocket Homœopathist, by D. H. Baldwin, M.D., of Englewood, N. J.

Williamson & Higbie are fitting up a new store at 7 Exchange street, and are publishing "Baylie's Trial Practice" under the new code.

Steele & Avery report the jobbing stationery

department slow, but expect an improvement soon.

Alling & Cory report the paper trade somewhat stimulated by the slight advance in prices.

James Laney & Co. are holding a large amount of rag stock, and are obtaining somewhat better prices.

President Anderson presides gracefully over the affairs of the University of Rochester. Mortimer F. Reynolds has established the Reynolds Library, and endowed it munificently.

Clague, Wegman, Schlicht & Co. report their specialties advertised in *THE STATIONER* as in good demand, and orders are being filled from all parts of the country.

D. M. Dewey, dealer in artists' works, &c., has just returned from his European tour, and reports his orders good for fruit plates for nurserymen.

I will report on the holiday trade in my next.

GENESEE.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, October 28, 1884.

Here is autumn two-thirds gone and business still lagging. But the last click of the clock brings us nearer to the day when business tired of lagging will speed along at a rapid pace and roll money into the coffers of those that, having prepared in times of prosperity for the stagnation that was sure to follow, were able to stay out the calm with sails spread to catch the first welcome breeze that comes along. "Thousands of years roll by and leave men none the wiser by the experience they bring," was the remark of an eminent lawyer to Prince William. The topic of conversation was whether the business men were trotting around in the same circle over and over again—whether the lessons of the past made them wiser or were lost upon them. At that moment times were brisk, but speculation was at high tide.

It was feared that country merchants and city merchants as well were stepping outside their regular line of business and dipping into outside gambling speculations—yes, gambling speculations is the plain English of it! "Yes," said the attorney, in answer to the argument that these amphibious fellows, half business men and half speculators, certainly had learned a lesson of prudence from the recent past—"Yes," said he, "that sounds very well, but it isn't according to experience. Why, don't you know that business men have not in the last three thousand years learned sense enough to keep them out of that sort of danger, and they are not likely to learn it in the next three thousand years." It made Prince William sad to hear a learned lawyer, who had a cord of books in his office, and who had been to Germany and studied in Heidelberg University, take this view of the case. Strong as was the impression made by this remark, Prince William finally resolved to not yield up his faith in human progress all at once, but to believe, in spite of learned testimony and some stubborn facts, that, after all, even business men, as a class, in the course of three

thousand years would learn to shun some dangers that snared their predecessors again and again. Prince William knows several instances of business men in Cincinnati in which the individual has learned by experience to shun evils, and it has not taken him anything like three thousand years to learn the lesson.

The advent of real fall weather has improved trade somewhat here in Cincinnati. But perhaps after all it is only one of those spurts that come from time to time when trade is dull. A real improvement is expected directly after the Presidential election. The strongest evidence that a real improvement of the times has not set in, is to be found in the fact that there is no great increase in the demand for mercantile stationery. Whenever that demand does come, depend upon it the revival of business will have set in. The sign is infallible. Noah's dove coming into the window of the ark with an olive branch in its mouth, was no surer sign that the waters of the great flood had subsided for good. There is no general depression of spirits among business men. Now and then an incautious man who had not prepared for the evil goes under. Those who were prepared keep heart, bearing in mind that business has its calms and storms as the sea has, and that he who embarks in it must be always ready for its dangers.

PRINCE WILLIAM.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA. October 28, 1884.

The stationers, both wholesale and retail, admit that political agitations are having a bad effect on trade. The past week has been unusually quiet. The stationery trade is in good condition, even though only moderate sales are being made. Cautious buying has been going on all along. Retailers have less dead stock on hand and much lighter salable stocks than ever. The conservative course of buyers has its advantages as well as disadvantages. The burthen of carrying stocks rests with the manufacturers and jobbers. Stationers, like all other people, are disposed to complain perhaps more than they ought to, but after all, the production and distribution of stationery since August 1 has been large, and to an impartial mind in the stationer's line, satisfactory. The school demand has been very fair, and this is a very important factor. There have been several new school-houses built, and the attendance of children has increased rapidly of late. Our school system is well managed and does not go into the extremes of pedagogism that is noticeable in many places. The commercial demand has fallen below that of last year. Holiday goods are coming in both from manufacturers and importers, and the display this year will excel in attractiveness the display of any former year, especially in the line of novelties. Prices are lower and are likely to continue low unless there should be a considerable advance in the price of paper. There

is, of course, some little evidences of a speculative feeling on account of the uncertainty as to the price of rags and paper, but the chances are favorable to steady prices and a supply of rags equal to the needs of the market.

Jonas Langfeld, No. 18 South Sixth street, reports a fair trade despite the grumbling over hard times. There was a rumor somewhere or other indicating the possibility of Mr. Langfeld selling out. Inquiry has substantiated the rumor. This is not due to any dissatisfaction with the business, but Mr. Langfeld is engaged in the manufacture of leather goods, and is the head of the firm of Langfeld, Turner & Andrews, 503 Arch street. That business calls for his full attention, and hence he has determined to sell out his stationery interests. It is not yet known who will succeed him. Several parties are negotiating. The matter will be settled in a short time. In view of this change the stock has been largely reduced, and whatever negotiations may be consummated, they will probably go into effect January 1. We are sorry to lose Mr. Langfeld from the trade. He has made numerous friends, and is generally esteemed.

An improving demand for all kinds of stationery is now probable. Even individual buyers have let their petty supplies run out, generally speaking, and they will help to swell the volume of the retailers' business by their purchases. Manufacturers have learned important lessons in regulating supply to market requirements, and the knowledge is now being utilized to their advantage and to the good of the stationery interest at large.

William Mann reports business fair, although not what it should be at this season of the year. However, they report the largest sales for the month of September ever made by the house in their nearly forty years of experience; this, with the prospect of increased orders after election, will bring their annual business up to the average. Goods are sold on very close margin and necessitates close and economic labor to make it "pan out."

Porter & Coates' "new publications" embrace many subjects, old in themselves, but, under the inspiring hand of genius, good taste and consummate skill in retouching, they are given a new lustre, and, if I may use the expression, a new lease of life. For instance, Bishop Reginald Heber's "From Greenland's Icy Mountains," almost as old as the hills itself, yet what man or woman that has crossed the meridian of life but what remembers it and the popular favor in which it was held thirty years ago. This beautiful poem is elegantly illustrated with twenty-two engravings from original drawings by Fred. B. Schell and printed on finest plate paper and bound in four different styles at popular prices. Tennyson's "Lady Clare" is also handsomely illustrated with twenty-two engravings from original drawings by Alfred Fredericks, F. S. Church, Harry Fenn, F. B. Schell, E. P. Sarrett and Granville Perkins. This little volume, printed on fine plate paper and elegantly bound in four different styles, will no doubt be received with much favor by our young folks. It is so delightfully suggestive

HENRY BAINBRIDGE & CO.,

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 per doz...\$24.00 | Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | DISCOUNT TO TRADE.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, October 27, 1884.)

To ascertain the extent of business that has been carried on in portraits of the various Presidential candidates, your correspondent called on Robert J. Lester, manager of the Western branch of J. H. Bufford's Sons, importers and manufacturing publishers of Christmas cards, satin art-prints and advertising novelties.

Mr. Lester stated that their business in that line had been enormous, the amount of sales surpassing anything anticipated. He attributes this mainly to the excellence of the work done, which, being of a superior order, naturally attracted custom from all quarters. The New Year and Christmas cards gotten up by this firm are perfect marvels of beauty and art. This house is also carrying a fine line of birthday, reward and advertising cards, plain and embossed shaped goods, chromos, fold cards, menus, diplomas, &c. Its business has been excellent throughout the entire season.

Business in the stationary line continues good, slightly depressed, however, by the election excitement which is rife here at present.

J. B. Clarke, proprietor of the Novelty Card and Advertising Company, is a candidate for Congress, nominated by the People's Independent Party. In a speech made lately he said: "I am in favor of a national eight-hour law, making eight hours a legal day's work, to the end that we may divide the twenty-four hours as I have no doubt God intended they should be divided: eight hours for work, eight hours devoted to recreation or the good of our fellow-beings, and eight hours for rest." He is a very popular man and will make a strong run.

At 9 o'clock yesterday morning fire broke out at 108 Madison street, and, before it could be controlled, resulted in a loss to A. G. Spalding & Brothers of \$80,000 worth of sporting goods, damaged the building to the extent of about \$6,000, destroyed \$3,000 worth of leather goods manufactured by George Bernard on the fourth floor, and resulted in a slight damage to the clothing stock of F. M. Atwood & Co. by water. Spalding's loss is more than covered by \$120,000 of insurance. The other losses are also fully covered by insurance. The fire started in a clothes-closet on the first floor of Spalding's store. Its origin is unknown.

A meeting of the Paper Makers' Association was held at the Grand Pacific Hotel on Wednesday, a daily product of 180 tons being represented. It was resolved that they should

shut down one-third of the time, providing 80 per cent. of the mills agree to do likewise.

The result of this action is not yet known, but probably will be at the end of the week.

Gane Brothers & Co., importers of bookbinders' stock and leather manufacturers, issue a catalogue calling attention to their excellent facilities for supplying stock promptly and at reasonable rates. The mills under their control for the manufacture of binders' boards are, in the quality of their production, equal to any in the country. They possess through their New York house all the advantages of the Eastern market, and offer from Chicago at New York rates a very large and complete stock.

The Novelty Card and Advertising Company is carrying on an immense trade in novelties, &c. It is seldom you can enter their store without finding it crowded with customers.

The Chicago, Rock Island and Pacific Railroad Company has issued a handsomely gotten up cook-book, comprising a carefully compiled selection of the most useful recipes and other valuable information in the culinary art. In closing its introduction to the book it states: "Should even our efforts so far have succeeded us to aid the women of our country in preparing more acceptable dishes or at less expenditure, and thus adding to their material wealth, our task will be but imperfectly fulfilled without at the same time reminding them, as well as the traveling public, that the Rock Island route, with its superb equipment of elegant coaches, palatial sleeping and luxuriant dining and easy reclining chairs, its safety appliances, smooth steel tracks and reliable connections, is pre-eminently the best, not only for all points located upon but beyond it." The book will be sent to any address on receipt of ten cents. Noz.

TORONTO TALKS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, October 24, 1884.

In my last letter I concluded with a notice of the failure of James Campbell & Son. At that time I had not the most remote idea of troubling you for some little time, at least, with any scribblings of mine; but the failure referred to has assumed a shape so diverse from the regular line of legitimate trade, and the disaster which will follow, mostly with small traders, from East to West, is so widespread that it seems almost imperative that I should say something more about it. It is sufficient to say that the firm of James Campbell & Son has been in existence for many years. That for a long time it controlled the book and publishing trade in Canada. That it did a very large and profitable business. That its credit in England and America stood high, and I think I shall not be wide of the mark if I say there was not a name on this side of the water better known and more respected than James Campbell among the British trade as well as the publishers of the United States. It will be seen at once that the failure of such a house, unless some reason can be given, will seriously affect our trade abroad for a time. It appears that some two

years ago—it is asserted, through the lavish expense of some of its members—that the house began to ask accommodation from its customers in order to keep things moving. In the meantime, other changes had occurred. New competitors had entered the field, competition was sharper and profits diminished, but the current expenses went on as in the palmy days, and in order to meet it, bills were drawn here and there, whenever a man could be found to accept, until the bubble burst. The failure was not a surprise to the best informed of the trade. Every man knew that it was sure to come sooner or later. It has come. What is or will be the result? A good many small dealers over the country will be wiped out, a good many others will receive practical lessons that in future may be of use to them, though they may have to work hard for awhile to get in the comfortable position they were in. There is no use of denying that this failure is a serious thing to our trade. It comes at a season of the year when perhaps the largest returns are expected. A large number who have given importing orders for holiday goods will be disappointed, and will have to do the best they can. Now, as to the results of this failure, as I have said before, there are a number of small dealers that will be ruined, others will have to pay bills for the pleasure of the thing, *i. e.*, for their autograph, and, besides, the direct loss to our wholesale houses, which, so far as I know, in any case, does not exceed \$1,500, there is no trouble apprehended.

Of course, I must add that all of our wholesale dealers will be affected more or less by the collapse of the small traders referred to, but the amount which spreads around among them will not disturb the serenity of any one of them for a moment. At this stage, it is difficult to get at correct figures, but it is stated that the total liability is about \$300,000, of which about one-half is direct and the balance indirect. Foreign creditors will be the greatest sufferers, and it is not likely they will get more than a very small fraction of their claims.

I had one or two memorandums which I intended to note in my last, but overlooked them. One was respecting Lowden & Co., fancy-goods dealers, &c., who report a first-class trade in holiday goods. I had the pleasure of being shown through their sample-rooms by their Mr. Dispard, and they certainly had a fine exhibit of German, French, English and American goods.

I met E. W. Blackhall on the street yesterday, and after a few interchanges the everlasting topic which shadows most men cropped up—"How's business?" My friend replied at once, "Good. I have just returned from a visit to leading cities in the United States, and have placed my perforators, regulating lappers, &c., in such houses as Boorum & Pease, Davies & Fitzgerald, Gaffney & Jackson, Robert Foster, &c.; besides these, I sold four in Cleveland, four in Pittsburg, three in Columbus, six in Cincinnati, six in Louisville, eight in Indianapolis, &c., and am quite content with my six weeks' work. I have some other things, together with my fast stamping-

press, which I shall place before the trade very soon." Exit.

J. G. Woodland, of the Bishop Engraving and Printing Company, Winnipeg, called on me to-day, and, as a matter of course, I embraced the first opportunity of edging in, how are things up with you? And this is what I got: We are rapidly recovering from the results of the speculative boom of a year or so ago. The cripples are getting pretty well weeded out; and when I left a short time since business was looking up, in fact, was good, and my latest reports are most encouraging. We expect a large and profitable fall trade. Of course, you know we have magnificent crops this year, and, more than that, we can produce more per acre of the substantials of life, and of better quality, than any other country in the world, and in a very short time we expect to be away ahead of you. All right! we are not an envious people, by any means, and we wish our Winnipegger friends unlimited success.

There now, if you get anything new out of me for some time to come, advise me, please. Good even—ing. C. H.

PATENT READY-CUT ELECTION STICKER BLANKS.

THE HALF-INCH SIZE can be used for Photograph Negatives, Tickets, Address Labels, Return Envelopes, or for any Label requiring neat margins around. Any size or color made to order.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW POSTAL BALANCE.

The cut illustrates a new postal balance which is said to be an improvement on those heretofore in the market. Only "knife edge bearings" are used in the construction, thus doing away with the "wire bearings" used in other scales, and giving, it is claimed, absolute accuracy in weight. The scale is well finished and presents an attractive appearance; the beam and sliding weight are finished in full nickel plate. In order that the weight may be readily seen, no matter what the position of the scale, the figures are stamped on both sides, and also on the top of the beam. R. R. Watson has it.

New Use for Old Picture-Frames, &c.

Picture-frames, old photographs, and broken mirrors, usually find their way to the ash-heap, though they are really more valuable than either the old papers or the rags which are so carefully preserved by every New England housewife. Newark and Providence have long had companies which utilize this novel waste, and one has recently been established in Boston.

Old gilt picture-frames are more valuable than those of more recent make, as the modern gilders are apt to cover a silver backing with a light coat of gilt, the gilders of the older school using heavy coats of gilt instead. These frames are first cut into manageable sticks and

then slowly charred and burned to an ash in a brick furnace. The ashes are then smelted, leaving a residuum of pure gold. One old-gold mirror frame, eight feet across, yielded about seven dollars of pure gold.

The broken glass of old mirrors is carefully scraped, the results being a mixture of quicksilver and foreign substances, such as tinfoil, used for the back of the mirror. These shavings are placed in a retort and heated, and at a certain temperature the quicksilver vaporizes, leaving the other substances behind, and rising passes through the neck of the retort into a water-bath, which cools it, leaving it in the mercurial form familiar to every boy who has broken a thermometer.

Old photographic proofs are another minor source of wealth. These papers are all submitted to a silver wash of greater or less strength and accumulate in large quantities with photographers. These brown bits of paper are first reduced to charred ashes and then put into a smelting pot with a flux, the residuum being a small button of silver mixed with the fluxing materials, of which lead is the chief component. By the process of cupelling or heating in a small vessel of bone ash, the flux is absorbed by the bone ash leaving a tiny lump of pure silver. A pound of paper will yield silver to amounts ranging from 24 cents to \$1.12.

The photographic settlements are almost equal to the sands of the Western rivers, as "pay dirt" for these muddy settlements from washes and toning baths contain deposits of both gold and silver, and an ounce of settlements has been known to yield a pennyweight of pure gold. The gold and silver are separated after the process of cupelling by a process known as "cutting." The muddy settlements of the baths are first dried and then submitted to the smelting process as before. Sweepings and refuse from gold beaters, jewelry makers, mirror platers and gilders is treated in the same manner.

Collecting broken looking-glass and picture-frames may yet supersede old rubber shoes and woolen rags, especially in the present condition of the market for the latter articles.

A man who has humor, and sees all things from a ludicrous point of view, is almost always able to call good nature and happiness to his side, and troubles are not half so troublesome, nor are cares half so sharp, while he has such a faculty within him.

The knowledge which we have acquired ought not to resemble a great shop without order, and without an inventory; we ought to know what we possess, and be able to make it serve us in need.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

On Sunday morning a fire occurred in the basement, No. 15 Spruce street, New York, occupied by John Scott, printer, but did no damage.

The New York Stationery and Envelope Company has several new designs in mourning papeteries. They are emblematical, and the designs are all new.

The stock of J. Fisher, pocket-book manufacturer, No. 80 Nassau street, New York, was damaged \$300 by fire on Saturday night. The building was damaged \$500.

Evans, Plummer & Co., stationers, New York, have dissolved partnership, Charles S. Plummer retiring. Frank O. Evans and Remsen Darling continue the business under the style of Evans & Darling.

The National Publishing Company, Philadelphia, has issued many very elegant new designs for its quarto bibles, which are having a large sale. One of them, an elegant cushion beveled-board, embossed with an imitation of a hinge, is both novel and striking.

A fire was discovered in the second story of the main building of the Allen Car-Wheel Company's paper factory, at Morris, Ill., on October 18, and before the fire was extinguished the roof of the main building was destroyed, and damaged to the extent of \$10,000, inflicted upon the building and machinery. Insured.

A fire was discovered on Friday in the basement of the five-story brick building at No. 86 Market street, Chicago, occupied by Cardy, Barrow & Co. as a bookbinding and printing establishment. The fire spread to building No. 85, occupied by Henry Niedert & Sons as a flour store. The damage to the printing establishment is heavy. The stock and machinery are badly damaged, while the building can be repaired at an expenditure of \$2,500, the printing material being valued at about \$4,000. The damage to the flour-store of Niedert & Sons is chiefly by water. It is estimated that about \$8,000 or \$10,000 would settle all losses.

Among the new books for children issued by R. Worthington, "Worthington's Annual" must take a prominent place. This is the third year that a volume under this title has been published, and the volume of this year resembles the previous issues in its general make-up and character, but here the similarity ends, for this volume is a decided improvement on its predecessors. There is an engraving on every page, one-half of them being full-page pictures. They are all of high artistic merit, and are all new, having been made expressly for this volume. In addition to these, it contains a number of elegant full-page plates in colors. The text, too, is nearly all original, and written especially for the "Annual," and the small portion that is not thus prepared has been selected from out-of-the-way sources, and has never before been used in a volume of this character. The book has a showy cover, lithographed in colors, from an original design, and for those who prefer it, it has a more expensive binding in full-gilt cloth. In either form it is one of most attractive and entertaining books for children of the season.

C. S. Nathan, 55 Cedar street, has one of the most novel lines of advertising calendars in the market, including a variety of tablet calendars of various sizes. He can furnish the electrotypes of the latter. Mr. Nathan has besides a number of new things in perpetual calendars, of which he makes a specialty. He is also prepared to furnish calendars for the holiday trade.

W. H. Pumphrey, formerly of Pumphrey & Louman, Seattle, W. T., has gone into the book and stationery business at that place, under the firm-name of W. H. Pumphrey & Co. He intends to do a jobbing and retail business. Manufacturers, publishers and jobbers are invited to send the firm catalogues and price-lists, with best discounts.

John Gilmer Speed, author and journalist, at 721 Broadway, New York city, has made an assignment to William A. Lane. The schedules which were filed Saturday in the Court of Common Pleas, show liabilities of \$32,684.07; nominal assets, \$7,457.88, and actual assets, \$2,757.50.

A. Buswell, of A. Buswell & Co., bookbinders, &c., San Francisco, Cal., has been attached.

J. Sailsbury & Co., stationers, &c., Peterboro, Ont., have been succeeded by Sailsbury & Brother.

M. A. Hull, printer, Pueblo, Col., has assigned to A. B. Patton.

Grant, Barfoot & Co., lithographers, Toronto, Ont., have assigned in trust.

P. Poposky, dealer in picture-frames, Milwaukee, Wis., has been damaged by fire.

Florence & Scott, publishers of the *Journal*, La Fayette, Ind., have dissolved partnership.

J. B. Allen, dealer in wall-paper, Hagerstown, Ind., has been succeeded by Allen & Co.

Layton & Kline, glue manufacturers, Cincinnati, Ohio, offer their creditors 50 cents on the dollar.

J. T. Boswell, publisher, Lawrenceburg, Ky., has burned out. Loss, \$1,500; insured for \$1,000.

Armstrong & Co., dealers in picture-frames, &c., Toronto, Ont., have been closed under a chattel mortgage.

The Saline County Democrat Publishing Company, Marshall, Mo., has been incorporated with a capital stock of \$6,000.

Clougher Brothers (J. B. Clougher only), booksellers and stationers, Toronto, Ont., are offering to compromise with their creditors at twenty cents on the dollar.

"Mother's Stories" is a delightful little volume of simple sketches and pretty pictures, printed on good paper, and attractively bound in new colored lithograph covers. "Baby Dear," "Children at Home," "Baby's Picture Primer" and "Little Prattler's Picture Book" are all in the same style, with plenty of engravings and reading of the most approved character for children. They are among the best of R. Worthington's Juveniles.

John F. Diemer, who has succeeded to the business of F. S. Hasbrouck, invites the attention of the trade to his line of goods. Mr. Diemer has had an experience of more than ten years as superintendent of the manufacturing business of Mr. Hasbrouck, which has made him familiar with all of its details. He has a complete stock on hand and every facility for making any size or style of document box or envelope, and his goods will all be kept up to their previous standard of excellence both in quality of material and design of manufacture. All goods are carefully examined before being packed and everything is done to insure perfect satisfaction. Mr. Diemer's line is so well known to the trade that it is unnecessary to mention it in detail. It embraces a complete assortment of file boxes, im-

provements and additions to which are made every now and then.

H. E. Seaman, stationer, Council Bluffs, Ia., is closing out his business.

Walrath & Barnes, wholesale paper dealers, Los Angeles, Cal., are closing out.

George C. Smith, newsdealer, &c., St. Paul, Minn., is reported to have left town.

Jacob Bronston, bookseller and stationer, Garnett, Kan., has sold out to H. B. Sparks & Co.

J. G. Lewis, dealer in wall-paper, New Orleans, La., is asking an extension from his creditors.

Smith & Messner, printers, Lake City, Minn., have dissolved partnership. H. L. Smith continues the business.

Hardin Brothers & Griffin, publishers, Savannah, Ga., have dissolved partnership. The *Echo* Publishing Company has succeeded to the business.

The Lutnyche & Leuty Company, manufacturers of picture-frames, Chicago, Ill., has been closed by the sheriff, on confessed judgment for \$2,014.

The *Herald* Printing Company, Leadville, Col., has sold out to H. A. W. Tabor. The same party has also bought out the *Herald* Publishing Company, of the same place.

Among the out-of-town tradesmen in town this week were Mr. Witherby, of Andrews & Witherby, Ann Arbor, Mich.; W. E. Seebold, New Orleans, La.; John F. Steir, Johnsonville, Pa.

The Minneapolis *Tribune*, of October 22, says: "George C. Smith, a newsdealer at 387 Jackson street, has suddenly left the city and debts behind him, aggregating a thousand or more dollars. His St. Paul creditors are Mr. L. Bosh, \$500; Levi Josepi, \$150, and the remainder to different firms. For some time he has been putting collections off, as well as absenting himself from his place of business. He came from Toronto and is supposed to have returned to Canada."

D. W. Glass & Co., Baltimore, have published a very neat ribbon book, called "Buttercups and Daisies." This is a collection of poems, printed on fine-toned paper and diversified with chromo-lithographs of buttercups, daisies and other field flowers. The cover is illuminated. It is quite taking.

That pleasant little magazine for children, *Our Little Ones*, is out for November. This is one of the freshest publications as to its reading-matter and illustrations that comes before the public, and the children must "cry for it."

The Crescent City Label Company, St. Louis, Mo., had a paid-in capital of \$25,000, which was not sufficient for the business, and stockholders declined to make further investment.

O'Kane & Hyer, stationers, New York, have dissolved partnership. Hyer & Co. succeed.

H. S. Pinney, bookseller, &c., Owego, N. Y., has made an assignment.

E. A. Taylor & Co., stationers, London, Ont., have assigned.

G. W. Prentice, publisher, Fairfield, Neb., has sold out.

A. C. Isaacs, printer, Evansville, Ind., has sold out to W. H. Isaacs.

Frederick Wernentin, stationer, toy dealer, &c., Davenport, Ia., has sold out to Adolph Frisius.

G. W. Welch, bookseller, stationer, &c., Nevada City, Cal., has established a branch store at San José.

C. V. Martin has bought out the interest of Rennington, of Rennington & Dunlap, publishers, Waterbury, Dak.

The Campbell Printing Press Co., Chicago, Ill., was burned out on the 29th inst. Loss, \$15,000; insurance, \$10,000.

D. N. Neyland, dealer in stationery, Nashville, Tenn., has made an assignment. He carried a stock of about \$15,000.

William Lycett & Brother, printers and dealers in artists' materials, New York city, have dissolved partnership. Francis Lycett continues the business.

The liabilities of Grant, Barfoot & Co., lithographers, Toronto, Ont., are now stated to be \$13,000 with assets of \$40,000. It is said that a reorganization of the firm will be made and that it is probable that the creditors will be paid in full.

J. Sailsbury & Son, stationers, &c., Guelph, Ont., have sold out to T. J. Day.

Charles C. Hall & Co., Syracuse, N. Y., publish Graves' printed index and Raymond's trial-balance book. Both of these specialties

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

are great conveniences in everyday business work.

G. S. Bradlee, bookseller, &c., San José, has sold out.

F. E. Curry, publisher, Telluride, Col., has sold out to C. F. Painter and others.

Carton & Co., wholesale paper-stock dealers, Utica, N. Y., have dissolved partnership.

F. Wernentin, stationer, bookseller, &c., Davenport, Ia., has sold out to Adolph Frisius.

Eaton, Small & Co., dealers in stationery, Gunnison, Col., are opening a branch store at Aspen.

Joseph Townsend, printer and publisher, Durham, Ont., has sold out to his brother, B. H. Townsend.

Application has been made to force into insolvency A. Buswell & Co., manufacturers of blank-books, &c., San Francisco, Cal.

A meeting of the creditors of J. W. Doughday & Co., wholesale and retail dealers in printers' materials and manufacturers of printing presses, Philadelphia, Pa., has been called for the 28th inst.

The Erwin Lane Paper Company, Elkhart, Ind., has settled with its creditors at 66 $\frac{2}{3}$ cents on the dollar, one half cash, and the balance in six and twelve months. The total indebtedness of the company was \$80,000.

John A. Shober, paper manufacturer, Lancaster, Pa., has made an assignment for the benefit of his creditors. The liabilities are heavy, in excess of \$60,000, chiefly to Philadelphia parties, he having bought very little in New York. It is said that his assignment was caused by recent failures of New York and Philadelphia paper makers. It is believed that some arrangements will be made to permit the resumption of his business.

The committee of the writing-paper branch of the American Paper Manufacturers' Association is making good progress toward receiving the consent of 80 per cent. of the trade to shut down the last full week during the months of November, December and January, in accordance with the resolution adopted at the meeting at the Metropolitan Hotel on Wednesday of last week, and hopes are entertained that the consent of 80 per cent. of the production to shut down will be obtained.

Henry Meyer, bookseller, &c., Pittsburg, Pa., has been closed by the landlord.

The *Artisan* Company, publisher, Nashville, Tenn., has been sued for \$10,000 damages.

Clarence O. Manchester, dealer in paper boxes, New York city, has made an assignment.

M. Calisher, bookseller and stationer, Eureka, Nev., has been succeeded by Smith & Moser.

W. J. Creighton, bookseller and stationer, Owen Sound, Ont., has sold out to James Sharp, Jr.

A. H. Nirdlinger, of A. H. Nirdlinger & Co., publishers of the *Casket*, Rochester, N. Y., is dead.

J. Engberg, printer, Chicago, Ill., is reported to have sold out to the Engberg-Holmberg Publishing Company.

Ouzts & Dailey, publishers of the *Edgefield Chronicle*, Edgefield, S. C., have been burned out. Insured for \$500.

The Burrow-Giles Lithographic Company, New York city, has changed its style to the Giles Lithographic Company.

Cline & Bartholomew, printers, Philadelphia, Pa., have dissolved partnership. W. H. Bartholomew continues the business.

Answers to Correspondents.

D. & Co. want to know who makes boxes adapted to all sizes of papers to be sold at retail.

Ans.—Globe Files Company (C. M. Ward, agent, 28 Bond street, New York), Cincinnati; Kiel & Ludhaus, 74 Fulton street, New York, and Schinck, 99 William street, New York.

K. & M. lately inquired for manufacturers of enameled Corks.

Ans.—Baker, McMillan & Co., Akron,

Ohio, and Davol Manufacturing Company, Providence, R. I.

O. & H. want to know where to get the pens known as "Société Plumes Platinum" or where to find H. Van Zuilen, the agent for them.

Ans.—We don't know the pens or the agent. Somebody please tell us.

Manufacture of Etching Ink.

According to Muller, a liquid for etching on glass has recently been introduced into commerce, and can be used with an ordinary pen. It consists of hydrofluoric acid, ammonium fluoride and oxalic acid, and is thickened with barium sulphate. A better ink is obtained as follows: Equal parts of the double hydrogen ammonium fluoride and dried precipitated barium sulphate are ground together in a porcelain mortar. The mixture is then treated in a platinum, lead or gutta-percha dish, with fuming hydrofluoric acid, until the latter ceases to react.—*Dingl. Polyt.*

"He who eats the kernel must crack the nut—he who would have the gain must take the pain." Right judgment is the kernel of the whole great nut of life, but to be gained only by pain and diligence, and the determination to know so much of the truth of things as we can get at.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.Just the
ARTICLE
WANTED;
Handy,
Durable
and Cheap.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are especially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies. - 10 Cents.

NEW YORK, THURSDAY, OCTOBER 30, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum. 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

It is noticeable that, while political excitement runs high and party antagonisms almost preclude business, there is a growing feeling of relief as the day of election approaches. When the *disjecta membra* of partisan feeling are finally put to one side there ought to be a reawakening. There is a little time left before Congress can get to work upsetting things, and a good deal of business may ought to be made in that interval.

WE have read that an Oriental potentate once bade his prime minister compose for him a motto which would serve both for seasons of prosperity and adversity, and that the response was the sentence engraved on a signet ring: "This too shall soon pass away." There's a great deal of wisdom in this Oriental thought, and we can readily apply it to the existing condition of trade. We need not disturb ourselves about the more remote future. What is and is soon to be concerns us most. Trade is dull, and people are waiting for the turn. Let us accept the motto and with good heart say that dull times shall soon pass away.

WITHIN a very few weeks Congress will be in session. There are many subjects of general commercial importance on which it will be necessary to invoke legislative action. Have the business men of the country considered this, and are they prepared to do anything which will accelerate any movement for improving the general status of trade and trade dealings? If certain remedial measures in connection with the settlement of insolvent estates and the disposition of debtors' assets are not advanced in Congress, there will be an opportunity afforded to apply to the different State legislatures for the relief needed. Has representative trade organization taken anything of the kind in hand? There are certain gentlemen who intend to try and institute some improvement in the insolvent laws of the State of New York, but such things should not be left to individual effort or depend upon the work of a few. Our trade organizations ought to take hold and act in this regard.

AS one of the incidents of the advantage of a protective tariff, we can point to the change effected in the metal and machinery trades of Germany. The United States Consul at Dusseldorf lately gave some statistics which showed that the wages of the hands employed in the industries referred to had been advanced per capita 11.8 per cent. in the iron works and in the machine shops 19.2 per cent., while the number of workmen in both lines had increased 33.2 per cent. Now,

to show the further advantage to the manufacturers, some further statistics demonstrate that since 1879 the net profits of the manufacturing concerns in the lines of industry indicated have increased 5.20 per cent. These figures have been gathered from official sources and are based upon returns made by several hundred companies. They plainly show that protection in Germany is doing a great deal in reviving the industries of the country and improving the condition of the working classes. Irrefragable facts like these ought to convince any American, except one who worships English idols, that a change in our tariff policy is not consistent with our material interests, and that any change in that policy which is likely to induce or permit competition with our lines of production is fraught with danger. We hope that the politicians of all parties will keep these facts in mind and, as far as the tariff is concerned, give us peace.

Roundabouts.

BY THE TRADE LOUNGER.

It's no use of talking! People will not do business as long as the political racket is going on. The excitement is now up to boiling point. What a crowd there was out on Saturday! But it seems to me that last Wednesday's turn-out in the rain was an outpouring of business men. I never knew that the paper and stationery trades looked so large until then. * * * *

But I am not to talk politics. I know it, Mr. Editor, but can't I hurrah for somebody? I should say so. I'll hurrah for myself. How will that do? * * * *

There is something to be seen if not particularly to be done. Just a few passing notes now may interest some of your readers. Several new designs in mourning stationery have appeared. Instead of indicating the age of the deceased by the usual dark margin, it is shown by various emblems, such as the extinguished lamp, harvested wheat and sickle, the ivy, the uprooted tree, the olive wreath, &c. * * * *

"There is a great deal of harm caused by cheap school-scales," said a dealer, recently. "They are made of cardboard and sell for a cent or two, but the scale is so imperfect that it is impossible to do correct work with them. The best scales are made of hard rubber and boxwood." * * * *

A new thing in ragged-edge note papers is made of linen stock, and has a peculiar tint, giving it the appearance of age. It is called Pompeian stationery, and it looks as if it had been unearthed from the ruins of ill-fated Pompei, to say the least. It comes in two weights and two sizes of octavo and commercial, and for a real novelty in stationery is

said to be selling rapidly. The manufacturer is prepared to furnish it in papeterie form or by the ream.

* * * *

Gold borders for pictures are the thing now. They set off even a plain picture to good advantage, and give a finish to a fine chromo that puts one in ecstasies.

* * * *

Chromos are now sold on the streets at twenty-five cents a pair. They are of large size, and many fine prints are offered.

* * * *

A novelty in stationery which is selling exceedingly well just now by sidewalk venders is a miniature propelling pencil with gold mountings. It makes a very nice charm, and is sold for ten cents.

* * * *

It is said that gilt-edge note papers which were in fashion a number of years ago are being looked upon with favor again. Lately plain papers have been mostly in demand among society people, and in the introduction of ragged-edge papers many manufacturers have gone to the extreme. Perhaps the reaction, therefore, brought about by the introduction again of gilt-edge papers may do some good.

* * * *

Combination penholders are cheap now, being sold as low as 35 cents per gross. Now is the time, therefore, to buy.

* * * *

But on the other hand slate-pencils are going up, possibly because there is a good demand for them now that the schools are in full operation.

* * * *

An interesting display of the World's Exposition at New Orleans will be a display of the various kinds of paper made in Japan. Wall-papers will receive special attention, and the best products of the empire in this line will be shown. Quaintness and beauty of design and strength and durability of material, in which Japanese papers are said to excel, will be shown to belong to them. Writing-paper will also be shown. The fibre of Japanese paper is mulberry bark, much longer than that of cotton, and the paper is proportionately stronger. One style of wall-paper exhibited will be an imitation of leather.

Obituary.

WILBUR F. STOREY.

Wilbur F. Storey, proprietor of the Chicago Times, died at his residence in that city on Monday night. He had been incapacitated for business for the past two years, the result of a stroke of paralysis received while in Europe four or five years ago. Though feeble, his death was not immediately expected until two days prior, when he began sinking rapidly. He became unconscious and sank peacefully to rest.

The high prize of life, the crowning fortune of man, is to be born to some pursuit which finds him in employment and happiness—whether it be to make baskets, or broadswords, or canals, or statutes, or songs.

A TRADE-MARK CLAIM.

PHILADELPHIA, October 23, 1884.

To the Editor of The Stationer :

Will you kindly allow us space to call the attention of buyers of advertising cards and specialties to the monogram which we present below and which is used in miniature on all of our advertising cards, folders, books, &c.

Monogram

Line of

Cards and

Specialties.

We received recently a letter from a law firm in your city (claiming to be retained by a well-known publishing house, whose name we will not expose) demanding that we discontinue using our monogram as being an imitation of one used by their clients.

As our monogram and our goods are our own and entirely original, as well as the methods that have made our productions a success, our customers may expect to see this monogram on all goods published by us, and we hope the same will not be confounded with any like mark on any other goods on the market.

Our thunder is loud enough without borrowing anyone else's. BAKER & HAYES.

Market Review.

OFFICE OF THE AMERICAN STATIONER, 1
WEDNESDAY, October 29, 1884.

THE MONEY MARKET.—There has been no appreciable change in the condition of financial affairs since the week commenced. Loanable funds continue in abundant supply, the rates of interest on call loans could scarcely be lower. The rates for call loans at the Stock Exchange are unchanged, 1@2 per cent. being nominally quoted. Commercial paper negotiable at 5@6 per cent. discount for the best indorsements. The stock market has ruled dull and featureless, the trading having been comparatively light and the feeling unsettled, with an inclination downward. Railroad bonds quiet and about steady. Governments firm and higher. Foreign exchange is again easier, the posted rates for sixty-day bills having declined to 4.81, while the rate on short bills that was 4.84 on Monday was raised yesterday to 4.84½ in anticipation of an advance in rate of discount by the Bank of England.

THE PAPER MARKET.—The demand is not reported by the dealers to have undergone any improvement during the week. As a general thing, dealers who were fairly well supplied with stock on the first of the month, when many of the manufacturers gave notice of an advance in their prices, have been restocking very little since then; consequently, not having been in the market to buy, they have not felt the effect of the advance, but now that the assortments of many of them have become broken, and stocks are running low, and having to replenish them, they begin to realize that prices have strengthened, and in this way the movement is becoming quite general, and sales at the old figures are rather an exceptional thing. In the line of writings, engine-sized flat-caps are firm within the range of 10@12c.; fines do., 13@15c., and superfines, 16@18c. Book papers also hold their own very decidedly; super-sized and calendered at 8¼@10¼c.; extra machine finished at 8¼@9¼c., and low grade machine finished at 7¼@7¾c. Manila papers are doing better, and prices are ¼c. firmer at the mills for No. 1, dealers quoting 7¼@7¾c. for heavy-weight, 7¼@8¾c. for light-weight, and 9¼@11¼c. for unbleached rope, with 11¼@12¼c. for cream flour sack. Straw wrappings are also 10 per cent. higher, heavy-weight being quoted at 2c. and light do. at 2¾@3c., and on the basis of 36x40 inches, 38 to 42 lbs., \$1.15 per ream. Straw boards and binders' boards are without feature.

THE STATIONERY MARKET.—In consequence of the near approach of election, business in most lines of staple goods has dropped off and is not expected to revive until the political contest is over. For the same reason, there has been a marked demand for campaign goods for several days past. Indeed, there has been considerable run on goods of this character, but it has been, however, almost entirely of a local character. Notwithstanding the depression in other lines, the movement in campaign novelties has been active since they first began to appear in the market. Great credit is due many of the manufacturers of these goods, for the excellent manner in which their productions are gotten up. The portraits and transparencies are exceptionally fine, and the badges, &c., are very noticeable for the neatness and taste displayed in their construction. The demand for plush goods is still quite fair, but will undoubtedly increase next week. There was some talk on the part of manufacturers of raising the price of blank-books, &c., in consequence of the rise in the price of paper, but now that the restriction on the importation of rags has been relieved, there will probably be no attempt to make an advance in the lines named.

WHITING PAPER CO., HOLYOKE, MASS., MAKE MORE FINE PAPER THAN ANY OTHER CONCERN IN THE WORLD. THREE MILLS. DAILY PRODUCT, TWENTY TONS. ALL DESCRIPTIONS OF LOFT-DRIED PAPERS.

GOODS ALMOST GIVEN AWAY!

The "Universal" Pocket Linen Markers.

No. 1.

No. 2.

SELF-INKING RUBBER INITIALS.

The Greatest Offer ever given to the Stationery and other Trades.

LOOK BELOW AND SEE OUR PRICES.

WE SELL THESE GOODS AT THEIR ACTUAL COST TO ADVERTISE OTHER GOODS.

HERETOFORE a comparatively incomplete and unattractive article of this kind could not be procured by the public for less than 25 cents, saying nothing of the detail and delay necessary. We now offer this Pocket Self-Inking Linen Marker to sell for 10 cents and 15 cents. Each Initial is put up in handsome, slide cover box, with bottle of the best Linen-Marking Ink and Ink Pad, in fine metal ink cup for the pocket. Style No. 1 contains a good supply of the finest Gold Bronze for use on Stationery, &c. Packed 36 assorted letters (full alphabet 26, and 10 extra of the most common) in a case, 4 cases to the gross.

PRICE: { No. 1, per case, \$4; per gross, \$12; 10 gross, \$100 } TERMS: C. O. D., when 25 per cent.
{ No. 2, per case, 3; per gross, 9; 10 gross, 75 } accompanies order.

The Yale Fountain Pen Company is having a good demand for its fountain-pen. This pen is not a stylograph, but is fitted with a fountain attachment, which supplies the ink to the ordinary form of nib. It is adapted to both professional and private uses. The pen is simple, durable and cleanly, and holds a large supply of ink. It is low priced, and is warranted for five years.

Alles & Conant are about to bring out some new designs in plush and leather odor stands and writing-desks.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the TRIUMPH MUCILAGE,

WHICH IS FAR SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7 50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Consult your friend on all things, especially on those which respect yourself. His counsels may then be useful, where your own self-love might impair your judgment.

Not to know what has been transacted in former times is to continue always a child. If no use is made of the labor of past ages, the

world must also remain in the infancy of knowledge.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary, New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must necessarily give accurate results. Truly yours, THOMAS TENNENT,

Mfr. Mathematical Instruments, 18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

Proposed Convention of Lithographers.

The following call for a convention has been sent out recently to the lithographic trade:

To the Lithographic Trade of the United States and Canada:

During the past four years numerous abuses have crept into the lithographic trade, whereby the profits of the business have been so greatly curtailed as to make it far less remunerative than it should be. As a consequence of this cutting off of profits, the standard of workmanship is, save in exceptional cases, much lower than it ought to be. Moreover, there is no unity of action among the members of the trade; in fact, there is but little acquaintance between them, though they should be bound together in close union for the furtherance of their mutual interests. Therefore,

Believing that a convention of the members of the lithographic trade or representatives of them, masters and workmen, will be of benefit to all of us, in the correction of abuses, comparison of methods and experiences, and in a better acquaintance with each other, we invite our fellow-craftsmen to meet us in the city of Chicago on November 17, 18 and 19, 1884, to consider matters having any connection with or bearing on our craft, and if thought advisable, to form an International Association of Lithographers. Every firm in both countries, as well as each association of the workmen, is invited to send one or more representatives.

This will be the first general meeting of lithographers ever held in America, and the attendance will undoubtedly be very large.

Printing Improvements.

Five years is the lifetime of a printing press, under present improvements, for newer and better devices come with such rapidity that the press of which a printing-house is proud to-day becomes quite a second-rate affair at the end of half a decade. Not only are presses becoming faster and faster, but the stereotyping processes are faster and better, as well. People who can afford to pay for costly and fast machinery are no longer content with presses that cannot print both sides, cut, fold and deliver 25,000 to 40,000 copies an hour. These are perfecting folding-presses. But fast presses can be made either on the flat-plate plans of the older presses, where only one side is printed at a time, either from the type or the stereotype plates, or on the double-cylinder plan, by which both sides of the sheet are printed at once from a running roll of paper, cut, folded and counted far faster than the eye can follow the sheets. Only a little while ago the Hoe eight-cylinder press was regarded as a wonderful piece of mechanism. This it undoubtedly was, but it required eight men to feed it and two to attend it, besides the men to remove the sheets. Now the work is done more rapidly by a single pair of cylinders, automatically fed from the roll, with a corresponding saving of labor and the number of employees. The folding that used to be done by hand, and later by separate machines, or by machines specially attached to the press, is now done by the press itself.

Future improvements are not only possible, but probable, but the speed already reached is something which seems to meet every existing demand, and only new demands will produce new presses.

New presses will glue the regular sheets for cutting purposes, and at the same time fold in

with them the third or supplement sheet, which used to be printed separately and earlier, and, of course, with danger of delaying the issue. Even the paper is wetted by machinery, although most people may not know that the paper has always been wetted to make it take a clearer and easier impression, and that the papers all come damp from the press. By the use of machinery, the paper can be evenly dampened to exactly the condition desired, while hand-work in such a case could never be even, and always required a great amount of labor on cut sheets, while the dampening is now done by unrolling the four-and-a-half mile long sheet in front of the delicate sprinkling machine. The utmost care and work has been expended on the index wheels, on several models of which experiments have been made. Here extreme exactitude became necessary that a wheel six feet in diameter had to be cut down three-sixteenths of an inch in the 226 inches of its circumference, or, in all, 1-1205 of its circumference, a neat job, which was not at first successfully carried out.

Special machinery is being devised in every direction in connection with printing presses and newspaper publishing. This is notably true of cheap, high-class presses, as well as of the more costly. There is a new two-revolution press with four rollers, the patent stop-cylinder, and the improved four-roller single cylinder, running in price from \$2,400 to \$8,000. Then there is a lithographic press, which does very handsome work, and no end of improved electrotyping and stereotyping methods. The electrotyping machinery is, for the first time, so simplified and arranged that it can be used at any time and at anywhere and duplicated indefinitely for any purpose. Type, too, has improved in many ways and the costlier copper-faced type has almost entirely taken the place of ordinary type for purposes where special speed or unusual clearness is wanted. When the type is used on bed-plate presses it will stand an immensely greater amount of pounding and last a correspondingly longer time than ordinary type-metal. The copper-facing, a sixth-fourth or more of an inch in thickness only, has a very clear outline and gives a sharp outline to the letters in the stereotype form when it is completed. This is not always readily done and care is required.—*New York Express.*

For \$6.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. One of PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustments of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unsupervised methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the world. SCRIPTURE.

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus. Declaration of Independence, &c. COMIC—Slide Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price (with 12 Slides), \$12 each. No. 4 Lantern produces a Four Foot picture. Price (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

Photogravure for Book Illustration.

Of all the processes that have been invented for book illustration, and their name is legion, there is none whose results are more beautiful than those of the photogravure. This process in its perfection is known only to Goupil & Co., of Paris, and it is to them that book makers have to send when they want the best work. The photogravure was not invented by a Frenchman, but by an Englishman, the late H. Fox Talbot, who is said to have patented it in 1852 and again in 1858. Mr. Talbot's experiments were necessarily crude, but his results astonished all who saw them. The process used by Goupil & Co. is an improvement on the Talbot process patented by Rousselon, who describes it as being founded on the discovery of a chemical substance which crystallizes under the influence of light, the crystals becoming larger the longer they are exposed to it. After exposure it only remains to make a deposit of copper by means of the electric battery on the crystalline surface, and thus a plate is obtained yielding proofs in which every detail and gradation of tone is faithfully reproduced. This sounds simple enough, but it is not so easy to put in successful practice, as many who have tried it and failed can give testimony. Vidal has gone more into the particulars of the process which he thus describes, and which is worth giving to show how much depends upon the dexterity of the operator. "A bed of bichromatized gelatine is exposed to the action of the sun's rays through a photographic negative, and is afterward washed in water. The image, after the washing, and when the gelatine has become dry, appears as if formed of a more or less marked grain, in proportion to the intensity of the shadows. The gelatine is then firmly pressed against a sheet of metal, which takes the impression of the image which has been formed upon the gelatine. This impression, properly prepared, serves as a mold upon which, by means of the galvanic battery, copper is deposited. As soon as the required thickness of copper has been deposited the plate is finished by cleansing, and by such re-touching with the burin of the engraver as may be considered desirable. If the plate be now subjected to the process of steel facing, an intaglio printing surface is produced from which, a large number of impressions may be made." Of course each plate is printed by hand, and the greatest care is necessary in its preparation, and this it is that makes the process so very expensive for book illustration. It is generally admitted to be the most beautiful of all the processes known, because it not only gives a perfectly faithful reproduction of the copy, but because its effects of light and shade, and the peculiar softness it imparts to the picture are not obtainable by any other art. There are some books published in the United States illustrated by the Goupil process. But as much as the publishers would like to use the photogravure they are deterred by the enormous expense. The plates have to be made in Paris and the time consumed in the making alone is enough to drive an American pub-

lisher, who is used to machine work, wild. Cassell & Company, however, having a beautiful set of character drawings from Dickens, by Barnard, determined to use them for a holiday book and set their hearts upon this form of illustration. The plates were made in Paris, and anyone who wants to see the photogravure process in its perfection should see this handsome folio. Goupil & Co. never sent out finer work.

A Counterfeit \$20 Silver Certificate.

A United States detective makes the statement that there are a number of \$20 counterfeit silver certificates in circulation in Nashville and other parts of the Southwest. The counterfeit will be easily detected by those who are posted, but in order to give the public the benefit of the detective's experience, the following defects in these notes are stated: In the notes no attempt has been made to imitate the fibre paper on which all genuine notes of the series, 1880, are printed. The large seal and the two large XX in the centre of the note have a dark red appearance, while on the genuine the seal and XX are of a dark brown or chocolate color. The words "Silver Certificate" appear in panels twice in the upper border on the face of the note. In the panel to the left, in the counterfeit, the letters R, T and F in the word certificate, are engraved wrong side up. The counterfeit is a trifle shorter than the genuine, and dark and

greasy. The portrait of Stephen Decatur is poorly engraved, and will not compare with the genuine. All that the detective has seen, so far, are numbered B 1,467 X and B 14 87,415 X. The numbers are uneven, but have a fine blue color, closely resembling the genuine. The plates are still in the hands of the counterfeiters, who are correcting the errors above mentioned from time to time, so that all \$20 silver certificates of this series should be handled with care, as the geometrical lathe-work is fair, and liable to deceive. The next lot issued will probably be much better than the first two batches, with which the counterfeiters are said to have flooded the money market in the Southern country.

The United States detectives are looking for the plant, which is supposed to be in the South.

All successful men have agreed in one thing—they were causationists. They believed that things went not by luck, but by law. Belief in compensation, or that nothing is got for nothing, characterizes all valuable minds.

Every man has his chain and his clog, only it is looser and lighter to one man than another; and he is more at ease who takes it up than he who drags it.

There are a great many duties that cannot wait. Unless they are done the moment they present themselves it is not worth while to do them at all.

The Art of Photo-Lithography.

Perhaps no recent invention has been of such service to the art of printing as photo-lithography. It is a reproductive process, which has almost infinite applications, and is as useful an auxiliary to typography as to the sister art. Designs made with the freedom peculiar to pen drawings may be executed, photographed, and made into process blocks for printing at the ordinary letterpress machine. Many of the most admired advertisements in the *British and Colonial Printer and Stationer* are thus produced. A short account of this invaluable process may, therefore, be read with interest.

ITS ORIGIN.

Photo-lithography is a method of producing by photographic means designs upon stone, from which impressions may be obtained in the ordinary lithographic press. Indications of efforts in this direction may be credited to the late Joseph Dixon, of Jersey City, and to Joseph Lewis, of Dublin, about 1841. Dixon's attempt was analogous to Poitevin's process, as described hereafter, and Lewis' was an ingenious modification of the daguerreotype process, in which a thin surface of silver applied to an underlying resinous coating was so treated subsequent to the photographic image being produced thereon, by exposure to light and mercurial fumes, as to lay bare portions of the greasy or resinous matter, which was then unsusceptible of transfer. No specimens or contemporaneous description by either method is known to be extant. The following embrace all the typical photo-lithographic processes at present known:

THE ASPHALT PROCESS.

Lemercier, Barreswill and Lerebours, of Paris, patented in France, July 3, 1852, a method which consisted in an application to stone of Nicéphore Niepce's very early experiments to produce a photographic image on metallic plates. They dissolved asphaltum in ether, and coated the clean stone with a thin varnish of the same. By exposing such a surface under a negative the bitumen undergoes a slow change, becoming insoluble in the parts exposed to light. A subsequent washing with ether removes the unchanged soluble portions, leaving the picture visible upon the stone, which is then to be gummed, rolled up, etched and printed. This process preceded that of Macpherson, of Rome (October 14, 1852), by only a few months; five years later the Imperial Printing Office in Vienna experimented in the same direction.

BICHROMATE OF POTASH METHOD.

Poitevin, of Paris, patented in England, December, 1855, a process for producing pictures on stone, based upon Mungo Ponton's discovery, that a sheet of paper saturated with a solution of bichromate of potash and dried was sensitive to light. Ponton, without ignoring the possible action of the substance of the paper, believed this liability to change to be inherent in the salt itself, but Beequerel subsequently explained its true nature as depending on the organic character of the sizing employed, which was apparently affected by the chromic acid set free by the action of light.

DIXON'S INVENTION.

It remained, however, for Poitevin to discover and make application of the great fact that organic matter so changed repels water and has an affinity for grease, resembling in this respect the behavior of a lithographic drawing on stone. Joseph Dixon, above referred to, published this fact in 1854, and therefore deserves the credit of priority; but the description he gives of his experiment, and the suggestions made by him, though embracing much of what was afterward elaborated by Poitevin, are hardly sufficient to displace the latter as the inventor of a typical process.

POITEVIN'S PROCESS.

According to Poitevin's description of his process, he coated a lithographic stone with a mixture of albumen, gelatine, gum, or similar organic matter (really selecting albumen), and bicarbonate of potash. He then dried the surface and exposed it under a negative. He then damped the stone, rolled up with lithographic ink, etched and printed. It may be here remarked that Dixon's experiment contained the gist, though unperceived by any, of the recent important inventions of Tessié du Motay, Albert, Edwards, and others, inasmuch as he really printed from an organic deposit, which lay between the ink and the stone.

AN AMERICAN DEVELOPMENT.

Cutting & Bradford, Boston, Mass., patented a process in England, February 23, 1858, and in the United States, March 16, 1858, which consisted in coating a stone with a solution of gum and bichromate of potash, with an addition of sugar, drying the same, and exposing under a transparent positive. After the actinic change was effected they washed the stone with soap-water, which penetrated only the parts unchanged by light, and formed there the lithographic picture susceptible of taking ink. The stone was then treated according to the usual lithographic methods, including probably its etching and gumming.

A DUTCH INVENTION.

Asser, of Amsterdam, patented in France, in 1859, the first transfer process. He prepared a sheet of unsized paper, or of paper slightly sized with starch, with a solution of bichromate of potash, dried it in the dark, exposed it under a negative, and then washed it thoroughly and dried it. This sheet was now subjected to a high temperature on a metallic plate, and then again damped as a lithographic stone would be damped for printing, and rolled up with transfer ink. The parts affected by light took the ink, in quantity more or less perfectly in proportion to the actinic action. The sheet was then dried and transferred, whereby a delineation on stone was produced. This was rolled up and etched in the usual manner. This was the first transfer process, but did not prove of practical value.

AUSTRALIAN EXPERIMENTS.

J. W. Osborne patented in Australia, September 1, 1859, and in the United States, June 25, 1861, a transfer process, in which he prepares a sheet of paper by coating one side with a mixture of albumen, gelatine and bichromate of potash, and dries it in the dark.

This is exposed under a negative, whereby a visible change is produced, the brilliant yellow of the sheet, due to the salt of chromium, being changed to a chestnut-brown. In addition to this visible change, the organic matter becomes insoluble. A coating of transfer ink is now applied to the whole exposed surface by passing the sheet through the press, face down, upon an inked stone. When the sheet is removed, the photographic picture is almost invisible. The sheet is then floated, ink side upward, upon hot water, the action of which is to coagulate the albumen, rendering it insoluble, and to swell and to gelatinize the gelatine, causing the part affected by light to appear depressed by contrast. The sheet of paper so floated is next placed upon a slab, and the superfluous ink rubbed off by a wet sponge. This operation develops the picture. The sheet is then washed, dried and transferred to the stone in the usual way. The coagulated albumen forms over the whole surface of the paper a continuous film, which adheres strongly to the stone during the transfer process, preventing any shifting and consequent doubling of the lines. This is, for all practical purposes, the first successful photographic process, and has been used in the Crown Lands Survey Office of Victoria since

September, 1859, in the production of maps. Substantially the same process is used in the Ordnance Survey Office of England. The duplication and copying of drawings for the United States Patent Office has been for some years performed by Osborne's process, and in accuracy and speed leaves nothing to be desired.

A DIRECT PROCESS.

Hannaford, of London, in August, 1861, suggested a transfer process, which he never put in practice, but the essential features of which were subsequently patented in England by Toovey, in 1864. A sheet of paper was to be prepared by a solution of gum and bichromate of potash, exposed under a negative, and then transferred damp to a stone without previous inking. The gum passed over the stone on all portions corresponding to the opaque parts of the negative, and, as explained in the lithographic process, incapacitated the stone at such parts for the reception of ink. On the removal of the sheet the application of the roller brought up the picture, which was then etched and printed.

Direct processes upon the prepared surfaces of stone are not now used, all successful photo-lithographic work being dependent upon the transfer process.—*British and Colonial Printer and Stationer.*

NEW LIST AND DISCOUNTS OCTOBER 1, 1883.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1873, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated.

December 13, 1883.

Cements.

There are various processes for making Chinese cements. The first that may be mentioned is to take finest pale orange shellac (broken small), 4 ozs.; rectified spirit (strongest), 3 ozs.; digest together in a corked bottle in a warm place until dissolved. This is very strong and useful, and almost odorless. It should have about the consistence of treacle.

A second recipe is to take the same ingredients, but to use rectified wood naphtha as the solvent. It is inferior to the last, but excellent for many purposes.

A third recipe, in which spirit is not used, is—take borax, 1 oz.; water, $\frac{3}{4}$ pint; shellac, 3 ozs.; boil them in a covered vessel until dissolved, then evaporate to a proper consistence. This is cheap and useful, but it dries slowly.

A fourth recipe macerates for several hours 6 parts of glue, in small pieces, in 16 parts of water; then adding 1 part of hydrochloric acid and $1\frac{1}{2}$ part of sulphate of zinc, and letting the mixture be kept for ten or twelve hours at a temperature of 68° or 70° Centigrade. This cement may be employed to mend glass, china, fancy work, jewelry, &c., for which it is only inferior to Armenian cement.

The first formula produces a cement so strong that pieces of wood may be joined together, cut slopingly across the grain, and they will afterward resist every attempt to break them at the same place.

In many of the islands of the Indian Ocean, in Japan, China and the East Indies, a similar cement is used to join pieces of wood for bows, lances, &c. The fluid is thinly smeared over each face of the joint, a piece of very thin gauze interposed, and the whole pressed tightly together and maintained so until the next day. Joints so made will even bear the continual flexure of a bow without separating. It is admirably adapted for fishing-rods.

The product of the second formula is commonly sold as "liquid glue."

That of the last is much used by the druggists and oilmen instead of gum, for fixing paper labels to tin, and to glass when exposed to damp.

The following is a good recipe for fixing glass letters: Take copal varnish, 15 parts; drying oil, 5 parts; turpentine, 3 parts; oil of turpentine, 2 parts; liquified glue (made with the least possible quantity of water), 5 parts; melt together in a water bath, and add fresh slaked lime (perfectly dry and in very fine powder), 10 parts. It is very useful for stationers and others to know how to attach metal letters to plate-glass in shop-windows.—*Exchange.*

It is our own vanity that makes the vanity of others intolerable to us.

The Harvard Fountain Pen.

The cuts illustrate the Harvard fountain pen, with its cap, as manufactured by the Harvard Pen Company, New York. This is a shading pen, by the use of which the characteristics of a person's handwriting are preserved. It consists of a flexible gold pen affixed to a fountain or reservoir holder, having no air-tubes, wires, springs, &c., which are the great obstacle to the efficient working of all fountain-pens. These objections are said to be overcome in the construction of this pen, and simplicity and adaptation being the points sought for, the pen is offered as one in which this result has been accomplished to the highest degree possible. The pen will write continuously for twenty-four hours without refilling. The pen is made of the best quality of gold used in the manufacture

of gold pens, iridium pointed, fine, coarse, medium, broad or stub, and of any pliability desired.

J. H. Bufford's Sons are constantly adding to their line of advertising cards. Among the new designs shown this week are five sets, including comic and other cards, which the firm offers at exceedingly low prices. No. 471 was suggested by the late Morisini clopement. It consists of a set of six cards showing a coachman going through the several stages of courtship, beginning with the usual flirtation on the sly and winding up with the happy "reconciliation."

He who waits to do a great deal of good at once will never do anything.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

NEW ENGLAND NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
230 Devonshire St., BOSTON, Nov. 4, 1884.

Having spent some days of last week among the paper mills of Holyoke and vicinity, I find that manufacturers of fine grade paper, book, writings, &c., are most favorably disposed to the idea of shutting down for a paper during each of the next three months, beginning with the last week of November.

Although I did not visit every mill in the different towns and cities through which I traveled, those that I did call on were found to indorse the measure most heartily.

At Holyoke I am informed that every paper-maker interested has signed the "call for restriction," and that the signatures of 80 per cent. of the manufacturers will undoubtedly be secured. So that a 25 per cent. reduction in these lines of papers for the next three months is among the possibilities.

This will certainly stiffen prices, and possibly advance figures a little. Let buyers survey the field, weigh the possibilities and act accordingly: The early buyer gets the lowest figures.

At Mittineaque are located three mills having a combined daily capacity of eight tons of writings, and they can be counted in.

The Southworth Paper Company, whose "bank linen" is so favorably known to the trade, has lately made many noticeable improvements in its mill. To its machinery has been added a Fourdrinier having a stop-cutter attachment, so that the company is now able to localize water-marks accurately. Such of its fine linen paper as finds its way to market now is water-marked "Bank Linen," which the Southworth Company claims as its trademark.

At Worcester, I had the pleasure of an interview with W. H. Hill, the envelope manufacturer. This is the oldest-established house in America for the manufacture of envelopes and envelope machinery, and during its long years of business has become extensively known to the trade throughout the country.

The demand for envelopes is reported very good, considering the dullness of trade generally. No further advance in prices is contemplated just at present, although what effect the lessened production of paper will have is problematic.

Mr. Hill is sending out to his many patrons in the stationery trade souvenir copies of "Worcester's Bicentennial," a 12-page paper which was issued on October 15, in commemoration of the city's grand event. The souvenir is replete with graphic descriptions and pictorial scenes illustrative of Worcester as it was in 1684, and as it is in 1884. The old and the new, in ways, manners and customs, are contrasted, and show wonderful development and progress. The secret of Worcester's rapid growth and industrial development is explained in this souvenir publication. Those of the trade desiring copies should address W. H. Hill, Worcester, Mass.

George C. Whitney, art publisher, Worcester, reports that his business for the past two months has been very heavy. And this extra trade has been done right in the face of what some call a dull season. This can be attributed very largely to the extensive line of rich novelties which the house offers the trade. In satin and plush goods this house has produced many unique designs which have proved very taking. One of these show a small French plate mirror with embossed metal setting, and beautifully mounted on plush and satin, the floral design being hand-painted. Another is a hand-painted satin door, folded over a plush pad, with frosted centre card, the whole being mounted on a hand-painted satin pad. The entire line of this house is most tastily gotten up, and show artistic finish in every detail.

It will be remembered that the New York Institute recently, in selecting from among the several art publishers for a line of satin novelties for souvenirs to its lady patrons, chose those offered by Geo. C. Whitney, and that was a valuable indorsement for his goods. Some fifty employees are now engaged in his establishment to whose artistic ability in designing and decorating is the house indebted for the many original novelties which were presented the trade this season. Merit hath a cash reward.

J. Richard Carter, of Carter, Rice & Co.,

has returned from his sports in the Yellowstone region, looking a little tanned, but considerably refreshed and invigorated. Now for an aggressive business campaign. Though Mr. Carter was warmly welcomed home, his many friends were pained to learn that his return was hastened a week by the severe illness of one of his little boys. A. L. D.

NEW ORLEANS NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

NEW ORLEANS, La., October 27, 1884.

It is no uncommon sight nowadays to see smiles on the faces of any of the stationers of our city, although to have witnessed a phiz lighted up into that pleasant appearance which would indicate a feeling of happy satisfaction a few weeks ago would not have been accomplished even after a day's tour, for depression in all its minutest details has reigned supreme in our midst for many months. The summer just ended has been trying, and such stringency in trade and financial circles has not been experienced for many a long year; and, indeed, when you look the field over and see still standing all those who started in with the summer with so little encouragement for business, and who have kept their heads above water some way or other, it is really astonishing, and many of them deserve diplomas for their powers of endurance and financiering capacities. But the darkest hour was before the dawn, for the "boom" has struck us now and merchants speak in glowing terms of the lively state of trade. There are some, however, from whom it would be as difficult to draw expressions of satisfaction under any circumstances as it would be to draw a credit balance from a defunct bank. These, however, are chronic grumblers and are to be met in all localities, but I think we have as few in our midst as are to be found in any city of this size.

There have been quite a number of the travelers from New York in the paper and stationery trade here within the past week, and among the houses represented were Boorum & Pease, Liebenroth, Von Auw & Co., J. Q. Preble & Co., Phil. Hake, J. Rosenthal & Co., H. D. Wade & Co., Hard & Parsons, and others. All of the gentlemen representing these firms report fine trade. Mr. Nott, of Phil. Hake, is

sick, at the St. Charles Hotel, with rheumatism of the eye, but he is well taken care of by his many kind friends here, and will be able to travel again within a week.

The large storehouses of E. C. Palmer & Co. present an animated appearance at all times of the day, and their corps of clerks has just about all it can stand up to, keeping away a blockade which would soon occur if the large list of orders received daily from every section of the South was delayed in shipment. Their large out-of-town trade is enough just now to keep them active, but they find themselves taxed to the uttermost to handle in a satisfactory manner both this class of patronage and their immense city business. Their stock is complete, and embraces a larger list of staple and fancy stationery of every variety of printing, wrapping and writing papers than for many years. They are well stocked with flat and ruled papers.

Julius Meyer is at his post after a long leave of absence, which is the first in some years. He has visited many parts of Europe, where he has relatives, and comes back to the Crescent City full of good health and vigor, and hopes to get a large slice of the great "Exposition boom cake."

The commercial stationers and printers are up to their eyes in work. J. S. Rivers says that he is "chuck full" and running his many presses all day and part of the night. He has recently been awarded another large share of the Exposition printing, and will soon go to work to print in colors many thousands of mammoth Exposition posters. His shelves were never so well filled with blank-books, stationery, papers, &c.

F. F. Hansel has received most of his fall goods, and he now carries a very great variety, not confining himself to stationery by any means, but he may be classed with the notion dealers. He has recently sold his entire printing office for \$8,000 to W. B. Stansbury & Brother, who, with this addition, have the largest book and job printing office in the city, and they are busy all the time, principally on Exposition work, a vast deal of which they have done in the past few months.

A. W. Hyatt moves along in his usual quiet but progressive way, and in keeping with others, is enjoying a healthy trade in commercial stationery.

Garcia & Fanche, who are among our shrewdest and most enterprising retail stationers, speak encouragingly of their business and state that their stock is well up, as the result of Mr. Garcia's recent purchasing trip to the East.

Dunn & Brother are tickled over the fine trade which they are now enjoying and their presses are kept running continually and their clerks are busy selling stationery and taking orders for blank-books and lithographing, &c.

T. Fitzwilliams & Co., who are near neighbors to Dunn & Brother, are right with them in activity and both enjoy together the confidence and esteem of all, and to their many friends they are indebted for the good business that they are now doing.

The Canal street booksellers and stationers are wide awake and they are preparing for a

big trade and are about ready to receive the great benefits accruing from the World's Exposition which will bring to our city many millions of visitors this winter. Of these the establishment of W. E. Seebold has opened to the gaze of the many passers-by the finest line of choice and rare articles of vertu and buhl. His show-windows, which are of mammoth depth, present the handsomest appearance of any on the street. His stock this year has been selected with great care and is very complete in all lines of fancy stationery, steel engravings, gift books of poetry, fiction and art, plush goods, bric-a-brac, &c.

J. C. Eyrich will be in the field this winter, and says that the result of his recent visit East will soon be seen, and that his selections this year will far surpass any of his previous attempts for elegance and variety.

James Buckley has all that he can attend to, with his trade as large as could well be desired, he has a very enviable commercial stationery business with many of our leading houses.

James A. Gresham is again to the front, and after several unsuccessful attempts to "keep ahead of the hounds" in the past ten years he has gone at it again, and this time under rather favorable auspices, and his host of friends hope as a reward for his indefatigable energy that he may have a successful experience this time.

G. T. Lathrop, who after years of struggle to wiggle through, but who finally "came to grief" last summer at the hands of the receiver by whom his stock was sold to help to pay his debts, has again returned to New Orleans, having given up his Texas prospecting tour, and has "braced up" again and now has a very neat stationery store on Canal street, in the most fashionable locality, and he bids fair to do a good lively business this season. Everybody knows Mr. Lathrop, and he is thoroughly posted in his business.

M. Perchaud & Co., who "yielded up the ghost" last month, are still clinging to the business, both members of the late firm having clerkships with houses in their same old line here in town. Mr. Perchaud is with A. N. Hyatt and his ex-partner with F. F. Hansel. All of their debts have been promptly paid, no one holding a debit balance against them.

There is no denying the fact that the Exposition so soon to be held in our midst is doing a great trade revival work among us. Every line of industry is feeling the good effects very vividly.

The larger Exposition buildings are all finished, or very nearly so, and the placing of exhibits within the space already allotted to exhibitors will soon begin.

Many of the large houses here will have very elegant displays, and every variety of merchandise under the sun will be displayed within the Exposition enclosure.

The stationery and paper displays from abroad and by home-folks will be very elaborate. The Holyoke Paper Company, the Whiting Paper Company, Crane Brothers, Carter, Dinsmore & Co., R. Hoe & Co., H. D. Wade & Co., Esterbrook Steel Pen Company, and many others, will be represented

here in fine style, under the care of E. C. Palmer & Co., their agents in this city. This firm promises one of the most interesting and complete exhibits of the Exposition. There have been over four thousand applications for space in the main building, and when all of these shall have placed their specimens in beautiful array, the effect will be simply bewildering.

The exhibits of States and Territories, every one of which will be on hand, with an exhaustive collection of their respective resources, together with twenty odd foreign nations, will be a magnificent sight in itself, and were they the only attractions of the many thousands to be seen, it would be well worth a trip to New Orleans this winter; but of these I will tell your readers later in a more detailed account, for this time I have consumed enough of your valuable space. So, *au revoir!*

CRESCENT.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET.
PHILADELPHIA, November 4, 1884.

The extreme dullness of the stationery business was the special subject of remark among members of the trade this week. Both the city and country buyers have deserted the market entirely, and not a single transaction of moment in any line of goods has been made. Business is at a standstill. For two or three weeks there has been a little activity in Christmas goods, but even in these there is nothing whatever doing; fortunately, to-day winds up the period of uncertainty, and to-morrow opens up fresh possibilities. The amount of business being done from day to day in a small way is somewhat deceptive and leads stationers to make undue complaints. The total is fair. Stores are not stocking up. It is likely that they will begin to buy more freely in a very short time. The actual wants of the trade are being supplied.

In the midst of the dullness I am glad to note any signs of enterprise. The firm of J. L. Shoemaker & Co., Sixth and Minor streets, has been for over a year making careful and expensive experiments with its new wire-stitching machine, and is now prepared to offer it to the public in a state as near perfection as seems possible to obtain. The advantages claimed for this machine, are: 1. Simplicity, the working parts being all contained in the head of the machine, and actuated by a single cam. 2. Ease of operation, the adjustment being made to the smallest part of an inch, by a single thumb-screw, a result attained by no other machine at present upon the market, and whereby the length of the staple is exactly adapted to the work required of it, no matter what the thickness of the work. 3. This adjustment can be made in less than a minute's time, and by an experienced operator in thirty seconds. 4. A wider range of work may be done upon it than upon any other machine now in use. A staple may be inserted in the centre of a pamphlet twenty-one inches wide. 5. Dura-

HENRY BAINBRIDGE & CO.,

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c. relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST.	Pen-Rack Stand, No. 1.....per doz...	\$9.00	Japanese Finish, No. 3...per doz...	\$24.00	Extra Pads.....per doz...	\$3.60
	Paper-Weight Stand, No. 2..	8.10	Mounted on boards.....	4.80	DISCOUNT TO TRADE.

bility is claimed, all the parts being made of hardened steel, and every part being readily opened to the inspection of the operator. 6. The machine is offered at about half the price charged for similar machines, and can be changed from one kind of work to another without changing of parts, which cannot be done in any other machine now offered.

On inquiry among a number of the well known retailers, it seems that there is an expectation generally indulged in, of an active fall and winter trade. If this is realized, there will be some active buying. They are the best judges of what is wanted. Every year develops a taste for finer qualities of stationery, and a greater variety of novelties, and the variety will be larger this year than last, in spite of dullness. The stationers' trade is the last to be affected by dull trade, perhaps for the reason that its customers are, as a class, among those who are the last to feel depression. General storekeepers, clothing houses, shoe stores, hat stores, and the like, feel the falling off in demand quite seriously, and perhaps stationers will in time, suffer; but the decrease in their business will not come very soon.

Our manufacturers are taking great interest in the forthcoming New Orleans Exposition. The committee in charge is working up a great deal of interest, and the expected number of exhibits will be forwarded.

In regard to collections, the trade report no difficulty beyond those incident to all collections; and as to finances, the stationers are on solid ground.

C. P. Bartleson is showing a fine line of fringed cards for Christmas and New Year's trade. Mr. Bartleson also makes a specialty of chromo advertising cards, of which he shows a very large and handsome variety. His little toothache book, mentioned some time ago, is having a splendid run, and is making glad the heart of many youngsters.

Theo. Leonhardt & Son report a good season's business and stock well sold up. They are already looking up novelties for 1885, and promise something entirely new in importations.

H. L. Lipman has improved and otherwise brought his eyelet machine up to a very high standard of perfection. Combining all of the advantages of the "Tri Patent" with the great benefit of simplicity, durability, and economy. It fills an important place in the office or bindery.

P.

AUGUSTA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., October 31, 1884.

The public schools of Richmond County, Ga., have all opened to their fullest extent, and the excitement is about dying out. A few more new text-books have been adopted by the School Board, which causes some growling among the parents, who are not satisfied with their children getting free education, but would like the books thrown in. After awhile they will want a carriage sent for

the children on rainy days and overshoes furnished. It is not many years since they had to pay for tuition as well as books; but some are never pleased. Among the new books introduced is the "Student's History of Georgia," written by Lawton B. Evans, our School Commissioner, son of Gen. C. A. Evans, who served throughout the war in the Confederate service, and who, although a celebrated Methodist divine, thought, like Bishop Polk, of Louisiana, that it was his duty to serve his State. The book has been introduced in almost every county in the State.

The stationery business has been very dull so far this season. Mr. Pendleton reports having sold a good many school-books so far, although there is not much pleasure in keeping up a stock, as the profits are so small. He thinks that he will confine himself more to staple and fancy goods, in which there is not so much risk if a little discretion is used. I know by my own experience, having hundreds of dollars' worth of old school-books out of date that I will not be able to get the price of old rags for. It makes me feel sick to look at them.

Richards & Son say that they they have done very well in school-books, and are doing very well in their printing business, which is a great help to them. The cotton factories have all begun work again at reduced wages, but full time, which is much better than stopping altogether, which some did a while back. It caused a great deal of distress among the operators, and it ruined the business of the small stores which had been opened in the neighborhood of the factories to catch that trade. Of course they could not credit when they were not at work. I can't see how they manage at the North, where so many are thrown out of employment at once and the climate is so much more inclement in winter.

It has been and still is very dry. We need rain very much, but no cold weather.

We have had quite a time for the last week or two with meetings being held every afternoon in the principal streets by the Sons of Holiness (they style themselves), and at night in the Methodist Church. There are more meetings advertised for ten days in the neighborhood of the factories. They claim to have made a good many conversions, but I doubt it. They are something in the style of the Salvation Army.

We have had several large failures in the last two weeks, which look very scaly. There is a defalcation in one of the factories, so far found out, of \$150,000, some say \$180,000. They are looking over the books yet. If it had been some poor persons who had stolen provisions to keep their families from starving they would have been very wicked, and would have been sent to the Penitentiary, but as the "defalcations" are all for large amounts, the defaulters are good financiers (especially for themselves), no matter how many they may ruin. It ought to be put a stop to, and they made an example of. Such things generally blow over in a short time, and are forgotten, except by the victims. Such men speculate with other people's money too much, and keep on losing, trying to make it up.

Business in every line is exceedingly quiet. I can't see the reason why, unless it is the election that will take place next Tuesday. If so, we will soon know if that is the case. Everything is very quiet here in that way; you would not imagine it was so near.

The Barrett Manufacturing Company's paper mill, at Bath, S. C., five or six miles from here, is at full blast again, making very good printing and wrapping papers.

Geo. A. Oates has been quite surprised at the numerous offers of assistance that have been tendered him, and fully appreciates them, but intends to be very careful and look before he leaps.

MILL BANK.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, November 4, 1884.

Another week gone! The Presidential election over (that is, it will be, dear reader, when you scan this), the bets on results more or less settled, and the good time for business nearer at hand. Who doubts that the good time is coming? Why, men bet on that. Even now some men are preparing to take chances on its coming soon—that is, they are getting ready to go into business and get the benefit of the tide whose coming no man knows, while every man knows it surely will come.

Here in Cincinnati, Dibble, the book publisher, is preparing to receive it in a new building, put up in modern style, on Walnut street, with only an alley between it and the new Custom-house. Never mind, gentlemen, that building will be an ornament and a credit to the city.

Shumate & Co., the successors to W. H. Derby, are sure the good time is coming, and they have prepared to take it in and entertain it sumptuously in their fine quarters on Fourth street, opposite Robert Clarke & Co.'s.

A. H. Pounsford & Co. are waiting and watching for this august arrival, waiting patiently and watching confidently. Meantime, they are getting out or have gotten out one of their old, old-style almanacs, with a huge triangular multiplication table on its back and with the quaint rural pictures at the head of each month's almanac, such as the predecessors of this house printed fifty years ago.

Peter G. Thomson has faith, and although he was burned out badly a few weeks ago, continues to work with wonderful pertinacity day and night. There is no feeling that this present dullness will last forever.

Neither is there any such feeling at C. F. Bradley's, where, if every press is not clicking and clattering every hour in the twenty-four, everyone in the shop stands in readiness to go into action the moment the order is given. You might as well try to persuade Charlie Stewart that the Scottish bagpipe is surpassed as a musical instrument by the piano, the organ, or any other discusser of sweet sounds, as to argue that good time has gone away to stay or that it will be long in coming back. Louis Snider's Sons pin their faith to paper and to the press as the great civilizers of modern times, and they believe

fortune will keep turning at the crank of her wheel till the paper trade at last comes right side up. They are all alike—business men in the paper and stationery trade—in abiding faith and buoyant hope.

Robert Clarke & Co. have such a variety of business and have been so long established that vicissitudes of trade distress them less than they do some younger firms with fewer strings to their bows.

John Holland has a never-ceasing demand for his staple pens. The call for his beautiful luxuries is only a trifle less than in flush times. Christmas is coming, you know, and it would surprise you to learn what calls he has and for what luxuries to brighten that season of joy.

George Stevens has a good Christmas trade, and somehow he has obtained a hold on the teachers. He has not a "corner" on the the custom of teachers, however, but a good share of their trade. Taken as a body, they are good book buyers, and they have influence in favor of buying books.

J. R. Mills & Co. are holding their staple trade, which is large and solid, and they are still reaping benefit from their novelties, notably their reversible envelopes, which are also utilized as files.

W. B. Carpenter & Co. are getting ready to give the good time a hearty reception when it comes. Meantime, they are not letting any opportunity for turning a penny slip. By the way, "Billy" has been away, and has taken a dive into the baths of El Dorado. You wouldn't know him. Not a vestige of old age remains and "Oh, how his eyes do shine!"

Edwin Hoole has great faith in Chicago, and while he has respect for Cincinnati he is able to discriminate between the value of music and money in the way of business. Cincinnati art is not convertible just now into coin for the business man's counter not to compare on that score with Chicago traffic.

Here comes the Globe Files Company like Banquo's ghost. Well, there is no use of trying to down it just now. Its turn to go under may come, but at present no signs of such an event are in sight.

The old house of Wilstach, Baldwin & Co. has the decks cleared for action, and, depend upon it, when the time does come, it will make things lively.

The house of William Skinner & Co. stood two floods and this summer's drought, and shows enough vitality to stand a dozen more of the same sort, which it is not likely it will be called upon to do.

Chatfield & Woods have long ago fitted up their immense warehouses on Fourth street, so that no one would even suspect that only a few months ago they were doused with water and charred with fire.

Ross, Robbins & George—all young men—are bestirring themselves, and depend upon it, they will be ready for the happy turn of fortune's wheel whenever it comes around this way.

Wm. A. Webb & Co., successors to Mallory & Webb, exhibit no less faith in the not-far-away future of business than do their fellow-craftsmen in Cincinnati.

C. F. Woodrow attends to business daily

in that bright little bazaar of his on Walnut street, and maintains the same discipline in his printing department as though we were all in the midst of a business boom.

The Dennison Manufacturing Company's

branch in Cincinnati never flags, though it is not saying just now that times are flush.

Samuel C. Tatum has his hands full filling orders and keeping up the stock of the popular letter-presses he manufactures.

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- 1st.—It can be set to lap any sized head in half a minute.
- 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.
- 3d.—It will lap any size from half note to imperial.
- 4th.—The pens do not lift, but rule continually as in feint lining.
- 5th.—There are no cogs. 10,000 sizes can be had from one wheel.
- 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.
- 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch.
- 8th.—The lift and drop of the pens is just the same as in hand-work.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

D. N. Neylan, bookseller, &c., Nashville, Tenn., is dead.

The *Post* Publishing Company, Houston, Tex., has failed.

Wray & Elliot, booksellers, &c., Maryville, Mo., have assigned.

Carhart, Wright & Co., printers, Chicago, Ill., have been closed by the sheriff.

L. D. Cardwell, publisher, Union City, Tenn., has sold out to N. B. Morton.

N. Leuthold, bookseller and stationer, Portland, Ore., has been attached for \$540.

The name of the *Trade Journal*, Baltimore, has been changed to the *Commercial Bulletin*.

E. H. Kendrick, bookseller, &c., Millbrook, Mich., has been succeeded by Gates & Wilcox.

Rutherford Brothers, stationers, &c., Owen Sound, Ont., have made an assignment in trust.

C. M. Mear, printer, Loogootee, Ind., has been burned out. Loss, \$1,000; insured for \$400.

The liabilities of J. G. Lewis, wall-paper dealer, New Orleans, La., are \$4,811; assets, \$7,091.

H. W. Rook & Co., publishers of the *Reporter*, Moundsville, W. Va., have been burned out.

F. J. Hard has sold his interest in the Merchants' Publishing Company, Denver, Col., to Parker Brothers.

The estate of James Campbell & Son, wholesale booksellers, Toronto, Ont., is advertised to be sold by the trustee.

Stubbs & Andoun, printers, Baltimore, Md., have dissolved partnership; Fred. P. Austin continues the business.

D. McNeil, bookseller and stationer, Port Elgin, Ont., is closing out his business at that place and is going to Essex Centre.

The limited partnership between Arthur & Bonnell, stationers, New York city, has been dissolved, and a new firm, under the same style, continues the business.

There has long been a demand for first-class writing tablets, made up in a cheap and convenient form. Most of the writing tablets in the market are made of a low grade of papers, which although they answer all of the purposes of a writing tablet, fail to satisfy the demand for a tablet made of good stock. The American Pad Company is putting on the market writing tablets of an excellent quality. All of its productions are made of the best tub-sized paper, and have the additional advantage of being bound with paper instead of composition. The company makes tablets of all sizes, and both ruled and unruled. A printed sheet, giving a scale of sizes of its pads, the number of pounds to the dozen of each size, prices, &c., will be sent on application.

The test of the superiority of an article is its continued sale. R. G. Hutchinson has a strap file and binder which has been on the market for several years, and the demand for it continues, notwithstanding the many so-called improved files which have succeeded it. The file consists simply of stiff covers in cloth, with flexible back, and broad, heavy leather straps across the back at the top and bottom of the inside, between which are stretched stout cords for holding six or twelve months' numbers of a weekly periodical. It is adapted to a variety of newspapers and periodicals.

The Merriam Manufacturing Company, Durham, Conn., report that it has kept comfortably busy during the recent dullness, and has so far met all competition that has developed itself. When the election excitement is fairly over it anticipates a better feeling in trade circles and more demand for goods, particularly mechanical locomotives and other toys, and its stock in all departments is in good shape to answer all calls for its various productions.

The firm of Howbert Brothers, booksellers and stationers, Colorado Springs, Col., has been dissolved by mutual consent, Edgar Howbert and C. W. Howbert retiring. Frank S. Thayer, formerly of the firm of Thayer & Wadham and of the Cross Pen Company, Boston, has formed a copartnership with Irving Howbert for the continuation of the business under the style of Thayer & Howbert.

A judgment for \$115 has been found against the American Photographing and Copying Company, manufacturer and dealer in photographs, &c., Harrisburg, Pa., and an execution has been issued to recover \$900.

The estate of E. Bastien, printer, Montrea, Que., is advertised for sale by tender.

An execution has been issued against P. L. Tousignant, printer, &c., St. Christophe, Que.

James Hope & Co., wholesale and retail stationers, Ottawa, Ont., have assigned in trust.

S. H. Breese, stationer, &c., Dover, N. J., has sold out to H. C. Rorick, who will continue the business.

Calvin Cobb, stationer, Chicago, Ill., was among the dealers who were in town during the past few days.

Ferguson & Elliott, printers and publishers of the *Banner*, Listowel, Ont., have been burned out. Partly insured.

E. A. Taylor & Co., booksellers and stationers, London, Ont., are offering to compromise with their creditors at thirty cents on the dollar.

D. McMaster, bookseller, &c., Sarnia, Ont., has assigned in trust. He was involved by giving accommodation paper to James Campbell & Son.

The Missouri Wheel Company, dealer in bicycles, St. Louis, Mo., has been sold out by the sheriff on an execution for \$2,000. The property realized \$1,357.

It is stated that John A. Shober, paper manufacturer, Lancaster, Pa., who assigned last week, owned real estate, which cost about \$47,000, and was mortgaged for \$41,639.

The Family Bibles published by the National Publishing Company, Philadelphia, are said to be having an extensive sale. Some of the best jobbers are pushing them largely.

Baum & Uhlmann is the name of a new stationery firm, which has been formed in Memphis, Tenn. The members of the firm have been in the city for several days buying a full line of goods.

The attention of the trade is invited to a new flexible fountain pen, in which gold or steel pens may be used at the will of the writer. This pen is warranted, and would make an excellent holiday present. It is manufactured by the Walke Pen Manufacturing Company, Hamilton, Ohio.

The assignee of C. P. Markle & Sons, Pittsburgh, Pa., has collected from the auditor appointed by the court to sell the property funds sufficient to pay a 50 per cent. dividend which the creditors will receive inside of a week or two. One of the largest creditors of the con-

Finest Line in
the country.

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

cern (a New York house) expresses the opinion that the creditors will be eventually paid in full.

James Koehler, 120 Chatham street, New York, is manufacturing a line of cheap playing cards; also New Year, Christmas and birthday cards and card ornaments.

William Colwell, stationer, &c., Mitchell, Ont., is reported to be offering to compromise with his creditors at seventy-five cents on the dollar. He gave accommodation paper to James Campbell & Son.

F. H. Loss, Jr., is meeting with a good demand for his large line of holiday novelties, including Swiss carvings, house-furnishing goods, &c., and expects more business now that election is over.

T. E. Wallace & Co., manufacturers of a standard self-inking pad for rubber stamps, now offer for the first time a pure carbon black pad and ink, which is warranted to not fade. The firm has a branch office at 60 William street, New York.

One of the best lines of campaign badges put out this season was that of Robert Snider. Mr. Snider's line has been exceedingly popular. In fact during the last few days of the campaign the demand for his badges could hardly be met.

J. W. Daughaday & Co., wholesale and retail dealers in printers' materials, &c., Philadelphia, Pa., are offering to compromise with their creditors at fifty cents on the dollar, in twelve, eighteen and twenty-four months, in unsecured notes.

Jerome B. Shaw, a traveling salesman recently discharged by John Foley, pen manufacturer, New York, was arrested on Friday of last week by Deputy Sheriff O'Connor, on a civil suit brought by his employer to recover \$2,000. Mr. Foley alleges that Shaw altered and raised hotel bills, and charged in his account railroad fares to cities he had never visited. Shaw was released under \$1,000 bail.

The "Ever-Ready" desk tablet is a complete writing desk and tablet combination. Although it takes but a space of $5\frac{1}{2}$ by $7\frac{1}{2}$ inches, it comprises a writing tablet, blotter, calendar, engagement record, envelopes, penholder, pencil, inkstand, and spaces for pens and stamps. It is tastefully made in plush, seal, and alligator. This tablet is the design of Chas. A. Burkhardt.

Edward Posen & Co. had a large shipment of albums on the steamship Maasdam, which was burned at sea. Notwithstanding they have only a limited stock of goods on hand, their cable arrangements and factory facilities are such that they are in a position to fill all orders within four weeks after their date.

C. F. A. Hinrichs has made quite a specialty of show-window novelties this season. He has as complete a line of automatic figures as can be found in the city. They are all of the best French manufacture. Mr. Hinrichs has also an extensive assortment of singing dolls, Swiss music boxes, &c.

The *Shore Press*, Asbury Park, N. J., has passed into the hands of William K. Devereux, of the *Daily Spray*.

Henry Levy & Son have a new line of smoker's stands, made of fancy ebonized wood, fancy brass mirrors and satin odor cases. They have also some new things in ebonized reading tables, with satin backs, gilt wood brackets, decorated with porcelain painted plaques, &c.

M. J. Anderson's line of New Year calling cards is very complete this season. The cards range from plain to gold bevel-edge and fringed cards. The line also embraces a variety of shape and embossed cards. Mr. Anderson offers to send a sample book showing samples of his full line for fifty cents.

John R. Edwards, stationer and manufacturer of blank-books, Baltimore, Md., has failed. His liabilities are \$20,032.71, which amount is distributed as follows: Baltimore, \$11,306.65; Philadelphia, \$1,624.83; New York, \$3,475.01; scattering, \$4,176.22. The last item named includes \$550 preferred debts for rent and wages. The assets are \$14,875.38, of which \$2,470.50 represent machinery and fixtures; \$8,343.50 stock; \$4,061.38 book debts. Among the New York creditors are J. Q. Preble & Co., \$671.23; Daniel Slote & Co., \$235.33; Boorum & Pease, \$73.97; Mr. Edwards has offered to compromise with his creditors at fifty cents on the dollar payable in four equal installments at three, six, nine and twelve months from the first of November, 1884, with interest. This has been accepted by the Baltimore creditors, but the New York creditors have not accepted it, nor have any of the other creditors, excepting those of Baltimore, so far as is known. Mr. Edwards has

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

been established in business since 1870 and had built up a good trade in the manufacture of blank-books, but recently added a wholesale stationery department to his business, which was not considered judicious, and he is believed to have lost money in the venture.

W. O. Hickok has further improved his "lay-boy" or "paper receiver" to the ruling-machine by the application of a device by which it is kept in continuous operation independent of the machine proper. Preventing any clogging and causing the paper to drop evenly and regularly in the receiver.

Raphael Tuck & Sons intend to establish a branch of their firm in New York. Adolph Tuck, of this firm, will be charged with this duty and will arrange for putting the New York house on a business footing. The firm states that the increasing demand for its goods has made this action imperative.

H. M. Brooks & Co., Springfield, Ohio, are offering Xmas and New Year cards, chromo cards, shape novelties, albums, &c., to which they invite the attention of the trade. Their advertisement will be found in another column.

Obituary.

FRIEDRICH KAPP.

Friedrich Kapp, who died on the 27th inst. at Berlin, Germany, was born in the town of Hamm, on April 13, 1824. We learn from the *Evening Post* that he had been for three years a Prussian legal functionary when the revolution in Hamburg broke out, in 1848. His participation in this compelled him to forsake his country in the following year, and he chose America as his new home. Becoming a resident of New York, he achieved success as a lawyer in the face of great discouragements, and, turning to literary pursuits for his recreation, composed some historical works both in English and in German, which will remain an enduring monument of his sojourn in this country. Among these may be named "The Slavery Question in America" (1854), and a "History of Slavery in the United States" (1860); *Lives of Generals Steuben* (1858) and *De Kalb* (1862), the latter having been recently published in English in this city; "The Traffic of German Princes in Soldiers for

America" (1864); a "History of German Emigration to America" (1867). The revolution effected in the constitution of the Fatherland by the war with France in 1870 recalled him irresistibly to his native country, where he was at once honored with a seat in the Prussian Lower House and the German Reichstag, and took his place among the National Liberals and the friends of Bismarck. His service in the Reichstag ended only with the last session, in the closing days of which the Chancellor appeared on the floor as his antagonist in the debates over the German colonial policy. Dr. Kapp had already published since his return to Germany a work on "Frederick the Great and the United States" (1871); "From and Concerning America" (1876); "Justus Ehrich Bollmann" (1880). In spite of the infirmity which has no doubt caused his sudden death, he was deeply engrossed with a new and laborious work on the history of the book trade in Germany, which we hope is so far advanced as to be sure of publication.—*Publishers' Weekly*.

Frederick A. Curtis, senior member of the firm of Curtis & Brother, paper manufacturers, Newark, Del., died at that place on November 3, aged seventy-two years.

Post-Office Department Statistics.

The report of Chief Inspector Sharp of the post-office department shows that during the past year 756 arrests were made by inspectors; 472 convictions were secured, and 163 cases are awaiting trial. During the year, 672 out of 11,246,545 pieces of registered mail carried were lost. Complaints were received of the loss of 20,377 ordinary letters, of which 14,641 were said to have contained inclosures. Investigation showed that 1,809 eventually reached their destinations or were otherwise satisfactorily accounted for. Four hundred and sixty-seven post-offices were robbed and 278 burned. Twenty-three highway robberies of mail were reported and 24 postal-cars were burned. The miscellaneous cases investigated numbered 4,870. They were of a confidential nature, and resulted in the collection from delinquent postmasters and others of money, fines and penalties aggregating \$26,927.

For Enameling Cardboard and Pasteboard.

Dissolve ten parts of shellac in a sufficient quantity of alcohol, and add ten parts of linseed oil. To each quart of the mixture add also about one-fourth of an ounce of chloride of zinc. The board may be immersed in it or the solution applied with a brush. The board is thoroughly dried and the surface is polished with sand-paper or pumice before applying this preparation.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or (2) Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

1 Carton (2,900 pieces), Five-Line Size, . .4.00

Ten-Line, Exact Size.

A Cartoon contains 28 small boxes, being 100 of each Letter; and 100 each, &c., commas and periods. In connection with the Letters use Wilson's Ready-Gummed Figures, Gold Headings, Fancy Shaped Cards and Card-Pins. With these you can make your own price cards, window tickets, &c., much cheaper and far more attractive than the old painted cards. We carry in stock assorted boxes containing 10 of each figure, and 10 of each dollar, cent and decimal marks, making 130 in all, at the following prices:

10 Line Figure, red, white or black, Five-Line, 40c. per box.

5-Line Figure, red, white or black, 25c. per box.

100 of any single Figure, Ten-Line size, 25c.

100 of any Single Figure, Five-Line size, 15c.

Send stamp for samples and Price List of above.

For use with these Figures we also keep in stock, at very low prices, by the 100, a number of different sizes and shaped Blank Cards. See also our Card Pins at 50c. per 100.

THE HARVARD FOUNTAIN PEN.

The Harvard is a flexible Gold Pen affixed to a fountain or reservoir holder. Having no air tubes, wires, springs, &c., which are the great obstacles to the efficient working of all fountain pens, these objections have been finally overcome in the construction of this Pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for, we take pleasure in offering it as one in which this result has been accomplished to the highest degree possible. Every Pen guaranteed to give satisfaction. Send for Price List.

HARVARD PEN CO., 152 Broadway, New York.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 6, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

ONE immediate duty lies before the trade: It is to stop talking politics and "buckle down to work." Let the politicians do the figuring and the arguing. Merchants who want to know how the election has gone can wait for the official figures without consulting the bulletins, and it is time to exact from every employee that share of attention to business which will keep them from distracting themselves and everybody around them from the almost forgotten claims of trade. The hurrah work is over. Now for solid trade.

WE have frequently set forth the desirability of taking advantage of exhibitions whereat goods of real value and intrinsic merit can secure that public attention and approval which they deserve. Now comes another occasion for calling attention to an opportunity which offers an excellent chance for bringing under notice a great many devices which peculiarly belong to the stationery, paper and printing trades. An International Inventions Exhibition will be opened at London next year under the patronage of Queen Victoria and the presidency of the Prince of Wales. In another column we present the prospectus of this exhibition so far as it relates to the trades mentioned. All inventions of meritorious character brought out since 1862 can secure a place, and when we consider the many new things which have come into the market within the past twenty years, we shall see that there is a good deal of available material for the purpose. We have always felt that it is the duty of Americans to be represented at foreign exhibitions, and we do not hesitate to urge it in this instance. There are many articles which would claim attention and find a market in Europe if they could only be brought under the notice of foreign buyers, and our inventors and manufacturers would lack enterprise if they failed to respond in this instance. We shall be glad to convey further information about this exhibition to any of our readers who may ask for it.

SOME men, if asked whether advertising during a season of business depression is profitable, will answer, off-hand, that it is not. Let us reason over it. Economy is always legitimate, always proper, but there is a "penny wise and pound foolish" system of economizing which is sure to inure to the detriment of trade. When a man begins to skimp on his advertising and to withdraw himself and his wares from public attention, he is putting an expensive system of economy into operation. Some people who make a study of advertising and have a systematic way of doing it, make a

special feature of the business of drawing notice to the goods which they offer when trade is dull, recognizing that in dull times people have more time to read and digest advertisements, and that fewer advertisements are presented for consideration. They also recognize that labor-saving devices which would be considered unnecessary in prosperous times, are sought for when economy is necessary; they realize that tradesmen will look to different and more distant markets in dull times and learn if it may be possible to make their necessary purchases through other than their accustomed channels, saving money thereby, while in prosperous times they are apt to content themselves with the usual channels, because the pressure of business makes it difficult to thoroughly investigate others, and they do not feel the necessity as in dull times. The failure of some houses and the consequent derangement of their business makes it necessary for their customers to look elsewhere for their purchases. In dull times new associations are formed by those who have heretofore been employees and have been thrown out of employment and these new firms are undecided as to where they shall purchase their stocks, and are likely to be influenced toward advertisers. Houses advertising in dull seasons inspire the confidence of business men who interpret this action as indicating that the house has confidence in its wares and its ability to meet the wants of purchasers, and, therefore, takes such a public way of inviting trade. The result is that such houses not only hold their own customers but draw trade from the customers of less enterprising firms.

Roundabouts.

BY THE TRADE LOUNGER.

The election is over. There's no use of talking about it one way or the other, now that business must be attended to. I have abjured all political discussions for the present, and mean to stick close to what I may have to do. If everybody will adopt the same course there will be a general getting back into harness and we may expect to keep trade lively for a little while, at least. Now, I have done.

The manufacturers of writing and book papers seem to be determined to reduce their production. Well, this will not hurt anybody, so far as the market goes; but it may be uncomfortable for the paper-mill hands and perhaps cut off some purchases of holiday presents. I can sympathize with those who are to be thus inconvenienced.

I hear that a prominent English firm is going to open a branch house in this country, New York being the seat of operations. When once a foreign house gets a good taste of

American trade it finds it desirable to keep up with it. It needs to produce something good to satisfy the demand, and hence it follows that if the inducement has been such as to bring about this "new departure," there must be reason in it.

* * * *

French figures for show-window attractions are taking the lead in this class of novelties at present. They range in price from \$18 to \$275, and vary in size from a small doll to a life-size figure. In automatic action they are simply perfect. They are very life-like in appearance, and are dressed in the most fantastic manner, while the various gestures which they are made to go through by an ingenious clock-work arrangement are exceedingly graceful and natural, and cause no end of wonderment and admiration in the spectator.

* * * *

Easel-back plush mirrors now come especially for counter show-stands for druggists' use. They are made of a plush-covered frame containing in the centre a diamond-shaped bevel-edge mirror. The spaces in the corners of the frame are filled with bottles of perfumery.

* * * *

There is an increasing demand for wood carvings, although prices, which are high, are firmly maintained. In fact, some pieces of wood carving, as merchandise, are worth their weight in silver. Owing to the extremely high prices, only the very wealthiest class of people can afford to buy them. "Carved goods are not for the million," remarked a dealer, "and the moment they get within the reach of the masses the rich people will cease to buy them."

* * * *

Cuckoo clocks are having a large sale now, owing to the great reduction in price bringing them within the reach of the masses generally. They formerly ran as high as \$60 apiece. The same style of clock can now be bought for \$12.

* * * *

Dolls are very cheap, owing to the large production in this country and the fact that they must be cheap to sell in competition with imported dolls. A fine class of dolls retail for \$8 up to \$40, and for very fashionably-dressed dolls the figures are even higher. But, respecting cheap dolls, it may be remarked, that an enterprising Boston dealer offers "three French dolls, with an elegant wardrobe of thirty-two pieces, for fifteen cents."

* * * *

Extensive as the manufacture of writing-pads has been gone into by American firms there are comparatively few pads in the market made of a good quality of writing paper. The greater portion are filled with engine-sized or book papers, which, of course, greatly reduces their cost, and as these pads usually have attractive covers they look A No. 1 in every respect. There is no doubt that pads filled with a good class of writing-papers will have a much larger demand.

* * * *

A new perforating and eyeletting ma-

chine has been brought out. It is particularly adapted to the use of attorneys, stenographers, abstract makers, county clerks, and all who have papers which tie together with tape or other fasteners. The machine cuts three clean holes through thirty sheets or less of paper at a uniform distance from the ends of the paper at one cutting, and eyelets at one operation from three to fifty sheets of paper.

* * * *

An English firm claims originality for what is called the "Visette" Christmas card. This is a square gold beveled-edge card with opening for lady's or gentleman's visiting card, which goes in a frame the same as a photograph in a photo frame. On the left is a sprig of holly or mistletoe, or a hand-painted floral or other design. I would like to know, however, where that word "Visette" is borrowed from.

* * * *

Some very pretty novelties in ink-stands, pen-wipers, string-boxes, &c., are now made with cocoa-nut bodies and oxydized mounts.

* * * *

Writing-cases made of French morocco and lined with imitation russia leather are quite popular in the English market. Some of them are fitted with two folding wings, which hold the usual fittings of work companions in pearl and nickel, with cottons, silks, &c. There are spaces for two sizes of envelopes, paper, post-cards, pen, pencil, refill pad, expanding pockets and ivory paper knife.

* * * *

A very novel form of inkstand has a base of oak of an oblong form, with cut-glass bottles of a pyramidal shape set in either end. A bronze sphynx mounted between the bottles forms a novel and appropriate handle.

* * * *

A very pretty perpetual calendar for ladies' use is in the form of a wheelbarrow. It shows the day of the week, month and date. A scissors and string box are accompaniments.

* * * *

Reading-tables are now made of ebonized wood, with satin pads set in the top of the table. The tables come in a number of fancy forms. Among some of the novelties in these goods is one which is in the form of an easel, having a satin centre-piece for a book to rest against while being read.

Answers to Correspondents.

O. & [H. last week asked for "Société Plumes Platinum."

Ans.—McCormick & Co., Franklin, Pa., say that they can supply Nos. 5-1 and 6 and that H. Van Zulin formerly had his headquarters at Washington.

S. H. & Co. want to know who manufactures or sells the best yellow copying paper.

Ans.—We do not like to make distinctions, but advise you to write to manufacturers for samples and test the paper for your own satisfaction. You can send to the Diamond Mills Paper Company, 49 Murray street, New York; Ivanhoe Paper Company, Paterson, N. J.;

Hand & Ellsworth, 51 Beekman street, New York; Henry Bainbridge & Co., 99 William street, New York; Vernon Brothers & Co., 65 Duane street, New York, or H. Lindenmeyr, 15 Beekman street, New York.

Henrico inquires for the address of the manufacturer of the seamless coin bag used by the United States Treasury Department.

Ans.—We have not seen the bags in use at Washington; but those used by the Sub Treasury in New York are *not* seamless. L. F. Requa, 537 West Twenty-fourth street, New York, is said to supply the Treasury Department with coin bags. We are told that there are no seamless bags for holding coin in the market. Coin bags are also made by F. S. Atwater & Co., 23 Bridge street, New York; A. H. Bruman & Co., 69 Cypress street, Rochester, N. Y., and the Dennison Manufacturing Company, New York.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 5, 1884. }

THE MONEY MARKET.—The money market has continued dull and featureless, loanable funds having been in abundant supply and readily available to good borrowers at the rates recently current. The stock market has ruled dull and without perceptible change. The passenger rate war is still being waged fiercely, but without effect on the market, and the fluctuations were entirely without significance. Railroad bonds have ruled dull and generally easier. Governments firm and a shade higher. The posted rate for long sterling bills is unchanged, viz., \$4.80½, but for demand bills has been advanced to \$4.84½, said to be in consequence of higher rates of interest in London, and a better demand for short remittance. Continental rates are unchanged.

THE PAPER MARKET.—There has been very little change in the situation since our last review. The volume of business reported by most of our city dealers shows a fair amount doing, as compared with the previous two or three weeks, the requirements of consumers being steadily supplied at firm prices generally. The movement among the manufacturers, looking toward a reduction of the output by running the mills on part time, has had a very sustaining influence upon the market, dealers meeting with less difficulty now in securing the advance declared by the manufacturers during the early part of this month. This advance has given a little impetus to the demand, many consumers having sent in orders to the mills for goods to be made up; but the hand-to-mouth method of buying, which has been so closely adhered to for some time past by a great many buyers is still kept up, and deprives the ordinary daily operations of business, of what under ordinary circumstances might be an active and healthy trade. In some localities, a stringency of money and a difficulty of making collections is reported.

THE STATIONERY MARKET.—Trade is very quiet in most of its branches owing to election, which has kept buyers from town and also interfered with the business done by commercial travelers in consequence of the tendency to hold back orders until matters become more settled. There is a very fair local trade and reports from the traveling representatives of the various houses indicate that a good demand is expected later on in the month. As usual, the political campaign has had much to do with depressing business, but now that it is over trade of all kinds may reasonably be expected to improve. There is a fair amount doing in holiday goods, which are selling better than many dealers anticipated. Manufacturers of these goods are quite busy and expect that business will increase as soon as the small trade, which is still cautious about buying becomes less conservative and acquires more confidence in the market. The ink manufacturers are doing little just now except to fill orders made earlier in the season, and the envelope trade presents no different features from those last reported.

WHITING PAPER CO., HOLYOKE, MASS., MAKE MORE FINE PAPER THAN ANY OTHER CONCERN IN THE WORLD. THREE MILLS. DAILY PRODUCT, TWENTY TONS. ALL DESCRIPTIONS OF LOFT-DRIED PAPERS.

Remarkable Photographs.

Some remarkable photographs of a pistol bullet in its flight, under the illumination of an electric spark, has been secured by Prof. E. Mach, of Prague. He has also photographed the air streams which one may see over a Bunsen burner placed in sunshine; and has even obtained pictures of *waves of sound*. These last being made visible by a method in which advantage is taken of the irregular refraction of light by the waves set in vibration by sound. Although these experiments may not have any practical value, they are interesting as showing the great degree of perfection to which the photographic art has been carried.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready to use* and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

According to a French journal, Dr. Aron has exhibited, at the meeting of the Berlin Electrical Society, various specimens of vegetable carbon, which were made conductors and rendered almost incombustible by energetic and prolonged heating in a vacuum or in a neutral atmosphere. These properties are so much like those of graphite that the product

may well be called artificial graphite, although it is not crystalline. The experiments show that if, as has been affirmed, the presence of hydrogen in graphite determines its combustibility, this can be true only of combined hydrogen, for carbon which has been calcined and made incandescent in an atmosphere of hydrogen is no more combustible than before.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours, THOMAS TENNENT,

Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THIS CUT
SHOWS
No. 2.

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses, Tubes, Slide-Box and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unsuppressed methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World. SCULPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard—ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. Our Descriptive Circulars and other PRINTED MATTER ARE SO ARRANGED THAT Merchants can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'fr's, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

A Copyright Decision.

In June of this year action was commenced in the Circuit Court for the Eastern District of Pennsylvania against Rufus C. Hartranft (Pickwick & Co.), publisher and bookseller, Philadelphia, Pa., by James Gopsill, publisher of the "Philadelphia Business Directory." The action, as set forth in plaintiff's bill, was for infringement of copyright and piracy, on the part of the defendant, in making and selling a small street directory of Philadelphia, plaintiff claiming that the matter for which was taken bodily from his publication. Application was made and granted for a preliminary injunction, the plaintiff entering indemnification bond in the sum of \$1,000 to cover cost of suit, &c.

At the trial, October 16, before Judges McKennan and Butler, it was decreed that the injunction was unjust, and should not have been granted, and immediate removal be allowed the defendant, and he be granted the publication of his book as before; and for further testimony and evidence the matter go before a master. It was shown by the defendant that the plaintiff had not substantiated his copyright, and that his idea was neither original nor new, the same plan and order having been used by directory makers of several other cities, and, further, that the defendant in this case had not used plaintiff's plans or arrangement to any extent whatever, as alleged in the plaintiff's bill. Civil suit will be commenced on part of defendant to recover damages.

Operations of a Forger.

An office in the Stewart Building was let in the early part of last August to a man whose right arm had been amputated above the elbow. The man introduced himself later as "Colonel" Alexander C. Branscom. He had letters of introduction which indicated that he was an agent for the publication of books in connection with the World's Exposition at New Orleans. The letters bore the signatures of Edward Richardson, president of the Exposition, who is also president of the Mississippi Mills, at Wesson, Miss., and of William Oliver, the secretary of the mills. Branscom announced that his object in coming to the city was to secure the publication of two books, one to be known as "A Guide to the World's Exposition," and the other as "Beauties and Attractions of the South." New York writers were engaged to assist in the preparation of manuscript for the books. One of the first steps taken by Branscom was to make a contract with the American Bank Note Company, at No. 142 Broadway, for printing the guide to the Exposition.

The company was to print 100,000 copies of the book, and he deposited as security a promissory note, to which the signatures of Messrs. Richardson and Oliver were appended for \$10,900. He also made a contract with the Peter Adams Company, of No. 57 Murray street, for paper, and left with them a similar note for \$15,000. By his direction they afterward sent out paper worth \$10,000,

and they paid him \$4,500 in cash besides. Conrow Brothers, of No. 33 Beekman street, also sold him paper to the amount of about \$5,000, and received a note for \$7,000, as collateral to cover the purchases. Another note for \$5,000 was placed with J. J. Little & Co., of No. 10 Astor place, who were engaged to print the "Beauties and Attractions of the South." A quantity of the paper-stock was delivered to them also, and they were to print an edition of books which were to sell at \$10 each. Kosack & Co., of Buffalo, N. Y., accepted a note for \$2,000, and sent lithographic plates to Little & Co., subject to Branscom's orders. The Century Company, in Union square, also furnished some plates for the proposed books and accepted a note for \$300 in payment. Hastings & Todd, manufacturers of cardboard, at No. 35 Beekman street, furnished some stock for the book and paid \$1,500 in cash to Branscom on receipt of a note for \$5,000.

The attention of Inspector Byrnes was called to the operations of Branscom a few days ago by Conrow Brothers, who had become suspicious that the note held by them was not genuine. Detective-Sergeants Haley and Ruland were sent out to investigate Branscom. They reported that he was an ex-convict who had served three years in prison for forging Florida bonds. An interchange of telegrams with Messrs. Richardson and Oliver had convinced the Inspector in the meantime that Branscom was a swindler, and that the notes issued by him were forged. Branscom was arrested on Monday evening, and yesterday he remained a prisoner at Police Headquarters, having been remanded to the custody of Inspector Byrnes until to-day. He gave his age as forty-five, and said he was a native of Virginia. Finding that he had been detected in forgery, he made a voluntary statement that no other person had been engaged in the swindling operation.

If his plans had been carried to a successful close he would have received \$25,000 from the American News Company for the sale of the guide-books, \$50,000 for the books printed by Little & Co., and about \$15,000 for advertisements in the books. He had placed on the market worthless notes to the amount of \$52,000, all of which were made payable four months after date.

Branscom told Inspector Byrnes that if the firms who had accepted the forged notes would "pool their issues" and carry out his publication schemes, they could save themselves from loss.

When we are in the company of sensible men we ought to be doubly cautious of talking too much, lest we lose two good things—their good opinion and our own improvement; for what we have to say we know, but what they have to say we know not.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
113 EAST MADISON STREET,
CHICAGO, November 3, 1884.

"The election excitement," remarked a stationer to-day, "while it has naturally drawn a great deal of attention away from business, has not had the effect of producing any great amount of depression in the trade. Our sales kept right on and what little is holding back, owing to politics, will come in with a rush when the excitement is over. The holidays being so close at hand will also very favorably effect the stationery and fancy goods trades."

John B. Clarke, of the Novelty Card and Advertising Company, is making a very strong run for Congress on the "People's Party" ticket and as an independent candidate. Copies of his speeches, that are being very extensively circulated, are producing a favorable effect on the voters in his district.

Cameron, Amberg & Co. report a very good trade in their various lines, and especially report a large demand for their letter-files. The self-indexing system of letter-filing, unquestionably without a rival, was invented by W. A. Amberg, and proved its merits from the start. This filing system is covered by no less than thirty patents and eight hundred copyrights. There is no section in the world to which the trade in their files has not been introduced.

Carhart, Wright & Co., printers, of 67 Washington street, were closed yesterday, under attachments for about \$2,000. The assets of the firm are said to be worth \$8,000 and the liabilities are only one half that sum. Joseph Hamsworth, one of the partners, is in Davenport, Iowa, and the J. W. Butler Paper Company have entered an individual suit against him as a nonresident for \$1,400. All the liabilities will be paid and the business will only be interrupted for a day or two, it is claimed.

Mayor Harrison has issued a proclamation to the people of Chicago concerning the World's Exposition and Cotton Centennial to open at New Orleans December 1, in which he says: "It is gratifying to me to be able to say that many of the manufacturers of Chicago have already entered application for space, and I strongly urge all others to do so without delay. There are paramount reasons why this city and this State should take special cognizance of this unusual commercial event. It offers an exceptional opportunity to our business classes to acquire their just proportion of the immense trade of our neighbors, the Spanish-American states. Of the \$400,000,000 that this trade amounts to annually the United States now receives about 15 per cent. This is an absurd state of affairs and nothing but wanton neglect on our part permits it to continue. If the effort is made at New Orleans to remove the trade barriers between the United States and Mexico most of this great trade can be secured and a vitality imparted to Western industry that will withstand any shock. I commend the possibilities of this enterprise to you as worthy your most vigilant efforts. Other

cities are striving with you in friendly rivalry to secure the rich revenues of this traffic. Considering, therefore, the importance of this undertaking to all the interests of Chicago, I call upon the merchants and manufacturers of every commodity for which a foreign trade is practicable to join in exhibiting at New Orleans, and in making such equitable business overtures to the people of our neighboring republics as the favorable conditions warrant."

The interest developing in the fat-stock show, which takes place in the Exposition Building from November 11 to November 20, is surprising even the managers appointed by the State Board of Agriculture.

The requests for space to exhibit in a competition "open to the world" have been so numerous as to have nearly taken up the portion of the Exposition building devoted to that purpose.

The Chicago Press Club, at its meeting on Friday, adopted the following memorial to the late Wilbur F. Storey, an engrossed copy of which is to be presented to Mrs. Storey.

At the time of his advent here, in 1861, the city could not boast a newspaper, in the present sense of the term, and the Press Club was an impossibility. Chicago contained six establishments, all near the verge of bankruptcy, and ordinarily employing a total of scarcely four times as many men in reporting the news of those days, and dictating to their readers what they

should think and how they should vote about a limited number of questions. He set out with the idea of making the expression of opinion subordinate to the dissemination of news, and the immense success which almost immediately rewarded his efforts proved that he had struck a popular chord. His subsequent course showed that he appreciated the response, and determined on continuing to deserve it. To this end he increased his news-gathering service as fast as the expansion of facilities would permit, and had no lower aim than to make the *Times* the greatest newspaper in the world. With this he was frank and fearless in the expression of his views, encouraged the widest range of thought on the part of those who contributed to his columns, and rendered no small service to the world by opening up and helping to settle some hitherto vexed questions in regard to the liberty of the press. We can scarcely say how much the tremendous progress in journalism within the past twenty-three years and the consequent increase of workers which has made possible the Chicago Press Club of to-day, with its membership of nearly two hundred, is due to the genius and work of Wilbur F. Storey.

Noz.

Vanity is our dearest weakness in more senses than one; a man will sacrifice everything and starve out all his other inclinations to keep alive that one.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

Stripping Photo Films.

Take a developing tray larger than the negative to be stripped, pour in sufficient water to cover, and, for a whole plate, drop in eight or ten drops of hydrofluoric acid (the exact quantity cannot be given, as the strength of the acid is constantly diminishing, though kept in a gutta-percha bottle), place the negative in the acidulated water, and in a minute or two the film will frill all round the edges and gradually leave the glass. If the operation is slow, add two or three more drops of acid, and gently rock.

When the film is loose hold it at one end and pour off the acid water, and wash by repeated changes of water; this lengthens the film wonderfully, but if the last washing is done with equal parts of methylated spirits and water it will return to its original size. This may be varied considerably by using more or less spirit. But on no account should undiluted spirit be used, as it makes the film coil out of all control.

Clean a plate with nitric acid—larger than the stripped film—dust with French chalk, polish with a dry cloth, and with a wet one wipe a quarter of an inch all round, coat with plain collodion, and when set, or even quite dry, introduce under the film. Adjust the film, and with a little care there will be no bubbles. Allow the film to dry, and coat with plain collodion. When this is dry, run a sharp penknife three-eighths of an inch from edge of plate, and you have the gelatine film between two collodion films, impervious to moisture, quite flat, and may be printed from either side. The acid is so dilute that any developing tray may be used.—*Photo News.*

The power of the mind over the body is immense. Let that power be called forth, let it be trained and exercised, and vigor both of mind and body will be the result.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, November 10, 1884.)

The election is over, and the excitement attendant thereon has passed away. Although at this writing the cloud of uncertainty hangs over the result, business men, as a rule, have banished all thoughts of politics from their minds and have settled down to work.

The stationery business continues to move along very satisfactorily. The campaign just closed has not had a very depressing effect on the trade. George E. Marshall & Co. report that their sales last month amounted to more than those of any previous month.

A good active trade had been predicted for the fall season, and the prediction seems to have been generally realized. Great preparations are being made by fancy-goods' dealers for the Christmas trade, which is already fairly under way.

The Schneidewend & Lee Company has been incorporated at Chicago, with a capital of \$100,000, for the purpose of carrying on an electrotyping and stereotyping business and to manufacture printing presses.

C. M. Barnes reports a very good trade in new and second-hand publications, of which he always carries a large stock.

The J. W. Butler Company has created a large demand for the Robinson Engraving Company's cards, with which it is supplying the trade.

W. K. Weaver has been elected secretary and treasurer of the J. M. W. Jones Stationery Company in place of Mr. Mars, resigned.

J. W. Ryckman, special commissioner for the Northwest at the New Orleans World's Exposition, has issued a call to the Chicago exhibitors at the Exposition to meet at the Palmer House Club Room, in this city, on Thursday evening, November 13, for the purpose of discussing the propriety of forming a Chicago Exhibitor's Association, and the advisability of establishing at New Orleans a bureau of information, in charge of competent persons, to carefully guard Chicago's trade interests at the Exposition. Mr. Ryck-

man states that a trade of over \$400,000,000 is being opened to us in Mexico, Central and South America, Cuba, &c., of which, in 1883, the United States received just \$13,289,581 in iron, steel, machinery, implements and vehicle manufactures. The actual state of this trade, it will be seen, is by no means satisfactory. We have really permitted Europe to take 80 per cent. of this business directly contiguous to our markets, with scarcely an objection. By properly directed and aggressive coaching, Chicago can easily acquire fully one-fourth of this neglected traffic. Hence the call for the meeting. The managers of the Exposition have fixed upon December 16, at noon, for the formal opening. The Exposition, however, will be open to visitors, as originally intended, on December 1.

The inability of President Arthur, who will be present and open the Exposition, to be on hand at that date, owing to the opening of Congress, is the cause of the change to the later date.

Applications for space will not be received after November 25, nor exhibits later than December 10. Exhibits must be in place by December 16, in time for the formal opening. Arrangements have been made for the accommodation of visitors to the Exposition to the extent of 150,000 per day. This has been arranged after a system which will be made known to the public later.

"The Chicago" is the name of a new improved paper-cutting machine manufactured and patented by E. P. Donnell, of this city, one of its leading features being that it dispenses entirely with the cutting stick.

A lithographic convention is to be held in this city this month. It will be the first general meeting of lithographers ever held in America.

The seventh annual fat-stock show, which, from the present indications, will exceed all former exhibitions, both as to the number of entries and quality of stock, will be formally opened to the public to-morrow, by George H. Loring, Commissioner of Agriculture for the United States. The Exposition Building has been tastefully arranged for the exhibition of fat cattle, sheep and hogs. The numbers of the finest specimens of all breeds of cattle, swine and sheep at present at the Exposition Building would surprise even those who have

been constant visitors to the past shows. Nearly all the stalls are now filled, as the stock for exhibition has been arriving from all quarters for the last two weeks. Although arrangements have been made for a larger exhibit than in previous years, all the States have been already assigned. Noz.

BALTIMORE BITS.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, November 10, 1884.

The clouds of general dullness which have pervaded and overspread our business community during the past three months had hardly disappeared, and while everyone was anticipating a commercial ray of sunshine, suddenly the storm of politics arose and blotted, as it were, every vestige of our bright anticipations and expectations, and left us in a state of chaotic business perplexity.

The great and general topic "Who shall be President" has been the all-absorbing theme of conversation for the past six months. The great event has come; it has passed, but is by no means forgotten. Anxiety seems depicted upon the countenances of the entire masses, until our commercial and, I might say, our social outlook seems almost paralyzed.

Business is completely at a standstill, and in its place the political situation is most seriously and alarmingly discussed, greatly to our commercial detriment; so much so as to engross every other attention to an extraordinary extent.

Every branch of trade wears a dull and altogether unsatisfactory aspect. Demands for all kinds of merchandise have been extremely light, and with continued evidences that buyers are very loth to invest or order, until compelled to do so.

It is, however, expected that a material improvement in business will be experienced as soon as this prevailing political excitement is settled and past; once safely out of this disturbing element, we may safely hope for a speedy return of all activity upon a more firm and secure foundation.

While this dullness pervades undoubtedly every branch of commercial activity, encouragement exists in the fact that, while we are not retrogressing, we are making haste slowly,

even if for the moment the progress is unsatisfactory.

While writing this, nearly the entire city has turned out to witness or join in the political procession.

The banker, the merchant, the cashier, bookkeeper, clerk, salesman, porter and drayman, all vie with each other, and are seen in the ranks, plodding through the streets.

I trust in my next to be able to give you a more satisfactory account of our Baltimore trade—at present I can say nothing of an encouraging nature.

A visit, however, among our stationers and printers here reveals the very satisfactory fact that, on a revival of trade, they will be found in the front rank, with full stocks at figures astonishing to buyers. VEXCEO.

WILMINGTON WHIFFS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., November 8, 1884.

For the past ten days the retail trade in this section, has been in a state of paralysis. No one has been buying except to supply actual necessities. Many men are idle, and have no money. Some factories are closed while others are running on short time.

The trade, while not despondent, find little encouragement in the present condition of affairs. As business exists they have no inclination to increase stock or expenses. Some of the stationers assert that their orders for holiday goods have been withheld for obvious reasons, and if placed at all will be largely affected by the changes of the next few weeks.

How long this feeling of uncertainty may continue, and trade remain in abnormal conditions, very few know and the opinions to its extent vary.

Whatever change may occur I am confident that the spirit of progress possessed by our business men will incite them to further achievements, and in the hour of calmness and reason, when business judgment prevails, none will be content to sit idly by to mourn and complain.

Although retail business has been badly crippled, some branches of the trade have, in a measure, improved. Especially is this true with our printers, whose cheerful faces indicate that the consumption of paper and ink has been very large. As I predicted, their facilities were taxed to the extreme, and to meet the extraordinary demand their full force was kept busy day and night filling orders.

Hubert A. Roop, printer, has increased his motive power by the introduction of a water-motor into his office. This addition has been made necessary by the steady growth of his business.

The James & Webb Company is daily booking orders, and reports its factory ten days behind in filling them. In the stationery department the unusual depression has been experienced. This company has in press a new book entitled "The Story of the Baptists, in all Ages and Countries," by Rev. Richard B. Cook, D.D., of this city. It is a 12mo of our hundred pages, bound in morocco and

cloth and highly embellished with over eighty engravings. It will be sold at popular prices, and by subscription only. Rev. H. M. Wharton, Baltimore, Md., is the publisher.

Among the late inventions of special interest to the trade is a new device for opening envelopes, invented by a Wilmingtonian. It is simply a machine-stitched thread across the end of the envelope, the ends of the thread being allowed to project over the edge of sufficient length to be caught by the tip of the fingers. A downward pull with the threads tears off the end of the envelope, and gives access to its contents. Inquiry among the trade finds no one predicting the inventor any remunerative success. A patent has been applied for.

Among the civil cases on our county court docket, and which is attracting much attention, is that of Hoopes v. Bell. The circumstances leading to the case are these: On October 5, last, an article appeared in the columns of the *Sunday Star*, of this city, in which Edgar M. Hoopes, business manager of the *Morning News*, was characterized as a "well-known thief, a miserable effigy of manhood, and charged with an attempt to steal advertising contracts from a paper now extinct." Mr. Hoopes at once began suit for libel against Jerome B. Bell, editor of the *Sunday Star*, placing his claims for damages at \$10,000. Mr. Bell was arrested on a capias by the sheriff, and bail was first fixed at the full amount of the claim, but was subsequently reduced to \$5,000. It was furnished by Mr. Bell, and he was released from custody.

TRACY.

BOSTON BILLETS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, NOV. 11, 1884.

The long months of political agitation, so depressing to commercial interests, are past. The minds of the people are at last freed from campaign discussions, and trade topics are receiving more attention.

Although the past few weeks have been very quiet, in a business sense, a brisk fall trade is now looked for, and if the average of past seasons is to be maintained, an extra heavy trade will be transacted during the next six weeks.

Manufacturers of holiday goods, importers of novelties and city jobbers have been quietly preparing for the demands of trade and are now ready for the boom.

Buyers are becoming more numerous, and the enterprising business concerns of the city invite the attention of the country trade to Boston.

As a market, Boston offers many inducements to dealers in stationers' staple goods, holiday specialties and novelties, and this fact is fully recognized by shrewd buyers everywhere.

Many of the lines of stationers' supplies are manufactured right in this city, and can be had at first hands. These manufacturers are enterprising, full of push and recognize the progressiveness of the times. Through their traveling representatives, Boston is being widely advertised to American dealers, while

the merits of the goods presented, coupled with low quotations, add emphasis to my statements.

The Cross Pen Company, whose goods are already so extensively handled by stationers, is among the enterprising concerns of this city. This house bases its claim to business patronage upon the real merits of its varied line of automatic pens.

Since the Cross Pen Company first presented its line of pens and pencils to the trade, its business has steadily increased, until now the largest portion of automatic pens used in this country are from the factory of the Cross Pen Company. This is the result not only of placing a fine line of pens and pencils on the market, but is due also to the continued improvements which the company makes in its goods.

Among the later productions of the Cross Pen Company is a new pen having a stationary air cap which permits the use of the pen without the delay and trouble of unscrewing. This pen also has a very large ink capacity; another valuable feature.

The 25-cent "Business Pencil," which the company placed on the market a short time ago, has had a big run and the demand is still growing.

In the way of pencil sharpeners the company is making one of the most effective "sharpeners" in the market. The cutting faces of the "Cross Pencil Sharpener" are of the best carbonated steel and are practically indestructible; and as each sharpener has four cutting faces its work is greatly facilitated while producing a long conical point to pencils. It is just the kind of a pencil sharpener that one takes a pleasure in using.

With the many thousands of Cross pens in use, it is not at all strange that the company should have interested itself in the kind of ink used in its pens. And from investigation it found that a better quality of stylographic ink than was on the market was a necessity. After many experiments, the company has succeeded in producing an ink which is conscientiously recommended as the best stylographic ink in the market, an ink which possesses fluidity with density. This chemical compound is known to the trade as "The A. T. Cross Stylographic Ink," and is presented in a peculiar style of bottle with perforated cork in which is a place for the pen filler when not in use.

As the season now opens when the demands for stylographic pens will develop, dealers should read the business announcement of the Cross Pen Company which appears in this issue.

Haynes' combined book-rest and dictionary-holder is a new device to which the attention of the trade is called by Carroll W. Clark, an extensive jobber of office and school furniture of this city. This new book-rest is a little in advance of anything in its line, and it cannot fail to recommend itself to those having occasion to use such an article.

Its construction is very simple, and the ideas of the inventor, as embodied in this book-rest, show a keen appreciation of what a book-rest should be.

As its name implies, this device is both a

book-rest and a dictionary-holder. It can be used for either purpose alone, or for a double purpose—hence its value.

To those of the trade having demands for a book-rest, Haynes' combined book-rest and dictionary-holder is of special interest. Carroll W. Clark, who is handling the article, offers such extraordinary inducements to the trade that no dealer in the country can afford to be without a sample in stock. Write to him for descriptive circular and terms, and be convinced of the truth of this assertion.

Thomas Groom & Co., the old reliable State street stationers, are fully alive to the signs of the times. This firm is a heavy importer of stationers' wares and is fully prepared for the holiday trade. What can't be found here in fancy stationery, imported novelties and blank-books, it is useless to hunt for. In blank-books Thomas Groom & Co. manufacture a line that cannot be excelled by any manufacturer in this country. Stephens' ink, a writing fluid of excellent quality, is a specialty for which this house is building up a very large trade.

At the salesroom of Knight, Adams & Co. is displayed an extensive line of imported novelties, which embraces everything that a stationer could desire to stock up with. Among the display are Vienna wallets and cigar cases, of every conceivable style; brass goods in endless designs; Bohemian glassware, such as inkstands and paper-weights; novelties in olive wood, leather and plush; photograph albums, Swiss carvings, horn goods and writing sets in great variety. These goods were personally selected by a member of the firm in Europe, and are offered the trade at extremely low figures. Being direct importers of all such goods as this house handles, intermediate profits are saved, and the firm are able to job their goods at lower prices. Buy at first hands when you can.

In the card line, Ward & Gay are prepared for the largest kind of orders and for any number of them; and they have an extra large stock to select from, which includes the best production of the leading publishers of America and Europe, besides original specialties of their own manufacture. Upon the walls of the sample-room and upon tables are systematically arranged samples of every card in stock, and from this bird's eye display buyers can readily make selections without loss of time. Besides its extensive card business, the house enjoys a very large trade in stationers' supplies, and for the holiday trade a splendid assortment of rich goods is open to inspection.

In autograph albums and scrap-books the largest trade is done by the Thorp Manufacturing Company of this city. The line of goods which this house has presented the trade for the coming holiday season was recognized everywhere as the most artistic productions ever brought out. Look at the "Longfellow" and the "Hour" autograph albums! Nothing like them in the trade for beauty of conception or for artistic execution. The merits of these publications were quickly recognized and early orders were soon duplicated and in some cases even triplicated.

The "Ideal Head" scrap-books as well as the company's "metalized" series have also had an unprecedented sale. The "Mental" portrait album is another successful venture of this company.

When, in obedience to the wants of the Christmas season, the people begin to make their selection from heavily stocked counters, the value of these meritorious publications of the Thorp Manufacturing Company will receive the greatest and the most substantial endorsement. No dead stock in these goods will be carried over. In view of the festive season Carter, Rice & Co. are sending to their numerous patrons in the stationery and printing trades samples of folders, tassels and pencils, so generally used for menus, balls and like occasions.

The gummed label paper, which this house lately presented to the trade, has met with good demand. Owing to the fact that this paper does not curl when being handled, printers find that by using the gummed papers prepared by Carter, Rice & Co., they are saved considerable trouble.

From a letter received by Carter, Rice & Co. from a large printing house having occasion to try these gummed papers, I give the following:

We take pleasure in recommending to printers the gummed paper of your manufacture, and can say from personal experience that it can be run in half the time of any other gummed paper that we know of, and trust you may be able to introduce it into every printing office in the country, thereby saving the printers a great deal of time and annoyance.

When it comes to solid enterprise, Carter, Rice & Co. are always to the front, and it is doubtful if any house in this section is doing more to impress upon the stationers of the country the advantages that Boston offers as a market for stocking up.

Notwithstanding its extensive trade in paper and cardboard and its numerous specialties the firm's line is being constantly added to, and now it is about to place on the market a line of extra fine writings which will be known as "Carter's Standard." This paper with envelopes to match will be neatly put up in a very tasty manner in 2-quire and 4-quire boxes. It will be in the different standard tints and in the ordinary sizes; differing from other lines of fashionable stationery only in quality, and in this particular it will be the best. So look out for "Carter's Standard."

The Davidson Rubber Company is another concern whose goods tend to draw the attention of the trade to Boston. Its line of goods includes numerous rubber specialties handled by stationers, such as rubber bands and rings, rubber pen-holders and rubber copying sheets. And these goods are admitted by all using them to be of the very best quality. Of Davidson's "velvet" rubber eraser the trade is too well acquainted with to need more than a mention. Since the decisions of the courts protecting the company in its manufacture of this peculiar kind of rubber erasers, its trade has steadily increased, and the merits of the "velvet" eraser have become the more generally known. And as the specialties of the Davidson Rubber Company become known the value of its business increases likewise.

From the Russell Paper Company the trade is largely supplied with "Russell's Superior Blottings." Not only does the company hold its large American trade, but considerable quantities of the Russell blotting paper are finding their way into foreign markets. Russell's double manilla, another specialty manufactured by this company, is becoming as popular with the trade as its blottings. This manilla is specially recommended for tags, boxes, and for drafting. It is made in all standard widths and a large stock is always on hand. Special sizes are quickly made when ordered.

With such business concerns as are above mentioned Boston feels safe in inviting the attention of buyers to her wares; and there are many others with whom the trade would find it very profitable to deal. So come this way with your orders.

A. L. D.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS, }
504 WALNUT STREET.
PHILADELPHIA, November 10, 1884. }

John C. Clark & Sons, 230 Dock street, are among our oldest stationers. The house was started in 1831, by John C. Clark, on Dock street, above Second. For the past twenty-five years it has occupied its present location. It controls one of the largest legal and commercial trades, having printed several hundred of the best adapted forms for every possible want of lawyers or mercantile men. In addition, it has a large trade in blank books. It does not handle the fancy articles of stationery so often seen in the stationery stores located more in the vicinity of the world of fashion, but it carries a full line of fine office requirements. The westward march of the city, and the gradual drifting of the legal fraternity in the same direction, suggested to the firm the advisability of opening a branch store at 138 South Sixth street, and the result has proved very satisfactory. For the commercial part of its business, however, the old stand is still the best, and it will probably remain there many years. Started in a very modest way by the father of the present head of the firm, the house has steadily increased under careful management and unfailing attention to the wants of the community, and it is now not only one of the oldest, but one of the leading houses of our city.

The firm of William M. Christy's Sons may also be ranked among the leading and also the old firms of this city. William M. Christy started in the stationery business on Chestnut street, below Third, in the year 1844. In 1854 he removed to his present location, where he afterwards associated with him his two sons. The father died in 1866, since which time the present firm-name has been unchanged. The house is located at the present time at 127 South Third street. It does a large blank-book business, and also publishes the internal revenue books. For some years past it has had exclusive control of the wholesale trade in "Waggener's Trial Balance," a work which has been found to be admirably adapted to the wants of the business community, and which

has been pushed with considerable success. Like the firm of John C. Clark & Sons, this house does not handle the fancy lines of goods, but prefers the standard articles which every business man is likely to need. Like most houses which devote especial attention to catering to the wants of the public, it has built up a steady trade, which is likely to stick by it, no matter how variable the times. Of course, like a good many others, it sometimes suffers from hard times, but, on the whole, it considers that it has been very fortunate in the amount of business it has been able to secure, when everyone was complaining of depression. As to current prices, as in other trades, so in the stationery line, competition has narrowed the profits a great deal in the past ten years; but W. M. Christy's Sons do not anticipate any further decline now. If, as was anticipated a few weeks ago, there had been a rise in blank stock, the margins of profit were so narrow that a rise in the price of blank-books would have soon followed; but the danger of any increase in the prices of the unfinished material, or in the complete article, seems as yet in the dim distance. Once prices get down, it requires a special effort, or some extraordinary occurrence, to bring them up again, in these days when the policy of every manufacturer seems to be to make as many goods as he possibly can and force them upon the market whether there is a demand for them or not.

The firm of William F. Murphy's Sons, now ranking among the oldest and best-known stationery houses of Philadelphia, had its origin in the city of New York in 1820. In 1840, William Murphy, the father of the members of the present firm, came to this city and engaged in the stationery business, and soon built up a steady, reliable trade. In its large store, 500 Chestnut street, may be found almost every imaginable article ever handled by stationers. The growth of the business in this direction has been very rapid in the past ten or fifteen years, and particularly in the last five years. The public taste has been cultivated, until articles formerly considered as articles of luxury and found in the counting-rooms of the favored few, may now be considered necessities, and are to be met with in the offices of nearly every establishment. In addition to this, the fine arts have been called upon to furnish their share in adorning the surroundings of the business man. Fancy goods, of infinite variety, are now staple articles in the wholesale stationer's stock and also in that of a majority of the large retailers. These goods in many cases come from abroad, but the Americans are yearly taking more and more interest in trying to produce similar goods, oft-times with a creditable degree of success. The stationer of to-day carries a much larger and more varied stock of goods than did his predecessor of half a century ago, and one might almost wonder how the inventive genius of the human race could devise such a multitude of designs in the various lines. But the American public is never satisfied with what it has, but is continually seeking after something new. There is a strong disposition to possess something that

no one else has, and once others have it, it seems to lose its charm and something else is wanted. The prices of these fancy articles have declined considerably since they have been manufactured so largely in this country. Formerly the importers had things all their own way, but American enterprise has effected a great change in this direction.

Among our leading retail stationers may be mentioned W. H. Hoskins, 913 Arch street. Perhaps it is hardly correct to designate him as a retail stationer only, for he does both a wholesale and retail business. The business was started by the present head of the firm in 1859, on Spring Garden street. In 1864, seeking a more central locality, he removed to his present location, where his business has gradually assumed larger and larger proportions, until every portion of available space in his large building is entirely taken up with the various departments of his business. In addition to a large blank-book business, he has devoted a great deal of attention to the printing of invitations to weddings, &c., and he not only does this for his city customers, but furnishes the trade with the same in the country. This fall he has issued one of the most complete catalogues or sample-books in this line ever presented to the trade. No less than twenty-five different styles are given, from which to select, and the dealer ordering from the country stationery store may be just as sure of getting the most correct and latest style as the city dealer. Mr. Hoskins confines himself exclusively to the stationery trade, not handling the fancy goods that have found their way into the stocks of some of our dealers. But in the staple goods no finer line could be displayed. A seemingly endless variety of paper, envelopes, inkstands, portfolios, pocket-books, albums, diaries, tablets, &c., greets the eye upon entering the store, and yet not the half of the immense stock is visible. Mr. Hoskins makes a specialty of monograms, crests, heraldic designs and the like for those who are ambitious to shine in this direction, and has all the facilities for printing with steam-power in the most rapid and neatest manner. His special styles in visiting-cards are well known to many of your readers, and those who once pay him a visit are likely to return, for no pains are spared to render all work satisfactory. Five engravers and ten printing-presses are constantly employed to meet the requirements of the business. W. H. Matthews, who was formerly engaged in business on Chestnut street, above Twelfth, and afterward in charge of the stationery department of John Wanamaker's store, is now with Mr. Hoskins, and has especial charge of the printing of the fine stationery. Those who are in need of something very fine will do well to give the house a call, and we can promise that they will not be disappointed if they do.

One of our best known wholesale firms, Elder & Bentley, 432 Market street, may possibly claim rank with our old houses, although it has not always been known by the same firm name. The original start of the house was made in 1846, under the firm name of Griffith & Simon, at 114 North Third street, which, under the system of numbering then

in vogue, was above Race street. Griffith & Simon were booksellers, stationers and blank-book manufacturers. In 1855 the style of the firm was entirely changed, and became Bast & Miller, Mr. Bast having been for some years in the employ of the original firm. In 1857 the house was known by the name of Marcus Bast. In 1859, J. W. Miller was the sole proprietor. In 1862 it changed to Miller & Elder. In 1871 Mr. Miller went out of the firm, and Mr. Bentley took an interest in it, the style of the firm being D. E. Elder & Co. In 1879 Mr. Grevemeyer was admitted to the firm and the firm name was changed to Elder, Grevemeyer & Bentley, but this partnership only lasted three years, and in 1882 Mr. Grevemeyer withdrew, and the firm became known as Elder & Bentley. The firm does one of the largest wholesale businesses in the city, making a specialty of school-books, in addition to its many other lines; it also handles wall-papers in a jobbing way, and is the only house now in the wall-paper pool, selling as a jobber, in this city. The pool was formed in July, 1880, and the firm went into it in January, 1881. Several other Philadelphia firms went into it at the same time, but have all gone out with this one exception. The firm reports a very quiet week, but has had a good fall trade, especially in its fine line of Christmas goods, which have been moving off very freely. It began the season with a very fine line of imported albums, but the stock is already well broken into, and before the first of December it will probably be nearly or quite cleared out. The styles for this year have been unusually attractive, and prices have never been so low. The same may be said of the prices of everything in the stationery line. A slight attempt was made a short time ago to obtain an advance, on account of the flurry in the rag market and a disposition to advance paper of all kinds, but the attempt was unsuccessful, and the figures remain unchanged. A little more profit would gladly be welcomed, but the demand must more nearly equal the supply before such a thing is likely to occur.

Louis Dreka, 1121 Chestnut street, is perhaps as well known to both wholesale and retail trade as any of the stationers in our city. Although his house is not so old as some others, it has always borne a reputation for being up to the times in the style and variety of goods displayed, as well as being very moderate in prices. He confines himself strictly to the articles which belong legitimately to the stationery business, and has not drifted into a general line of fancy goods, as have some of the others. Mr. Dreka began business in 1864 at 1033 Chestnut street, where he soon built up a good trade. While neglecting no portion of his business, however insignificant it might seem, he catered for a fine retail trade, and having the advantage of a good location and always furnishing good work, his efforts were crowned with success. In 1874, owing to the changes in the block that he occupied, he thought it to his interest to remove one square farther west, to his present location. Doing a very fair business at all seasons of the year, as the holidays approach we find his counters thronged with buyers, and in

anticipation of the same rush this fall he has laid in probably as fine a stock of staple and Christmas goods as has ever been presented to his customers. The wholesale trade has been a little dull this summer and so far this fall, but this may be expected, as Mr. Dreka does not claim to be in any sense a commercial stationer, but is, more correctly speaking, a dealer in fancy stationery.

The firm of J. B. Lippincott & Co. is one of the oldest book and stationery houses in the country. When running full, as at the present time, it gives employment to about 500 hands, and seldom does the number, even in the dullest seasons, fall below 300. The statement has been made that this is the largest book publishing house in the United States, but it does not lay claim to this title, giving the palm to a New York house. Still, it is safe to say that it is not in the rear rank by any means. While the style of the firm has changed many times, it dates well back toward revolutionary times. In the last quarter of the eighteenth century one Johnson had had a book and paper store on Fourth street at Market street, which he afterward sold to Benjamin Warner. In 1816 John Grigg became a partner in the concern, which was styled Warner & Grigg, and so remained until Mr. Warner's death. The firm then became Grigg, Elliott & Co., Hugh Elliott obtaining an interest in the concern. Afterward, under the same style, in 1847, Henry Grambo, Edmund Claxton and George Remsen became the company. J. B. Lippincott was born in Burlington, N. J. He came to this city in 1830, and obtained a position in a bookstore. In 1836, having thoroughly mastered the business, he became the founder of the firm of J. B. Lippincott & Co., book publishers, at the corner of Fourth and Race streets. In 1850, Mr. Grigg retiring from the firm of Grigg, Elliott & Co., Mr. Lippincott bought his interest, although it took nearly all his available capital to do so, and the firm was known as Lippincott, Grambo & Co., and was located at the old stand, on Fourth street at Market. In 1860, the old quarters getting too small, Mr. Lippincott began the erection of the present buildings, 715 and 717 Market street, which were completed in 1863, and the firm moved into its new quarters. The style of the firm was now J. B. Lippincott & Co. The buildings at first were 45x200 feet and five stories high, but even this vast area proving insufficient for the wants of the trade in 1871, the property in the rear extending through to Filbert street was purchased, and the building was extended all the way through at the same width and height, with an entire depth of 345 feet, giving, with the basement, between 85,000 and 90,000 feet of floor surface. The stationery department is a very large and important feature in the firm's business, and it controls a very extensive trade.

One of the best known houses in this city is that of William Mann, 529 Market street. The firm is an old one. It was established by the elder Mann in October, 1848, with a capital of \$60 in money and merchandise. Mr. Mann was one of those pioneers in business who knew that nothing but hard and strict atten-

tion to business would insure success, and he started in this city, carrying his stock in a carpet satchel. He canvassed the city from door to door, and thus created a demand for his goods, and laid the foundation for the business which exists to-day. He made a specialty of carrying only the best stock, and selling it at the lowest price consistent with sound business principles. The business grew steadily from month to month. That way of doing business was something new, so long ago, and Mr. Mann made friends wherever he went, and his visits came to be expected. In fact, the consumption of stationery increased by this method, as people naturally used more and bought more, when it was handed to them by an enterprising stationer, than they would have used had they purchased at stores. In a comparatively short time his business grew to such proportions that the canvassing was discontinued, and a large trade was built up, more space occupied, and since then, from year to year, the business has grown, until at the present time the firm occupies a five story brown-stone building, at 529 Market street, for which it paid \$125,000, and with stock worth at least that amount. This establishment is one of the most complete in the country, and the firm probably does the largest business of the kind in the United States. The head of the house died three years ago, and the business is being carried on in the same line of policy, under which it was established. The trade extends from Maine to Mexico, and has been extended to foreign countries. Joseph H. Mann is the present manager.

Charles J. Cohen is one of our well-known stationers. He reports a spirited demand for the "C" assorted box of envelopes particularly. The demand for his entire line of goods is satisfactory. This particular envelope is put up in packages of twenty-five in twenty different styles, which enables the dealer to fit at once any size of card. This is very useful for enclosing Christmas, New Year's, and all classes of cards. A list of sizes, which may be specially ordered, accompanies each box.

The house of Chas. J. Cohen, 503, 505 and 507 Chestnut street, is one of the largest and most enterprising in the stationery line. S. Cohen, born in London in 1780, established in 1802 a factory for the manufacture of leads and lead-pencils, and the business is still carried on in London by his younger son, B. S. Cohen. His elder son, Henry Cohen, born in 1810 in London, came to the United States in 1836, and in 1838 established the business of importing and manufacturing stationery on a large scale in Chestnut street, near Fourth, afterward on Fourth street, near Market, and in 1857 secured his present location. In 1862 Chas. J. Cohen (the present head of the firm), his eldest son, then fifteen years of age, entered the establishment, and in 1868, attaining his majority, became a member of the firm under the style of Henry Cohen & Son. In 1871, on account of ill health, the father retired, and Chas. J. Cohen became sole proprietor under the present firm name. The manufacture of envelopes by steam-power was introduced in this establishment in 1862. Mr. Cohen reports a gratifying improvement in busi-

ness since the beginning of the week. The trade seem to be getting over the political excitement and settling down to business. His stock of fancy goods for the holidays surpasses any hitherto offered, and a very fair trade for the times can safely be predicted for him.

Collin S. Cohen, of London, cousin of Chas. J. Cohen, has recently been visiting America in the interest of the London house, which is a large manufacturer of lead-pencils. He has been looking up an American trade, and will spend the winter on this side. He is much pleased with what he has seen and those he has met, relatives and business acquaintances included, and expects to do a good trade.

Potsdamer & Co., 243 and 245 South Third street, manufacturers of lithographic, etched folds and cards, whose card is to be found in another part of this paper, are steadily extending their business, introducing novelties, and helping to stir up a spirit of emulation in the trade by their enterprise. Their latest novelty is 2,470 fold, which is very attractive. Their price list is in the advertising column.

The Philadelphia Novelty Company, manufacturer of dies and stamps, is doing an active business, both domestic and export. It is located on Callowhill street, above Broad. The company is enterprising, and keeps in the foreground in its specialties, in this city, and is favorably known throughout the trade.

Wolf Brothers report that Clarence Wolf has just returned from the West, where he has found trade somewhat hurt by the unsettled state of politics. However, his trade has been fully equal to that of last year, but this they attribute to the much larger line that they are manufacturing. Sales of their embossed designed envelopes and pure "Crown" linen papers are far ahead of any previous time since they have been manufacturing them.

The manufacturers of the well-known Chambers' paper-folding machine are building an addition to their already extensive works in West Philadelphia. Cyrus Chambers, Jr., is also the inventor of a very efficient brick-making machine, which is meeting with very gratifying success. The firm has just exhibited one of its latest machines at the Mechanics' Exhibition in Boston, and is now preparing a very complete exhibit for New Orleans.

P.

A trophy lamp is held in an armored hand, the gauntlet being well counterfeited, which protrudes from a rich shield, the whole being supported at a height of about six feet by three spears.

Tripod bamboo frames are now utilized for work-baskets. They can be obtained either in light or dark wood, and so arranged that they can be opened or closed at will. When opened they are kept in place by a triangle piece, made of metal, which fits in at lower part of sticks. This gives open space at top. In this space is suspended the little work-basket by ribbons or cord. It is exceedingly pretty to embroider a dainty silk bag, trim with lace and full bows, instead of using the basket. The bag need not be removed when you wish to fold for packing in trunk.

Novelties in Brass Ware.

A few months ago it was believed that fancy brass goods would be in very little demand this season as they have been in the market so long that it was thought that people had become somewhat tired of them. Notwithstanding many new and novel designs were constantly being brought out, they were taken hold of by the jobbing trade with a great deal of distrust as to their salability, and this too in the face of the fact that prices have very much declined within the past year or two, and that this class of goods, therefore, had a better chance of becoming generally popular. But the extremely large sale which brass goods have had this fall has taken the trade by surprise, and it is now thought that they may become more popular than ever. Their increased sale is undoubtedly because of the reduction in prices. People are buying brass ware now who could not afford to do so two or three years ago. With those who have an almost unlimited amount of means, to be sure, bronze is preferred to brass, but the price of the former is about four times greater than that of the latter. A piece of bronze costing, say, \$40, can be bought in brass for \$10 or \$12, and except for those of ultra fashionable tastes, answers just as well, being exactly the same as to quality of workmanship, finish, &c. "In some instances," said a dealer to a reporter of THE STATIONER, "the difference is more striking. Here is a brass pitcher, worth at wholesale \$85, which in bronze would be worth \$500. The finest brass goods are imported from Vienna, Berlin and Paris, and consumers generally prefer the imported to the domestic goods, on account of their quality, and also because there is not much difference in the price. It is impossible for domestic manufacturers to compete with foreign makers in respect to quality and fineness of finish, although they do their utmost to imitate the imported goods. To an unpractised eye they succeed very well, but it is an easy matter for a dealer or connoisseur to detect the difference. A few years ago nearly everything in the shape of fancy brass goods was imported. Eventually their manufacture was taken up in this country, and now there are more domestic manufacturers than you can shake a stick at. This has had the result of reducing the price fully 33 per cent. We could not sell the imported goods for the prices they are holding at if they were not of a better quality. I am inclined to think that in the end our home manufacturers, however, will drive out of the American market their foreign competitors, from the fact that each season they improve on the quality of their productions, and also because they do not depend so largely on foreign ideas for their designs, but are constantly bringing out many novelties."

One who has never had occasion to go through the market for the purpose of acquainting himself regarding the number, and variety of fancy brass goods would be surprised, not to say, interested and edified, were he to take the trouble to do so. Articles in brass have multiplied with each season.

There are paper baskets, statuary, ash-trays, pocket-lanterns, candlesticks, pictures, with frames of brass, *repoussé* ware in panels, with portraits in bas relief, mantel and wall clocks, card-receivers, inkstands, book-racks, lamps, thermometers, &c., *ad infinitum*. Brass-ware is made to serve a variety of uses, aside from its ornamental character, and stationers and fancy-goods dealers now carry in addition to a line of strictly stationery novelties, many articles in the house-furnishing line, such as fancy brass tilting-kettles, egg-boilers, wine-coolers, dressing-glasses, cuspidors, umbrella-stands, &c. "One reason," remarked the dealer already referred to, "why brass-ware remains so popular, aside from the reduction in price, is because it is showy and looks aristocratic."

There are a great many novelties this season in brass-ware. Tilting kettles are improved, not only in their attractiveness and neatness of design, but in respect to their utility. A French novelty of this kind consists of a porcelain cup, tightly covered, mounted in a frame, with a spirit-lamp underneath and a glass receiver with siphon attachment. The beverage, when it has undergone the process of preparation, flows through the siphon into the glass receiver, perfectly freed from drugs, and so delicately flavored as to be fit for the gods. These goods are mentioned because they are largely handled by dealers in fancy goods.

A card-receiver is mounted on legs and has a square top inlaid with porcelain with a pretty design in colors. The same style of card-receiver also comes with a mirror attachment.

A very attractive thing for the parlor table is a bouletta, which consists of a rod resting on a base of a very pretty design holding up a brass canopy with a row of glass prisms around its edges and four sconces underneath.

A new style of lamp has a base consisting of a Turkish figure, the whole being brass with a bronze finish. A hall lamp is enclosed in Japanese screens having frames of teak wood.

An elaborate card-receiver consists of a square tray with a gondola mounted on a dolphin, and a call bell in each of the four corners of the tray. This piece is massive and expensive.

Benares ware is the name of a new variety of brass goods which comes from India. It is all hand-worked, and comes in jardinières, vases and card receivers. The same ware comes also enameled in a style peculiar to Indian productions.

Very beautiful vases are mounted on onyx bases. The vases are decorated with hand-paintings, and range in price from \$200 to \$400.

Luminous waterproof paper may be made from a mixture of forty parts pulp, ten parts phosphorescent powder, one part gelatine, one part potassium bichromate and ten parts of water. It can often be used where luminous paint cannot.

A useful cement may be made of alum and plaster-of-paris well mixed with water and used in a liquid state.

New Combination in Metals.

A new combination in metals this winter will be forged iron and copper; the iron cut in open pattern overlays the copper which shines through with a ruddy lustre; salvers, candlesticks and inkstands have appeared so far. The so-called baser metals are now being worked with such skill as to rival the precious metals, showing that exquisite form and color after all are the leading charms, whatever medium is chosen for their expression. A charming combination also is of copper with colored bronzes. On a large panel of this metal is shown the head of a Moorish girl with graceful turban, jewels and drapery, all wrought in brilliant bronzes. Mounted on a panel of Austrian oak, bound with bands of copper ornamented with arabesques of silver, and encircled by a twisted band of garnet plush, this high relief forms a rich wall decoration. Among smaller ornamental pieces are hand-painted jugs, cannettes, and vases of olive body, on which are variously painted crimson Virginia-creeper vine, Michaelmas daisies and nasturtiums. A decided novelty in minor decorations is an ice-water jar or cooler in Oriental style, as follows: A large glass jar has a pasteboard cover made to fit its top. A pasteboard cover made to fit outside the jar is neatly covered with yellow Canton silk. The cover of the cooler is also covered with the yellow silk; on the top is applied a decoration of Chinese figures embroidered in gay silks. A silken cord, run through two holes pierced in the lid, is knotted underneath and forms a handle to lift the lid.—*The Art Interchange.*

Preparing Panels for Painting.

An excellent method of preparing paper tissues, wooden tablets and the like, for the purpose of painting, has been successfully employed in Germany by M. Dupays, of Nancy, the advantages being that in the use of crayon or chalk the colors adhere better to the surface; in water-color work the moisture is long retained, so that the color tones remain unchanged during work, and in oil painting the colors easily mix, greatly facilitating the work of beginners. The process is thus described: One or two coats of size are first applied to remove porosity, then a thin layer of a paste of white lead (200 gr.) and boiled oil (50 gr.) is put on. After drying for half an hour, fine cotton dust is sprinkled on the surface from a sieve, and by striking the piece on the back, the fine cotton fibres are caused to rise, forming a velvet-like surface. The material is let dry two or three days, and brushed with a woolen brush, so as to depress the cotton somewhat; then a mixture of white lead (8 pts.), gold lac (1 pt.), spirits of turpentine (1 pt.), and starch (1 pt.) is applied. This is equally distributed by passage between rollers with a caoutchouc surface. The cotton particles are raised again with a fine brush of couch grass, and after two or three days drying, the material is put in a bath of equal parts of alcohol and water.

A thief passes for a gentleman when stealing has made him rich.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade-Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

HAYNES'

Combined Book & Dictionary Holder.

DESIGNED FOR LITERARY WORKERS AND GENERAL FAMILY USE.

It rotates and holds securely at any desired height and angle, two or more open books of any size, thereby avoiding the necessity of holding the book or leaving your chair to consult your dictionary or book of reference. To the opposite sides of a revolving table twelve inches square, are attached two folding graduated shelves, each 12 x 16 inches, for holding the books. The space on top is available for closed books or a lighted lamp. Each shelf is provided with an elastic leaf holder. The shelves can be turned down upon the top and give a stand 16 x 19 inches, making a handy table for various uses. The whole rests on a substantial folding tripod.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure. at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

SAMPLES AND PRICES ON APPLICATION.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE WORLD BANK.

The cut illustrates a new toy money-bank, recently brought out by North Brothers, Philadelphia. The bank is made of iron, and finished in the best possible manner. The globe is covered with a very complete map of the world, finished in five colors. The base is finished in gold bronze, the name "World Bank" in raised letters being finished in carmine. In adopting this design the manufacturers have aimed to furnish a bank that should be both attractive and instructive, and believe that they have succeeded in doing so. The inlet for coin is so arranged as to render it impossible to shake the coin out when once deposited, as it is walled on all sides except one. To take the money out, the base and cap on the bottom of globe are unscrewed. This is a very attractive and useful little toy.

THE WORLD BANK.

NEW TYPE-WRITER.

An illustration is given of a new type-writer, which is said to be thoroughly reliable, practical and rapid in operation. Although especially designed for young people, it is said to be desirable alike for professional men, clergymen, business men, &c. It will print a page six inches wide, and make four copies at once. It is durable, compact, light and portable, and so simple that it can be operated without assistance by a child, with the same facility as an older person, and it is a comparatively rapid writer. Full directions accompany each machine.

Ink spots on floors may be removed by rubbing with sand wet in oil of vitriol and water; when the ink is removed rinse with pearl-ash water.

AUTOMATIC CHECK PUNCH.

The Automatic Check Punch illustrated is a very ingenious invention. Most people understand that a great deal of swindling is done by raising bank checks above their original denomination. Numerous plans and devices have been tried to prevent this species of fraud, but hitherto the skillful rogue has succeeded in manipulating the writing so as

NEW TYPE-WRITER.

to defy all check protectors. The Williams Automatic Check Punch is a machine designed to cut the figures out of the paper of a check, and thereby defy ingenuity to change the original order. The machine is in a compact form, convenient for placing on an office desk.

AUTOMATIC CHECK PUNCH.

It is about six inches high, the upper or rotating part being a miniature turret, resting upon a neat, square base. Around the inside walls of the turret are arranged a series of dies, working vertically, each having the impress of a figure or \$ sign upon its point, and opposite to this point, through a dial plate, is cut a corresponding letter, into which the die

fits. The figure or mark held by each punch is identified by an index plate on the top of the turret, so that the operator can see which mark he is making. The dies are operated by keys resembling those on a telegraph instrument. When a check or other paper is to be marked, it is placed on the base of the machine, where a cap holds it in position. Whatever figure the operator now desires to punch on the paper he selects by the appropriate key,

turns it round to the vertical slot in the front of the turret, and punches it down. The act of punching moves the paper automatically along, the machine acting so that an equal space shall be left between each of the marks, thus frustrating any attempt at inserting figures between them.

The cap on the machine-table holds a glass plate on top, which enables the operator to see how to place the check so as to have the figures cut on any desired part of its face. The feeding device consists of friction rollers let into the base of the machine. They are operated by a bow-

shaped lever that encircles the inside of the turret, and fits into a groove slotted on the side of each punch. This punch is controlled by the Automatic Bank Punch Company, 35 Temple Court.

IMITATION AMBER.

Of late an imitation of amber, which cannot be distinguished from the genuine article by inspection, has made its appearance on the market. It contains copal, camphor, turpentine, and other ingredients, becomes electric by friction, and is used for manufacturing mouth-pieces for pipes, cigar-holders, ornaments, &c. The composition may be

distinguished from genuine amber by its lower melting point, as it quickly softens and melts when laid on a hot plate, while amber requires a comparatively high heat, and further, by the action of ether, which softens the imitation until it may be scraped away with the finger-nail, while true amber is absolutely insoluble in cold ether.

PATENT SELF-OPENING AND CLOSING INKSTAND.

The illustration shows a tastefully designed cut-glass inkstand set in a metal base with a self-opening and closing attachment. The cover of the mouth of the stand, which forms a part of the self-opening and closing attachment, is balanced so that a penholder when placed in its proper place in the rack, closes the bottle, thus preventing any dirt or dust from coming in contact with the ink as well as preventing the ink from molding. When the pen is taken from the rack the cover flies up and when the pen is put in place again the cover closes over the mouth of the bottle, as before stated. Thus, when not in use, the inkstand is always closed and the moment the pen is taken from the rack the ink is accessible. It thereby saves time, and its perfect action, convenience, &c., are points which will bring it into favor, especially in business offices. The rack of the stand is metal, finished in various styles, such as verd-antique and gold, plain Florentine bronze. Florentine and gold bronze, &c.

NEW PERFORATING MACHINE.

The accompanying illustration shows a newly designed perforating machine suitable for perforating tin pans, shelf-paper, Bristol board, mottoes, oil-cloth, &c. It is especially adapted, however, to the perforation of metal, such as tin, steel, brass, &c., its heavy, compact frame, giving it extraordinary perforating power, as well as strength, firmness and durability. It is heavily back-geared, and can be used with rollers, or without, in case it is used for perforating tin pans or anything of that character. For perforating shelf-paper, oil-cloth, &c., it is made in smaller sizes. The machine is large enough to take in a blank sheet of tin before the pan is formed, It is also self-feeding, where it is required to feed metal or paper automatically or without the aid of an attendant. It has a capacity for perforating fifty gross of tin pans a day. its action being rapid and effective. A die making over 2,600 perforations, comes with the machine without extra charge, but a die with larger capacity can be had with it if desired. The machine weighs about four tons, and is well built. It can be used with hand, foot or steam-power.

Fashionable Stationery.

By CHAS. A. BURKHARDT.

FORMS USED IN ENGRAVING VISITING CARDS.

The Old English type has long since gone out of fashion, and the neat round-hand and angular script has taken its place entirely in the engraving of visiting cards and invitations.

Ladies' visiting cards are now made almost square size— $2\frac{1}{4} \times 3\frac{1}{2}$ inches. The engraving should be in the plainest script, without any flourishes, well cut and printed upon the best three-sheet white bristol-board. The card *Mr. & Mrs.* is now rarely used, excepting by newly-married couples, the size used being $2\frac{3}{8} \times 3\frac{3}{8}$ inches.

The card *Mrs.* is often engraved with the name of the daughter or daughters below it, if there be a daughter in society, and when the daughter visits with the mother. If there be more than one daughter, *Misses* is used.

Mrs. Oliver Martin.

Misses Martin.

The old style of *The Misses* is no longer considered in good taste, although still sometimes used.

Reception days are always engraved in the lower left-hand corner of the lady's card, and the address in the lower right-hand corner. The prefix of *Mrs.* or *Miss* should appear in every case.

During a young lady's first season in society her name is engraved beneath that of her mother; after the first season she has a separate card. If she is the eldest daughter her name reads simply

Miss Martin.

while the younger daughters use their Christian names, thus:

Miss Rosalind Martin.

the proper size being $2\frac{1}{4} \times 3\frac{3}{8}$ inches.

Gentlemen's cards now frequently follow the English custom of having the prefix of *Mr.* There is no established rule, however, as to this, as it is an entirely optional matter, to be governed by personal taste. The address, when used, appears in the lower right-hand corner of the card; names of clubs always in the lower left-hand corner. The first Christian name and surname engraved in full with the middle name in initial is generally, but not always, used. The letter should be of the plainest script, without any flourishes, and it should be printed upon a small oblong card of the best bristol board.

The favorite size being $1\frac{3}{4} \times 3\frac{1}{4}$ inches,

Children's cards are engraved in the very smallest script and printed upon a very small card, size $1\frac{5}{8} \times 2\frac{7}{8}$ and $1\frac{3}{8} \times 2\frac{5}{8}$ inches. The card of a young girl reads:

Miss Alice Brown.

that of a boy—

George Brown.

Or,

Master George Brown.

AFTERNOON RECEPTIONS.

The invitations to afternoon receptions are generally issued in the name of the lady of the house, and they are usually engraved in the lower left-hand corner of her visiting card.

Mrs. Charles G. Robinson.

*Thursday, January tenth,
tea at four o'clock. 150 Verona Avenue.*

Should she be assisted by a daughter or friend the name of such assistant is engraved below her own on the card.

For a series of receptions the card reads:

Mrs. Charles G. Robinson.

*Wednesdays in December,
from three until seven o'clock. 150 Verona Avenue.*

or,

*Tuesday, January fifth, and February tenth,
after three o'clock.*

Where a more formal reception is designed the cards used are larger and more nearly square. The wording may be the same, or the *At Home* form used, as preferred.

Mr. & Mrs. John Smith

At Home

*Wednesday, January tenth,
from three until seven o'clock.*

110 Madison Square.

These cards should be enclosed in two envelopes when sent by post; if delivered by messenger, but one enclosure is usually considered essential.

Three sizes of cards are used in reception invitations sizes $3\frac{1}{8} \times 4$, $3\frac{1}{4} \times 4\frac{1}{4}$ and $3\frac{3}{8} \times 4\frac{1}{2}$. The inside envelopes are plain wedding cut without bead and without gum.

DINNER INVITATIONS.

Dinner invitations are always given in the name of both the host and hostess, the following being the latest form:

Mr. & Mrs. William H. Jones

request the pleasure of

company at Dinner,

Thursday, January third,

at seven o'clock.

215 Madison Square.

or if given in honor of a special guest, the invitation appears thus:

Mr. & Mrs. William H. Jones

request the pleasure of

company at Dinner,

Thursday, Jan. third, at seven o'clock,

to meet

Mr. Oscar Wilde.

215 Madison Square.

Dinner invitations are printed upon cards instead of note sheets. Crests or Monograms are now rarely used on the envelopes or invitations. Names or addresses should never be abbreviated in engraving of any kind, al-

though initials can be used for Christian names. Dinner invitations are enclosed in two envelopes, the sizes of cards being the same as those used for formal afternoon receptions.

BALL INVITATIONS.

Ball invitations are issued in the name of the hostess only. The following form is correct:

Mrs. Charles A. Brown

requests the pleasure of your company

*Thursday evening, January tenth,
at ten o'clock.*

Dancing at eleven. 109 Franklin Place.

The sizes of cards used being the same as the preceding.

THE GERMAN.

Invitations to the German are issued the same as for an evening reception, an earlier hour being specified than for a ball:

Mr. and Mrs. John A. Brown

request the pleasure of your company

*Thursday evening, January tenth,
at nine o'clock.*

The German to begin at ten. 200 Verona Avenue.

EVENING RECEPTIONS.

In the invitations to evening receptions the same form is used as for the German. In the place of *The German to begin at ten*, the word *Music* or *Dancing* is sometimes used. The following forms are proper:

Mr. and Mrs. T. M. Clark

At Home

*Thursday evening, January tenth,
from eight until eleven o'clock.*

150 Madison Square.

*Mr. and Mrs. Frederick A. Steele,
request the pleasure of*

*company on Monday evening, Jan. ninth
from nine until twelve o'clock.*

150 University Square.

CHILDREN'S PARTIES.

Invitations for children's parties are engraved in very small script, and printed upon dainty square cards or note-paper, embellished with some fancy design. They read as follows:

Miss Helen Browning

requests the pleasure of your company

*Thursday evening, February tenth,
from four until ten o'clock.*

319 Lafayette Street.

Master William Taylor

*requests the pleasure of your company
on Christmas Day, December twenty-
fifth, from ten until five o'clock.*

319 Park Street.

BIRTHDAY PARTIES.

Invitations for birthday parties are engraved and printed on the usual invitation cards, the following forms being used :

Mr. Robert Hallett
requests the pleasure of your company
Tuesday evening, January ninth,
to celebrate his nineteenth Birthday.
150 Astor Avenue.

When the party is given by the parents the form should be :

Mr. and Mrs. F. H. Johnson
request the pleasure of your company
at the celebration of the
Twenty-first Birthday of their son
Thomas,
Tuesday evening, January ninth,
at eight o'clock.
108 Montgomery Place.

BIRTH ANNOUNCEMENTS.

In announcing the birth of a child, the child's name is engraved in very small script on a very small ordinary visiting card, with the date of the birth in the lower left-hand corner. These are usually enclosed in a single envelope and sent by mail.

CHRISTENING PARTIES.

Invitations to christenings are engraved and printed upon cards or note sheets, the following being the form generally used :

Mr. and Mrs. Edward Atkins
request the honor of your presence
at the
Christening ceremony of their daughter,
Tuesday, March eighth, at four o'clock.
100 Montague Court.

NEW YEAR RECEPTIONS.

Ladies who give formal receptions on New Year's Day, send engraved invitations to such of their gentlemen friends as they desire to have call. The invitations are engraved and printed on the usual invitation cards.

Mrs. Robert A. Hall,
Miss Julia Hall,
Miss Alice Lilly
At Home
January first, 1885.
1010 Washington Place.

Ladies who give a less formal reception have the words *January first* engraved or written in the lower left-hand corner of their visiting cards. When more than one lady receives, their visiting cards are enclosed in the same envelope.

Gentlemen who are unable to call on their lady friends send their visiting cards either by messenger or post.

WEDDING INVITATIONS.

Wedding invitations are engraved in the name of the bride's father and mother, or if

neither are living, in the name of her guardian or nearest relation. The following is the form used :

Mr. and Mrs. Frank R. Clark
request your presence
at the marriage of their daughter
Julia,
to
Mr. Robert Montague,
Thursday morning, April tenth,
at half-past ten o'clock.
St. Paul's Church.

If a reception is given, a separate card is enclosed :

Reception
from nine until twelve o'clock.
300 Tybalt Place.

An admission card to the ceremony reads :

Please present this card
at the Church,
Thursday, April tenth.

If the invitations are issued for a reception, the following is the form used :

Mr. and Mrs. Frank R. Clark
request your presence
at the
wedding reception of their daughter
Nellie
and
Mr. Martin Shafter,
Thursday morning, April tenth,
at nine o'clock.
10 Madison Place.

A separate card is usually enclosed giving the hour of the ceremony :

Marriage Ceremony
at half-past eight o'clock.

The following is one of the forms used for an invitation to a widow's wedding :

Your presence is requested
at the marriage of
Julia Robinson
to
Mr. William Steele,
Friday evening, June tenth,
at half-past eight o'clock.
15 Verona avenue.

When marriages take place during a season of family mourning, no reception is given or invitations issued. The wedding is then announced in the regular form, as below. (See Wedding Announcements.)

WEDDING ANNOUNCEMENTS.

The latest form for wedding announcements is as follows :

Mr. and Mrs. Adriano de Armado,
Married June tenth, 1884.
At Home
Thursdays in September.
19 Mercutio Street.

This is printed on the usual invitation card, the lady's maiden name being printed on the inside of the flap of the envelope in which the card is enclosed, with a line drawn through the centre, thus—

The regular form is the same, with the exception that the lady's maiden name is printed on a separate card, which is smaller than the announcement card, and the two cards are enclosed in the same envelope. The name in this case is not crossed. The new address of the married couple is used on the announcements.

The sizes of paper used for invitations are $3\frac{7}{8} \times 6\frac{1}{8}$, $4\frac{1}{4} \times 6\frac{3}{8}$ and $4\frac{1}{2} \times 7$, when folded. Monograms or crests are no longer used on invitations. The envelopes are plain, without stamp or head.

MARRIAGE ANNIVERSARIES.

Cards of wood, tin, &c., are no longer used, the invitations being issued on plain white cards, or note sheets, in neat script. The following forms are used :

Mr. & Mrs. Robert Franklin
request the pleasure of your presence
on Monday evening, June tenth,
at eight o'clock, to celebrate the twenty-fifth anniversary of their marriage.
10 Madison Place.

The words *No gifts* are often engraved in the lower left-hand corner of the invitation. Another form is :

1834—1884.

William Taylor. *Julia Jones.*
Mr. & Mrs. William Taylor
request the pleasure of
company on Monday evening,
April tenth, at eight o'clock.
300 Tybalt Place.

MOURNING STATIONERY.

The width of black borders used on visiting

cards and note-paper is a matter of taste which must be regulated by individual judgment.

MEMORIAL CARDS.

The sending of memorial cards is an English custom, and has not yet been adopted to any extent in this country. The following form is used, which, however, is subject to variation :

In Remembrance of

Frank R. Fielding,

who died June tenth, aged thirty years,

and was this day interred at

Rutland Cemetery.

June twelfth, 1884.

This is printed on the second page of an oblong folded card, with black border, the first page containing the words

In Memoriam

in heavy black lettering ; the third and sometimes the fourth page is devoted to a prayer, eulogy or poetical quotation. The cards are enclosed in mourning envelopes,

NOTE PAPER.

Among the late novelties in note paper which are popular for a season and then forgotten, may be mentioned the hem-stitched handkerchief in note-paper and correspondence cards ; the linen cloth paper in white, cream and light tints ; the queen's lace handkerchief ; the Pompeian. This last is a very natural representation of a decomposed parchment ; a sheet of parchment buried in the ashes and cinders of Pompeii for sixteen hundred years could not have a more ancient appearance. The new wallet-shape envelopes are also meeting with favor here ; they are very popular in England.

The fashionable paper, however, is the plain, unruled cream linen, either mill or plate finish, the favorite size for ladies being octavo, with the baronial envelope, in which the sheet folds once, and for gentlemen the commercial, which folds twice in a long envelope. Fancy stamped and illuminated papers are not as popular as they have been. Crests and initials are still used, the latest and most popular stamp, however, being the autograph initials, engraved in fac-simile of the lady's own handwriting. This is stamped across the top left-hand corner of the paper, the envelopes, as a rule, not being stamped. Sometimes this die is stamped on the envelopes also, running up the right-hand side of the flap.

Addresses and names of villas are now greatly used, these being stamped in the upper right-hand corner of the sheet, the envelopes not being stamped. Monograms, both cipher and fancy, still appear to some extent, and these are usually stamped in the top centre of the sheet, the envelopes not being stamped.

The favorite material used in stamping is bronze, copper, green, gold, silver and other colors. Monograms are often illuminated—stamped in bronze, and other colors filled in by hand.

SEALING-WAX.

Sealing-wax has again come in fashion, the fancy colors being preferred to the red. The

latest in this is the "Ecritoire," five sticks, assorted colors, being put up in a neat box, with seal-stamps of Old English initials, and two wax tapers ; an opening at one end of the box will hold the tapers when in use.

Another novelty is the imitation paper seals with initials. These are made in very close imitation of sealing-wax, the back being gummed. They are simply moistened and placed on the envelope.

WRITING TABLETS.

Writing tablets have become a very popular and staple article ; they are made in a variety of styles. The Tourist Writing Tablet is a wood frame handsomely covered with seal and antique leather, it will hold from one to fifty loose sheets of commercial note-paper, the top sheet being always on a level with the board, an excellent rest is afforded the hand in writing. The Combined Blotter Tablet is also a new invention, the base being a gilt-beveled card, a sheet of blotting-paper on the side answering the double purpose of a guide in writing and a blotter. The well-known M. & H. Tablets are out this season in a new dress, the covers are Lowell's steel-plate designs, and the tablets are fitted in handsome plush, imitation alligator and russia leather cases.

The Ever-Ready Desk Tablet is the most complete writing-desk and tablet combination ; although it takes only a space of five and a half by seven and a half inches, it comprises a writing tablet, blotter, calendar, engagement record, envelopes, penholder, pencil, inkstand and spaces for pens and stamps. It is tastefully made in seal, imitation alligator and the new Roman bronze leather.

FANCY GOODS.

Stamp boxes, in olive wood and leather, are made in a variety of fancy shapes, such as turtles, fish, shells, shoes, &c.

Pen-wipers are made of various material and in many original designs. The most unique being a little book bound in morocco and lettered on the side "Extracts from the pen of ———," the leaves are composed of chamois and cloth, and are intended to receive the extracts. This will make a dainty addition to a lady's writing-desk. The Bismarck Pen-wiper is another novelty, it is a metal pig with a representation of the head of Bismarck, the back is composed of bristles on which to wipe the pen. The Playing-Card Pen-wiper is the size of an ordinary playing-card, with the diamonds, clubs, &c., neatly cut, pasted and sewed on the base, the colors contrasting.

Twine boxes are made in leather and plush, with a top of heavy beveled glass and an opening on the side through which the twine passes, a small scissors is also attached to the side.

Inkstands are made in an endless variety of shapes and styles. A very choice and unique design being a brass stand, representing a lotus leaf, on which a frog is resting ; another quaint stand is an ancient battle-ax. A pretty inkstand is made of rustic silver bronze, holding two pieces of horn, in which are set the ink-wells.

Thermometers are made in many pretty shapes, one of the most dainty being set in a piece of real white birch ; some are made in

brass of fancy shapes, such as swords, keys and scissors, and mounted on a plush panel ; others are made of ivory wood, in imitation of elephants' tusks. These look so real that they may easily be mistaken for the genuine were it not for the weight.

Paper weights have not been overlooked and considerable ingenuity is displayed in the innumerable odd and curious designs. Grasshoppers, katydids, beetles, chickens, birds, crocodiles and frogs are handsomely made in bronze and brass. A frog exercising with dumb-bells is a very pretty weight.

Calendars.—The number of calendars increases each year. For the coming season the following, among many others, will compete for popular favor : Ruskin, Tennyson, Thackeray, Shakespeare, Emerson, Holmes, Longfellow, Whittier, Every-Day, Day Unto Day, Marion Harland, Household Calendar, and the Elite Engagement Calendar. This last is a most useful calendar especially adapted for ladies' use. The calendar is printed in red and black on a thin card, with blank spaces, on which to enter engagements for each day in the year. The cards are fitted in a handsome Russia frame, which can be hung up or stood on the table or desk as a reminder.

NOVELTIES.

The following are a few of the many new novelties :

The Carriage Companion is a small leather case with a handle ; it has compartments for ladies' and gentlemen's cards, and contains a mirror, erasable tablet, calling and address book.

The Hall Indicator is a small card handsomely made in calf with gilt tooling. By a simple movement of the disks on the side, it will indicate if a person be at home or not, and the exact minute may be given when expected back, no writing whatever being necessary.

A Pine Knot Writing Case contains a pencil, pen-holder, eraser and ruler. Very pretty hammered brass trays are made for sealing-wax.

Paper Knives are made in hammered and plain brass, and in the new ivory wood, plain and carved.

Perfume Bottles are made to represent champagne bottles in a tub of ice.

The Book Letter Case is a novel receptacle for letters. It is a case in the shape of two bound books, the backs being lettered "Unanswered Letters, Vol. I.," and "Answered Letters, Vol. II." The letters are dropped in an opening at the top of the box. It is intended to stand on a writing-desk.

Under an ancient Chinese dynasty, the beautiful translucency of the exquisitely thin ware produced was taken advantage of for a peculiar species of decoration, the art of which has been lost. On the pure vessel being filled with liquid, blue fishes and other animals became visible, which were absolutely imperceptible when it was empty. This effect was produced by inclosing the colored figures between two thin lamina of porcelain paste, and reducing the thickness of the outer side as much as possible before the glaze was applied.

C. B. COTTRELL & SONS,

Front-Delivery Two-Revolution Press.

THE above engraving represents our new **FRONT DELIVERY**. This is unquestionably the most important improvement in Printing Machinery that has been made in many years. It delivers the sheet printed side up in full view of the Pressman. No part of the printed matter being touched by anything, thus avoiding all possibility of smut, no matter what the quantity or quality of ink it may be found necessary to carry. In addition to this, it leaves the front and back of the Press free of access at all times; there being **NO FLY, STRINGS, TAPES OR OBSTRUCTIONS OF ANY KIND**, and as it lays the **PRINTED SHEETS** almost **AS STRAIGHT** as when they came from the mill, it will be admitted that the percentage of **WASTE** is **REDUCED** to the **MINIMUM**. It delivers the sheets at **FAST OR SLOW SPEEDS** equally well, it does not require to be set for different size sheets. This improvement is in operation in many of the leading Printing Offices of this country. We respectfully invite examination and criticism.

C. B. COTTRELL & SONS,

BLOTTER * TABLETS.

THE "ELITE."

DESCRIPTION.—The chief attraction of this Tablet is the Cover, on which is painted by one of New York's well known artists, an exquisite cluster of flowers, no two designs alike—giving each a character and originality totally different from anything in the market. The Cover, on which the painting is delineated, is a sheet of Whatman's heaviest paper, and any soiling from handling can be easily removed with a rubber. After the Cover, comes a sheet of fine velvet-faced blotting-paper; then the paper, which is of either 60 lb. Plated Cream, or No. 25 Bond—all unruled and cut so that it may be used for Folded Commercial or Congress Letter. The back is ornamented with handsome stamped leatherette in various elegant designs.

This Tablet we put in a neat box containing 80 square Commercial Envelopes of either of the papers mentioned, tied with appropriate shades of ribbon, to harmonize with the paintings on the covers.

These goods have received the highest commendations from the finest trade in the United States.

If you desire these goods order at once, as our supply will be very limited. **Prices upon application.**

— MANUFACTURED ONLY BY THE —

ACME STATIONERY AND PAPER COMPANY,

146, 148, 150 CENTRE STREET, NEW YORK.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. W. Appl, publisher of the *Enterprise*, Red Key, Ind., has sold out.

J. A. Chappel (agent), dealer in wall-paper, Ilion, N. Y., has sold out.

Sailsbury & Son, stationers, &c., Coburg, Ont., have assigned in trust.

Halley Brothers, booksellers, &c., Montreal, Que., have dissolved partnership.

F. Bromberg, toy dealer, &c., Mobile, Ala., has been burned out. Insured.

H. Kimball, of the firm of Bartlett & Kimball, bookbinders, San Francisco, Cal., is dead.

S. A. Noyes, publisher, Silver Plume, Col., has been burned out. Total loss, \$1,800; not insured.

A dissolution has taken place in the firm of Lathrop & White, dealers in wall-paper, &c., Atlanta, Ga.

J. M. Watts, bookseller and stationer, Silver Plume, Col., has been burned out. Insured for \$1,000.

The American Photograph and Copying Company, Harrisburg, Pa., has been closed up by the sheriff.

The United States Stenograph Company, St. Louis, Mo., has been incorporated with a capital stock of \$30,000.

Charles H. Litchman, treasurer of the *Statesman* Publishing Company, Marblehead, Mass., is a petitioner in insolvency.

T. E. & S. M. Richards, publishers, La Fayette, Ala., have dissolved partnership. S. M. Richards succeeds to the business.

An execution has been issued against J. W. Daughaday & Co., wholesale and retail dealers in printers' materials and manufacturers of printing presses, Philadelphia, Pa., to recover a judgment for \$4,000.

THE STATIONER has received the catalogue for 1884-85 of Samuel Carson & Co., publishers, booksellers, &c., San Francisco, Cal. It gives prices of all the latest publications, also stationery and specialties.

T. Thomas Fortune, editor of the New York *Globe*, went to Philadelphia on Wednesday of last week to speak at the dedication of a new colored church. He returned on the Friday afternoon following and found that the *Globe* office had undergone radical changes in his absence. The plant or mechanical part of the paper had been transferred to Houston street by George Parker, who was one of the first owners of the paper. The *Globe* will not appear this week. Mr. Fortune was seen at his house in Williamsburg, and stated the circumstance as follows: "About two months ago Mr. Parker sold his fourth interest to the Rev. Mr. Derrick, pastor of the Sullivan Street Church. I retained my fourth interest and controlled the other two. Mr. Derrick, without the knowledge of the rest of us, gave Mr. Parker a chattel mortgage for \$400, not on his fourth, but on the whole thing. Mr. Parker now forecloses. Of course, the action is irregular, but I shall not resist it. The type is old and would soon have to be replaced, and the plant is not worth fighting for. Moreover, I have contemplated for some time a change, which would leave me free to do as I wish. I have been too independent, and, of course, have made enemies. The *Globe* has had a weekly circulation of 7,500, and I shall probably retain its readers for a new paper, to be called, perhaps, *Fortune's Weekly*, of which I shall have absolute control. I have not decided whether to start it here or in Philadelphia."

G. E. Desbarato & Co., lithographers, Montreal, Que., have dissolved partnership. The Canada Bank-Note Engraving and Printing Company, Limited, has succeeded the firm.

The publication of the *Home Journal*, Gardiner, Me., has passed into the hands of E. W. Morrell, the former publishing firm, H. K. Morrell & Son having dissolved.

The Raymond Manufacturing Company, manufacturer of baby jumpers, Corry, Pa., has been burned out. Loss estimated at \$2,000; insured for \$800.

A new monthly paper, devoted to the interests of newsdealers and stationers, has appeared in this city. It is called the New York *Newsdealer*.

Finley & Heckman, publishers, Alamosa, Col., have sold out to Johnson & Blain.

J. E. Beers, stationer, &c., Danbury, Conn., has sold out to F. C. Smalley.

A. P. & A. F. Holbrook, printers, Newark, N. J., have assigned.

Rudolph Hermann, paper-stock dealer, Philadelphia, Pa., is dead.

Warner R. Butler has retired from the Eagle Printing Company, Newburyport, Mass.

A. C. Lowery, publisher of the *Clipper*, Kingston, N. M., has sold out to J. C. Curran.

Arnold & Gardner, manufacturers of sleds, &c., Corry, Pa., have been burned out. Loss small.

Charles L. Becker & Co. have bought out J. B. Shaffer & Co., booksellers and stationers, Ottawa, Kan.

The stock of the estate of Sailsbury & Son, stationers, &c., Coburg, Ont., is advertised for sale by tender.

J. B. Lippincott & Co., Philadelphia, Pa., have issued their illustrated holiday catalogue of new publications.

Thomas W. Saxton, of the firm of T. W. Saxton & Co., publishers of the *Repository*, Canton, Ohio, is dead.

Carhart, Wright & Co., printers, Chicago, Ill., have been closed by the sheriff on confessed judgment for \$3,236.

Bowdoin & Curtis, publishers of the *Scott Valley News*, Fort Jones, Cal., have been succeeded by Curtis & Marky.

An execution has been issued against the American Photographic and Copying Company, dealer in photographs, &c., Harrisburg, Pa.

The Armor Lithographing Company, Limited, Pittsburg, Pa., has dissolved, and has been succeeded by a new association under the same style.

W. H. Woodruff, bookseller, &c., Vicksburg, Miss., has admitted F. L. Whetstone to partnership, and the firm will do business under the style of Woodruff & Co.

A. C. Allen, stationer, &c., Northampton, Mass., has sold out to Henry W. Cleveland and Elliot E. Cleveland. The new firm will do business under the style of Cleveland Brothers.

The Kerner Stylographic Pen Company has been putting in a large amount of new machinery thus adding to its facilities for turning out its popular production. It reports business excellent, and that it is some three weeks behind its orders. There has been an unexpected demand for the Kerner pen lately. The company has recently secured a new patent,

covering the recent improvements made in the Kerner pen.

Rankin Brothers, stationers, &c., San Francisco, Cal., have sold out.

P. D. Jones, publisher of the *Sunday Dispatch*, Providence, R. I., is dead.

Farrand Pratt, dealer in wall-paper, East Worcester, N. Y., has sold out.

The *Herald Publishing Company*, Platts mouth, Neb., has confessed judgment.

Wardwell & Clark, paper manufacturers, Newton, Mass., have been damaged by fire.

Jones & McCauley, wholesale dealers in fancy goods at Philadelphia, have had execution issued against them on judgments for \$6,627.

Kidder & Willey, job printers and publishers of the *Week*, Orange, Mass., have dissolved partnership, C. E. Kidder continuing the business.

Wm. H. Woodcock, dealer in printers' supplies at No. 78 Murray street, made an assignment on Thursday, November 6, to Joseph A. Taylor. He has been reported hard pressed for money for some time past. He carried a fair stock of amateur goods and second-hand machinery. He began in 1878.

Two new juvenile books, entitled "Play" and "Nursery Rhymes," are issued by Marcus Ward & Co., Limited. "Nursery Rhymes" is filled with familiar nursery tales, interspersed with colored engravings and outlines for filling in with such colors as the juvenile taste may suggest. Both books are handsomely bound.

A peremptory sale of the stock of toys, fancy goods, &c., of Oscar Strasburger & Co. was begun on Tuesday at the store of the firm, Nos. 443 and 445 Broadway. The sale comprised 1,600 lots of goods, including a large line of glass and china. It was made by order of Albert Strasburger, committee for account of the estate of Oscar Strasburger & Co., and it is the closing out of the business.

A novel feature of the December number of the *Magazine of Art* will be the page contributed by Alice Havers and R. L. Stevenson, the former supplying a picture-setting to a verse by the latter. The page will be printed in color. In the same number will appear the commencement of a description of Hatfield House, the residence of the Marquess of Salisbury, fully illustrated, and a paper by Mrs. Fawcett on "The New Forest." An etching by R. W. Macbeth will form the frontispiece.

The Tower Manufacturing Company has just received a new line of fancy inlaid desks. Nos. 502 and 503 are cabinet-shaped, with partitions for holding paper. They open from the centre and the arrangement of partitions is entirely new and novel. No. 501 is of Regent pattern with fancy inlaid top, and No. 500 is the same style with plain top. There are also a large variety of square inlaid desks in 12 and 14-inch sizes; also a line of hand made walnut and rosewood desks in sizes of 10, 12 and 14 inches. All of these goods are of the firm's manufacture, and are guaranteed not to warp or crack. The firm also carries a line of imported desks.

R. Worthington's announcements for the fall and winter include a greater number of new books for children than he has ever before issued in a single season, and these comprise a great variety, in sizes, styles and prices. Indeed, it would be a very large family of children which could not find in the list half a dozen books for each, abundantly satisfying each individual taste and capacity. "Twilight Tales" is a large quarto volume of original stories, profusely illustrated with engravings and full-page colored plates. "Picturesque Tours in America" is brought out in more ample form, attractively illustrated. The "Chatterbox, Junior" is as attractive as ever. A quarto edition of "Andersen's Fairy Tales" is fully illustrated. "Æsop's Fables" has many fine full-page engravings, and each page of the text is embellished with minor illustrations. A new edition of "Grimm's Fairy Tales" is offered with fresh illustrations. "Clover Nook" is the pretty and therefore appropriate title of a square volume of illustrated original poems. Each poem has a pretty tail piece and a full-page engraving designed expressly for the text. Besides these, the volume is also brightened by a number of colored plates, and is enclosed in a tasteful cover resplendent with color. "Christmas Box," with its charming cover, its many pictures and its entertaining sketches and verses, will be a welcome gift to any child. In the list are "Peep Show," "Little Chatterbox," and "American Chatterbox," all in covers of new and unique designs. The new volume of "American Chatterbox" is especially pretty, both inside and out. The design of the cover is artistic. The book is admirably printed, and has a greater number of pages than previous editions. Besides its other attractions it has a number of beautiful full-page colored plates. "Chatterbox Hall" is a Kate Greenaway book. The colored cover is quite superb in its colors, but they are admirably blended so as not to offend correct taste. "Wonderful Kittens" is a book of original verses about cats and kittens, illustrated by colored plates and pretty engravings of all sizes. Other books of the same size and price are "Happy Hours," "Wonder Days," "Baby Chatterbox," "Buds and Blossoms," and half a dozen others, all made up of bright stories and verses, liberally illustrated, and bound in covers of new and unique designs. "Mother's Stories" is a delightful little volume of simple sketches and pretty pictures, printed on good paper, and attractively bound in new colored lithograph covers. "Baby Dear," "Children at Home," "Baby's Picture Primer," and "Little Prattler's Picture Book" are all in the same style, with plenty of engravings and reading of the most approved character for children.

C. B. Cottrell & Sons, 8 Spruce street, New York, are making a new front delivery two-revolution press which is one of the most beautiful mechanical achievements yet brought out. The sheet is carried directly from the cylinder to the front, and is delivered, printed side up, in full view of the pressman. No part of the printed matter is touched, there being no fly, strings, tapes or obstructions of any kind. This press is a model. The same

delivery is applied to the stop-cylinder press.

E. D. Christian, president of the Richmond Paper Manufacturing Company, Richmond, Va., manufacturer of the celebrated Climax blotting paper, is on a visit to the city and enjoying the hospitality of his numerous friends.

The schedules in the assignment of Edward J. Bermingham, publisher of medical books at 28 Union Square, to Charles L. Bermingham, which were filed on Wednesday, in the Court of Common Pleas, show liabilities, \$27,239.83; nominal assets, \$22,208.86, and actual assets, \$2,005.50.

Francis Lathrop, whose fame as a decorative painter is well known in connection with the Metropolitan Opera House and other public and private buildings, has made a handsome and striking design for the cover of *Cassell's Family Magazine*. The new cover will appear on the first number of the new volume for January, 1885, and will be ready December 12, 1884.

A novel but convenient device is known as the "Book Letter-case." It is designed for people of fashionable proclivities, and consists of a case in the shape of two bound books, the backs of which are lettered "Unanswered Letters, Vol. 1," and "Answered Letters, Vol. 2." The compartments are used as indicated by the titles, an opening at the top giving access to the box. This is the design of Chas. A. Burkhardt, and it is manufactured by G. P. Putnam's Sons, New York. The Burkhardt "Ever Ready" desk tablet is also meeting with a good demand.

A. & J. Wallach, whose advertisement appears on another page, are offering a very extensive line of staple and holiday goods, embracing real and imitation alligator pocket-books, hand-bags, imitation of sealskin hand-bags with muff attachments, also leather coin bags with patent coin traps, a line of fancy plush boxes, which the firm is closing out at very low prices; a large variety of imported scrap albums which are also being closed out; chess, dice and cribbage boards and boxes, also a fine line of glass goods. In addition to these goods the firm is offering a new thing in the shape of a skate-bag made of either canvas, oil-cloth or leather.

Will. F. Park, 57 Maiden lane, has now ready for 1885 a full and handsome line of advertising calendars. No. 1,190 is a 7x9 hanging card, which represents a schoolboy's slate, one end of which is broken out, a large bunch of bright roses and other flowers being stuck in the space, with a blank card attached on which the advertisement is to be printed. The monthly pad is the upper left-hand corner. No. 1,191 is an embossed design which is hard to describe. It has female figures and cupids on a large pedestal, in the centre of which is a monthly calendar pad printed in gilt letter. The design is on a heavy tint-board in rich colors, viz., bronze, gilt, olive, green, dark blue, making an elegant calendar. No. 1,192 comprises a set of four easel calendars (to stand on the desk, table or mantel), in size 4½x5½. The entire line consists of twenty-

two designs in color, embossed, and steel-plate work.

Jennings Brothers' paper mill, at Fairfield, Conn., was burned on November 10. Loss, \$8,000; insurance, \$4,000.

Among the out-of-town dealers in the city during the past week were Joseph Dunham, Jacksonville, Fla.; Otto Ulbrich, of Ulbrich & Kingsley, Buffalo, N. Y.

The Harvard fountain pen has now been before the trade for several months. The demand for it is said to be fully up to the expectations of its manufacturers. It is guaranteed to give satisfaction.

The Gendron Iron-Wheel Company, Toledo, Ohio, is receiving large orders for its new dump toy barrow for the holiday trade. The company invites inquiries for its catalogue and holiday discounts to the trade.

The National Publishing Company, Philadelphia, uses a clear white paper in all of its Bibles, even to the cheapest grades. The trade are invited to examine the paper and letter-press in the National's cheap Bibles.

It is often difficult for professional stenographers to find a pen that is sufficiently fine-pointed and of the requisite elasticity to answer this purpose. The pen No. 126, manufactured by the Esterbrook Pen Company, is said to meet this want. At any rate it is worthy of a trial. Its point is fine and smooth, and in every way it is excellently adapted to writing shorthand.

Among the new issues which have got to be known in the trade as "Fine Art Books" is "Seven Little Maids," published by R. Worthington. It is an original poem, or a series of poems, by Miss Lathbury, of much force and a fine and tender sentiment, which admirably fits it for this dainty style of publication. "Jack in the Pulpit" is printed and bound in the same dainty style as "Seven Little Maids." The text is a poem which was originally sent by the author to John G. Whittier for use in "Child Life," and which he added to and amended to its present shape. This is all explained in an autograph letter from the poet, a fac-simile of which is published as a sort of preface to the book. Longfellow's poem, "There Was a Little Girl," is published by R. Worthington, with illustrations by Bertha M. Shaeffer, consisting of elaborate initials and borders richly illuminated, and alternate pages of silhouettes. "Walk Into My Parlor" is another volume in the same style, in which the verses of the "Spider and the Fly" and what they suggest as regards human nature and human affairs are illustrated in attractive designs, printed in colors. These books all have handsome covers, with silk fringes.

The New York Stationery and Envelope Company, 62 John street, has just out an entire new line of fancy cabinets especially for holiday trade. Its Eagle Wax-Seal cabinet (just patented) contains paper, envelopes, seal, wax and candle complete. It is unique and is expected to command a large sale.

The firm of Grant, Barfoot & Co., lithographers, Toronto, Ont., whose failure was announced some days ago, has been granted an extension of time, and the business will go on.

Henry Levy & Son, owing to the extreme dullness of trade, offer the remainder of their imported stock at the lowest prices, thereby giving those who may desire anything in their line an opportunity that they may not get again soon.

Among the new advertisements which appear in THE STATIONER this week is that of George C. Greene, 90 Warren street. Mr. Greene keeps on hand a full line of artist's transfer papers, impression papers, type-writer papers, and all kinds of type-writer materials, such as ribbons, manifold papers, manifold books, &c. He has facilities for supplying these goods in any quantity at the lowest market prices.

I. M. Gaugengigl has attained eminence in his art through pictures, which have been seen in Boston and other cities for the past three years. Every fresh work from his brush makes more manifest the influence of foreign study. His choice of subject is most happy; he is thoroughly in sympathy not only with the subject he selects, but with the public to whom it appeals. For this reason, the fact that he is now engaged upon a painting in the form of a Christmas card, to be reproduced by L. Prang & Co., has an interest for all lovers of art. The demand by amateurs for floral studies is steadily increasing. Those by Mrs.

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

E. T. Fisher are admirably adapted for the purpose, from their fidelity to nature and the poetic spirit in which they are conceived. Among the more popular publications by this artist are recent studies of Zinnia and Marigold.

J. H. Bufford's Sons say that the demand for their goods is better now than at any time during the season since May. Their line of advertising cards, shape novelties, &c., has been well received by the trade everywhere. The firm has fifteen different designs in satin Christmas cards, which have attained a wide popularity since their introduction. It is the aim of J. H. Bufford's Sons to produce only the very best, and this they have ample facilities to do.

Joseph Koehler, 120 Chatham street, is offering a very extensive and varied line of New Year and Christmas cards of the latest designs. Mr. Koehler claims to be the originator of the New Year calling cards, and since their introduction, some twenty-four years ago, he has been constantly engaged in publishing and dealing in them. That he has kept up with the times in the matter of designs, prices, &c., is shown by his very attractive stock of not only calling cards but general Christmas and New Year novelties.

The Paper-Stock Disinfecting Company of New York city was incorporated on November 7. The incorporators are S. Webber Parker, Wm. P. Ward, and Henry Blackman, of New York, and Oliver L. Gardner, of Brooklyn. The objects of the association are the manufacture of machinery and apparatus for disinfecting purposes, and also carrying on the business of disinfecting houses, vessels and other receptacles, and also paper stock and other materials and fabrics. The capital stock of the company is \$500,000, divided into 5,000 shares of \$100 each.

The Columbian Diary is manufactured by Arthur Christy, 244 Main street, Buffalo, N. Y. This is a low-priced diary, which finds a good demand among consumers. It is limited to five years, and can be opened at any time, in the middle equally as well as the first of the year. As an article of convenience it will, therefore, commend itself to everybody. Mr. Christy makes both pocket diaries and diaries for desk use. They are well and substantially bound in attractive covers. The

trade are invited to send for price list and samples.

R. R. Watson, 51 Nassau street, is the patentee and controls the sale of the new postal balance, lately illustrated in THE STATIONER. Only "knife-edge bearings" are used in the construction of the scale, thus doing away with the "wire bearings" used in other scales, and giving, it is claimed, absolute accuracy in weight. The scale is well finished and presents an attractive appearance; the beam and sliding weight are finished in the full nickel plate. In order that the weight may be readily seen, no matter what the position of the scale, the figures are stamped on both sides, and also on the top of the beam. This is a handsome as well as useful article.

The Typothetæ held its regular meeting on November 6 at its new rooms, 19 Park place and 16 Murray street. The meeting was largely attended. This association of employing printers has a suite of three rooms at the location mentioned. Two of these rooms are reserved for the use of officers and members and the third will be devoted to the purposes of a labor exchange and bureau for employees. A library will be formed which will include books of reference and printing data, specimen books, art and trade journals, revised lists of labor prices and a bulletin of notes and queries. Donations to the library are invited, and members of the printers' craft in other cities are requested to send in specimens and books therefor. The labor exchange will be in charge of a competent superintendent.

Sanborns' extra heavy all-iron table shears are designed for cutting the thickest and hardest kind of boards used for large blank books, folio and quarto bibles, and similar work. They will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has a brass-measuring rule set in. A new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on the inside and underneath the top of the frames. This arrangement insures perfect accuracy in the working of the gauge, and the working parts being out of the way and covered, will not collect dirt. The gauge can be run out 20 inches. The pointer shows on the rule the

exact distance, in inches and fractions; the gauge is from the blades. By one clamp-screw on the top of the gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is expected to supersede all the shear gauges now in use. The all-iron table shears, regular, are lighter than the extra heavy. They are suited to all ordinary work in a bookbindery, and particularly adapted for job binders. Each machine is provided with the wheel front-gauge. These shears have taken very well with buyers. Geo. H. Sanborn & Sons, 69 Beekman street, are the manufacturers.

The trade are quite well aware that the old and well-known firm of Evans, Plummer & Co., manufacturers and importers of fine stationery and artistic specialties, at 57 Beekman street, New York, has recently been succeeded by Evans & Darling, who will carry on the business at the same place. This firm is offering a new line of specialties, including a very large assortment of New Year calling cards. The line embraces a variety of novel designs, such as plain embossed cards, cards embossed in gilt and silver bronze, plain beveled cards, with mounts, also with embossed panels; quite a large line of folders for New Year greetings, &c., neatly put up in envelopes; also twelve numbers of hand illuminated cards, with gold beveled edges and embossed designs; a line of special shapes, with New Year greetings; a line of beveled cards, mounted with scrap pictures; fringed cards; cards with metal ornaments; special shapes with satin stars and fringed edges, fringed cards with four embossed panels designed for four callers, "dude" cards, plush cards with butterfly ornamentation, palette cards (plain or with satin buttons and stars), chromo cards for party of three, etc. The firm also offers a line of calendars for both the holiday trade and advertising purposes; these are embossed and colored in gilt and silver bronze. One is a perpetual calendar representing a clock, the days of the month being on the dial plate, and the proper date being indicated by a hand. The name of the month is shown in the lower part of the clock where the extremity of the pendulum is supposed to be. Another design is called the fire-place calendar. They are both very tastefully and attractively gotten up.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 13, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

READERS OF THE STATIONER will find an unusual variety of interesting suggestion and information in this issue. If there is to be any holiday trade, our friends cannot make better preparation than by taking advantage of the offerings of our advertisers. Read every item.

THE Director-General of the World's Industrial and Cotton Centennial Exposition, at New Orleans, has announced that the opening day has been deferred until December 16, that applications for space may be made until November 25, and that exhibits will be received until December 10. The reason assigned for this change in the day of opening is that the President will be prevented from attending on December 1, because of the opening of the session of Congress on that day whereby he and the heads of departments, executive officers and members of Congress would be precluded from participating in the inauguration of the Exposition. This change is proper, as otherwise the ceremonies would be stripped of much of their interest and the official recognition so essential to the success of the Exhibition as an international affair would be wanting in an important particular.

WE find in the *Bulletin de l'Imprimerie* a late French consular report referring to the paper and stationery trade of Mexico. We learn from it that few French engravings are imported into the republic, and hardly any French paintings, German chromos superseding all pictures. Paper-teries chiefly come from France, England, the United States and Germany; common writing-paper from Belgium; white ornamental paper (papier de luxe) is preferably ordered from Austria. French news paper would be extensively consumed if French paper makers could be induced to lower the price somewhat. Stationery goods are chiefly bought from the United States and Germany. All kinds of books sell well in Mexico, the commonest as well as the most expensive, but in this line the United States furnish least, the bulk of the imports coming from France, Spain, Germany and Belgium. In all of the colleges there is an enormous consumption of French scientific and literary works; but in all elementary schools Spanish is taught exclusively. As, however, Paris makes a specialty of Spanish books, many of these are French reprints. Any good book translated from French into Spanish, especially if they bear on American and Mexican affairs and interests, have, and will have in the future, a great sale in Mexico. The report contains a good many useful hints, and if followed up by us, may be the means of increasing our

business relations with a country ready to adopt anything desirable that we produce if it can compete, in point of price, with similar products from Europe.

THE general business situation is outlined by reports from our correspondents. While it is indisputable that politics and their excitements subsequent to the election, have diverted attention from business, it is equally plain that where people have turned their backs on the distractions of election figures and their attendant circumstances, they have, at least, been able to do some business. What the outcome of politics may be, none can say; but as the decision is plain, it is the duty of all to make the best of it, no matter how grievous the disappointment. We are much concerned, however, as to the possibilities of the holiday trade. The telegraph advises the public daily of the shutting down of many large factories, the large reduction of the working force in others and a general pinching and contraction of expenditure which is to bear heaviest on the people who bear the burden of consumption. The very great and, perhaps, greater impending limitation of the purchasing power of the general public is certain to diminish trade. This is a consideration which needs the careful attention of every buyer, and the question as to how far the existing and prospective emergency from this source must fix its limitation in the procurement of supplies.

Roundabouts.

BY THE TRADE LOUNGER.

Excitement has about died out. A great deal of folly and eructation has been indulged in during the past week, and decent people have been getting sick of the thing. What we want most is steady attention to business, without disturbance. The trade, so far as I have seen them, only ask to have quiet and the chance to pick up the loose ends of business. It is time to be selling goods actively.

The market is well supplied with attractions. You will find these everywhere. There is getting to be quite a run on calendars and there seems to be an increasing demand for novelties, in this direction particularly, for advertising purposes. Some very neat things in this way are presented.

A new style of bookstand is of the pedestal pattern, with a table having a concave form, which seems to be an improvement over the flat-shape table. Its top can also be tilted to any desired angle.

Molded picture-frames are now made of a composition finished to resemble gold. They are said to be equal in appearance and

to be much lower in price than frames gilded with gold leaf. * * * *

A new mourning note-paper, instead of plain black edges, has a bordering in imitation of crape. The borders of the paper and envelopes are first embossed and subsequently black-edged. The borders are produced in the customary widths of middle, broad and extra broad, and have appropriate silver and black lettering on a gray ground. These papers are imported. * * * *

The retail trade seem to be impressed with the idea, evidently, that consumers demand a great deal for their money, judging from the slaughtering prices at which some of them are offering, especially holiday goods. An Eastern toy dealer offers sixty-one Christmas presents, together with a year's subscription to a popular magazine, all for fifty cents. * * * *

Books of hymns, songs and poems bound in elegant illuminated covers with fringed edges, which were very popular two years ago, are to be revived this season, if the attempts of certain dealers to push these goods are any indication of it. They are very pretty, and deserve a longer run. * * * *

The art of photography has taken another step in the line of progress, if the recent invention of a Southern man counts anything at all. The gentleman alluded to has devised a machine, worked by compressed air, for taking instantaneous photographs. By this machine a photograph may be taken in less than one-fifth of a second. A newspaper, in speaking of the invention, adds: "Those who have sat for half an hour with a cold iron brace jammed in the back of the neck, and with various other mechanical devices applied to other portions of the anatomy, in order to secure a graceful position, will appreciate the advantages of this invention." * * * *

As an instance of the depressing effect of politics on trade, one agent of a large concern in Baltimore, according to a Southern newspaper, says that he has lost the sale of at least \$30,000 worth of goods during the Presidential campaign. The same journal states that political excitement so turned the heads of tradesmen that whenever there was political speaking going on they closed their shops and, of course, for the time being business was suspended. * * * *

"The statement which a dealer made in THE STATIONER recently, to the effect that stylographic pens of American make are no longer sold in England because we could not compete with English manufacturers in the English market, is a little far-fetched," was a remark made a few days ago. "They do make cheap stylographs in England, to be sure," he continued, "and so far as cheapness goes I don't think we have any show; but they can't make the pens manufactured here for the reason that they are protected by patents. Now, all stylographic pens are not alike. There is a great deal of difference in the vari-

ous makes. The English consumer appreciates a good article when he sees it. He is not going to buy a thing simply because it is cheap. There are some stylographic pens in the English market which sell as low as one shilling, but a much better article sells readily for ten shillings, and in a great many instances it is of American make. That dealer who said there were very few American pens exported, I guess, jumped at his conclusions. We are sending a great many stylographs abroad." * * * *

A dealer was relating how the custom of using New Year calling cards originated. He said: "In 1861 I was working as an apprentice for Julius Bien & Co. On the approach of the holidays that season I made a few cards for my own use. I afterward made a few for some personal friends, at first without charge. The demand became so great for them, however, that I continued to make them. I made the cards in sheets and in the evenings cut them, put them up in packages, and at odd times took them from store to store and left them for sale. At that time I got fifty cents a dozen for plain cards. I allowed the dealer a percentage of 33½ per cent., and all he did not sell I took back. I next got the American News Company and other large concerns to take hold of them, which led to their speedy introduction in all parts of the country. Of course, during all this time I had brought out many novel designs so that the goods bore unmistakable evidence of my handiwork." * * * *

"Some people who use carbon papers," said a manufacturer of those goods, "have an idea that thick papers are better than thin ones, because they have more carbon on them and are, therefore, capable of receiving a greater number of impressions. This is a mistake. The carbon on good paper is in the fibre as well as on the surface, and, for this reason, a thin paper is better, because in its manufacture it absorbs the carbon more readily than a thick paper." * * * *

Some of the retail booksellers are protesting against the practice of many of the leading publishers in bringing out their best books in a cheap form. A leading bookseller, according to one of your contemporaries, alleges that publishers by so doing are doing themselves injustice and the trade is starved by the reduction in the volume of business. The publication referred to half coincides with what was said, and expresses the opinion that publishers would do better for themselves and the trade if they would put all books, not purely ephemeral novels, in cloth binding at reasonable prices. It believes that many people are anxious to buy books in good shape rather than pamphlets in poor shape. * * * *

An English firm has brought out a line of note-papers and envelopes made of pure wood and containing the water-mark "Pure Wood." An English stationery journal, in mentioning this production, says: "The novelty of a paper made entirely of wood may be turned to useful account by the retail stationer

in offering it to his customers, as to many of them the fact that paper can be made out of wood will have the interest of a new discovery."

* * * *

What may be called an improvement in papeteries has lately appeared in the English market. It contains, besides the usual quantity of note-paper and envelopes, various articles used by ladies to do fancy work, such as scissors, crochet-needle, &c., in addition to pen and pen-stalk, paper-knife and other similar articles, making a very convenient and desirable combination. The papeterie is an elegant case of antique leather, thus adding to its attractions.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 12, 1884. }

THE MONEY MARKET.—The financial situation has undergone no material change or developed new feature since the close of last week. Loanable funds have continued abundant, and Stock Exchange borrowers on call have supplied their wants readily at 1@2 per cent., and it is reported that as low as ¾ per cent. was accepted. Commercial paper quiet and steady, with prime indorsements readily salable at 5@6 per cent. discount. The stock market has ruled quiet and a shade firmer. The feeling is still unsettled, with fluctuations frequent; but the most active stocks left off a trifle higher. Railroad bonds were quiet and firm. Government bonds were steady and unchanged. Foreign exchange is again lower, the leading drawers of sterling bills having lowered their posted rates to 4.80@4.84½, but the demand has continued light and the market dull.

THE PAPER MARKET.—The uneasiness and excitement growing out of the uncertainty of the result of the election that prevailed last week is gradually disappearing, and greater attention is being devoted to business affairs generally. The demand for paper shows no noticeable improvement, and unless the manufacturers of book and writings agree to reduce their production, which it seems probable that they will do, they will find it difficult to sustain the market against a decline. As a general thing the advance made a month ago in fine writings and book papers is not sustained, and it is only exceptional that it is. Orders of any magnitude can be placed at the mills at about the figures which ruled prior to October 1. News was affected very slightly by the advance in writings and book, and as the consumption of late has been very large owing to the political campaign, this grade holds its own very well. Some idea can be formed of the large consumption of news by taking for example a carefully made estimate of the quantity used on Wednesday of last week, the day subsequent to election day, by the five leading papers of this city—the *Tribune*, *Times*, *Herald*, *World* and *Sun*—aggregating for that day fifty tons, which, at 6c. per pound, would cost \$6,000. This is said to be equal to the combined consumption of all of the daily papers in New York city for a whole week during the time of our civil war. If five of the papers in this city required fifty tons for one day, what must be the entire consumption of news? No positive change is reported in manillas, straw wrappings or other grades.

THE STATIONERY MARKET.—Although some dealers report a brisker business within the past few days, the reports of dealers generally do not indicate that the trade, as a whole, have experienced any improvement. However, most dealers are confident that business will undergo a very great improvement within the next few weeks, especially in the holiday trade. Many orders for holiday goods were placed in an early part of the season, but they came mostly from the large dealers and jobbers, and by no means represented the cream of the business. There is a large portion of the trade yet to hear from, and it is more than likely that those dealers who compose this portion will place their orders within the next two or three weeks if they mean to do any holiday trade this year. There was a good trade done in stationers' specialties during the early part of last month, but this is reported to have fallen off lately. In Christmas cards the demand is not very uniform. Some dealers report business better than it has been for some months past, others again report a decrease. There has been a slight rise in the price of envelopes, and business in this line is somewhat improved.

The following is a crimson stain that is frequently used for decorative woods for musical instruments: Ground Brazil wood one pound, water three quarts, cochineal half an ounce; boil the Brazil wood with water for an hour, strain, add the cochineal, boil gently for half an hour, when it will be fit for use. This is first applied, and then the varnish, consisting of rectified spirits of wine half a gallon, six ounces of gum sandarac, three ounces of gum mastic, and half a pint of turpentine varnish; put the above into a tin can by the stove, frequently shaking till well dissolved; strain, and keep for use. If it is harder than is wished, thin with more turpentine varnish.

Gold powder for gilding may be prepared by putting into an earthen mortar some gold leaf with a little honey or thick gum water and grinding the mixture till the gold is reduced to extremely minute particles. When this is done, a little warm water will wash out the honey or gum, leaving the gold behind.

To clean glass, bottles, decanters, &c., brightly, break a few raw egg shells in the article to be cleaned, with a little cold water—if greasy, warm water—and a little soda; shake well, rinse with plenty of cold water, and the objects will shine as nothing else will make them.

Black walnut sawdust, formerly thrown away, is now mixed with linseed gum and molded into heads and flower pieces for the ornamentation of furniture. When dried and varnished it is as handsome and much stronger and more durable than carved work.

A delicate glue for mounting ferns and seaweeds is made of five parts gum-arabic, three parts white sugar, two parts starch and a very little water. Boil until thick and white.

WORKS AT HARRISON SQUARE, MASS.

The Cyclostyle.

The cyclostyle is the latest device, and is claimed to be ahead of the other various processes for producing manifold copies. It preserves the characteristic of the handwriting, the copies being in black, so that a circular printed with this process has the appearance of a written letter. It is stated that the governments of the United Kingdom and other countries have approved and adopted this process for official and military work, in preference to others, as the ink is permanent. It is useful for producing copies of circulars, price lists, specifications, examination papers, manifests, way bills, daily returns, drawings, music, &c., as the process is simple, cleanly and economical, the material used not being as expensive as that required for other processes.

A sheet of cyclostyle paper is fixed in the cyclostyle frame. The circular or other matter is then written on this sheet of paper with a cyclostyle pen, which consists of an ordinary wooden holder, at the end of which is fixed on a pivot a minute wheel. This wheel revolves and turns in the direction of the writing and makes a perfect stencil. The copies produced are so perfect that the minute dots appear to the naked eye a continuous line. Immediately after the writing is finished the printing may (if desired) be begun as shown. Any paper may be used for printing on, but an unglazed dries more rapidly than a highly

The Autotype Process.

This beautiful and extremely useful process is very little understood—much less, indeed, than it ought to be, in the interests of art. The following particulars presuppose on the part of the reader an acquaintance with photography, autotype being a branch of that science.

Gelatine is whipped into a froth with warm water and sugar, skimmed, cooled, cut into blocks, and mixed with the pigments. To this

creamy fluid the sensitizing agent, bichromate of potash, is added, and the liquid is conveyed to a trough in the room with orange-colored curtains, where a traveling sheet of paper is surfaced with the compound.

The tissue with its coat of sensitive varnish is then dried, and a piece of the required size is exposed to the sun's rays in connection with

of similar material backed by a glass or metallic plate, so that the picture may be used as a printing surface. A mixture of gelatine, albumen, and bichromate of potash is made and filtered. A sheet of plate glass, about half an inch thick, is then leveled in a drying-box, warmed up to a temperature of 100° Fahr., and coated with the preparation.

In about two hours the first coating is dry. The second coating consists of gelatine, albumen and bichromates, with the addition of a small quantity of an alcoholic solution of resinous gums; to this is added a *souffron* of nitrate of silver, with a few drops of a solution containing an alkaline iodide. After washing out the excess of bichromate from the first coating, the second preparation is applied to the plate, which is again subjected to a high temperature in the drying-box, and becomes thoroughly dry and ready for use in two or three hours.

The tough "negative" film is then laid down upon the plate glass of the pressure-frame, and the plate, now completely coated with a sensitive surface, is laid upon it. The whole is exposed to the sunlight, and the progress of the printing can be easily ascertained by looking through the plate from the back. After exposure, the plates are well washed in cold water, rinsed thoroughly and allowed to dry. They are then ready for the press.

Subsequent operations depend upon two simple truths; first, that the gelatinous film will absorb water, and secondly, that any

THE CYCLOSTYLE MULTIPLYING COPYING APPARATUS.

glazed paper. Error can be rectified by simply rubbing the stencil with the thumb nail, when the holes will be found to close, and any other word or words can then be written in substitution. The original may be left for any length of time, and further copies taken when required. Copies can be obtained at the rate of 200 to 250 per hour. The cyclostyle is said to be equally suitable for obtaining 10, 50, 250 or 2,000 copies. It is patented in this country and in Europe. The advantages of this copying process are that there is no washing, no damping or melting, no copying-press or electricity, no chemicals, gelatine or aniline, and that there is therefore no fading or finger staining. For further information address the Cyclostyle Company, 152 Broadway, New York.

a collodion negative obtained in the ordinary manner. The required time having elapsed, the tissue is taken out of the case and plunged into cold water with its face downward on a plate of glass, metal, or another paper, coated with a light solution of gelatine and chrome alum. The surfaces having united, the whole is plunged in a bath of hot water, when the parts of the composition not hardened by the action of the light are dissolved, and the paper slips off, the tougher parts remaining attached to the plate, and successive rinsings remove the cloud of colored gelatine until the picture is free. This is the Swan process of carbon printing. The next step is to prepare the "plate" for the printing press. This consists in mounting the carbon print upon a substratum

greasy mixture of the nature of printers' ink, or any pigment prepared in like fashion, abhors the contact of water, and absolutely refuses to adhere to those portions of the plate which have absorbed that fluid. The success of the operation does not depend upon the relief of the plate, but on the faculty of gelatine for absorbing water, and then, as a matter of course, resisting the imposition of a fatty ink.—*British and Colonial Printer and Stationer.*

Sympathy, without active energy, may degenerate into weak sentimentalism; without intelligence it may produce much evil; without sense of responsibility and duty, it may be a mere self-indulgent impulse.

The Mutual News Company.

If all that is promised by the Mutual News Company, a corporation recently formed in this city, is carried out, a revolution will be brought about in the newspaper and periodical business which will be of great advantage to the retailer and profitable to the new corporation. The company named has already met with the friendly co-operation of over 10,000 newsdealers located in New York and other cities and towns throughout the country, and many of the leading publishers have also agreed to lend a helping hand toward making a success of the venture, by permitting the company to handle their publications.

Speaking of the aims and prospects of the new company, R. Johnson, manager of the newspaper and periodical department, said to a reporter of THE STATIONER: "We propose to increase the profits of the retailer by curtailing our own profits. We intend to allow the retailer a good living profit if we have to sell to him at net cost, whereas now the news companies have the biggest profit themselves, leaving the retailer the lowest possible margin. Moreover, we intend to put a uniform price on publications—that is, sell them to a newsdealer in San Francisco or Chicago as low as to a dealer in this city, the outside dealer, of course, paying the freight. We propose to make our company mutual by giving newsdealers an opportunity to become stockholders. Unlike other corporations of this character, we desire that the retailer shall, if anything, receive the biggest profit. It is right that he who handles a few publications of a kind each day receive a larger profit than we, who may handle 10,000 or 20,000 of the same publication daily. We can afford a less profit, because our business is much larger."

"Is there any prospect of the leading publishing houses favoring your project?" Mr. Johnson was asked.

"Oh, yes; we have only been established a short time, notwithstanding our business is sufficient to yield a 10 per cent. dividend on our capital stock. You see many of the large publishers rather prefer to do business with us for there has been considerable antagonism between them and the other news companies, who have attempted to dictate to them what price they shall sell their publications to the wholesaler. For many years the news companies threatened to boycott the publishers if they did not permit the former to monopolize the sale of the latter's publications and put on them such a wholesale price as the newsdealers should dictate. This state of things the publishers were compelled to submit to until they grew rich enough to reach the retailer direct by establishing their own agencies. We propose, on the contrary, to let the publishers dictate their own prices to us."

Mr. Johnson added that the new company would eventually add books and stationery to its stock, and in all respects duplicate the business of the large news companies at present in existence, and branches would be established in Canada.

If you would not fall into sin, do not sit by the door of temptation.

The NOVELTY Paper Fastener.

(Patented in Europe and America.)

Drives and Clinches a Staple or Suspension Ring at a Single Blow.

For Fastening Papers, Binding Books, Ringing Show Cards and Pamphlets, &c., &c., with 400 Steel Staples and 50 Steel Suspension Rings, boxed,

Sample by mail, all complete, Fifty Cents.

Staples, all sizes, 30 cents per 1000. Suspension Rings, 30 cents per Box of 500 Rings.

The Trade will be supplied, cash with order, at the following rates: Suspension Ring Paper Fastener (as above), per Gross, \$48.00 Steel Suspension Rings, per M, 36c. Novelty Staples, per M, 18c.

Strangers are referred for our standing to the Publisher of this Paper, to any of the Express Companies, or to Bradstreet's Mercantile Agency.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Just the
ARTICLE
WANTED;
Handy,
Durable
and Cheap.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

BROWN'S PERFECT FILE.

How to Photograph Paper Photographs.

In copying paper photographs the granular texture of the paper invariably injures the copy, making it appear to be covered with whitish dots.

A method practised by Mr. Denier, a Russian photographer, says the *British Journal of Photography*, enables one to obtain a perfect copy in which all granularity is avoided.

On copying the original it was illuminated with a strong side light, so as to minimize the grain as much as possible to begin with. The negative was made tolerably vigorous, and then slightly retouched. In printing (using a registering printing frame), when the impression had attained somewhat about half its proper depth, it was removed from the negative, and a couple of thin films of gelatine—such as those used in packeting confectionery—were placed upon it, one of those films being tinted a pale blue and the other colorless. The half printed sheet was next replaced over the gelatine sheets in exactly the same position as it previously occupied, and the printing continued until it was dark enough. By this method the details are printed first, while the second printing blurs and softens the picture and prints out the granularity. An ordinary printing-frame may be converted into a registering frame by placing a piece of sheet-glass in the front, and laying upon the negative, which must have one corner and two sides about against the interior sides of the frame. The other edges of the plate should be wedged between the sides of the frame. The negative being rigidly secured, the paper must be cut so that its top and one side at least shall form exactly a right angle. In replacing the paper in the frame, if care is taken that the two edges accurately fit the corner of the frame, it may be removed, the films inserted, and the paper again replaced, provided that the same edges strike the sides of the frame, without interfering with the result or overblurring the picture. Very soft and peculiar effects may be produced by this process.

Another method is to place the photograph in a strong side light, and in making half the time of exposure with the image exactly in focus on the ground glass, then capping the lens and moving the back of the camera slightly within the focal point, so that the image will be a little out of focus; then to expose one quarter of the time, recap the lens, and expose the last quarter with the rear of the camera slightly beyond the focal point. A negative will be produced in which all appearance of granularity is destroyed, and from which prints may be made direct without the necessity of double printing.

The International Inventions Exhibition.

The preliminary prospectus of the exhibition to be held next year at South Kensington shows that considerable space will be devoted to the paper-making, printing, and kindred trades, and it is expected that a thoroughly representative display of all the new processes in connection therewith will be made. This group (XXVI) will consist of:

CLASS 137.—Machines and processes for the manufacture of paper, pasteboard and papier-mâché. Materials; manufacture of "half-stuff"; washing, beating, and bleaching engines; agitators, strainers, molds; methods, &c., of glazing and planishing; methods of treating waste paper; appliances, &c., for treating and molding papier-mâché; manufacture of artificial parchment; recovery of waste products, and preventing the pollution of streams.

CLASS 138.—Machines, &c., for cutting, folding and ornamenting paper.—Stamping; embossing; envelope and bag making; manufacture of playing-cards; chromo-lithography; paper-box machines; marbling; perforating; ruling; waterproofing; enameling.

CLASS 139.—Paper-hangings.—Printing machines; apparatus for engraving printing rollers; materials; tests for injurious materials.

CLASS 140.—Letter-press and other printing.—Printing machines and presses; glazing and hot-pressing apparatus; apparatus, &c., for type-founding; lithographic machinery, materials, &c.; stereotyping apparatus, &c.; methods of anastatic; process block from autographic drawings; wood blocks; engraving machines; machines for cutting wood letter; type setting machines; numbering machines; printers' furniture and locking-up appliances; production of printing surfaces; methods of printing checks, banknotes, &c.

CLASS 141.—Bookbinding, manufacture of portfolios, &c., applications of papier-mâché.—Materials; book-binding machines, wire-stitching machines, cutting presses, rounding machines, backing machines, arming presses; account-books, desks, cases, &c., for stationery, &c.; purses.

CLASS 142.—Artists' implements and materials.—Pencils, brushes, colors and varnishes, easels, crayons, palettes, palette knives, drawing boards, drawing instruments, pencil sharpeners.

CLASS 143.—Writing materials and appliances.—Type-writers; manifold writers; copying presses and processes; processes for multiplying copies of MS.; pens, ink, penholders, inkstands, sealing-wax, stationery.

The exhibition will consist of two divisions, the first containing apparatus, appliances, processes or products, invented or brought into use since 1862, and the second examples of musical instruments of a date not earlier than the commencement of the present century. The second division will also comprise machinery, apparatus, and appliances connected with music, and, in addition, historical collections of musical instruments, and paintings and engravings representing musical subjects.

Recent Improvements in Photo-Mechanical Printing Methods.

Perhaps the most perfect mode of printing is from an incised or "cavity" plate, as by this method the most minute markings can be reproduced with a degree of perfection which is not attainable either in the case of lithography or typography; but what is perhaps of more importance is the circumstance that, by adjusting the depth of the cavities to the requirements of the subject, not only can the engraver of the plate determine which portions of the print shall be covered with ink, but he can also determine how much ink shall be devoted to each part of the subject. To put the case in another way, not only can the engraver plot out his subject in black and white, but, within certain limits, he can determine how black the lines shall be.

Intaglio plates, made by the aid of photography, have been produced in great perfection by several methods, but up to the present time there has not been a very large market for them, partly, perhaps, from the considerable expense attending the work of printing them. Intaglio plates are, even in the present day, generally printed from by hand, and this notwithstanding the fact that very excellent machines have been constructed for the purpose of plate-printing.

One may generally put it that any transfer method for the production of a lithographic surface may also be applied to the production of intaglio plates, it being merely necessary to make a transfer in which the whites and blacks are reversed to put this down upon a copper or steel plate, and to etch away the uncovered parts by suitable means.

It will be thus seen that by the Ives method and its modifications intaglio plates may readily be made; but there is but little inducement to do so, as such plates will not give much better impressions than the typographic or lithographic surfaces produced by similar methods, so that the great expense of printing from the intaglio plate steps in as a determining circumstance. There is, however, an exception in the case of printing surfaces to be used for pottery decoration. For this purpose intaglio plates are generally used, the method of printing being so rough and simple that the impressions cost about the same as prints from a type block. Hence, it happens that intaglio plates made by means of photography have a special value to the potter.

* * * * *

An extremely simple and expeditious method of engraving line subjects upon copper plates is the bichromated albumen, practised with much success by Gobert and others. A plate is covered with a film of bichromated albumen and exposed under a transparency, until the whole of the ground—that is, the part not covered by the lines of the transparency—is rendered insoluble. The plate is next washed with cold water, so as to remove the albumen from the lines, after which the etching is effected by an alcoholic solution of ferric chloride.

The following details will be sufficient to enable the method to be carried into practice.

One hundred cubic centimetres of albumen are mixed with a solution of two and a half grams of bichromate of ammonia in fifty cubic centimetres of water, and after having been well beaten, the mixture is filtered. A carefully-cleaned plate of copper is now coated with the mixture, and after the excess has been well drained off, the plate is dried at a very gentle heat, it being retained in a horizontal position meanwhile. The exposure required is by no means a long one, half a minute in moderate sunshine being sufficient in ordinary cases; but this must, of course, be learned by experience. Instead of developing (washing away the unaltered albumen) in plain water, it is better to use a weak solution of aniline red or magenta dye, as under these circumstances the ground becomes tinted and the progress of the development can be watched. When the plate has been dried, nothing now remains but to varnish the back and edges with an ordinary black varnish, such as the so-called Brunswick black, and to etch. The etching bath is made by dissolving one part of perchloride of iron in five of alcohol, and ten minutes is generally a sufficient time for etching to the required depth.

On the table are some early specimens illustrating the photo-engraving method of Mr. Woodbury—now so successfully carried into practice by Goupil & Co., of Paris. A gritty powder—crushed glass answers well—is incorporated with the gelatine used for making the Woodbury relief, and a leaden reverse being taken by pressure from the rough relief, the leaden reverse is reproduced by a twofold electrotyping. This reproduction of the leaden reverse is the printing plate.

The method which Major de La Nöe calls typogravure is in reality an intaglio process, but the printing is conducted as in the case of ordinary zincography. The details are as follows: A prepared zinc plate is coated with a film of sensitive bitumen by well known means, and exposure is made under a transparency or a tracing, so that when development is carried on with turpentine or benzole in the usual way, the lines alone are bare. The plate is now etched with dilute nitric acid (1 and 40) until a depth of about a 250th of an inch is reached, after which the plate is dried and once more coated with bitumen. The ground is now polished off with a stick of charcoal, leaving the bitumen in the lines; after which the plate is gummed and printed from by the usual zincographic method. This process is admirable for map work, although it is obviously inapplicable for the reproduction of subjects with widely extended blacks; and it has the advantage that the lines show no tendency to spread.

Before going any farther, you may with advantage look back at some of the older examples of photo-engraving in half tone. Here are some specimens done by Talbot's etching process, over twenty-five years ago, and they are admirable; while yonder is an example done by Mr. Dallas, in 1864, and issued with the *Photographic News* of that year. These examples of work done by Pretsch about twenty years ago are quite sufficient to prove that good work is not altogether a thing of to-

day. Among the newer methods, that of Klic deserves special mention; and this specimen, which was issued with the "Year Book of Photography for 1882," will serve to show you how perfectly this method can render the lighter or more delicate shades of a photograph. Messrs. Annan Brothers, of Glasgow, are working the process commercially in this country, and they have turned out some admirable plates. Klic has not published his method, but it is said to be an etching process, and the following details are given in a recent number of the *Photographic News*:

The process itself was a secret at first, but we are informed that the principle of working is as follows: A copper plate is dusted with powdered asphalt, and the plate is heated, so that the asphalt becomes nearly melted. A negative carbon print is now transferred on to the copper plate, and the plate, now covered with the negative in carbon, is etched, at first by a strong solution of perchloride of iron, which penetrates only the thinnest parts of the picture; then by a weaker solution of the same salt, the solution etching through the thicker parts. By employing more and more diluted solutions it is possible to etch through thicker and thicker layers of gelatine, so that only the high lights remain unetched.

On the table are some exquisitely fine plates made by A. and W. Dawson, the managers of the Typographic Etching Company, these being reproductions of subjects after nature, and of difficult drawings in wash.

Major Waterhouse has been remarkably successful during the past few years in making intaglio plates, and he has published the details of his method. The process is a modification of one introduced some time previously by Geymet, and it is based on the mechanical reticulation or breaking up of the Woodbury relief.

A Woodbury relief is developed upon a plate of silvered copper (but the relief need not be nearly so high as that required for the Woodbury process; in fact, an ordinary carbon print will answer), and when the relief is taken out of the developing water, it is dipped into a solution of potassium bichromate, drained and dusted over with fine sand; this sand having been previously waxed by being heated in an iron pot, and stirred up with a small proportion of wax. The layer of waxed sand is allowed to remain on the film until it is quite dry, when it is brushed off, leaving the gelatine granulated or pitted all over; the pits being deepest in the thick parts. The plate is now black-leaded, and a cast is made in the electrotype bath; this cast being the printing plate.

The specimens on the table will show you what excellent work can be done with this method, and you must remember that Major Waterhouse has not only published full working details, but he has demonstrated the process before several gentlemen interested in the matter; moreover, he has not patented the method.

Before you are some fine examples of the application of photo-engraving to pottery decoration, by F. S. Emery, of Burslem—and one photographic method which this gentleman adopts for the reproduction of pottery designs is of special interest. He coats a plate with sensitive bitumen, puts down upon this surface a transfer from the plate to be reproduced, and exposes to light until the

ground is insoluble. Development is now effected with the usual solvents—say, a mixture of turpentine and benzole; only those parts of the ground which were protected by the transfer dissolving. The etching is effected by perchloride of iron.

As regards collotype printing, the progress to be reported is principally as regards extension of work and some minor details; while as far as this country is concerned, the Autotype Company practically hold the thing in their own hands. Excellent as the specimens of foreign work may be which are placed before you to-night, you will find nothing better than the specimens shown by the Autotype Company. In Germany, the steam press is largely applied to the rapid production of collotypes, and before you are drawings of the machine collotype press constructed by Messrs. Schmiere, Werner & Stein; the most striking feature being the large number of rollers, used in order to ensure equal inking and damping. The transfer of collotypes to porcelain has been practised to a small extent, vitrifiable colors being dusted on afterward, but the results obtained have not been very satisfactory.

Collotyping in colors from several plates has been introduced to compete with chromolithography for fine work, but the only examples exhibited in this country are, I believe, some shown by Mr. Meyerstein, and a selection of which is now before you. * * * *
—Lecture by Thomas Bolas in *Journal of the Society of Arts*.

Gold varnish for metal or wood is made by taking two ounces gum sandarac, one ounce litharge of gold, and four ounces clarified linseed oil; boil in a glazed earthen vessel until they appear of a transparent yellow color.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST.

Pen-Rack Stand, No. 1.....per doz...	\$9.00	Japanese Finish, No. 3 per doz...	\$24.00	Extra Pads.....per doz...	\$3.60

A New Application of India-Rubber.*

If iron takes the lead among articles of modern industry in the extent and number of its applications, it yet falls short of india-rubber in their variety. This latter article, indeed, promises soon to attain a universal diffusion. Its industrial career, though little more than just begun, already outstrips that of most substances that were first in the field.

The mere enumeration of its qualities would suffice to account for the diversity of its applications. It possesses so great an elasticity that by this quality alone it adapts itself to a thousand different uses—brace-bands, garters, sides of boots, &c.

Observe how, if not the lightest, india-rubber is at least the most powerful reservoir of mechanical energy known. It lends itself most readily to the restitution, under the form of mechanical labor, of the energy imparted to it by tension, and this restitution may be effected with remarkable quickness. It is owing to the relative lightness of india-rubber considered as an accumulator of energy, and, above all, to its power, that the exactness of the principle of "heavier than air" may be demonstrated on a small scale.

From an electrical point of view, india-rubber acts as a better insulator than gutta-percha, and is, indeed, one of the best insulating bodies known. At the same time that its specific inductive capacity is weaker than that of gutta-percha, it does not become plastic at a moderate temperature. These properties render it an excellent insulator in electrical applications; submarine and subterranean telegraphy, electric light, transmission of force, &c. While it insulates better than gutta-percha, the conductor, where india-rubber is used, does not run the risk of being put out of centre, as is the case sometimes with gutta-percha.

India-rubber is known to oxidize under exposure to air and light; above all, under alternations of dryness and damp. By subjecting it, however, to a special operation called vulcanization, a product is obtained which maintains its flexibility at low temperatures, resists heat much better, does not oxidize in air, and absorbs less water. It is especially under the form of vulcanized india-rubber that its applications are numerous.

There is, finally, a third form of india-rubber no less useful, that of ebonite, or hardened india-rubber, a form which combines with its lightness and great electrical resistance the further advantage of resisting acids, and which is therefore exclusively employed when vessels for the electric pile or other reservoirs of a light and not readily brittle character are wanted. Like a new Proteus, india-rubber is thus seen to adjust itself to the ever more numerous and pressing demands of modern industry.

To turn now to the new, curious and original application an idea of which it is the object of

this notice to convey. The aim of the inventor, whose name, unfortunately, has not reached us, has been to take advantage of the great mutual adherence of a soft and a hard body. It is by the utilization of this relation that the inventor has originated quite a series of household objects in earthenware, porcelain, glass, &c., which manifest a remarkable adherence to the body supporting them, and this result he has obtained by the very simple expedient of securing to the lower part of all kinds of goblet objects (Fig. 2) a groove, A A, in the form of a swallow-tail, into which is

FIG. 1.—Position in which household utensils furnished with india-rubber may be placed without falling.

lugged a band of red india-rubber, a variety of vulcanized india-rubber, forming, when deposited, a kind of circular cushion. Objects furnished in this manner are almost incapable

FIG. 2.—Arrangement of the india-rubber covering in a swallow-tail groove, A A, provided at the base of the object.

of falling from their places. They may be placed on a wooden table, and the table be inclined (Fig. 1) from 45 to 50 or even 60 degrees without upsetting any of them. The most direct and immediate use offered by the properties which a vessel so provided with india-rubber thus acquires is evidently in the shipping service. At the Fisheries Exhibition of last year in London, and at the Health Exhibition of this year, the inventor has displayed a little bark, the bridge of which is entirely covered with dishes, plates, &c., all furnished in the manner described, and the bark, floating in a basin, may be tossed to and fro in every direction without displacing a single piece. All who have been on long voyages

at sea know the disagreeable and painful impression produced by the screen of cord laid along the table to prevent the glasses and bottles from falling.

As an accessory advantage possessed by the undisplaceable india-rubber dishes may be reckoned the less noise they occasion and the less risk of breaking they run on being clapped down carelessly or hastily on the table. Washhand basins and water-pots may likewise be advantageously constructed with the india-rubber band.

Invalids in bed, and compelled to eat from a board placed more or less horizontally across the bed, and children, so apt to upset glasses and bottles, will both find their advantage in the undisplaceable contrivance. We have thus a simple, ingenious and useful application of india-rubber which we thought it incumbent on us to place before our readers.

Carving Ivory and Bone.

All of the curiously-carved handles which are so fashionable, and the quainter that are sought after, are shaped upon a series of rapidly-revolving wheels, ranging from an eighth to three inches in diameter, and which are a cross between a file and a saw upon their cutting surface. Ivory and bone are carved in precisely the same manner, the only difference in the handling of the two being that bone has to be boiled a long while to free it from animal matter before it goes to the carver, while ivory is clean and pure from the start. When it is desired to produce any object in bone or ivory, an umbrella handle with a couched tiger upon it, for instance, the carver takes a piece of the material of suitable size,

and presses it against one of the wheels described above. At the point of contact it cuts with amazing rapidity. Soon the shapeless block begins to assume the rough outlines of the object intended. The lathe is then stopped, which requires but an instant, and another, probably a smaller wheel, is substituted. In this way a dozen wheels may be used before the final finish is given with a delicate disk, a little larger than a pin's head; but when the work leaves the deft fingers of the skillful worker, a perfect miniature of the royal native of the jungle is seen. The only remaining thing to be done is polishing, which is accomplished by means of canvas belts with pumice upon them; and, finally, by canton flannel belts or wheels.

Many people suppose that billiard-balls are turned by means of some exquisitely-adjusted machinery, in order to secure their spherical perfection. The exquisite machinery is the eye and hand of the artisan. The writer saw a gray-haired workman turn several billiard-balls, and the only tool he used was an ordinary turner's chisel. His eye was his gauge.

Japanese balloons of bright-colored paper, with the basket-car underneath of red and white wicker work, are hung under the chandelier or in bay windows.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Rulling Machine. The following will show some of its advantages:

- 1st.—It can be set to lap any sized head in half a minute.
- 2d.—It saves 50 per cent. in pen setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.
- 3d.—It will lap any size from half note to imperial.
- 4th.—The pens do not lift, but rule continually as in faint lining.
- 5th.—There are no cogs. 10,000 sizes can be had from one wheel.
- 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.
- 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch.
- 8th.—The lift and drop of the pens is just the same as in hand-work.

The Bankers' Lever Self-Inker.

A new endorsing stamp, especially constructed to meet the wants of banks and bankers has just been got out by the R. H. Smith Manufacturing Company, of Springfield, Mass. This stamp has received the highest commendations of the bank men who have thus far seen it. It is an adaptation of the principles used in the Lever Self-inking Stamp for counting-house use which was put upon the market by this firm last spring, and which has met with an immense sale, its principal difference being in the suspension of the working parts over the bed in such a manner as to allow the passage of a single check or a bundle

THE BANKERS' LEVER SELF-INKER.

of fifty or seventy-five checks, through it from front to back, and by bringing down the lever with thumb and finger a perfect imprint of the die may be quickly made crosswise of the check at any point with the least possible effort and without jar or noise. For rapid use a bundle of checks is placed in the stamp and the top one printed and removed as far as they can be picked up.

The self-inking arrangement is a very complete affair, ingeniously combining the inking cushion with an ink reservoir in such a manner that it holds an almost inexhaustible supply of ink. Another valuable feature is that several printing dies—either with or without changeable dates may be used in the same stamp, and on'y two or three seconds' time are required to exchange one for another. The stamp is also adopted to use the well-known interchangeable metal-bodied rubber type which is also manufactured by this firm, and with which any matter temporarily required can be set up and after using, distributed. As the stamp is a fine piece of mechanism strongly made, and has no wearing motion it must prove very durable.

Satin-wood stain is made by grinding raw sienna in water, adding dust of burned sienna, lowered with whiting and varnish.

The International Literary Association.

The following are the principal suggestions laid down by this society at its convention last month:

1. Authors placing themselves within the jurisdiction of the contracting countries will be afforded protection for their works, whether in print or manuscript, and will have all the advantages of the laws of the different nations embraced in the Union.
2. These privileges will be dependent upon the carrying out of the conditions and formalities prescribed by the legislation of the author's native country, or of the country in

music containing fragments from other composers, unless the consent of such composer be first obtained.

The head office of the International Literary and artistic Association will be established at Berne, in which town another Congress will assemble next year.

Magic Lanterns.

The magic lantern is one of the most effective and convenient articles for instructing and amusing, not only public gatherings and public school pupils, but the home circle. The perfection to which the magic lantern has been brought renders its operation always sat-

MAGIC LANTERN.

which he chooses to first publish his work, such country being, of course, one of those included in the convention.

3. These stipulations apply alike to editors and authors of literary works, as well as to works of art published or created in any country of the Union.

4. Authors within the jurisdiction of the Union will enjoy in all the countries the exclusive rights of translation of their works during a period of ten years after publication in any one country of the Union of an authorized translation.

5. It is proposed that it shall be made legal to publish extracts from works which have appeared in any country of the Union, provided that such publications are adapted for teaching or have a scientific character. The reciprocal publication of books composed of fragments of various authors will also be permitted. It will be an indispensable condition, however, that the source of such extracts shall at all times be acknowledged.

6. On the other hand, it will be unlawful to publish, without special permission of the holder of the copyright, any piece of music, in any collection of music used in musical academies.

7. The rights of protection accorded to musical works will prohibit arrangements of

isfactory, and the great reduction in its price brings it within the reach of all. The electro-radiant magic lanterns, manufactured by J. Bride & Co., 254 and 256 Canal street and 104 Elm street, New York, is a very excellent article. The body of the electro radiant is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The electro-radiant No. 2 projects on screen a picture eight feet in diameter. The No. 2 lantern is made entirely of metal. Including the smoke-stack, it stands over sixteen inches high when ready for use, but when taken apart, it goes into a box 11x9x12—small enough to carry in the hand. The removable parts are the base, the reflector, the lens tubes, the smoke-stack, and the lamp. The entire base being removable, allows the use of any kind of light, whether oil, gas, calcium, or electric. A large door at the side gives ample room for manipulating the light.

Chalk drawings may be fixed by drawing through weak solution of isinglass. When evenly and carefully wetted, hang up to dry.

— IMPORTANT NOTICE. —

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS.  Catalogues sent on application.

Answers to Correspondents.

W. E. J. wants to know when to find Coon & Graaf, said to be manufacturers of the Champion numbering machine.

Ans.—We don't know anything about the firm named, but can say that the Champion paging and numbering machine is made by W. E. Hoole, 48 Centre street, New York.

A. C. & Co. request address of manufacturer of Robbins' eyelet machine.

Ans.—Eyelet Tool Company, 40 Lincoln street, Boston.

D. Brothers ask for addresses of manufacturers of advertising cards, programmes, menus, &c.

Ans.—If you will carefully go over our directory to advertisers, which you will find in this issue, you will find the information sought.

S. H. & Co., who inquired for manufacturers of yellow copying paper are further informed that the Jersey City Paper Company, Cornelson avenue and Montgomery street, Jersey City, N. J., makes it.

Obituary.

WILLIAM C. PECKHAM.

William C. Peckham died at his residence in Brooklyn, N. Y., on Sunday, November 9. Mr. Peckham was widely known in the trade, having been for the past thirteen years traveling representative for the Dennison Manufacturing Company. He was taken sick about a week prior to his death, on his return from a trip to California and the South, where he contracted malarial fever. The disease assumed the typhoid form, causing death. Mr. Peckham was born at Newport, R. I., and was fifty-three years of age. He was a man who had a very large circle of friends and acquaintances, by whom he was highly respected and esteemed for his integrity, good habits and genial disposition. He was a member of the Commercial Travelers' Association of Syracuse. He was married and his wife survives him. The funeral will take place at Providence, R. I., on Thursday, 13th inst. (to-day), and the remains are to be interred at Newport, the birthplace of the deceased.

SPEZSHEIM LEVISON.

Spezsheim Levison, of the firm of Levison & Blythe, No. 213 and 215 North Third street, St. Louis, Mo., died on Friday, October 31, at St. Luke's Hospital, New York city. Mr. Levison was a highly-respected resident of St. Louis, where he had been in business a number of years. The immediate cause of death was a liver disease, from which Mr. Levison had suffered for many years and which confined him to bed during the greater part of the past year. Mr. Levison was born in Yorkshire, England, September 6, 1831, so that he was over fifty-three years of age at the time of his death. His father was Dr. Levison, a well-known practitioner in England and author of several medical works of established reputation. Mr. Levison left England in 1845 and settled in Philadelphia, where he remained several years engaged in various kinds of business. He then left and began a stationery importation business in New York,

remaining there three years. He removed to St. Louis in 1861, entering into copartnership with James E. Blythe, under the firm-name of Levison & Blythe. He retained his interest in the firm until the day of his death and was in very fair circumstances. His career while in St. Louis was that of a thorough business man. He had no desire to accept office and paid but little attention to politics. He was at the time of his decease a director of the Mercantile Library and one or two banks in St. Louis. Mr. Levison was unmarried and his only surviving relatives are three sisters residing in England. He was a member of no particular church, but usually worshipped at Dr. Messing's church, Twenty-first street and Olive. He was an exceedingly well-read and well-informed man, and withal charitable. He made a large number of friends in St. Louis and was honored by all with whom he came in contact for his strictly upright methods and for his great commercial probity. At his own wish his remains were taken to St. Louis and buried in Mount Olive Cemetery.

At a meeting of the stationers, lithographers, printers and paper dealers of St. Louis, called to take action on the death of Mr. Levison, held at the Mercantile Club, November 3, 1884, there were present: Messrs. Ennis, Compton, Sawyer, Buxton, Williams, Brewer, Murphy, McGowan, Chappell, Hildreth, Graham, Bright, Wittler, Blythe, Holmes, Talbot, Becker, Kauffman, Mack, Flaven, Ware, Studley, Barnard; Boland and Messrs. Pike and Giles, of New York.

Richard Ennis was made chairman, and Geo. D. Barnard, secretary.

The chairman pronounced an eloquent eulogy on the life and character of the deceased.

On motion, the following-named committee was appointed to draft suitable resolutions: Messrs. Holmes, Boland, Sawyer, Hildreth and Kauffman, who reported the following:

Whereas, Death has removed from our midst our co-laborer, Mr. Spezsheim Levison, who for the past twenty-two years has been prominently connected with the stationery and printing trade of St. Louis; it is hereby

Resolved, That we lose in the demise of Mr. Levison a worthy member of our business, whose loss will be long felt in this community; a gentleman of strict honor in all business relations, a broad and honorable competitor, who singularly elevated his calling by rare scholarly attainment added to practical ability and a keen appreciation of fair dealing among his fellow-men. His career as an upright and honorable man will, we hope, remain on record as a fitting example for younger members of our calling to follow.

Resolved, That we herewith tender to the bereaved members of his family in a distant land our heartfelt sympathy, and as a mark of our deep sorrow and respect attend the funeral in a body on Tuesday next.

On motion, it was

Resolved, That these resolutions be suitably engrossed and forwarded to his family; and that they be published in the St. Louis and New York papers.

Ormsby Phillips, one of the proprietors of the *Pittsburg Dispatch*, Pittsburg, Pa., died suddenly on Wednesday, 12th inst., of nervous prostration.

Daniel B. Cole, proprietor of the *Salem* (N. Y.) *Review*, and one of the oldest editors in that section of the State, died on Saturday, November 7. Mr. Cole was for fifteen years

editor of the *Salem Press*, and in 1877 founded the *Review*.

Copperplating on Zinc.

Take an organic salt of copper—for instance, a tartrate. Dissolve 126 grams sulphate of copper (blue vitriol) in two litres of water; also 227 grams tartrate of potash, and 286 grams crystallized carbonate of soda in two litres of water. On mixing the two solutions, a light bluish-green precipitate of tartrate of copper is formed. It is thrown on a linen filter, and afterward dissolved in half a litre of caustic soda solution of 16° B., when it is ready for use. The coating obtained from this solution is very pliable, smooth, coherent, with a fine surface, acquiring any desired thickness if left long enough in the bath. Other metals can also be employed for plating, in the form of tartrates. Instead of tartrates, phosphates, oxalates, citrates, acetates, and borates of metals can be used, so that it seems possible to entirely dispense with the use of cyanide baths.

New Method of Making Envelopes.

One of the most frequently recurring features of inventive skill is in the manufacture of envelopes, either in the preparation of the blanks or in the mechanism by which paper is transformed into perfected articles. New mechanical devices intended to facilitate and cheapen production or to overcome the patent claims of machines already in use are constantly being studied and presented in various forms. One of the most recent ideas in this line may be gathered from the following description taken in connection with the illustration given.

Referring to the figures, A represents a portion of a continuous web, at the longitudinal centre of which a straight, waving, curved or zigzag line of gum, B, of a width sufficient for two sealing-flaps, is applied. The web is subsequently severed on a similar line, as C, which determines the outline of the sealing-flaps *d* of the envelopes. The disposition of the gum-line and the line of severance may be varied, so as to produce various styles of sealing-flaps, and this either with or without waste of material along the lines—that is, with or without cutting out and separating portions along the line which do not form a part of the envelopes produced. In this instance only a single line of severance is shown, and this occurs substantially in the centre of the web and extends lengthwise thereon; but if desired, a web of sufficient width may be twice so severed to produce four blanks in its width, in which case a straight line of severance would be made to determine the lower edge of the back-forming portions *d*² of the blanks, and the gum and severance line may be arranged transversely on the web and alternately with straight lines of severance; but this leads to the waste of a half-blank

at each edge of the web on each transverse row of blanks produced. Such a disposition of these lines is illustrated by considering the top of Figure 1 as the leading end of a continuous web with transverse gum and severance lines B and C. The width of such web being considered as for three blanks, the waste appears as a half-blank in each row. From the bends or angles of the zigzag line the web is severed transversely to determine the edges of the side flaps, *d'*, of the blanks, and the portions *x* of the web are removed as waste material, on lines which determine the bottom edges of the side flaps, and the side edges of the back forming portions *d*² of the blanks.

In this instance a sealing flap is produced having a lip, *d*³, at its point, but this lip may be dispensed with. When the lip is formed the outline given to the adjacent blanks is such that those portions of the sealing and side flaps which in the web are adjacent to each other are concaved, as at *d*⁴, so that when sealed the envelope has a neat and finished appearance. It will be noticed that unlike ordinary machine-made envelopes the gum is so applied that it extends completely down the flap to the folding-line. At *y*, Fig. 1, the

also be made by this method; this applies to newspaper and other wrappers for mercantile purposes, paper boxes, bags, leaves of scrap-books and cigarette-papers. In all of these and many other articles the manner of applying and drying the sealing-gum are readily and advantageously applicable.

The mechanism for producing envelopes of this kind consists of rotary cutters, folding blades, pasting and drying mechanism, and other mechanical details for carrying out the principles involved. This method of making envelopes is the subject of a recently-granted patent.

Paper and Card Cutter.

The drawings given herewith illustrate the design of a new and improved machine for cutting paper, cards, cardboard, and other like material to any desired size.

Figure 1 is a longitudinal elevation of the cutter. Fig. 2 is an elevation of the same.

The top plate, A, of the table on which the paper is placed is supported at the ends by two leg-frames, B, suitably united and braced. Above the top plate A a clamping-bar, C, is held longitudinally, in the ends of which bar the upper ends of clamping-screws D are held, to turn which screws pass through fixed nuts E on the ends of the top plate, and which screws are provided at their lower ends with crank-handles D' for turning the screws. A longitudinal groove, *a*, is formed in each longitudinal edge of the clamping-bar, into which grooves *a* tongues *b* pass, which are formed on the lower end of a cutter head or block, F, resting on the upper surface of the clamp-bar and adapted to slide on the same; but the said cutter-head cannot be lifted from the clamp-bar. In upwardly-projecting lugs F' of the cutter-head a transverse shaft, G, is held, to turn on each end of which a handle, H, is rigidly mounted. At the bottom

transverse severance-lines are shown as stopping short of the edges of the blank. At the left of the figure the lines extend to the edges. The former modification is useful in feeding the blanks through a machine, while the latter modification may be employed by the use of proper feeding devices. The blanks thus produced, either by hand or machinery, may be folded upon the dotted lines shown to produce envelopes, paste or gum being applied to the side flaps.

It is apparent that where the sealing-flap is

PAPER AND CARD CUTTER.

to be provided with a wider or deeper gummed surface than that shown, the outer edges of the gum-line on the web need not conform so strictly to the outline of the flaps to be produced; hence a substantially central line of gum of suitable width would answer in such cases. It is also apparent that in the manufacture of cheap printed-matter envelopes, the sealing-gum not being used upon the closing-flaps, this method and means for applying the sealing-gum would not be required, and yet the method of thus producing blanks from a web would secure the rapid production of such envelopes. Any article having a closing-flap edge or edges provided with sealing-gum may

of one side of the clamp-bar a projecting guide-edge, J, is formed. An arm, K, projects downward from the shaft G, and to this arm the cutter-blade L is held by screws *d*, the inner surface of which blade rests against the side edge, J. A spiral spring, M, coiled around the shaft, has one end secured in the cutter-head, and the other end is fastened to the shaft, the spring turning the shaft in such a manner as to swing the cutter-blade upward as soon as the handles are released. Part of the top of the table is divided into small squares by longitudinal and transverse lines, to gauge the paper or cards to be cut.

The operation is as follows: The paper,

cardboard or other like material to be cut is placed on the top plate, and is held firmly on the same by means of the clamp-bar, which is pressed on the stack of paper by the clamp-screws. The knife-block is then at that end of the table at which the operator stands. The operator seizes the handles of the shaft and turns the shaft in such a manner as to swing the blade downward, and the cutter is pushed in the direction from the operator. The cutter-blade, sliding along the edge, cuts off that part of the paper, cardboard, &c., projecting beyond the said edge. As soon as the handles are released, the spring swings the blade upward, so that the cutter can be moved back again.

By means of the squares on the top plate, the stack of paper can be adjusted to be cut the desired size.

Kaleidoscopes.

"How do we make kaleidoscopes? Come with me and I will show you."

The thin-faced German, who enjoys a monopoly in the manufacture of kaleidoscopes, as far as Philadelphia is concerned, led the way to a small shop in a narrow down-town street and conducted his visitor to a back room on the second floor. At a long work-bench, extending the entire length of the shop, five girls sat at work. They were creating the supply of kaleidoscopes which is destined to meet the demand of the approaching holidays.

"This first young woman," says the manufacturer, "wraps the black paper about the system of glass reflectors which produce the optical delusion. These strips of glass when thus arranged and fastened together form the body of the kaleidoscope. The next girl simply inserts the united reflectors into the pasteboard cover and then passes the octagonal pasteboard tube to her neighbor. Number three adjusts the brass ring which secures the glass disks in the end. Between the disks or plates are placed the scraps of colored glass, the beads, and various trinkets that tumble about as the kaleidoscope is revolved, which, when reproduced by the mirrors lining the tube, form themselves into those ever-shifting and fantastic forms which are familiar to every child. The other young women are armed with hammers to break the colored glass into fragments, which they insert between the plates, and which are then made fast by the brass ring. The kaleidoscope is then complete. We obtain the colored glass from the waste scraps purchased very cheap at stained-glass manufactories."

"With his goods," said the Chestnut street toy dealer who furnishes the principal market for the thin-faced German's wares, "we can undersell the imported article and give a superior toy. He makes none that will retail for more than 75 cents. He can make six gross of them a day, and about twenty gross of the small 5-cent ones."

"The kaleidoscope is the most popular optical toy in the market," said Mr. McAllister, the optician. "But very few people know that it has any other use than as a mere plaything. It has been one of the most important mechanical instruments to aid designers. Indeed, Sir David Brewster, the inventor, claimed that all the useful arts would be improved by its more general use. The common kaleidoscope is simple in its construction; but those used by artists are generally more complicated. The finest are made in Providence, R. I. These sold at first for \$5, but now they retail for \$2.50."—*Philadelphia Times*.

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESIDENTIAL FAIR, the COUNTRY FAIR, the TEMPLE-ANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of reflector, Lenses, Tubes, Slide-rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of

all untried methods for LEARNING, G. AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World. SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. Our Descriptive CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'rs, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

THE AMERICAN STATIONER.

A strictly First-class Newspaper devoted to the Interests of Stationers, Booksellers and Fancy Goods Dealers.

EVERY THURSDAY, AT \$2.00 A YEAR.

HOWARD LOCKWOOD, Publisher, 126 & 128 Duane St., New York.

THE STATIONER contains every week **Special Trade Articles**; **Correspondence**, foreign and domestic; **Novelties**, including all new goods, with cuts illustrating the same; **New Patents** for the current week; **Trade Gossip**, giving a vast amount of information relative to what is occurring in the trade in all parts of the country; **Useful Hints**; **Imports and Exports** of Paper, Books, Stationery, &c.; **A Directory of First Hands** in all departments of the business; **Queries and Replies**; **A Detailed Market Review** every week; **Official Announcements** of the Stationers' Board of Trade; **Editorials** on current trade topics, and a great variety of valuable and interesting reading matter.

In addition to the great variety of matter above noted, **THE STATIONER** contains a very large collection of the advertisements of most of the leading **Manufacturers, Jobbers and Importers**, showing in great detail the different classes of goods required by the trade. These advertisements are, as a rule, handsomely illustrated, and in themselves form a very valuable **Guide to First Hands**.

THE STATIONER is printed on the finest book paper, in the best style of the art, and its size (9×12 inches) is such that it makes a very convenient Work of Reference, when bound in yearly volumes.

THE AMERICAN STATIONER is thus the **BEST** as well as the **CHEAPEST** publication of its kind in the English or any other language. **SAMPLE COPIES SENT FREE UPON APPLICATION.**

It will pay every Dealer and Manufacturer to read carefully what Subscribers say about
THE AMERICAN STATIONER.

The following expressions of opinion come from some of the subscribers to THE STATIONER.

I would not be without it for ten times the subscription price.—**GEO. A. SEARCY**, Tuscaloosa, Ala.

We regard **THE STATIONER** as a very efficient aid in our business.—**WILSON & WEBB**, Little Rock, Ark.

It has already been the means of reforming many evils and abuses which had crept into the stationery business.—**STRICKLAND & CO.**, Oakland, Cal.

Don't see how any one in the stationery world can keep up with the times without it.—**SUMNER WHITNEY & CO.**, San Francisco, Cal.

We have found **THE STATIONER** of great assistance in directing our attention to novelties and other goods in our line.—**DUTTON & WITHERTON**, San Francisco, Cal.

It stands in the same position to the trade that Webster's Unabridged does to the general public—a necessity.—**CHAS. F. KIMBALL**, San Francisco, Cal.

I consider **THE AMERICAN STATIONER** worth several times the amount of subscription paid for it.—**ALEX. W. H. & E. H. MAC EWEN**, Sacramento, Cal.

I deem it invaluable, and pick it up with ever increasing interest.—**W. G. M. STONE**, Boulder, Col.

We consider **THE STATIONER** indispensable to the trade.—**RICHARDS & CO.**, Denver, Col.

I consider it a very valuable "trade tool," and heartily congratulate you upon the success which has rendered it possible for you to furnish it weekly.—**C. R. COAN**, New Haven, Conn.

We value it in both editorial and advertising departments.—**M. SAFFORD & CO.**, Norwich, Conn.

I would not be without **THE AMERICAN STATIONER**, knowing now what I do of its value to dealers, were the subscription price \$10 per year.—**O. G. BECKWITH**, New London, Conn.

Best.—**C. A. BURNHAM**, Norwich, Conn.

We wish to express our gratification at the change of the visits of **THE STATIONER** from semi-monthly to weekly. We consider it one of the indispensables of our house. We would scarcely know how to get along without it, and without intending to speak in disparagement of its able editorial management, we find its advertising columns quite as valuable to us, if not more so, than any other department.—**JAMES & WEBB**, Wilmington, Del.

I have learned much from it that I did not know.—**C. C. PURSELL**, Washington, D. C.

A valuable feature of **THE STATIONER** is the reliability of its statements of matters of current interest to the trade, and a popular and reliable list of responsible houses.—**MILANS & WILKINS**, Washington, D. C.

It is worth, annually, fifty times the subscription to any stationer doing a good business.—**ALVORD, KELLOGG & CAMPBELL**, Jacksonville, Fla.

I could not do without it.—**T. A. BURKE**, Athens, Ga.

It is a very valuable assistant to me.—**W. J. CHAFFIN**, Columbus, Ga.

We regard **THE STATIONER** almost a necessity in the intelligent prosecution of our business.—**PHILLIPS & CREW**, Atlanta, Ga.

We find it to be a valuable paper.—**ELSA, MAY & CO.**, Atlanta, Ga.

THE AMERICAN STATIONER has been the best investment I ever made. I could not get along without it, and I have bought many a bill of goods from houses whom I never knew existed, only seeing their advertisement in **THE STATIONER**. Every manufacturer and retailer should advertise in it, and let us all know what they make and sell.—**W. H. WATSON**, Aurora, Ill.

There is no paper comes to us so eagerly sought after by all in our store as **THE AMERICAN STATIONER**.—**CAMERON, AMBERG & CO.**, Chicago, Ill.

We consider **THE STATIONER** one of the most valuable trade papers extant.—**A. ZEESE & CO.**, Chicago, Ill.

I consider it a great help to me.—**F. E. BELLAMY**, Kankakee, Ill.

I would not be without it.—**JAS. DALE**, Chicago, Ill.

It has become an indispensable.—**DAWSON & LAY**, Warsaw, Ill.

Think well of it, and the manner in which it has treated many reforms of importance to the trade.—**CULVER, PAGE, HOYNE & CO.**, Chicago, Ill.

A publication of great value to all parties in the trade.—**GEO. E. MARSHALL & CO.**, Chicago, Ill.

I prize it very highly.—**ALFRED L. SEWALL**, Chicago, Ill.

Its advertisements frequently introduce us to new and valuable correspondents in various branches of our business.—**JNO. R. NUNEMACHER**, New Albany, Ind.

We have found it to be of invaluable service to us.—**YOUNG & PORTER**, Indianapolis, Ind.

I consider **THE STATIONER** very useful, and now doubly welcome since the late change of issue to a weekly.—**T. MAHER**, Notre Dame, Ind.

It has saved me money on every purchase I have made since I have been a subscriber.—**NEWELL SANDERS**, Bloomington, Ind.

THE AMERICAN STATIONER is of great value to us. All jobbing stationery houses East should advertise with you.—**MORLEY & McCLEURE**, Logansport, Ind.

We would be lost without it.—**BUTTON & HAMILTON**, Terre Haute, Ind.

We like **THE STATIONER** much.—**GROSVENOR & HARGER**, Dubuque, Ia.

I expect to remain a subscriber as long as I am in business.—**M. A. SALISBURY**, Valparaiso, Ind.

It will be considered one of the indispensables hereafter. Put us down as life subscribers.—**MILLS & CO.**, Des Moines, Ia.

THE STATIONER gives me entire satisfaction.—**JOHN BERWALD**, Davenport, Ia.

We have got many times our money's worth from **THE STATIONER**.—**DAV, EGBERT & FIDLAR**, Davenport, Ia.

A successful exponent of the business interests in its department of trade.—**ALLIN, WILSON & SMITH**, Iowa City, Ia.

We know of no other class or trade journal that excels it.—**PARROT, GIRTON & SHERMAN**, Waterloo, Ia.

I consider it indispensable to any wide-awake stationer. I value it highly.—**SAM. C. WESTCOTT**, Keokuk, Ia.

Could not do without it.—**C. GILLMAN**, Newton, Ia.

Would feel adrift somewhat without it.—**MADISON FINCH**, Knoxville, Ia.

A good thing for the trade.—**I. D. FOX & CO.**, Emporia, Kan.

There is none better than **THE STATIONER**. It is well worth twice its subscription price.—**HENRY R. CAMINITZ**, Covington, Ky.

A valuable assistant to our business.—**BRADLEY & GILBERT**, Louisville, Ky.

THE AMERICAN STATIONER is held in high appreciation by the trade of this city.—**A. W. HYATT**, New Orleans, La.

The man in our line who don't take and attentively read **THE STATIONER** will soon find himself so far behind the times that "the fast mail train" won't help him to catch up.—**A. H. NELSON**, New Orleans, La.

Is a first-class medium to reach the trade.—**JOHN-SON ARMSTRONG**, New Orleans, La.

As a journal of ready reference it has no equal.—**JAMES BUCKLEY**, New Orleans, La.

An excellent paper, and of great and growing value to the trade generally.—**T. FITZWILLIAM & CO.**, New Orleans, La.

Of inestimable value to me, and think no first-class stationer or bookseller should be without it.—**J. S. RIVERS**, New Orleans, La.

An invaluable companion to every stationer. We should consider ourselves "blind in our business" without its valuable aid.—**DRESSER, McLELLAN & CO.**, Portland, Me.

Indispensable to all in the stationery and fancy goods trade.—**M. H. ANDREWS**, Bangor, Me.

We find **THE STATIONER** far ahead of any journal or magazine either in this country or on the other side, of its character. Yes, sir, **THE STATIONER** is a prize; and as a great success I trust it may prove a treasure to you as it is a blessing to the trade.—**DAVID W. GLASS**, Baltimore, Md.

Every stationer in the country who consults his own interest should have it.—**T. NEWTON KURTZ**, Baltimore, Md.

Indispensable in our house.—**WM. J. C. DULANY & CO.**, Baltimore, Md.

It is a live journal and well up to the wants of the trade.—**M. W. WOLF & CO.**, Baltimore, Md.

It is a well-edited paper, lively, interesting, and full of valuable information to every one who takes an interest in the pursuits to which the stationers and booksellers cater. In token of our appreciation we inclose an advertisement, which please insert according to directions.—**L. PRANG & CO.**, Boston, Mass.

Any person would make a most serious mistake by undertaking to economize and do without **THE STATIONER**, even in these hard times.—**BERKSHIRE VALLEY PAPER CO.**, Pittsfield, Mass.

It is at times invaluable to me, and I find it especially useful when I am puzzled about the proper place to which I can send for an unusual article in the trade.—**W. E. RICE**, Lawrence, Mass.

Don't see how any one engaged in the paper trade can do without it.—**SPRINGFIELD ENVELOPE CO.**, Springfield, Mass.

it takes at least four hours out of every month to read thoroughly your paper. It is time we can ill afford to spare, but it is absolutely necessary if we wish to keep posted in the stationery business. This is written not as a puff, but as giving the actual state of the case.—WARD & GAY, Boston, Mass.

To be without it now would be like a boy attending school without any text books.—EDWIN DEWS, New Bedford, Mass.

We think it a good thing for the trade.—AARON R. GAV & Co., Boston, Mass.

I consider it a valuable aid in my business.—JAMES D. GILL, Springfield, Mass.

It is newsy, and by it one can keep well posted on the trade it represents.—G. HENRY WHITCOMB & Co., Worcester, Mass.

It fills the place exactly. Must have it.—PUTNAM & DAVIS, Worcester, Mass.

I gladly send you \$5 for THE STATIONER, and advise all to do likewise, if they wish to keep up with the times.—J. J. ESTES, Rockland, Mass.

The most valuable publication of the kind issued.—H. K. W. HALL, Boston, Mass.

I am only surprised that you furnish so good a journal at so low a price.—H. M. HINSOILL, Grand Rapids, Mich.

I consider THE STATIONER of great value to the trade.—CHAS. HUMPHREY, Adrian, Mich.

We find it a very valuable aid in selecting new goods, and keeping "up to the times."—EATON, LYON & Co., Grand Rapids, Mich.

We keep it on file in our office for reference.—RICHMOND, BACKUS & Co., Detroit, Mich.

I think you made a good change when you made it a weekly. Would not be without it for twice the cost.—C. H. GASTON, Detroit, Mich.

Absolutely necessary to any one in the trade.—SHAKESPEARE & ROUNDS, Kalamazoo, Mich.

We think it a valuable publication to the trade.—L. A. SHERMAN & Co., Port Huron, Mich.

Put us down for a continual subscriber and "draw at sight."—WHITE, STONE & Co., St. Paul, Minn.

Six months' trial will convince any one of its value.—MUNGER, VIESSELMAN & Co., Fairmont, Minn.

We cannot do without it.—DUDLEY & Co., Minneapolis, Minn.

We like it very much and consult it with advantage.—GASLIN, WALES & CHUTE.

The most welcome visitor of all the trade periodical literature we receive.—H. T. WRIGHT, Kansas City, Mo.

I would not be without it for \$25 a year.—S. B. KIRTLLEY, Columbia, Mo.

It keeps the trade generally informed in regard to stationers' goods.—J. H. LLOYD, Liberty, Mo.

Would not willingly be without it.—WOOLWORTH & COLT, St. Joseph, Mo.

Each issue is gladly welcomed, thoroughly examined, and highly appreciated by H. H. SHEPARD, Kansas City, Mo.

We always read every number through.—VAN BEEK, BARNARD & TINSLEY, St. Louis, Mo.

Couldn't well do without it.—BROWN BROS., Sedalia, Mo.

I like THE STATIONER very much.—J. W. PATTON, Moscow, Mo.

I am glad that its visits now are weekly. A few weeks ago one number saved me \$6. I shall subscribe for it as long as I am an American Stationer myself.—C. L. HILL, Columbus, Neb.

Am glad you get it out weekly.—AL. G. EBERHART, Omaha, Neb.

The most valuable trade publication in existence.—THE OMAHA BOOK Co., Omaha, Neb.

I think no bookseller or stationer can afford to be without it.—O. A. TOWNE, Franklin Falls, N. H.

We often refer to it and value it highly.—S. M. MORSE & Co., Nashua, N. H.

Consider it a valuable medium of communication between members of the trade.—R. S. BRITTAIN, Phillipsburg, N. J.

Its advertising columns we value as a directory to the trade.—INSLEY BROTHERS, Jersey City, N. J.

THE AMERICAN STATIONER has been of great service to us and to the trade generally.—THE DIXON CRUCIBLE Co., Jersey City, N. J.

I consider it the "Stationers' Vade Mecum," and it surely should receive the support of the whole trade. Coming as it does every week, brimful of information, were we suddenly deprived of it we would feel as though—as though—as though—we were about to be sold out, and in consequence might do some rash act, such as suicide or marriage.—DAVID W. JAGGER, Newburg, N. Y.

Let every live bookseller and stationer subscribe, and, after reading it himself, place it into the hands of his clerks, that they may all the more understand their business and work to the interest of their employers.—PETER PAUL & BRO., Buffalo, N. Y.

As an advertising medium for the stationery trade none can excel it. I have seen THE STATIONER in Boston and San Francisco, and found that all refer to it as a kind of authority.—ARTHUR BOTT, Superintendent of Allston Adams, Albany, N. Y.

I consider it invaluable to myself.—S. H. LE ROY, Poughkeepsie, N. Y.

We like THE STATIONER very much, and find many valuable suggestions in the same; also the advertising departments are exceedingly convenient for those that wish to deal with manufacturers direct.—R. G. WYNKOOP & Co., Syracuse, N. Y.

I consider THE STATIONER one of the best trade publications extant, and invaluable to any stationer who expects to keep up with the age. Congratulating you upon your success in the change to a weekly.—E. L. AKEHURST, Utica, N. Y.

We receive each number with pleasure.—STEELE & AVERY, Rochester, N. Y.

It is always bright and newsy, and contains just the information we need.—W. W. WATKINS, Cazenovia, N. Y.

No bookseller should be without it.—GEO. W. GREEN, Jr., Newburg, N. Y.

Its value is inestimable to the trade.—JENKINS & JOHNSTON, Albany, N. Y.

Indispensable to everybody in the trade, both in Europe and America.—W. W. SWAYNE, Brooklyn, L. I.

THE STATIONER has proved a welcome visitor ever since the first issue found its way to our desk.—WILLIAMSON & HIGBIE, Rochester, N. Y.

We are much pleased with THE AMERICAN STATIONER, and should not want to be without it.—GEO. L. STRATTON & Co., Rochester, N. Y.

THE AMERICAN STATIONER is a welcome visitor and friend to—T. H. BUTLER, Buffalo, N. Y.

We heartily indorse all the good things which have been said of it, and wonder if there is a stationer without it. If there is, he's behind the times and doesn't know what's good.—A. H. POUNDSFORD & Co., Cincinnati, O.

THE AMERICAN STATIONER is the only journal that I ever saw which really covered the ground for which it is intended.—J. H. GUTHRIE, Conneaut, O.

When your journal reaches us we generally peruse it before we do our daily paper.—SCHNEIDER & SON, Columbus, O.

The trade can never hope to have any force as a trade unless it maintains a trade paper and makes it a good one.—BEELER & CURRY, Cincinnati, O.

I cannot do without it very well. I hope that you will continue to battle "short counts in blank books and other goods."—W. N. PORTER, Warren, O.

It gives me pleasure to say that I consider your paper of very great value to every person in the trade.—C. F. B. ADLEY, Cincinnati, O.

It has been of very great service to me. You can count on my subscription as long as I sell stationery.—C. E. GLINES, Marietta, O.

We have more than saved the price of subscription by having the price current of goods that is published in it.—L. N. OLDS & SONS, Circleville, O.

We believe it can justly be styled the "General Commanding" of the grand army of stationers.—S. A. GRANT & Co., Cincinnati, O.

We know of nothing published that is of so much value to a stationer as your paper.—McCLELLAN & Co., Wooster, O.

We deem it invaluable to every stationer.—MOUNT & CARROLL, Cleveland, O.

A most useful journal of information, indispensable to stationers and the paper trade in general.—STEPHEN E. BROOKS, Cleveland, O.

Very useful in keeping us informed as to all the novelties being brought out.—T. J. BROWN, EAGER & Co., Toledo, O.

An invaluable assistant to the retail trade, and would not be without it for ten times the price of subscription.—TUTHILL & Co., Lancaster, O.

Information gained in the first copy received doubly paid a year's subscription.—A. P. TAYLOR, Newark, O.

It keeps up with the times.—J. H. SAMPSON, Columbus, O.

An extremely valuable trade journal, both interesting and useful.—COBB, ANDREWS & Co., Cleveland, O.

It not only keeps the dealer posted in the many changes in value of goods, but gives him a general insight as to the trade throughout the country.—J. H. FULMER, Oil City, Pa.

THE STATIONER keeps me posted up in a great many useful hints not to be obtained by any other means.—JAMES ARNOLD, Philadelphia, Pa.

THE AMERICAN STATIONER is indispensable to me, and, like good wine, becomes better by age. Your recent improvements, such as the weekly, in lieu of the semi-monthly issue, reading matter, &c., are capital, and must be appreciated by your customers.—H. C. ORTH, Harrisburg, Pa.

A glance at your paper shows it is ably conducted. We are satisfied it should be in the hands of every buyer.—W. G. JOHNSTON & Co., Pittsburg, Pa.

We find it indispensable in our business, and trust it finds a hearty support from the trade.—JAMES B. DODGE & Bro., Pittsburg, Pa.

I would not be without it for double the price. Always consider me a life-long subscriber.—GEO. W. BACKOFEN, Pittsburg, Pa.

We highly prize THE STATIONER, and look forward to its receipt with much interest.—LOUIS DREKA, Philadelphia, Pa.

Alive to all the interests of the branch of business which it represents.—CHARLES SANDS, Philadelphia, Pa.

The trade cannot afford to lose it.—W. O. HICKOK, Harrisburg, Pa.

Indeed it is worth many times its price to every stationer doing even a small amount of business.—J. H. SMITH & SON, Franklin, Pa.

We would not be without it.—ORMSTON & HOSEY, Oil City, Pa.

It keeps us posted, is read with interest, and is the most profitable advertising medium we have.—CHARLES McILVAINE & Co., Philadelphia, Pa.

I find great help from THE AMERICAN STATIONER, both as regards prices and firms.—RICHARD JONES, Philadelphia, Pa.

I know THE AMERICAN STATIONER to be of great value to those in the trade.—GEO. W. EMERSON, Philadelphia, Pa.

THE AMERICAN STATIONER is regarded by us as the best trade publication we know of. It is very valuable in keeping us posted on trade news and trade novelties.—WALKER, EVANS & COGSWELL, Charleston, S. C.

As a trade journal it is unexcelled by any contemporary.—JAS. R. SALMON, Knoxville, Tenn.

It affords me information that I could not obtain anywhere else. When published only once in two weeks, I could scarcely wait for it.—F. E. MCARTHUR, Knoxville, Tenn.

THE AMERICAN STATIONER is a welcome visitor to me, and I think it a necessity to the general trade. Away out here in Texas it is the means of posting us on the variations of the market and giving us general information of the progress and changes in the trade, and enables us to keep in stock all the late introductions as fast as out. In my opinion your journal is invaluable.—BEN. TRAVER, Galveston, Texas.

It covers a want long felt in the paper and stationery trade.—A. STEIN & Co., Galveston, Texas.

THE STATIONER is a most desirable and pleasant visitor, and as a trade paper will, we believe, prove indispensable to every firm in active business.—PIERCE & TERRY, Galveston, Texas.

I have found THE AMERICAN STATIONER always interesting and valuable, and should be very loath to do without it.—E. H. CUSHING, Houston, Texas.

It helps us to keep up with new styles of goods as issued, and we cannot do without it.—TUTTLE & Co., Rutland, Vt.

I receive your paper as a business document, not to be read at leisure, but to examine at once upon its arrival.—H. T. CUSHMAN, North Bennington, Vt.

I consider it all that could be desired by any one interested or connected with the stationery trade.—CHAS. H. ANDRUS, Berkshire, Vt.

THE STATIONER is as indispensable to the stationery and book trade as text-books to a teacher or tools to a mechanic.—R. J. A. BOREMAN, Parkersburg, W. Va.

We consider THE STATIONER valuable to the trade, and supplies a want long felt.—J. W. RANDOLPH & ENGLISH, Richmond, Va.

We have found it to contain much valuable information, and feel confident that the investment has been a good one.—WEST & Co., Milwaukee, Wis.

It is just what we need in ordering goods, and consequently must be just the thing for advertisers.—MOSELEY & BROTHER, Janesville, Wis.

Every stationer or paper dealer should subscribe, as it will be found invaluable as a guide to the trade.—GAIN BROTHERS, Hamilton, Ontario.

THE STATIONER we have found invaluable, have gathered from it many hints, and worked out many suggestions contained in its pages, which have added to our success.—JONES & MORRISON, St. John, N. B.

We find THE STATIONER useful and interesting.—J. & A. McMILLAN, St. John, N. B.

LOCKWOOD'S DIRECTORY OF THE PAPER TRADE FOR 1885.

LOCKWOOD'S DIRECTORY contains a full description of all the Paper Mills in the United States and Canada, together with the Wholesale Stationers and Paper Dealers in the principal cities. **BUY YOUR PAPER AT FIRST HANDS.** This Directory is octavo in form, is printed on the finest book paper and handsomely bound in cloth, and as a work of reference it is indispensable to every Stationer, Publisher, Paper-maker, Paper and Paper-Stock Dealer, or any one connected with or interested in the trade.

PRICE, Postage Paid, \$2.00.

THE AMERICAN STATIONER (one year) and LOCKWOOD'S DIRECTORY, \$3.00.

SHOE DRESSINGS AND INKS.

Among our speci-
alties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in
the market, as it adheres quick-
er, lays smoother, dries sooner, and
sticks with GREATER TENACITY. It has
no odor, no waste, never molds
or sours in hot weather, so it is
always ready to use, and is the
only Mucilage that sticks with
such tenacity that it can also be
used for repairing ornaments
and all household articles. Deal-
ers can rely on its NEVER spoiling
on their hands. We can't
compete in price with the
cheap trash, but can beat
them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps,
and Brushes (1 doz. in box),
or gross, \$7.50; also, our Im-
proved Liquid Glue, the
best and strongest adhesive
known. Retail price: 2-oz. bottles, tin caps and
brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with
many strong testimonials of this Mucilage and
Liquid Glue. For sale by all first-class Stationers.

CHERRY PIE; or, *Pictures Bright for Our Pet's Delight.* A volume of original poems for children, by Mrs. WHITTECHURCH. Beautifully illustrated with 32 colored pictures, designed by W. Claudius. 4to, colored lithograph cover, boards, \$1.50.

Cincinnati Clips.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, November 10, 1884.

A phenomenon of the week past here was the consumption of news paper. From a quarter to a third of a million copies a day was the aggregate circulation of the Cincinnati daily papers during the week of the election. Still the people wanted more news. News boys were all hoarse with crying off papers from two o'clock in the morning till next day midnight. Morning and evening papers worked off several editions. The trains went out loaded with newspapers. In fact, the people did nothing but look after the news. Business actually came to a standstill. The silvery voice of the traveling man was not piping on the ears of the dealer. For once the merchant heard no longer the buzzing of the mercantile traveler. Instead of that the air rang with the din of tin horns mingled with which tumult of sound, shouts for Blaine or Cleveland could now and then be heard. Still for once the human yell was often visible when it was not audible, so stunning was the noise from the horns. Never before was there such blowing in Cincinnati, not even when the city was full of mercantile travelers.

The good-humor of the crowds was one great notable feature of the street scenes. First, on Tuesday night of November 4, the Cleveland men had the advantage, when the returns from New York came in. Wednesday forenoon, the Blaine men took their turn at jollifying. In the afternoon, the New York returns looked favorable to Cleveland, and one set of jollifiers hunted their holes and another set took up the chorus, and made the streets tremble with the roar of their horns. On Thursday and Friday, both sides took it up simultaneously, and we do not want it repeated, even as often as Presidential elections occur. Still, they were good-humored. The horns made so much noise that spoken words could not be heard. This crushed the unruly member, and as a result there were no fights. There were instances of two improvised processions filling the street from curb to curb and flowing through each other without clashing. On Saturday everybody was tired out and hoarse, and on Saturday night only the toughs paraded the streets. The police took advantage of Sunday for putting an end to the looting, and they succeeded. All these processions, which made the streets a pandemonium for four days, were without organization—mobs, in fact, but very peaceable, and in no way riotous.

Now comes the business man to the front, illustrating beautifully his conservative qualities. A few threats and boasts were heard on the streets on Friday night and on Saturday. The jubilant crowds were immediately thinned down to small squads of drunken roughs by the withdrawal of business men. On Sunday scarcely a threat was heard day or night. Men interested in trade and in property frowned down all such talk at once, and within twenty-four hours the universal expression of sentiment was conservative and law-abiding.

The fact is that outside of dealers in print-

R. WORTHINGTON, 770 Broadway, New York.

For Sale by all Booksellers or sent by Mail prepaid on receipt of price.

ing material and newspapers and publishers of news journals, there was almost no business at all in Cincinnati last week. The railroads, while they carried loads of passengers to and from the city every day to hear the news, carried little freight either way. The express companies did almost nothing in outward-bound carrying. Merchants received next to no orders. The Chamber of Commerce had no meeting on the day of the election; met, but did nothing on the day following, and, in fact, did almost nothing all the week. That the great uncertainty affected business all over the country as it did in Cincinnati, is indicated by the immense, almost alarming, decrease of the clearing-house exchanges all over the country. No matter what the final outcome may be, business men look for a change for the better in trade after the Presidential election is over.

There is little else to be said about trade in Cincinnati. Business opens this week hopefully. Men will soon be freed from the temporary distraction of the present, and then they will turn their eyes to the future and busy their heads and hands in adjusting their business according to what they see in the future.

Now we may expect the festive traveling salesman. His voice will be heard again in the land, and the wheels of trade will turn faster, faster, faster, till the very swiftness of their whirling will make one's head swim. This is the dream of every business man to-day—a dream that sooner or later will be realized.

PRINCE WILLIAM.

A very pretty brush-broom case is made by taking a small Japanese fan for the foundation, covering it with blue silk, then cutting a piece of pasteboard of the size of the brush-broom, covering it with silk and fastening it to the fan; suspend from the wall by the handle of the fan, which should be gilded.

Envelope Machine.

An illustration is given of an improved envelope machine, designed particularly to simplify the construction of the gumming devices and to facilitate their rapid operation; to improve the manner of hanging the wings of the folding-box; to provide improved mechanism for conveying folded envelopes from the drying-chain to the table, and for counting each envelope so conveyed, and, for arranging the counted envelopes in convenient groups of a certain number preparatory to banding them.

In the drawing B indicates parts of the usual frames of the machine, of which *c* is the driving-shaft, *d* the driving-pulley and *e* a cam-shaft.

The gum-box is indicated by 3. The picker gumming-roller 5 is hung in boxes 7, in which it is capable of a reciprocating movement in the direction of its length. The boxes are adapted to have a reciprocating movement upon their supporting rods 8, by means of two swinging levers 13, which are secured to a rock-shaft, 14, the latter being actuated by its connection with shaft *c'*, by the cam 18, lever 17, rod 16 and arm 15. Any convenient retracting-spring holds lever 17 in contact with cam 18. The levers 13 are connected to the roller-boxes 7 by the connecting-rods 12. The movement given to the gumming-roller 5, under the pickers 10, whereby the latter are gummed, causes roller 5 to be moved against the gum-roller, thence from the latter under and against the face of the pickers and beyond the latter, where it rests an instant, while the picker descends and rises, and then back again next to the gum-roller, where it again rests while the picker moves as before; but previous to the return movement of the picker-roller 5 to the gum-roller 4 the former is given the movement in the direction of its length, as it also is just before it comes in contact with the gum-roller. The purpose of this shifting movement of the gumming-roller is to cause different parts of its surface to be rolled against the face of the picker as it moves back and forth under the latter, and said movement is imparted to it by the guide-strips 9 9, one being so located that the end of the roller-shaft will strike it after, in moving from the gum-box, it has passed under the picker, and the other is placed opposite the other end of the shaft, and in such position that the end of the latter will strike it as the roller moves toward the gum-box, carrying the gumming-roller back to the position it occupied in the boxes before

the first-named guide-strip shifted it. The described arrangement of the gumming-roller and shifting devices obviates the requirement of two gum rollers and boxes for gumming-roller, so that the surface on it which rolls against the picker shall be supplied with gum for its two movements, for after having been in contact with the picker in going from the

the object described. Wing *w* is operated by arm *w*³.

After the envelopes have been gummed and folded they are dropped into the usual chain, A, between the fingers of which they are carried from the folding-box and finally brought toward the table on the front side of the machine; and for taking the envelopes from the chain, counting and grouping them upon the table, where the groups are indicated by 21, the following devices are employed:

A series of spiral carriers, each lettered *a*, are hung on the ends of shafts *a*², which are properly supported on the frame of the machine. The shafts *a*² are given a rotary motion by gear connection with a shaft, *a*³. The carriers *a* are arranged at such distance from centre to centre that the ends of the envelope can enter them, as shown in the figure, and the rear ends of the carriers reach back a little each side of the chain, so that an envelope which is brought along to the carriers by the latter has its ends engaged by the spirals, and is by them carried forward toward the table. A plate is supported between the carriers *a*, and the bottom edge of the envelope rests thereon as it moves. The table is located so that envelopes moving forward will slide onto it.

Under the table, hung on a shaft K', is a ratchet-wheel K, provided with twenty-five teeth, and having on its side a cam, *n*. A pawl-lever, *m*, is also hung on the shaft K', and has an oscillating motion imparted to it by a cam on shaft, *c*, through the connect-

ENVELOPE MACHINE.

box 3, it is moved endwise before it goes back to cause that part of its gummed face which has not been rolled against the picker to be brought against the latter in its return movement. Thus a well-gummed surface is carried against the picker at each movement of roller 5, although it has been subjected but once to a contact with the gum-roller.

The back-flap wing, *w*, of the folding-box 25 is hinged in bearings which are attached to the ends of flat springs *w*² *w*², which are secured to the machine by bolts *x* *x*, which pass through their ends.

It often occurs from some cause that the thickness of the combined paper and gum which comes under the wing when the envelope is folded varies more or less, and it is desirable that the wing or wings of the folding box shall be hung in yielding bearings, rigid enough to hold the wing against ordinary resistance, but capable of yielding if the latter be too great; hence the use of the springs *w*², or other suitable means, for accomplishing

ing-rod *j*. The lever *m* extends above the upper edge of wheel K. A spring, *o*, rests on the wheel K, to restrain its rotation, so that it shall not turn any farther than the pawl carries it.

A pawl-supporting device, *h*, consisting of an arm, *z*, on which the pawl *i* is hung, and an arm, *z'*, on arm *z*, to one end of which is secured a balance-weight, *z*², is delicately hung on the shaft K', so that the preponderance of weight is slightly on the pawl side of the device. A pin, *y*, on which the pawl is hung, extends far enough over the wheel K to have the end of arm *m* strike it when it is within the reach of the oscillating movement of the arm. The shaft K' has its bearings in the hangers *s* *s*.

A rock-shaft, *d*, is hung in supports *e*² above the carriers *a*, and has two wings, *e*, which extend downward between the carriers, so that an envelope which is being moved along by them, as described, will hit the ends of the wings and rock the shaft *d*, on which is an

arm, f , which is connected with the arm z by the connecting-rod f^2 . Thus an envelope being moved along by the carriers a strikes wings e , rocking the shaft d , and causing the pawl-arm z to swing back. The pawl i engages with a tooth on the wheel K, and brings the pin y where the lever m strikes it, and rotates the wheel the extent of one tooth, this operation taking place each time an envelope goes under the wings e ; and the wheel K is not acted upon by the lever m unless the pawl i is first caused to take a proper position by the passage of an envelope.

Two grouping-guides, r r , are pivoted between the carriers a —one between each pair—and are capable of a lateral movement. The front ends of the guides r are made to engage with two vertical arms, t t , which are secured on a sliding-rod, v , to which a spring, v^3 , is attached, and on which is an arm, v^2 , which extends down by the side of the wheel K and bears against the edge of the cam n thereon. When the wheel K is turned as described, the rod v is made to slide to the right, as each envelope passes in the carriers until (wheel K having made one revolution) the arm v^2 drops off from the high end of the cam n and allows the spring v^3 to draw the rod v to the left, swinging the guides r r . Thus the envelopes, one by one, are given a different position in the carriers by the position relative to the latter of the edges of the guides r , the latter continuing to swing laterally to the right, while the envelopes, in passing, cause the wheel K to be turned, and when the wheel has once rotated dropping back, leaving just twenty-five envelopes in one or several groups on the table and in convenient position to be seized by the right-hand back corner thereof by the operator, separated from the group behind it and banded. The envelopes, after having passed between the guides r r , are struck from behind by oscillating arms or wings 23, which are secured on the shafts 24 24 and pushed forward between the guide-strips on the table and against the stop.

The shafts 24 are operated by any convenient connection with other parts of the machine.

Now that the excitement of the election is over, business affairs must prefer their proper claims. With the revival of trade, the closing of accounts for the present and the opening of new ones for the coming year, paper and ink of all kinds must necessarily be freely used.

Without a good blotting, the efforts of all writers are nugatory, and attention is called to the celebrated "Climax" blotting, made by the Richmond Paper Manufacturing Company, Richmond, Va. The "Climax" has now achieved a reputation inferior to none in quality, while in price it is cheaper than any other of a similar grade, and, with the constantly-

increasing number of wholesale dealers who are placing it in stock, consumers and stationers are constantly testifying to its excellence and their appreciation of it. It is also of an accommodating disposition, for it will not only absorb surplus ink of a business character, but also that expended on either side by the political writer.

THE \$1.00 NEW YORK FOUNTAIN GOLD PEN.

A \$5 pen in appearance and usefulness for \$1. This pen can be carried in the pocket in any position without leaking, and will write 15,000 words without refilling. Any ordinary pen can be used by attaching to the fountain holder if desirable. The construction of the Fountain Pen is so simple that there is nothing to get out of order, and this simplicity of construction enables us to sell it at a low price. The most economical and useful pen in existence. Just the thing for business corresponding or school, as it is always ready for use. Sample by mail on receipt of price, with gold pen, \$1: one dozen, \$8. Sample with imitation gold pen, 50 cts; one dozen, \$3.50. GOLLNER MFG. CO., 222 Centre Street, New York.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY** AWARD given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE** and **REWRITE** FOUR TIMES on same spot. Each sheet is water-marked with name and date.

Correspondence.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET.
PHILADELPHIA, November 18, 1884.

The trade movements of the past week are lacking in special interest. A more settled feeling is evident, and in a short time business will be enough improved to give indications of it. E. J. Spangler & Co., 507 Minor street, are manufacturing a new line of tags for shipping purposes of the same style as the well-known Dennison tag, the patent on which has expired. These new tags are manufactured by an automatic machine, the invention of their foreman, T. Lanbach, who has spent several years in bringing it to perfection. The tags are made of three different grades of manilla paper, and the eyelet consists of a manilla "washer" on either side of the hole, the same machine cutting the tag, punching, pasting and affixing the washer on both sides of the tag at once and separating the finished article into packages of twenty-five each. In other words, it merely requires the attention of a man to keep it supplied with paper, and it does all the rest of the work except packing in boxes. The three grades are designated respectively I, X, L, corresponding with the "A," "Boss," "Job," brass eyelet tags they have been manufacturing for some time past, in size and price. Each grade is made in eight different sizes. The advantage of the new machine is that it can be manufactured to work in "gangs" or "sets," whereas the brass eyelet is run singly. Each new automatic machine will turn out 250 tags per minute. The firm also makes a specialty of seedsmen's tags, pay envelopes, &c. In all their products, they claim excellence of material and workmanship and moderate prices. They also make a tag known as the baggage-excess tag for railroad companies, when baggage is over weight. Samples were shown your correspondent of tags that had been immersed for fifteen minutes in warm water, and on drying, were as good as before wetting.

There is no small degree of ingenuity at work to improve on existing methods in several branches of stationery. Business is dull,

but inventive talent is only thereby stimulated. THE AMERICAN STATIONER is making its way closer to the hearts of the stationers of the city and is rendering services which they willingly acknowledge.

Wolf Brothers report that the envelope manufacturers claim an overproduction; still, they are putting in new machinery and increasing their facilities. This leaves only one resource, and that is lowering of prices, which Wolf Brothers have done. They say that they are bound to keep as low as the lowest, and from the appearance of their warehouse I should judge that they are securing a very large share of the trade. They report plenty of orders ahead for some time.

Potsdamer & Co speak encouragingly of the outlook, and say, that although they were somewhat damaged by the fire at the time, their new facilities and new designs are bringing them already a golden harvest. P.

WASHINGTON WAIFS,

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., November 18, 1884.

The political contest is over. The tempest-tossed bark of the politician and partisan, battered, bruised and twisted, now lies in the dockyard awaiting repairs for another voyage or to be condemned as old junk and cast aside forever. The turmoil of the fight and the subdued excitement of the official count in the Empire State have passed away, giving place, among the people of Washington, to a feeling of peace and quietude on the part of Republicans and a sense of satisfaction and security on the part of Democrats. Begging pardon for this political reference in a live trade journal, your correspondent tenders his congratulations to the President elect and softly subsides.

Having been absent from the city for the past five or six weeks, much has escaped my attention which might have been of interest to the readers of THE STATIONER. At present I am unable to find anything floating about which is worth publishing, and in my visits to the merchants there is nothing in the way of news to be had. The order of Secretary McCulloch, of the Treasury Department, issued on last Saturday afternoon, is one which, I assume, will in no little degree affect the paper manufacturer. The restraining cir-

cular is brought about by the presence of cholera in the city of Paris and other infected European ports. The instructions are sent to customs officers, and read as follows:

The unloading in the United States of old rags shipped from and after the 20th inst., from foreign ports or countries now or hereafter known to be infected with contagious or epidemic diseases, is hereby prohibited. France and Italy and all Mediterranean and French ports are declared to be infected within the meaning of this order. Old rags gathered or baled in infected ports or countries, and shipped from other ports or countries, are also prohibited from being unladen. No rags shall be landed at any port of the United States except on a certificate of the United States Consular officer at the port of departure that such rags were not gathered or baled at or shipped from any infected place or any region contiguous thereto.

On last Thursday, the 13th inst., Secretary McCulloch received a petition from eminent physicians, surgeons and scientists, of New York city, requesting that immediate steps be taken to prevent the introduction and spread of cholera in this country, appealing to the Secretary because of the recent removal of the restrictions on the importation of old rags and, asserting their belief that threatened danger can only be averted by a thorough and systematic disinfecting of old rags from all European ports. In speaking on the subject the Secretary said he recognized the responsibility resting upon him and that he was determined to do all he could for the welfare of the people. Hence the order above quoted.

The annual report of the Treasury Department is being put in shape for the inspection of the country at the beginning of Congress, and it is said that there will be some recommendations in regard to a revision of the tariff from the present keeper of Uncle Sam's cash-box, who, it is whispered, has some decided views upon this much vexed question.

Other departments of the Government are also busily engaged just now in preparing their annual reports. The controller of the currency says that his report will be withheld until a few days before the meeting of Congress. He says the National bank system makes a good showing considering the number of banks which have been organized and the financial panics which have occurred crushing State and private banks. One hundred and ninety-one National banks have been chartered during the year with a net aggregate of \$15,000,000 added to the National bank capi-

tal during this period. Eleven national banks have failed this year and one hundred since the passage of the National bank act of 1863.

A new system of Spencerian penmanship has been introduced in the public schools here. The books after some little delay, owing to certain revisions, have been received. Professor Spencer of this city says that the system is ingenious and teaches children to write the way experience shows men write in their every-day business, and does not guide them in the old theory as to how letters should be formed. All fancy strokes and flourishes are dispensed with and just enough of lines left to make plain the identity of the letters. It is said in favor of the new system that rapidity and legibility are gained and that the beauty of the style is in no way marred.

The exhibit of the Bureau of Engraving and Printing will be ready for shipment to the World's Exhibition at New Orleans by the 1st of December. It will be the largest and handsomest display ever presented by this bureau, notwithstanding the fact that this department received the highest prize at the Philadelphia Centennial and at the International Exhibition of Vienna. In one frame of the exhibit there will be shown portraits of all the Presidents and Vice-Presidents of the United States, all members of the Cabinet, whose likenesses are obtainable, engravings of the public buildings of this city, and many handsome designs used upon government commissions; another frame will contain facsimiles of bank-notes and securities issued by the government, including revenue and customs stamps; the third frame will show specimens of letter engraving executed in alphabets by the Casilear patent process. This last display will be novel, interesting and instructive, as it will show script, lathe-work and ornamental lettering from the smallest to the largest alphabet, and from the plainest to the most delicate and intricate fancy work.

The business outlook is better, and now that things are getting down to a settlement, there are signs of an improvement in the trade. Though it has been oft repeated that government clerks would hoard up their earnings and show a disposition to economize and save in the event of a Democratic advent, as yet I have not heard that such statements have been verified by the falling off of the retailer's sales. It may come later, as I have no doubt it will, in many branches of business, but I am of the opinion that it will not last long and will be only temporary. A business man, particularly one engaged in the retail trade, should abjure politics and give his entire attention to the affairs of his office and store, if he desires to attain popularity with all classes and sell goods to everybody. The Democrat and the Republican may differ widely as to the method of conducting this great government, but as they both earn and spend the same identical dollar, I take it for granted that all live, wide-awake tradesmen will make things about them as attractive as possible, talking "strictly business," with the one end always in view, namely, catch the dollar. This city is rapidly filling up with absentees who have been away for the campaign, and members and senators are coming in quite

lively, ready for the winter's work. These things will, of course, tend to brighten up the trade and add much vigor to commercial life. The hotel-keepers of this city are daily receiving applications for accommodation during the inauguration ceremonies. Mr. Staples, of Willard's Hotel, says he already has applications for two thousand, and that they are coming in at the rate of three and four hundred a day. What is true of Mr. Staples is also true of the other hotel proprietors, and from present indications it is very apparent that the capital will have to accommodate one of the largest crowds ever present at any inauguration.

I visited several of our stationers yesterday, and while I found some of them uneasy as to the winter trade, the most of them were making preparations for a large business and were quite hopeful of the future.

At Brad. Adams', on F street, I was told that while trade had been a little dull for the past month or two it had begun to get a trifle livelier in the last day or two, and that within the next two or three weeks they looked for better times.

Mr. Paret, on the Avenue, said that he had experienced a dull time for the past month or so, but he was getting ready for a large trade, and that he had no doubt business would be much better from now on. He has added quite a large stock of fancy goods to his line of fine stationery.

Whitaker was not so hopeful of the future as some of his brethren, and reported that the election business had in a great measure retarded the fall trade and kept things very dull for some time past.

Brentano Brothers seemed to be doing a good business, their place of business being quite full of buyers, and they told me they had no complaints to make of the state of affairs.

I called on J. C. Parker, of Seventh street, and pleasantly reminded him of the little difference of opinion that existed between us in regard to the status of business last September. He received me quite cordially, and in a polite and graceful manner gave me his opinion of the state of trade at the present time, assuring me that he had the best wishes for THE STATIONER and would be glad at all times to keep your correspondent posted as to matters in his neighborhood. Mr. Parker is one of the oldest stationers in the city and his place of business is one of the best known in the capital. Mr. Parker said that his sales for the present month would not be so good as they were for the same time last year, for the reason that the set-back of election times in the early part of the present month would more than counterbalance any briskness which might spring up for the rest of November. He took a cheerful view of things, and predicted a good trade after things had settled down to a smooth working basis in the various departments and when the political fervor had cooled off. At this time, he said, things were a little dull, but there were many indications that trade was increasing.

The large dry-goods firm of Lansburgh Brothers have gone into the holiday book trade and fancy goods business and are offer-

ing such articles at greatly reduced rates compared with the prices of the regular retail stationers. This action on the part of the dry-goods men interferes a great deal with the regular book trade and some of the stationers complain of it in loud terms. Some of them told me that while most of the books were of an inferior grade yet the dry-goods men were selling some of them at prices less than they (the stationers) could buy them. It is not understood how this thing can be done with any profit to the dry-goods men, and it does seem a hardship and an unfair competition to those regularly in the book trade when it is believed it is only done by Lansburgh and others for the sole purpose of attracting and holding trade for his legitimate business, the dry goods. Mr. Lansburgh possibly looks at this matter differently, but as I have not heard his side of the story I can not speak for him. BEN.

BOSTON BOUQUETS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 DEVONSHIRE ST., BOSTON, NOV. 18, 1884.

Comparing trade now with the business of last year at the same period, one finds the present season very backward. Political disturbances are generally held to be responsible for this inactivity in commerce; but now that the electioneering is over, and the issue of the campaign settled, no reasonable arguments can be advanced for a longer suspension of business.

Meeting a prominent manufacturer yesterday—a man who has almost the monopoly of an article largely handled by the stationers of the country, and a man who is credited with being shrewd and long-headed—I ventured some comments upon the state of trade, and asked him how he found business.

"Nothing doing at all, sir; don't mention my business, I don't expect to sell another bill of goods for four years, sir."

Is not such talk utter nonsense? Does this manufacturer, or any other sane man, really suppose that the bottom has dropped out of American commerce?

So long as business men entertain such foolish ideas, just so long will business continue to be dull to them, for inasmuch as they invite depression, they stand ready to give it welcome.

Of this class, however, the number is very limited, especially among the manufacturers and business men of Boston. Instead of lamenting over "what might have been" our merchants take advantage of "things that are," and by this means bring about "what is to be."

While the despondent man is quietly waiting the dawn of a brighter day, the enterprising merchant is about in the gloom and by his persistent efforts hastens the "dawning."

At the Beacon street establishment of H. H. Carter one finds no gloomy shadows, nor has Mr. Carter the time to discuss questions not directly relative to business transactions; but on trade topics he is fully prepared to entertain the most curious, and he has an endless

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade-Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 292.)

stock of curious novelties which are very entertaining to dealers in holiday goods.

Among the goods displayed are a number of pretty publications which this house has lately brought out for the present season. "Stray Leaves from John Ruskin" is the title of one. This little pamphlet is ornamented with the "antique" cover, through which are interlaced brown silk cords. The front cover is also embellished with landscape and floral designs in colors. From this little work I must give one quotation, because the lines so aptly illustrate my former remarks relative to courting business depression. These are the lines: "In all things throughout the world, the men who look for the crooked will see the crooked, and the men who look for the straight will see the straight."

"Cups of Gold," "Morning Glory," "Golden Gleanings" and "Fair Thoughts and Happy Hours" are the titles of four beautiful little souvenir publications which make up a very handsome series for little folks. These are all printed upon fine cream wove paper in letters of gold. The covers are in imitation of pebble-grained sheepskin, and the edges are in gilt, giving a neat and artistic appearance. "A Child's Dream of a Star," by Charles Dickens is another very pretty souvenir.

These little publications are presented to fill a want which has been developed by the millions of beautiful cards distributed among the people. By cards the eye has been trained to appreciate the beautiful in form and color, so that now the mind is ready to receive the beauties of true sentiment, and to retain the influences of soul-inspiring thoughts.

Ten years ago such sentimental publications would have been just so much dead stock; but the tastes of the people having become better educated, these little Christmas souvenirs are meeting with extraordinary demands. Many thousands of them are being sold by the publisher to the stationer throughout the country.

The Heliotype Printing Company, whose business is too extensive to remain idle during the next four years, and as the manager of the company thinks that some of the commercial and manufacturing concerns of the country will continue to do business, invites the attention of such firms to its new series of advertising calendars for 1885. These calendars are intended to be used in series together, or singly, and space is left for the calendar and for advertising announcements. The designs are somewhat varied, both in size and style, so as to admit the use of large or small sized calendars, and to include, if so desired, heliotype views of buildings. The designs are all new and unique and are attracting considerable attention. Ipsen furnished one of the designs, while other designs are by artists of equal merit. Stationers or printers whose trade calls for something artistic in the calendar line, as well as business houses desiring advertising calendars, will find it profitable to address the Heliotype Printing Company, 211 Tremont street.

The officers of the Massachusetts Charitable Mechanics' Association having the matter of awards of medals and diplomas to exhibitors

in the fifteenth exhibition (which closed on the first of this month) for superior excellence, have just completed their labors and the awards have been made.

Among the successful competitors for silver medals are: A. H. Hews & Co., North Cambridge, Mass., for art pottery; John A. Lowell & Co., Boston, for steel-plate commercial work; S. E. Cassino & Co., Boston, for scientific publications and illustrations; John H. Cranston, Norwich, Conn., improved printing presses.

Bronze medals were awarded to the following exhibitors: Carroll W. Clark, Boston, for office and school furniture; Alley & Keyser, Boston, for fringed satin puffs, with hand-painted pictures.

George C. Whitney, Worcester, Mass., for satin and plush Christmas novelties.

William H. Minot, Boston, for brass plaques.

Thomas Groom & Co., Boston, for account books and stationery; Arthur & Bonnell, New York, for books bound in English moleskins.

William E. Sibley, Waltham, Mass., for lead and slate pencil sharpener.

Among those who received diplomas are: A. G. Whitcomb, Boston, school furniture; Edward B. Phelps, Springfield, Mass., for music leaf holder and music chart; Alles & Conant, New York, for pocket-books; Oak Leaf Manufacturing Company, Boston, for King's anti-heat indelible ink; Tate & Co., Boston, for wire picture cord; Heath Letter File and Index Company, Boston, for letter files and indexes; Lewis C. Norton, Boston, for elevated rule and hand rest; Colby & Co., New York, for historical charts. A. L. D.

CINCINNATI COMMENT.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, November 17, 1884.

No good time here yet, but no worse time has put in an appearance since last week's report. Business men feel assured that the depression of trade has struck solid bottom, and that there is enough elasticity in business to warrant the conclusion that its next move will be an upward rebound. Rebound is the word, and it expresses all that is implied in the good time that is coming. By reports from all other parts of the country it appears that the general dullness in Cincinnati in consequence of excitement over the election, was not exclusive by any means. The cheerful acquiescence of the vanquished in the result, and the absolute cessation of excitement on the subject that characterizes the opening of this week only shows how patriotically American and Americanly patriotic the people of the United States are. In this phase of the situation one finds many cheering and faith-inspiring features. Then what balance wheels, what regulating governors, the business men of this nation are to the machinery of the government. Really trade is a phase of patriotism, a conservative element, an antidote for the poison of partisan fanaticism, and business men, the nobility of this country, have a right to be proud of themselves.

Now that the voice of the turtle is no longer heard in the land, the dulcet notes of the traveling salesman are to be heard in all of

the shops. He comes to the hotel amid the thunder of trunks, and he skips briskly over the streets, gripsack in hand, and at night, weary and hoarse, he goes to bed with a heavy heart if he has not been able to send home by the morning mail a fine batch of orders. But the traveling salesmen differ in respect to species. This does not mean that some of them do not belong to the human species. It would be a species of meanness to say anything of the kind, and this letter does not say any such thing. But there are different varieties of them. There! "Prince William" will stick to that. "Varieties of traveling salesmen" is a phrase that one can stand by. Here is a rare variety. He must be a solitary individual of that variety. But here he is described in the following dialogue, which actually took place in this city:

Traveling Salesman—"Yes, you need a lot of this line of pocket-books."

Stationer—"Yes, I'll take a gross of them."

Traveling Salesman—"No you won't. What would you do with a gross. You couldn't sell 'em all. A half gross is enough for you."

Stationer—"Well, then, say a half gross."

A half gross it was, and as it turned out only two pocket-books were left of that lot.

Said the stationer to Prince William: "I always let that man tell me what I ought to buy in his line after that, and he never 'stuck' me yet. I don't let any others of 'them fellows' have that privilege though." Then the stationer went on to describe the devious ways of the traveling salesmen. "One man," said he, "comes in and without saying a word surveys my stock. Then when a good opening offers, he comes and tells me that my stock is about out in this, that, and the other items, and that I had better fight shy of such and such an article this year, as the demand for that particular style was liable to be light, or it was likely to be supplanted by something else that I had not yet heard of, and so forth. You see I could hardly help buying of such a man. He understood his business perfectly and was likely to stay in it, and that was the basis of my confidence in him." But the stationer went on, his blue eyes sparkling all the while, and kept describing the varieties of the mercantile traveler. "One of them fellows," said he, "found out my dinner hour. I didn't want to buy anything of him—but he found out my hour. It's a peculiar hour, you know, and a little off of the hotel time for a fresh dinner. Well, what do you think he did? Why, that fellow happened in 'by accident,' just five minutes before my time to leave the store for dinner. Nothing would do but that I must go with him to his hotel to dinner. After dinner I had to look at his goods, and would you believe it, he took my order for a big lot, and that after I had made my mind up to not buy of him. Well, he did, and I made money on the goods. I never let one of 'em stick me if I can help it, and if any of 'em do it once, depend upon it he never gets another chance at me." Here a customer came in, and while the stationer was waiting on him, "Prince William" withdrew.

Dealers are laying in conservatively for the holiday trade. They are arranging, however, for duplicating orders should better times set in.

James Barclay, of the *Volksblatt* job rooms, has removed his establishment to the Strobbridge Lithographing Company's rooms, on North Canal street, near Elm street.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF NO. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3.....per doz...\$24.00 | Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | **DISCOUNT TO TRADE.**

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, *Full weight*, as marked in *figures* on bundle.
- 2d, Absolute uniformity as to quality and color.
- 3d, It will not harden with age.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different ganges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

TEN LINE — EXACT SIZE.
FIVELINE

EXACT SIZE. For sale by Stationers or sent by mail on receipt of price.

A Cartoon contains 28 small boxes being 100 of each Letter; and 100 each, &c., commas and periods. In connection with the Letters use Wilson's Ready-Gummed Figures, Gold Headings, Fancy Shaped Cards and Card-Pins. With these you can make your own price cards, window tickets, &c., much cheaper and far more attractive than the old painted cards. We carry in stock assorted boxes containing 10 of each figure, and 10 of each dollar, cent and decimal marks, making 130 in all, at the following prices:

10 Line Figure, red, white or black, 40c. per box.
5-Line Figure, red, white or black, 25c. per box.
100 of any single Figure, Ten-Line size, 25c.
100 of any single Figure, Five-Line size, 15c.

Send stamp for samples and Price List of above.

For use with these Figures we also keep in stock, at very low prices, by the 100, a number of different sizes and shaped Blank Cards. See also our Card Pins at 50c. per 100.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliant illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all untried methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these LANTERNS embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus. Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-foot picture. Price, (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS and OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. FOR HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- | | |
|--|--|
| 1st.—It can be set to lap any sized head in half a minute. | 5th.—There are no cogs 10,000 sizes can be had from one wheel. |
| 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work. | 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time. |
| 3d.—It will lap any size from half note to imperial. | 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch. |
| 4th.—The pens do not lift, but rule continually as in feint lining. | 8th.—The lift and drop of the pens is just the same as in hand-work. |

NEW YORK, November 13th, 1884.

MR. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickok Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double-cap, or over one thousand sizes, against ten from the gear wheels on our Hickok O. A. By lapping headings we save from fifty to sixty per cent. of time in settings pens alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filling-in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,

DAVIS & FITZGERALD, 24 Liberty Street, New York

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A. C. Allen, stationer, Ware, Mass., has sold out.

Martin Rudy, dealer in bicycles, Lancaster, Pa., has failed.

Jane E. Patterson, newsdealer, &c., Whitehall, Mich., is closing out.

Electra J. (Mrs. C. W.) Stone, toy dealer, &c., Clinton, N. Y., has sold out her business.

Edward F. Amsden has retired from the Sacramento News Company, Sacramento, Cal.

James McNabb, publisher of the *Herald*, Hardin, Ill., has admitted Frank McNabb to partnership.

A receiver has been appointed for H. A. Elderkin & Co., dealers in photo supplies, &c., Louisville, Ky.

R. E. Bennett has connected himself with the firm of Evans & Darling, which he will hereafter represent in the West.

The firm of H. Lieber & Co., of the Art Emporium, Indianapolis, Ind., has dissolved. H. Lieber continues the business.

Irvin H. Abell and Paul W. Abell, under the style of I. H. Abell & Son (The Chatham Printing Company), have succeeded W. E. Bennett, printer, East Hampton, Conn.

The Chas. M. Green Printing Company, 74 Beekman street, New York, has been succeeded by M. H. Green, for whom the business will be conducted by Chas. M. Green as attorney.

The Stylographic Pen Company, Providence, R. I., has a new No. 11 pencil made with handsome French black enamel barrel with gold-plated trimmings. This is said to be a very salable article and the trade are asked to send for samples. This company claims to make the "original" stylographic ink which is specially desirable for the users of stylographic pens. This ink has a monogram of W. W. W. on every bottle. The company invites attention to its advertisement in which it offers exceptional advantages in the way of discounts.

Fire broke out in the George Upton Glue Works, Peabody, Mass., on November 14. It was discovered in the old part of the works, near the drying-room, and spread rapidly. The works are about a mile from town, and before the fire department could get to work the flames had complete control. The works consist of a series of buildings of various kinds and cover a large area of ground. The entire central portion was destroyed. The three wings were saved. About one hundred feet of the drying-house on Washington street was burned, and the remainder is saved uninjured. Much of the stock was taken out in good condition. The machinery appears to be only slightly damaged. The large steam pipe and the tall chimney are both substantially uninjured. The works, other than as above stated, are a total loss. The property belonged to the estate of the late George Upton. Henry O. Wardwell is trustee of the estate, and King Upton is manager of the works. About 125 men were employed. The loss is estimated at from \$75,000 to \$100,000. The insurance is about \$70,000.

Among the out-of-town tradesmen in the city during the past week were: G. R. Angel, Detroit, Mich.; Mr. Sawyer, of A. M. & S. A. Sawyer, Boulder, Cal.; Nathan S. Smith, Newburgh, N. Y.; W. J. Bissell & Sons, Waterville, N. Y.; Mr. Campbell, of Campbell & Sons, Newark, N. J.; Mr. Holt, of Holt & Crawford, Montgomery, Ala.; Mr. McIntosh, Erie, Pa.

Among recent publications by Roberts Brothers, Boston, is an edition of Louisa M. Alcott's "Spinning Wheel Stories" which have so much amusement as well as instruction for youthful minds. Another late publication of this house is "Ramona" by Helen Jackson (H. H.).

The liabilities of A. P. & A. F. Holbrook, printers, Newark, N. J., who assigned last week, are about \$7,000; nominal assets, \$9,000.

George E. Boynton, paper dealer, Providence, R. I., has sold out to Robert L. Greene.

S. E. Mitchell, bookseller, &c., Pembroke, Ont., is offering to compromise with his creditors.

Charles W. Rossberg, dealer in pictures and frames, St. Louis, Mo., is dead.

Henry T. Allen, stationer, &c., Paterson, N. J., is dead.

Adolph Brown, printer, Chicago, Ill., has been closed out by the sheriff.

Ormsby Phillips, of the *Dispatch* Publishing Company, Pittsburg, Pa., is dead.

The Cowles Hardware Company, of Unionville, Conn., has removed its entire business to its new factory at Bridgeport.

A new edition of "Harry Coverdale's Courtship and Marriage" has been published by T. B. Peterson & Brothers, Philadelphia.

J. Fagan & Son, stereotypers and electrotypers, Philadelphia, Pa., have lost a member of their firm by the death of George R. Fagan.

The liabilities of Charles H. Litchman, of the *True Statesman* Publishing Company, Marblehead, Mass., who filed a petition in insolvency last week, are \$1,803, principally for borrowed money.

A very interesting series of biographical sketches is contained in "Our Great Benefactors" lately published by Roberts Brothers, Boston. This work contains reviews of the lives and works of men and women eminent in literature, science, philanthropy and art, and is a valuable publication.

The suit brought in the United States Circuit Court of Pennsylvania, by Thomas Kane & Co. against S. A. Clarke & Co., of Pittsburg, for an infringement of a patent on a noiseless slate has been discontinued by the plaintiffs, against whom the defendants have entered judgment for costs.

The Holyoke Envelope Company, Holyoke, Mass., has got out the "Duchesse Lace" paper, which consists of a plain box containing a quire of paper cut in the form of a ladies' cambric handkerchief, with a lace design border. The cambric and lacework is done in a delicate tint on the surface of the paper. The envelopes match the design of the handkerchief.

The first National Convention of the members of the lithographic trade is now in progress in Chicago, Ill. It is for the purpose of devising means for the elevation of the craft. Notifications of the Convention have been received by all the employees in Chicago, and as many masters as workmen are now at the Convention. Plans will be adopted to reform certain abuses that are believed to have entered and injured the trade; to elevate the standard of compensation for lithographic work; to bring about a unity of feeling and purpose between the members of the craft; to devise and suggest means for the elevation of the trade in every

branch, and to form, if possible, an international association for the mutual benefit and improvement of lithographers.

The Adjustable Blank-Book Manufacturing Company has been incorporated at Chicago, Ill., with a capital of \$100,000.

T. C. Bright and H. L. Behrens have formed the Home Paper Company at Holyoke, Mass., and will deal in paper and paper-stock.

Wiser & Robertson, printers, New Haven, Conn., have dissolved partnership. D. F. Wiser continues the business under the old style.

The *Post and Tribune*, Kansas City, Mo., has been incorporated with an authorized capital of \$10,000, and Wuerz & Lampe, the publishers, have been succeeded by the *Post and Tribune*.

Reynolds & Merriam, agents for the American Pad Company, have put a telephone in their office at 43 Temple Court for the use of the trade. Their call is "209 John," and they will be glad to hear from the trade by telephone, and all orders thus received will be promptly attended to.

The J. W. Butler Paper Company, Chicago, Ill., has brought suit against Joseph Hams-worth, one of the firm of Carhart, Wright & Co., printers, Chicago, Ill., whose assignment was announced last week. The defendant resides in Davenport, Ia., and the amount sued for is \$1,400. The assets of the firm are said to be about \$8,000, with liabilities of about \$4,000.

Clark Miller, newsdealer, &c., Mandan, Dak., has sold out.

John Rhoades, bookseller, Fayette, Ia., has sold out to Bullock & Walker.

Henry Allemang, bookseller and stationer, Berlin, Ont., has assigned in trust.

Theodore Wohlgenuth, dealer in toys, &c., Milwaukee, Wis., has been burned out.

L. H. Wilson, publisher, Keystone, Dak., has leased his business to T. R. Brown.

C. W. Ray & Brother, dealers in picture-frames, &c., Montreal, Que., have assigned in trust.

O. E. Henderson, stationer, &c., Almonte, Ont., is asking for an extension from his creditors.

Phillips & Griswold, dealers in automatic check registers, Providence, R. I., have dissolved partnership.

Liebenroth, Von Auw & Co. have had an exceptionally good album trade this season—the best for many seasons.

F. H. Loss, Jr., is offering a very extensive line of Christmas novelties, some of which are entirely new to this market.

A fire in the theatrical printing house of A. S. Seer, No. 26 Union square, New York city, Sunday morning, did a damage of \$25; insured.

The Acme Stationery and Paper Company is getting out some new things in school stationery, which will be ready for announcement after Thanksgiving.

A. A. Weeks is about to bring out a new line of glass inkstands of the artistic order. Judging from one or two samples which he is showing the line will be attractive. The designs are original and pretty.

F. W. Devoe & Co. have some goods in the shape of embossed brass plaques, a new line of easels made of fire-gilt metal, brass scroll plaques, &c. They have a very complete line of artists' materials.

Henderson, Mullin & Bolton, wall-paper dealers, &c., Toronto, Ont., have dissolved partnership. Ernest Bolton retires from the business, which will be continued by the remaining partners.

The New York News Company is having all the trade it can attend to. Its newspaper and periodical delivery is large and its trade in stationery and fancy goods is very satisfactory.

Thomas Patterson, manufacturer of toys, &c., at Nos. 58 and 60 North First street, Brooklyn, N. Y., made an assignment last Saturday to Geo. H. Frazer.

F. C. Cochrane, bookeller and stationer, Palatka, Fla., has been burned out. Loss, \$6,000; insured for \$3,000.

Gordon & Deardorff, dealers in wall-paper, &c., Kansas City, Mo., have dissolved partnership.

George Sheppard, bookseller, &c., Goderich, Ont., has been succeeded by Mrs. L. Cook.

George B. Hurd & Co. have a number of new designs in stamped papeteries. They

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

have a very large assortment of these goods and the very large trade they are having in them proves their popularity.

J. A. Bonitz, publisher of the *Messenger*, Goldsboro, N. C., has been burned out. Loss, \$20,000; insurance, \$8,500.

The book-store of J. T. Kackley & Co., at Marysville, Ky., was partially destroyed by fire on Sunday night. The loss is not given, but the insurance is \$10,000, which probably covers the loss.

Fire was discovered about midnight on Wednesday night on the ground floor of the building No. 75 Duane street, New York, occupied by James E. Hayes, dealer in straw-boards, &c. The fire department was promptly on hand, and the flames were extinguished before they had made much headway. The damage to the stock and building is slight.

M. H. De Young, proprietor of the *San Francisco Chronicle*, was shot on Wednesday by Adolph Spreckels, son of Claus Spreckels. Spreckels fired twice. The first shot took effect in the left arm, a little above the elbow, and the second in the left shoulder. The shooting was the outcome of an article published in the *Chronicle* last Sunday morning respecting the affairs of the Hawaiian Commercial Sugar Company. Spreckels was arrested.

James W. Bouton, book publisher and bookseller, at No. 706 Broadway, made an assignment on Wednesday to William H. Post, giving preferences for \$28,652, among which were Odells & Mills, \$4,000; Anna Moore, \$13,652; H. J. Johnson, \$2,313; H. J. Horn, \$2,500; T. Horn, \$2,500. He has been in business for over twenty-seven years, his principal line being the importation of rare and fine books, though occasionally he issued a special edition of his own publishing. He carried a large stock, valued at over \$100,000, and was estimated by his friends to be worth over \$150,000. He stood very well in trade circles, and at his bank, where he only occasionally obtained accommodations. His business has been dull of late, and it was said his payments had not been as prompt as formerly. The business was established in 1861, the firm being J. W. Bouton & Co. The firm dissolved in 1860, and since that time Mr. Bouton has carried on the business alone.

Luther C. Parker, printer, Lynn, Mass., has sold out.

The *Methodist Advance*, Goldsboro, N. C., has been burned out.

J. E. Curren, publisher of the *Headlight*, Deming, N. M., has sold out.

G. R. Hotsinpeller, bookseller, &c., Independence, Mo., is about to sell out.

Carter & Dinsmore are shipping large quantities of their inks direct from their factory in Boston.

L. Walker, publisher of the *Herald*, Albany, Ore., has sold out to the proprietor of the *Harrisburgh Disseminator*.

William H. Parsons, president of the American Paper Manufacturers' Association, was among the passengers for Europe yesterday by the new Cunard steamer *Umbria*.

A fire broke out a daybreak on Wednesday on the third floor of the building No. 119 Fulton street, New York. Prompt work kept the flames in check, and the damage is estimated at less than \$10,000. The following are among the losers, who are all well insured: James Egginton, printer, \$5,000; E. G. Saltman, drawing materials, \$2,500.

American Paper Manufacturers' Association.

The committee appointed at the last meeting of the Writing and Book Divisions of the American Paper Manufacturers' Association has issued the following notification:

SPRINGFIELD, Mass., November 17, 1884.

As the manufacturers named below have signed the agreement or signified their willingness to shorten production, your committee now request you to shut down your machines and engines the last full weeks of the months of November, December and January:

Union Paper Company, H. Dickinson, treasurer.
Parsons Paper Company, J. C. Parsons, treasurer.
Hampshire Paper Company, J. H. Southworth, president.
Holyoke Paper Company, O. H. Greenleaf, president.
Southworth Company, J. H. Southworth, president.
Valley Paper Company, A. W. Esleeck, treasurer.
Hulbert Paper Company, South Lee.
John Verran, Lee.
Carson & Brown Company, Charles O. Brown, president.
East Hartford Manufacturing Company, A. W. Eaton, secretary.
Benton Brothers, Lee, Mass.
Platner & Porter Manufacturing Company, E. B. Ripley, president.

L. L. Brown Paper Company, T. A. Mole, treasurer.
I. De Witt Walsh.
Seymour Paper Company, C. E. O'Hara, treasurer.
Keith Paper Company, John Keith, president.
Irwin, Lane & Co.
Springdale Paper Company, J. E. Taylor, treasurer.
Agawam Paper Company, D. B. Rising, treasurer.
Harding Paper Company, C. M. Harding, secretary.
Massasoit Paper Company, E. C. Rogers, treasurer.
Riverside Paper Company, J. H. Appleton, treasurer.
Carew Manufacturing Company, C. W. Gardner, treasurer.

Whiting Paper Company, Wm. Whiting, president.
Collins Manufacturing Company, Wm. Whiting, agent.

The Beebe & Holbrook Company, G. B. Holbrook, treasurer.

J. B. Sheffield & Son.
Worthy Paper Company, Geo. L. Wright, treasurer.
Oakland Paper Company, N. T. Pulsifer, treasurer.
Z. Crane, Jr., & Brother.
Crane & Co.

Mount Holly Paper Company, Charles H. Muller, treasurer.

Byron Weston.
Chapin & Gould.

The book mills in Holyoke and some outside of Holyoke, have agreed not to make any engine-sized writing or envelope papers, during the shut-down of the tub-sized writing mills.

O. H. GREENLEAF,
D. P. CROCKER,
Geo. R. DICKINSON,
E. C. ROGERS.

Committee.

Obituary.

HENRY KIMBALL.

Henry Kimball, of the firm of Bartling & Kimball, bookbinders, doing business at No. 505 Clay street, San Francisco, died suddenly, Saturday, October 31. The deceased was sixty-six years of age, and was formerly a school director, and had been well known in the business community for many years. He was a native of Manchester, N. H. He went to California in 1850, and at an early day became connected with the stationery firm of Cook & Le Count, and subsequently with the succeeding firm of Le Count & Strong. In 1859, he formed a partnership with Mr. Bartling, which continued until his death. He leaves a wife, but no children.

A novel work-table is shown. It consists of a brass heart-shaped top, supported by three arrows, whose feathered ends rest upon the floor and barbs pierce the heart. The idea is an unique one.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

Preparation, &c., of Paper for Checks, Notes, Stamps, &c.

Following is a description of a newly patented method of preparing paper for checks, notes, stamps, and other documents, in order to prevent fraud. The paper, either in the process of manufacture or afterward, is saturated with a solution of gallic and tannic acids, or gallo-tannic acid mixed with gum-acacia or other suitable gum and alum. The solution must be sufficiently fluid or watery to enable it to be readily taken up by the paper, and yet of sufficient strength to produce the effect desired. It will be found that a saturated solution of the acid and alum, or a solution slightly weaker, combined with a small proportion of gum in solution, will answer the purpose. This treatment will make little change, if any, in the color of the paper, but will render it everywhere sensitive to the action of preparations of iron. In some cases a few drops of the preparation of iron are added to the acid solution in order to facilitate the action on the prepared paper of inks which are weak in the iron constituent.

In the event of its being desired to print on the prepared paper in colors a proportion of some alkali is added to the acid in solution so as to a certain extent neutralize the acid, which is, however, left in sufficient excess to answer the purpose.

The paper prepared as above described and afterward dried or written on with an ink or preparation containing ferri-sesquichloride or other similar preparations of iron in quantity sufficient to cause the writing and printing to pass entirely through the body of the paper, whereby, in the event of any portion of the writing on the check, note, stamp, or other document being obliterated, the printing will also be removed, and the color of the body of the check or other document so altered as to render the attempted alteration apparent. This will also be the effect when any attempt is made to remove the obliterating mark from stamps and other documents. By printing on both sides of the check or other document the difficulty of alteration is increased. Glazing the back of the paper is also preferred.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 20, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE superintendent of public instruction in Minnesota has issued a price list of school books to be used in the public schools of that State, and this list is to be adhered to by the agents under his jurisdiction. What seems to us rather queer is the statement that the book trade are *allowed* to sell these books at an advance of 10 per cent. This seems to indicate that no cutting under the State price list or competition therewith is admissible. The booksellers of Minnesota must feel grateful.

OFFICIAL notice has been given of the completion of the terms of agreement for shutting down the writing paper mills in accordance with the resolution adopted at the Metropolitan Hotel meeting; this notification will be found in another column. Pursuant thereto, the mills interested have been directed to cease production during each of the last weeks of November, December and January. It will be seen that the statement is made that the mills at Holyoke making book papers, have agreed not to run on engine-sized writings or envelope papers during the shut-down of the fine writing mills. As we go to press we are advised that the book paper mills at Holyoke have determined not to shut down.

AT the last meeting of the Board of Trade and Transportation a plan for the protection of commercial travelers was reported and adopted. The system devised is co-operative and is limited to the members of the Board who choose to connect themselves with what is to be known as the "Commercial Travelers' League of the New York Board of Trade and Transportation." Each member of this league is to be assessed for legal expenses in proportion to the number of travelers employed by him, and credentials will be issued to each traveler recorded. The assessments will be used for the employment of counsel and the payment of other costs incurred in protecting the salesmen entitled to the support of the organization. In the course of the discussion upon the subject, quite an array of decisions upon the right of State or local authorities to impose a license tax upon traveling salesmen was brought forward, and these sustain the claim of the unconstitutionality of such regulations. We were not aware that so many precedents upon this question had been established. There seems to be no doubt of the law on the subject, and in all future proceedings the rule of *stare decisis* ought to prevail and prevent legal delay, argument and undue expense. Looking at this issue in the light that the principle of the illegality of taxing travelers has been sufficiently and

clearly established, the commercial public certainly needs some guaranty or statutory protection, which will preclude innumerable and frequent lawsuits if the exaction is to be opposed. For that reason, the intervention of Congress becomes necessary. The bill which it is proposed to urge ought to be carefully examined, and, if it meets the exigency, it ought to be pushed with all of the force which the business interests of the country can exert.

Roundabouts.

BY THE TRADE LOUNGER.

Political excitement has subsided and the trade are trying to "ring in" on business. There seems to be somewhat more doing with a prospect of considerable to come. If attention is not paid to picking up the loose ends of business now, people will come out at the diminuendo end of the cornet with their settlements at the close of the year.

* * * *

It is not only darkly hinted, but it is lightly rumored that James Gordon Bennett has sold one-third interest in the *Herald* to J. W. Mackay. It is asserted that the new ocean cable put the strain on Mr. Bennett. Perhaps there was no strain at all. The great income of the *Herald* ought to keep its owner supplied with a great deal of loose cash, even after indulgence in those journalistic enterprises for which he has become famous.

* * * *

The chief officer of Customs—which his seat it is at Washington—has been giving some more points on the tariff to his subordinates. He tells 'em that card middles—"middle board," as he calls it—are not dutiable as manufactures of paper, but should pay 25 per cent. ad valorem as paper not specially enumerated or provided for. He gives another point on odor cases. Silk boxes, known under this designation, are not to be regarded as fancy boxes, but must be charged with duty at 45 per cent. ad valorem.

* * * *

A Springfield (Mass.) man has invented a method of propelling tricycles by means of compressed air, *a la* Keeley. A steel cylinder, three feet long and eight inches in diameter, adding but a trifle to the weight of the machine, he claims will propel a tricycle ten or twelve miles, and a cylinder charged with cheap gas will, he also claims, propel a tricycle fifty miles. No mallet required.

* * * *

An ingenious and very useful article to bookkeepers and accountants is a pen extractor, which may be affixed to the desk for the purpose of extracting old pens from the holder without soiling the fingers. Another form of extractor comes in the guise of a paper-weight.

* * * *

One of the numerous stationery novelties, which should have a wide sale on account of their utility, is a book adjuster. It consists of a pedestal mounted on a firm base and having a spring of a peculiar shape in which the

cover of a heavy book may be placed for the purpose of holding it up. The cover may be raised or lowered by means of a ratchet. The adjuster is neatly and substantially made, and is something which will meet with the approval of every accountant.

Judging from the number of new patterns of skates which have been introduced within the past few weeks a brisk demand is expected for these goods during the coming skating season. There have been no less than two or three new makes of club skates brought out, and if half of the claims of their manufacturers are true, the making of club skates has been brought down to a fine edge, to say the least.

An English inventor has brought out a tricycle, which is operated by electricity. It is an open-fronted machine of the ordinary pattern, with the treadles and driving-gear removed. The driving-wheel is 44 inches in diameter, and close to it is a large spur-wheel containing 248 teeth. The motor is slung from the seat-platform. The armature spindle carries a spindle of 12 teeth, gearing into the spur-wheel, the machine thus speeded down 20 to 1. The battery, composed of Faure, Sellon-Volkmar cells, occasionally, and sometimes of a combination of the two devices, is slung from the backbone and axle, and when fully charged contains a store of electrical energy equal to the conventional two horse-power.

A man in Pennsylvania has taken out a patent for a paper shirt. The shirt is made of very tough paper that will not tear without a great deal of strain, and the bosom is made up of seven layers, one for each day in the week, so that the wearer may present a clean shirt-bosom every day. Enough collars and cuffs go with the shirts for the seven fronts, and the whole outfit only costs thirty-five cents. I forbear to remark on other conveniences which this shirt suggests.

A new enamel, which is said to be a perfect representation of burnished iron, has been brought out. A porcelain vase or piece of statuary covered with this enamel is said to pass with experts for artistic iron-work.

Mazarine blue is said to be again coming into favor as a color for richly decorated vases. This is one of the richest tints in the whole range of ceramic colors, but is very costly.

A new toy, which retails for five cents, consists of two pieces of round tin soldered together close on the edges and widening out in the centre to about a quarter of an inch in thickness with a hole in the centre. A string is attached to a hole made for the purpose on the edge and when the toy is twirled in the air a sound is emitted which is like a partridge call. There is a variation in the sound according as the device is twirled rapidly or slowly. The toy is brilliantly painted and is a little larger in size than a silver dollar.

Confectionery pails are now made of a solid sheet of waterproof paper and are guaranteed to hold either hot or cold water. Why they should hold water deponent saith not.

Answers to Correspondents.

Subscriber asks: 1. Who makes railroad ticket printing and numbering machines? 2. Who makes card-boards, especially for tickets?

Ans.—1. R. Hoe & Co., 29 Gold street, New York. 2. Crocker Manufacturing Company, Holyoke. For other names consult Lockwood's Directory.

H. H. K. asks for the address of the mill that puts up the "Eureka Mills" W. C. paper.

Ans.—Ross White puts it up specially for Schiefflin & Co., who control it.

J. & W., who asked for the address of a certain dealer in slates, have been notified of the address by mail.

Mortgages, Etc.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

A substitute for wall-paper has been found in tinfoil, which is stamped and printed with the designs desired by some patented process. The tinfoil is in sheets, thickness of ordinary paper, pliable and waterproof. It is varnished and in every way is artistic.

Hammocks may be made of heavy canvas and trimmed with bright fringe.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 19, 1884.

THE MONEY MARKET.—Monetary affairs have not developed any new feature of special significance during the past week. The market is still characterized by an abundant supply of loanable funds and easy rates of interests, capital still finding difficulty in obtaining profitable employment. Prime indorsements have been readily salable at 5/16 per cent., but the supply is not very large, as there are comparatively few bills of this class making. The stock market has ruled quiet and featureless, the fluctuations having been the result of manipulation, and therefore without significance, while the situation has undergone no actual change. There has been a fair amount of business in railroad bonds at generally firm prices. Governments are a trifle firmer. Sterling exchange is a trifle firmer owing to the scarcity of commercial bills, and while posted rates are still 4.81@4.84, actual business has been done at higher rates.

THE PAPER MARKET.—With the paper trade there has been no noticeable change during the week, dealers continuing to report supplies more plentiful than customers, but withal prices have settled down to a level, at which, if any change takes place, the indications are more favorable to appreciation than to decline. It seems to be pretty generally understood now that the agreement of the writing manufacturers to shut down during the last full week this month, December and January, having received the required consent of 80 per cent. of the production, will be carried out, and this cannot fail of having a very salutary effect upon the market in strengthening the prices of paper, lessening the demand for stock and keeping down prices for the same. That manufacturers are pretty fairly engaged on orders is indicated by the fact that very few of them have visited the city this week seeking new contracts. Although prices generally are about as low as they were before the advance of October 1 was declared, manufacturers have the advantage of about as low prices for rags and other stock have ruled at any time within the past three months; consequently profits are certainly no smaller.

THE STATIONERY MARKET.—Business has improved during the past week, but is hardly what it was during the corresponding period last year. There are more tradesmen in town than there were a week or two ago, and they have shown more disposition to do business than was manifested in the early part of the season. The trade in writing papers and envelopes has varied little from last week, but if anything has improved, blank-books are holding their own, and prices are unchanged. The recent extension of the order of the United States Treasury Department in respect to the importation of rags, it is expected, will, by forcing up the price of paper, cause an advance in the price of blank-books, which will probably take place on the opening of the new year, as profits now are small, and manufacturers cannot, it is alleged, afford to sell at present prices long in view of the advance in the cost of raw material. The trade in fine art albums is not reported to be brisk, the majority of orders for these goods having been placed earlier in the season. Dealers in and manufacturers of writing pads report that trade is very good, more orders having been taken during the past few days than in any previous week during the season.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

13 * MONTHS * IN * USE.

LONDON, 1883.

MR. E. W. BLACKHALL.—Sir: We have carefully tested your Combination Striker applied to one of our OLD STYLE RULING MACHINES, and using the common English ruling pens. We find it does all you claim for it; and compared with the ordinary American Ruling Machine is a great improvement for the following reasons:—

- 1st. Your invention makes our old style machine give TWICE the results of the American Machine.
- 2nd. It gives over sixty sizes to ten of the American, and any change can be made on yours in one-twentieth of the time required to make a change on the other.
- 3rd. It does better work, is easier to handle and is almost noiseless in operation.
- 4th. For stop-work our old machine with your device will give in one feeding results that would require three feedings on the American Machine.
- 5th. Your invention saves all space on the cloth, the sheets touching or lapping as required. A saving of four inches on each sheet in one week's work at thirty reams per day would be 57,000 feet of space gained as a profit in favor of your machine—a great saving of time and labor.
- 6th. We find results are obtained almost equal to the best hand-work, producing 50 per cent. more work on one stop, and 150 per cent. on two or three stop-work.
- 7th. We should think that any ruler of fair average ability, could after one or two week's use produce the foregoing results and work the machine without further instructions.

We are pleased to say that your Striker has proved a perfect success and meets our warmest approval for its general merit.

We are, Sir, yours faithfully,
For WATERLOW & SONS, Limited, GEO. S. WATERLOW.

SAMPLES AND PRICES ON APPLICATION.

Ancient Playing-Cards.

In no part of "Old London" is there greater interest than in Goodall's stall, where "Playing-Cards" from the earliest possible period to the present are exhibited. There is an interest here far beyond the ordinary exhibits in "Old London." When one sees the manipulation of new cards, cutting and packing under the modern system, one knows not what is behind. The speed of new manufacture is not so well represented as at Messrs. Goodall's works at Camden Town, but it is sufficient for the purpose of showing the advance of ages, and how playing-cards have been a feature in the past as well as in the present generation. It is difficult to define the exact era when "Playing-Cards" first came into existence, but certainly Goodall & Co. show the Arabic cards of 1470, which were produced from copper engravings and are unique in character. A book may be well written upon this collection, and some early specimens of King Solomon and the Queen of Sheba might make a text-book for modern commentators. Early German playing-cards have a most decided novelty to modern critics. Then we see what are called Court cards where kings, queens and knaves are intriguing, if we interpret the history properly, and very curious are the ideas which fluctuate in one's mind when reviewing them, Teaching geography with court cards, in the time when Charles II. was king, is interesting and amusing. The four suites are four parts of England, and the thirteen northern counties are clubs; the western are spades; the eastern are hearts, and the southern are diamonds. In each card we have a map of the county and chief towns, with a compass for the bearings and a scale for the mensuration. There is also given the length, breadth and circumference of each county; the latitude of each city or town, its distance from London, and other features, such as hill and dale, wood and valley, and frequently architectural views. A complete pack of the Parol cards, printed in Bologna in 1672, with cups and medallions, are not only artistic but interesting to modern critics. The German playing-cards, printed at Prague in 1664, have emblematics and colorings of an extraordinary nature, more in the character of the modern Japanese than anything we have seen. We are next shown a pack of English playing-cards with suites of hearts, clubs, spades and diamonds—the court cards with portraits—the English nation being represented by Charles II., and other countries having their representative kings and queens in their then attire. This was printed in England in the year 1680. There are grotesque German cards following this, which we have not space to mention. In a humorous sense, however, we may say that at the close of the seventeenth century there were French caricature cards, where kings and queens are fat and podgy, and retainers carry on their breasts the amount of service they are desirous of rendering, or, as modern politics would point, "You give your service, and you take your pay." The signs of the constellation printed from copperplate is a neat

specimen of early playing-cards. The Biographical playing-cards, in which classical medallions take form, and astronomical ideas assume position, are alike worthy of regard. We have, however, passed over what may be regarded as a great feature in playing-cards when an old author endeavored to teach the Bible history by "playing-cards." Adam was then the king, and Eve his queen. These were published in 1591. We were also shown a very curious fortune-telling book by cards. Again, we see Heraldic playing cards of the "Peers of Scotland," by Walter Scott, Esq. (not Sir Walter), and these are painted by hand, and bear date 1691. One other feature in Messrs. Goodall's stall. We were shown a pack of playing-cards engraved by Virgil solis. Every king, queen and knave have monkey faces with regal robes. One would think a reissue of these, at a period like the present, when the many denounce the higher assemblies, would sell. Playing-card makers are, however, like ourselves, distinct from politics. They produce in these days works of art, and make these works of art as closely as possible in conformity with the purses of the masses.—*British and Colonial Printer and Stationer.*

Asbestos Bank-Notes.

A new kind of paper for bank-notes, bonds, and other securities is made by combining a sufficient quantity of asbestos to prevent the entire destruction of the paper by fire, with palmetto, hemp, or its equivalent, having long fibre to impart greater strength.

The paper is further made with the denomination of the note or other security designated by means of silk fibre of different colors introduced within the body of the paper in the course of manufacture. For example, green fibre is taken to indicate \$1; orange to indicate \$2; blue, to indicate \$5, and scarlet to indicate \$10. For \$20 any two of these may be combined, and for \$50 and \$100 and documents above that value three of the colors, according to any prearranged system. The fibre is also used for indicating the ownership or origin of the bank-note or other instrument by initials, names, or any other mark, private or otherwise, or any suitable device or form in which the colored fibre may be arranged.

The object in employing palmetto as the principal material for the body of the paper is to insure perfection in the printed impression. Asbestos is employed to provide a non-conductor and to afford protection from the action of heat. In addition to the effect of the colored silk fibre in indicating the denomination and ownership of the note it is useful in adding strength to the fabric.

The bank-notes, bonds, certificates, and securities are to be printed in three colors, using black carbon-ink, green oxide of chromium, and burnt sienna. The object of using these three materials for color is that they are all produced at a higher degree of heat than could possibly reach the bank-note or other document in a safe of any kind when exposed to fire; hence the matter printed may remain uninjured in color in the event of fire, and will assist in the identification of the printed instrument.

To further increase the durability of the ink, mica or asbestos, or both, are mixed therewith, previously pulverizing the same.

CHICAGO CULLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, November 17, 1884.)

There is a very amusing feature to all of the apprehension and solicitude in view of a prospective change of administration. In the business world, from the bank president down to the messenger-boy, there is no little fear and trembling for the safety of individual interests; and the anxiety they all feel in behalf of the country is truly beautiful to contemplate. In justice to all concerned, however, it must be borne in mind that the sleep lost to the banker on this account is not to be mentioned in the same breath with the terrors the situation presents to the messenger-boy. The financier feels a slight hesitancy in making large ventures until he is assured that no radical departure from beaten paths is to be taken; the heavy stock manipulator pursues a mild and conciliatory course and waits for the crisis; the ordinary speculator, fearful of a sudden "boom," shuns the "short" side of the market, and, acknowledging a break equally imminent, is correspondingly shy of the "long" side; the wholesale merchant has hopes on the tariff question, in its relation to the duty on his imports, and anathematizes the stupidity of the retail dealer in imagining that the affairs of government have anything to do with his petty interests. As a matter of fact, it is the small tradesmen who are most apprehensive on the subject. The astute side-street diplomat, who runs a \$1,000 book and stationery business, has his doubts of the wisdom of a prospective foreign policy, and dares not replenish his scanty stock until his suspense is ended. The street-car drivers and bridge tenders alone seem indifferent; they wisely restrict their political proclivities to the confines of the municipality. The near approach of the holiday season seldom fails to enliven trade of all kinds. The shopkeeper gets in an attractive stock of Christmas and New Year goods early, and his customers find the attraction irresistible. They begin to spend money freely, and naturally exert themselves to replace the dollars which slip away so easily for Christmas gifts; consequently, there is a spurt of activity all around, no matter how dull the season may have been.

Rand, McNally & Co. have just issued the third edition of their "Pocket Cyclopædia," a handbook of useful information. It is a handsomely-gotten-up little volume, containing tables, rules, practical hints and historical sketches, for farmers, mechanics, machinists; bankers, merchants and the public generally. It contains numerous colored diagrams, illustrating some of the more important comparative statistics of the world. The retail

price of the "Cyclopædia" is twenty-five cents.

The same firm has published a new indexed pocket map of New York State, and also one of Pennsylvania. Both of these maps have a fine cloth binding. It has also issued an indexed county and township pocket map, and Shippers' Guide of Kansas, accompanied by a new and original compilation and ready reference index, showing in detail the entire railroad system, the express company doing business over each road and accurately locating all cities, towns, post-offices, railroad stations, villages, counties, islands, lakes, rivers, &c. The special features of this pocket map are: Locating the branch or particular division of railroad upon which each station is situated; the nearest mailing point of all local places; designating money-order post-offices, telegraph stations and naming the express company doing business at the points where the several companies have offices. The population is also given according to the latest official census.

The American Tract Society has announced several new books, among which may be mentioned "Honest Willie," by Lydia L. Rouse. This is a home story of life in Scotland, with many scenes of deep and pathetic interest during the days of persecution. The brave and loyal characters described are fine models for our young readers.

The Superintendent of the Chicago Depository of the Presbyterian Board of Publication has the following books for the holidays: "Half-Hours with the Lessons" and "Peloubet's Select Notes." A fine lot of bibles for teachers can always be obtained there.

The Chicago exhibitors at the World's Exposition met at the Palmer last Thursday. About fifty were present. Frank Gilbert pre-

sided. They decided to open rooms at New Orleans to accommodate all Chicago exhibitors and those wishing to do business with them. To carry out this scheme an association was formed. The officers elected were: President, J. H. Bradley; secretary and treasurer, H. W. Caldwell; superintendent, J. A. Norton; Executive Committee, A. W. Kingsland, A. Hildreth, C. H. McCormick.

Inquiries regarding the accommodations to be had in New Orleans during the Exposition have resulted in a communication from I. B. Walche, chief of the Department of Information and Accommodation, in which he states: "This department has been organized for the express purpose of aiding all visitors to the Exposition, not only in securing suitable accommodations at moderate rates, but in protecting them in every possible way from excessive charges, and this service we render free of cost. The rates will vary according to location and style of entertainment. Furnished rooms will be from 75 cents per day and \$15 per month up to and including \$1.50 per day and \$30 to \$40 per month. Board and lodging will be double the above, and the best hotels will not advance their rates. The St. Charles will charge, as usual, \$4 per day, while the new Hotel Royal will be conducted on the European plan; rooms from \$1 per day up to the choicest apartments at \$8 and \$10. Other hotels in the city, as also those now in course of erection in the vicinity of the Exposition grounds, will charge from \$2 to \$3 per day, according to the location of the rooms. These rates will prevail during the entire period of the Exposition, and there will be no lack of comfortable accommodations at these prices."

The streets and principal hotels here lately seemed completely given over to cattle kings from all parts of the Northwestern States and the plains of the far West. Never before, probably, has there been so great a number of breeders of fine stock gathered together at any one time.

The American Fat-Stock Show has attracted numerous visitors, the attendance during the evenings being very large. Noz.

WHITE'S EYE SHADE,

—→ WITH AUTOMATIC SPRING. —→

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

Dolls.

Dolls are our children's children, and, therefore our grandchildren. They are only removed by one generation from our real nurseries, and extend one link further the chain of family responsibilities. Nurses look after the babies; but the babies, in their turn, are nurses also, and, if the truth were told, are far the more conscientious of the two. Their solitudes are infinite; for, though little more than dolls themselves, they combine in their own small persons all the duties of domestics, trials of governesses, anxieties of parents, and, where necessary, responsibilities of physicians. In addition, they are the dolls' milliners, music-teachers and dancing professors; they have their physical, religious and moral developments upon their consciences. In a word, they are the providence of the doll. How hopefully and bravely they bear this almost intolerable burden of prerogatives and functions everybody knows who has ever watched a little girl with her rag baby. With what cheerfulness, too, they meet the ever-shifting conditions of the doll's health and temper, and with what patient tenderness—a perpetual lesson to nurses and mothers—they conform to every whim and need of their exacting charges! Yet when severity is called for they do not shirk the painful responsibilities of the case, but administer correction in a spirit of generous justice which is as delightful as it is praiseworthy. They listen unmoved to the lamentations of the puppet standing in the corner with its face to the wall, until they feel convinced that there is true sincerity of repentance. They send it to bed without its supper again and again in the course of a single morning without exhibiting any symptoms of unworthy concession to the hungry but impenitent doll. Nor when chastisement is considered appropriate are they ever found backward in the duties which they owe to their little ones, but they administer it with an enthusiasm which, though it may let some of the sawdust out of the seams, is otherwise salutary in the extreme. The very first symptom of an approaching illness is invariably detected; the warning is promptly acted upon, physic administered, change of air and diet at once obtained and with the happiest results. For who ever heard of a doll that died from neglect? On the contrary, it always recovers. Its ailments, being attended to at once, are nipped in the bud. They never have time to get into the system, nor the opportunity of becoming chronic.

It is not, of course, possible for grown-up people to analyse the little girl's sentiments toward her dolls. In the first instance, they are maternal, of course; but this tenderness is complicated by the other relationships that exist. The child is not only the mother, but the godmother too, and the elder sister as well. She is its grandmother and its aunts and cousins—to say nothing of being all its everyday acquaintances in addition. Moreover, she stands toward the doll in the relation of the clergyman of its parish and its family physician, its college of professors and its morning newspaper. But, mixed up

as her sentiments thus become, they might be classified and understood were it not for the fact that a doll has no identity of its own. It changes its name from time to time, and becomes somebody else at each alteration. Yet the same loving solicitude pursues it through every phase of its shifting existence, and to the end of its days it is the object of an untiring and most exemplary affection. Moreover, if a child be pressed upon the point, she admits that her doll is not really alive. The sawdust inside it goes often a considerable way, no doubt, toward making this unlikely. She talks wisely of the improbability of an authentic baby having a wax head and shoulders hitched on to a rag body, and points to the parting in the head where the hair is fixed in, as an evidence of its being "only a doll." Her opinion is occasionally further strengthened by other details of construction which, taken altogether, eventually convince the small philosopher that her possession is really only a plaything. This does not make any difference, however. Her imagination proves equal to the severest strain, and, let the doll be never so incomplete, she sees it, from the unassailable heights of fancy, whatever she pleases it shall be. It is curious, too, to observe how superficial the child considers good looks. Prettiness of face or regularity of features goes for very little. These succumb to the ravages of time, and bit by bit the plaything loses its charms. The front of the head is flattened out of all feature; the back has had a large hole knocked in it. As a rule, however, these imperfections do not make the slightest difference. On the contrary, the fondness for it seems to increase in proportion to its afflictions, and in every family the phenomenon is well known of the "old" doll which is always the greatest favorite. New ones come and go, but the original dummy, with an indistinguishable face and shapeless body, remains supreme in the favor of the nursery. It has fallen into baths times beyond number, has been left out on the lawn night after night, has been worried all round the garden by the pug, fell once into the fire and twenty times out of the window, has been sat upon, thrown about, thumped and ill-treated by several elder brothers in succession, has been executed by them on many occasions as a notorious criminal, and its suspended corpse given to the fowls of the air; has seen, in fact, and suffered all the ills that dolls are heir to; yet this unfortunate relic, this torso, this fragment, refuses either to go out of existence or to resign its place in the family affections. Under all provocations and temptations to do otherwise it persists in being imperishable, and none of the new-comers, let them be ever so smart, can oust it from the honorable regard of the household. When a raid is made upon the nursery accumulations, and the "rubbish" is cleared out, the suffrages of the children are all unanimous for the retention of the "old dolly;" and so from generation of playthings to generation, the venerable effigy survives in undiminished affection.

Thus a doll-shop is really something much more serious than it seems. The shelves are

piled up with boxes, and in all of them, wrapped up in tissue paper, are dolls. As yet they are hardly born, for their life only begins when they have found a mother in a purchaser. From that moment they live, and their existence, if we consider it, is not very seriously unlike that of our children. The lives of the latter are really mysterious to grown-up folk. We dress them, feed them, teach them, do our best to make them good and keep them so; we amuse ourselves by playing with them, and we love them. But this is not the child's life. It lives in another world altogether, and whenever it is released from the irksome necessities of humanity it goes back at once to its corner in the nursery, where there are houses and churches and schools, ships and railway trains, streets and gardens, and where the people are all dolls. All the events of the larger world revolve in a mimic circle within that corner. There are joys and tears, goodness and evil, reward and punishment. Here the little girl is really at home. Everything is within her comprehension. Among adults she finds much that puzzles her with its dullness, for grown-up people must seem very dull folk to children. Sitting down with her dolls round her, however, she has all the threads in her hands, and finds things happen in an intelligible and diverting way. Her puppets are thus, in fact, the most real beings she is acquainted with. Never mind about the sawdust. They talk to her and play with her in a fashion that she thoroughly understands. They keep within her intelligence, and never inflict upon her the problems and standards of a superior capacity or of older minds. They are, in fact, her truest companions and confidants. To them only does she tell everything. So that if we look at the shelves of the doll-shop from another point, we find ourselves confronted with an infinity of interesting considerations. What varying fates and fortunes are before this company of tiny effigies! One by one they will go out into the world to be the friend of some little girl, her comforter in trouble, her favorite companion in pleasure. Each in turn will start upon a career as individual as that of the baby to whom it is given, will suffer as she suffers, and share her every joy. The love that we lavish upon our children they pass on to their dolls, with as sincere a solicitude as any that parents can show. This plaything, therefore, somehow stands distinguished from all others as having a reflected humanity. As we have said above, they are the children's children—and, consequently, our grandchildren.—*London Telegraph.*

Rust upon steel may be removed by covering the rusted part with oil or fat, letting it remain three hours, and wipe off with a cloth; take two drachms caustic potash and four ounces opodeldoc, rub on the mixture, and let it remain ten minutes; rub off dry with cloth. Or cover the rusted part with sweet oil, well rub in, and next day cover with finely-powdered unslaked lime, and polish with this until the rust disappears. Or take half an ounce of emery powder, once ounce of soft soap mixed, and rub well.

Playing-Cards.

Playing-card making is the only branch of industry connected with the paper and printing trades in connection with which stamp and excise duties are still levied. The duties on cards were imposed in 1711, the rate being sixpence per pack. This duty was doubled in 1756 as regards Great Britain, and in 1773 as regards Ireland. In succeeding years the rate was gradually raised until the maximum of half-a-crown was reached in 1801. This prohibitive rate of duty continued in force until 1828, in which year it was lowered to a shilling, and in 1862 it was farther reduced to three-pence per pack, the rate now in force. This reduction was made mainly in the hope of suppressing the enormous evasion of the duty which notoriously prevailed. It was confidently asserted by some of the card makers at the time, that the clandestine manufacture of playing-cards was carried on to such an extent that one person alone, who was engaged in the trade, had owned to the sale of more unstamped packs in one year than the whole number which had been charged with duty in the same period, viz., 260,000 packs.

Apart, however, from the clandestine manufacture which was thus encouraged, and the restriction imposed on the trade, the old system of levying duty upon playing-cards was attended by other evils, which it may be worth while to recall. The ace of spades, which bore the stamp, was supplied by the office of Inland Revenue, and pasted on the cards by the makers. These aces were supplied on credit, the duty being exacted when the manufacturers made up their packs for sale, at which time an officer attended to put on the wrappers and take an account of the number of packs. The ace of spades being thus always prepared by the Revenue Department, that important card was different from the rest of the pack; and this difference, though slight was readily perceptible to the touch, so that, in fact, this stamp duty was on the one hand fostering the clandestine manufacture of unstamped cards, and was on the other abetting the designs of card-sharpers. The change of legislation in 1862 swept away a mass of most complicated and restrictive measures, and as a necessary corollary the manufacture of playing-cards has since then increased at the rate of something like 450 per cent. In the last year of the old duty 272,000 packs of playing-cards were stamped; in the following year the number was 660,000 packs, and in 1870, 984,240 packs, while the aggregate total for the financial year ended last March, was 1,204,560 packs, which last-mentioned figure shows, however, a diminution of 12,400 packs as compared with the year 1882-83. The revenue derived from the stamp duty on cards during 1883-84 was £15,057.

Concurrently with the stamp duty of half-a-crown per pack of playing-cards, to which reference has been made above, other restrictions were in force which seem to have been framed with the sole object of restraining trade. For instance, no cards were allowed to be made in any place in Great Britain except London, Westminster, and Southwark,

nor in Ireland except in Dublin. A license tax was, moreover, levied on makers. This tax originated in 1828, the amount being then fixed at five shillings. In 1863 it was altered by the imposition of a license fee of one pound for each maker, and half-a-crown for each seller of cards. In 1878 the provision as to the holding of a license by sellers was repealed: the maker's license duty continues, however, in force down to the present day. It is probably due to the restriction as to the exercise of the manufacture in other localities than those above mentioned, that the trade of playing-card making has always been in comparatively few hands. When the system of licensing came first in force there were only twelve makers (including individual partners of firms) in the United Kingdom, and all these were resident in England. In Scotland the manufacture has never taken root—at least it has not been carried on there during the present century. In Ireland, too, there was no maker down to the year 1863, with the single exception of 1833, in which year one manufacturer seems to have carried on business there; and even at the present time only one maker is resident in the sister kingdom, while sixteen (including individual partners) carry on business in England. It is a singu-

lar fact that the number of playing-card manufacturers in the United Kingdom has never exceeded twenty. There are few other branches of industry the membership of which is equally circumscribed.—*Printing Times and Lithographer.*

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY AWARD** given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 126 and 128 Duane Street, cor. Church, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 22. NEW YORK, NOVEMBER 27, 1884. WHOLE NO. 492.

Correspondence.

CINCINNATI NEWS.

[FROM OUR REGULAR CORRESPONDENT.]

Cincinnati, November 24, 1884.

Here they are like the locusts in Kansas—clouds of them—that is, of commercial travelers. Some flit by, but many stop to try the taste of this pasture. Among the latest visitors of the genus above described, namely:

From New York—John Dovell, with Thaddeus Davids Company; John B. Gunn, with Eberhard Faber; H. L. Dewey, of the National Blank-Book Company; Frank C. Johnson, of Liebenroth, Von Auw & Co.; A. J. Schad, of Daniel Slote & Co.

From Philadelphia—C. W. R. Smith, representing the Hampshire Paper Company; S. B. Fisher, with the B. B. Hill Manufacturing Company; a representative of the Riverside Paper Company.

From Massachusetts—George E. Parmenter, with William A. Davis, Boston; W. A. Hall, with Worthy Paper Company, Mittineaque, Mass.; A. H. Hill, with Holyoke Envelope Company.

From New Jersey—E. Walter Giles, with Esterbrook Steel Pen Manufacturing Company; T. S. Buck, with Lambertville Rubber Company.

Miscellaneous—Wm. C. Hubbard, with Merriam Manufacturing Company, Durham, Conn.; G. W. Blatherman, Maysville, Ky.; C. E. Akins, with Tablet and Ticket Company, Chicago.

This "gang" worked the town for all there was in it. From now on their like will swarm in here until near Christmas, when they will seek the luxuries and the repose of their homes for a brief season. As it is, their movements are hurried and flitting.

A very decided change in trade for the better set in during the latter part of last week. It came unexpectedly, but was none the less welcome. Whether this change will be enduring is the interesting question at the present moment.

W. B. Carpenter & Co. say that their sales of counting-room outfits during the week has been very large. In the sale of letter-presses they never had a better week.

J. R. Mills & Co. report that their trade

in mercantile stationery has been very large. Other manufacturers join in the same sort of testimony. These are signs of a restoration of confidence which may be relied upon and are the advance heralds that announce a revival of business.

The Christmas holiday trade has not been counted on for much this year until this little improvement in trade came along. Now dealers are duplicating portions of their orders, and are looking for fair holiday sales.

Book buyers for home reading are, as a rule, choosing rather low-priced books, and those who buy books excluded from the low-priced class are not disposed to pay for fine, much less fancy, binding. But a permanent revival of business will change all this and set consumers of books back into their old habits.

Many of the manufacturing stationers have improved the leisure the dull times afforded for improving their shop conveniences.

W. B. Carpenter & Co. have recently fitted up pneumatic tubes for carrying copy to their printing-office and blank-book and envelope factories; also electric bells and speaking-tubes, whereby Fred. Sellers, the chief of their manufacturing department, can, without leaving his seat, communicate with any man in any of the factories, as well as receive and send up proofs and copy.

The sale of school-books by Van Antwerp, Bragg & Co. has increased instead of falling off by comparison with sales of previous years.

PRINCE WILLIAM.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

Pittsburg, November 24, 1884.

No. 20 of THE STATIONER was certainly most excellent, and it presented many a hint which will be of advantage to the trade. I find running in the trade a strong feeling of kindness toward THE STATIONER, and even among the *laity* it proves interesting. Not taking any credit whatever (for I am comparatively a novice), I believe that the letters published from your correspondents afford most pleasant reading, and give the pleadings in the case in such good shape that the court at New York can frame a very fair opinion as to the standing of the parties in the various matters in which they are interested.

Business of all kinds in and around Pitts-

burg has been exceedingly dull for some little time, and I regret to say that the outlook is not at all bright. There are 21,000 men in the city and immediate vicinity out of employment. That means fully 100,000 mouths to feed without anything coming in to pay for the provisions; it means over \$15,000 shut up weekly that ought to be circulating among our merchants; it means that our men of means will be required to practise generosity and charity this coming winter. I pity the poor women and children from the bottom of my heart. Many of the men deserve no sympathy, for they struck for higher wages in the face of the apparent impossibility to grant them their demands.

A number of our largest manufacturing industries have given notice that they will make a reduction of 10 to 20 per cent. in the men's wages. They are compelled to do so, for the warehouses are crowded with manufactured goods, and orders are coming in very slowly. Many will be required to take severe lessons in economy.

I met James B. Dodge to-day, and was informed by him that, notwithstanding the quiet state of business, he had a fair trade. Mr. Dodge began the book and stationery business on rather a small scale about twelve years ago. His success has been sure, and he is in a position to stand a good deal of business depression. His store is convenient to Blackstone's disciples, and from them receives a very large patronage for legal supplies. He also has the lead in the supply of Catholic literature, which is no small item in this city.

On Thursday last Henry Meyer, successor to Henry Miner, was shut up by the sheriff on an execution for \$2,500 in favor of J. E. Sonnenberg. Mr. Meyer, after the purchase of the old Miner stand, spent a large sum of money in remodeling the store and adding new goods. His many friends cannot but regret to hear of his misfortune.

The Edgar Company holds its own in the trade, but has to admit that a better demand for periodicals and books might be wished for.

Frank Echols comes up more chirpingly than any book-man I have met lately. He has charge of Rosenbaum's book department and reports large daily sales. Frank is a capital salesman, and one of the most honor-

able young men I ever had the good fortune to meet.

Geo. W. Backofen, the genial "German," has a very fine trade in German literature, and especially does he command a large business in the art-furnishing line. He has an old stand and one of sterling reputation.

The general stationery trade is quiet, but by the middle of next month I trust I can write a letter with a little less indigo than pervades this one.

The members of the National Gun Foundry Committee are in the city to-day and will visit the leading steel plants. No doubt they will be well treated by our iron and steel manufacturers. I have no fear of the plants not speaking well for themselves. They are of the finest order, and, in your correspondent's humble opinion, Pittsburg is as well situated and qualified to carry on the National Gun Foundry as any city in the Union.

G. W. H.

PHILADELPHIA ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, PA., November 25, 1884.

A visit to the leading book-publishing houses of this city reveals the fact that this branch of business, like nearly all others, is feeling the effects of the dull times.

Porter & Coates, 900 Chestnut street, report a very fair retail trade, but say that the wholesale trade has been considerably less than usual at this time of the year. Fewer books are being published, and most of those that are being produced are published at the author's expense. In many cases they have to refuse to publish altogether, so much trash is written to one real work of merit. Certain standard works of well-known authors are always to a certain extent salable, but the demand of the American public is mostly for something new. Even new styles of binding, new illustrations, new typography, and lower prices fail to always make books sell. At the present time "alligator" is one of the most popular styles of binding. It is hard to say how long the craze for this style may last. It is certainly a very neat and durable binding, and one which ought to have considerable run, but public taste is very capricious, and for no apparent reason a change may at any time be demanded. Bishop Heber's "From Greenland's Icy Mountains," Tennyson's "Lady Clare," and other works are being issued this fall in new dress, with handsome illustrations from the pencil of such artists as Schell, Fenn, Church, Garrett, Perkins, Fredericks, and others. A teachers' edition of Smith's Bible dictionary, edited by F. N. and M. A. Peloubet, will be found handy and useful. An excellent work from the pen of Elferslie Wallace, Jr., entitled "Amateur Photography," for the low price of \$1, will commend itself to all who may feel interested in that art which has gained so largely in popularity in the last year or two. "Life and Travel in India," by Harriette Leonowens, will be ready for issue in about a month's time, and a new book for girls, "Doris and Theo-

dora," by Margaret Vandergrift, will also appear shortly. "Rod and Gun," "Do and Dare," "Ned in the Woods," &c., are offered to the boys. Yet, in spite of every inducement that is offered to attract purchasers, the hand-to-mouth spirit has been, is and is likely to be, the characteristic of the book trade for some time to come. Both author and publisher find it hard to make things go; but if good style in the "get-up" of a book can make it popular, this firm have no reason to be discouraged. But something more seems necessary. It remains for general confidence to be restored to the public mind before we can hope for any active trade in any line.

J. B. Lippincott & Co., 715 and 717 Market street, say that they have not lost any customers because of the dull times, but that each and every one is buying much more cautiously than heretofore. Probably the orders from their wholesale trade will not amount to much more than one-half what they usually receive so near the holidays. Their retail department has been fairly up to the average this season, and they are anticipating a very lively holiday trade. Following the policy of most houses, they are publishing most of the works they are bringing out at the expense of the author. Some few works they are bringing out on their own responsibility. Among the new editions they are offering to the public this season are found "The Seven Ages of Man" from Shakepeare's "As You Like It," with illustrations by Church, Juengling, French and others; "The Wagoner of the Alleghanies," by T. Buchanan Read, also handsomely illustrated by well-known artists; "Doris," a popular novel already in its second edition; a new artists' edition of Gray's "Elegy," and many others. Their collection of holiday goods, both for young and mature minds, surpasses anything they have hitherto presented to the public, and the styles of typography and binding are unique and beautiful. The fall trade in school-books was probably fully up to that of other years. The different branches of the trade are differently affected by the depressed state of business. Those works which are indispensable have sold in about the usual proportion, while the works of luxury, if such a term may be used, show a considerable falling off in sales.

Henry C. Lea's Son & Co., 706 Sansom street, publish medical works exclusively, and say that the present year has been a rather quiet one with them. The present is always a dull time of the year in their special line, but the amount of trade varies less from year to year than in some other branches of the publishing business.

William J. Campbell, 740 Sansom street, is a publisher of law books and an importer and collector of valuable editions of rare and curious works, many of which are no longer published. In the staple works of legal literature, what may be termed the lawyer's tools, there is always a steady demand. This branch of the business has not suffered so much from the general depression as has the foreign and antiquarian department. Some of the foreign works now on his shelves are well worth the inspection of those who seek fine works of art.

Peter F. Cunningham & Son, 817 Arch street, publish works of a religious nature exclusively, particularly those pertaining to the Catholic denomination. Like all others they have felt the effects of the dull times, and say that business has been, perhaps, one-fourth less than that of last year. Fewer new books have been published this year, and but little improvement is looked for for some time to come.

Garrigues Brothers, 603 Arch street, make a specialty of Sunday school works, and have published quite a number this season. Their wholesale trade, strictly speaking, has been rather more dull than usual, but they do a semi-wholesale trade in supplying books in large quantities to Sunday schools at a discount from list prices, and this branch has been fairly active this fall. Speaking of the styles of binding in which these works were gotten up at the present day, it was said that the popular taste called for neat, æsthetic designs, with more or less gilt. Gradually, however, the amount of gilt was being reduced, as it did not stand the wear and tear of use as well as some plainer but equally neat styles of binding.

Fisher & Brother, 614 Arch street, are among our oldest book publishers, this being the fiftieth year they have been engaged in the business. They report trade as quiet with them for the year, but say they have made no especial effort to push business, having decided to retire from business at the termination of their semi-centennial. They have for years published a series of popular almanacs, and will issue them for 1885 as usual. Of late years they have given a good deal of attention to the publishing of works for children, some of which have met with large sale. We shall be sorry to lose them from our list of publishers, but they retire with an honorable name after their half-century of faithful devotion to business.

The American Tract Society, though having its office in this city, does all of its publishing in the New York house. It reports business less active this year than last, though as to the exact proportion that trade has fallen off it would be difficult to say exactly. The prices of books have been very much reduced of late years—so many publishers have begun retailing, and there is less profit now for the middlemen. At one time books were always sold to the consumer at list price, with a discount of 20 per cent. to the trade. Now every one buying even a single book expects to get some reduction from the list price. There has been a gradually increasing demand for cheap editions of the different works. The cost of books has declined in perhaps greater proportion than most other products of labor. Books which a few years ago sold at \$2.50 sell to-day at \$1.25; \$1.50 and \$1 books have declined to 35 and 50 cents. For a certain class of literature less expensive binding is used and in this way the cost can be greatly reduced. It may be said, however, that a great deal of good literature has been thus brought within the reach of the masses, though this might be supplemented by the statement that

(Continued on page 728.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

(Continued from page 724).

an equal quantity of pernicious literature has also been thrown upon the market. But the balance is in favor of the good that has been done. Profits may have declined considerably. It is well known that books are sold to the trade for 12½ cents that cost 10 cents to get up, and the publisher has to run all the risks of getting the work out, and of bad debts for this trifling profit. If the book commands ready sale he can make by the transaction, but he has a good many chances to take, and sometimes he gets left.

Henry Carey Baird & Co., publishers of industrial works, find a falling off in demand for industrial publications, except in the field of electrical science, and in that there is considerable activity. The number of readers, thinkers, inventors and writers is steadily increasing, and the interest in electrical matters is growing rapidly. Electrical science is dividing or breaking up into three fields—that pertaining to light, that pertaining to motive power, and that pertaining to telegraph and telephone work. Specialists are arising in each, and in due time these will be still further subdivided until the furthestmost limits of this vast field of the Unknown is searched for its hidden lore. Thus far, the English are the most prolific writers; but their voluminous wisdom only follows in the wake of American mechanics like Edison, Bell, and other like pioneers. The best works are reproduced by American publishers from both English and continental writers, and they are sought by students, inventors, mechanics, scientists and others who are delving in this department of activity. The best thought of the age is directed to electrical science, and vast probabilities lie just beyond the accomplished results of to-day. Among the best known English writers are Gordon, Kempe, Maxwell, Sprague and Thompson. Among rising American writers are N. S. Keith, Thomas D. Lockwood, Lieutenant Bradley and Fiske, and George B. Prescott, each of whom are developing into specialists. Behind these are looming up scores of literary amateurs who hope to win distinction. Besides these are hundreds of young mechanics who are fired with a spirit of emulation and ambition which leads them to push blindly almost through intricate and generally fruitless experimentation, so far as practical results are concerned. The commercial success of electrical devices and appliances stimulates endeavor. Philadelphia excels all other cities in its per capita electrical appliance supply. Several new works are coming out in England and on the continent; but the freshest results are to be found in electrical periodicals, which are gathering together the best writing ability of the age. Recent industrial publications are works on glue, and on the manufacture of bricks and tile. A new work is soon to appear on leather, its manufacture and manipulation. The dullness in the industries and the possibility of continued dullness, is having an unfavorable effect on the book market in this line; but aside from this there is a steadily improving demand for industrial literature.

T. B. Peterson & Brothers, publishers, are

preparing to bring out a large supply of popular literature of the same excellent character for which they have become famous, among them "The Wife of Monte-Cristo," "The Son of Monte-Cristo" and "The Countess of Monte-Cristo," just published by T. B. Peterson & Brothers, Philadelphia, but already pronounced successes. These fine romances, fully worthy of Dumas' pen, appropriately

conclude that celebrated novel, "The Count of Monte-Cristo." All the characters figuring in Dumas' masterpiece, the Count himself, his wife, Haydee, his son, Esperance, Mercedes, the sweetheart of Edmond Dantes, and all the rest, are introduced. These books literally overflow with exciting episodes.

The need of entertaining literature of a wholesome character was never greater. The

number of novel-readers is on the increase, and these publishers have not been slow to recognize the tendency in this direction. Their catalogue contains a vast amount of useful information, and they could be instructively perused. P.

Discontents arise from our desires oftener than from our wants.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

Raphael Tuck & Sons' Cards.

Raphael Tuck & Sons are showing samples of their fine art publications to the trade, and will be ready to receive dealers who wish to inspect the same at their New York branch house, No. 298 Broadway (which is now being fitted up), by the first week in December. The firm's line embraces a great number of different designs of Christmas, New Year, birthday, valentine, Easter, wedding, floral study, relief cards, &c., &c. Its collection of birthday cards alone embraces 300 sets, comprising 1,000 designs. The firm makes a specialty of a beveled-edge card of special thickness, which is sold as low as cards of the ordinary thickness. In folding-cards there are thirty different sets, embracing trifold, twofold and fourfold screen cards, which come in very tasteful and pretty designs. The firm also makes a leading specialty of a heavy satin panel card. No house, it claims, publishes a similar line of these goods. The panel cards come in forty separate sets. They are made of heavy cardboard, with a chromo-lithograph design on satin, the effect, owing to the softness of the material, being very much like a hand-painting. The satin cards also come in different forms, one of which is a diamond-shaped card, which is very popular. A number of designs are by the celebrated artist, Baroness Beckendorf. One of her latest designs is a moonlight scene, with a spray of blossoms in the foreground. There are four designs in the series, each of which contains an appropriate verse in the top right-hand corner. It may be well to state here that all of the sentiments on Raphael Tuck & Sons' cards are written by the best writers. The firm has also a line of blank satin tablets for the use of amateurs. They are in twelve sets of different sizes. Hitherto printing upon satin has been attended with difficulty, owing to the fact that by the ordinary method the colors run. The firm has entirely obviated this by the use of a liquid called veloutine, which it alone prepares.

The firm has a full line of plush cards, which are produced for birthday, Easter and valentine presentations. These come in an endless variety of designs. Its sachet cards have designs both on the back and the front, thus completing the *tout ensemble*. There are also grained silk cards with mounts of satin flowers; silk book cards, twofold and interleaved; also what it calls a music sachet, the sentiment on the card being written in music.

In Easter cards the firm also endeavors to excel. Its Easter trade is a very important part of the firm's business, its line embracing 100 different series. A very beautiful design is an angel card, by James Sant, R.A., the copyright of which cost £200. There are also a great variety of text cards known as the "Rock of Ages" series; also cards for framing with a space for the portrait of a deceased friend; floral screen reward cards, &c.

In congratulation wedding cards there are satin and plush single and folding cards in numberless designs, all of a very chaste and delicate character.

The firm's line of relief scraps is very extensive embracing everything conceivable in these goods. Many of its scraps are entirely new this year.

The firm has also a large number of floral studies. The reception of these goods has been so flattering everywhere in previous seasons that the firm has published 100 new studies this year.

LONDON, ENGLAND, 1883

Sir: We have much pleasure in stating that your Combination Striker and other appliances for Ruling Machines, also your Rotary Perforating Machine, are capital inventions, and very soon repay themselves. We can speak confidently of the efficiency of these machines, having thoroughly tested them; we are using them constantly and should be pleased to show them running, as we fully endorse everything said in their praise by other firms who have them in use.

We are, dear sir, yours faithfully,

For WATERLOW & SONS, Limited,

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- | | |
|--|--|
| 1st.—It can be set to lap any sized head in half a minute. | 5th.—There are no cogs. 10,000 sizes can be had from one wheel. |
| 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work. | 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time. |
| 3d.—It will lap any size from half note to imperial. | 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch. |
| 4th.—The pens do not lift, but rule continually as in feint lining. | 8th.—The lift and drop of the pens is just the same as in hand-work. |

Mr. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

New York, November 13th, 1884.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickok Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double cap, or over one thousand sizes, against ten from the gear wheels on our Hickok O. A. By lapping headings we save from fifty to sixty per cent. of time in settings pens alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filling-in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,

DAVIS & FITZGERALD, 24 Liberty Street, New York

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

W. G. Robinson, Jr., paper dealer, Atlanta, Ga., has sold out.

Irving Bath, printer, Millbank, Dak., has lost \$400 by fire.

A. M. Reed, Silverton, Cal., has leased the *San Juan Herald*.

The Modesto Publication Company, Modesto, Cal., has suspended publication.

C. S. McClain, of the firm of C. S. McClain & Co., publishers, Springfield, Mo., is dead.

A. Buswell, formerly bookbinder, &c., San Francisco, Cal., has applied for relief in insolvency.

W. S. Whitehouse has retired from the firm of H. McManus & Co., dealers in wall paper, Omaha, Neb.

Frederick Mehnert, book-binder, toy dealer, &c., Goshen, Ind., has been burned out. Loss, \$200 to \$300; insured.

Attachments have been issued against W. B. Alford, bookseller, stationer, &c., Ferndale, Cal., to recover \$1,501.

Thatcher & Webster, publishers of the *Journal*, Lawrence, Kan., have dissolved partnership. W. M. Thatcher succeeds to the business.

Abraham F. Cohen, dealer in fancy goods at Buffalo, N. Y., has made an assignment to Charles M. Kraetzer. He claimed to be worth \$10,000.

The stock of the Union News Company, Lima, Ohio, was damaged to the extent of \$700 on November 20, by fire getting into the paper; no insurance.

The *Plain Dealer* Printing House, Grand Forks, Dak., was burned on November 22. The establishment was insured for \$10,000, mostly in favor of mortgages.

A fire broke out at the building, No. 78 Beekman street, on Wednesday of last week, and the stock of O'Connor, Kimball & Co., paper dealers, who occupied the first floor, was damaged \$500. C. W. Wadsworth, who had a large stock of lithographic work on hand, lost \$1,000.

Frederick H. Johnson and Eliza L. Van Campen, comprising the firm of Van Campen & Johnson, lithographers, at 324, 326, 328 and 330 Pearl street, New York, on Saturday made an assignment for the benefit of creditors to George W. Hopping, giving preferences as follows: William D. Ryder, \$3,921; Chatham National Bank, \$2,516.66; total, \$6,437.66. In June last a chattel mortgage for \$5,000 was placed on the machinery and plant. A year ago they bought out their partner, Mr. Hance, for \$11,000, secured by notes extending over eighteen months. Their balance sheet then showed assets, \$26,680, and liabilities, \$3,500.

J. D. Babbage, dealer in paper-hangings, fancy goods, &c., Cloverport, Ky., has taken a new stand at the corner of Wall and Elm streets, in that city, which he has fitted up in first-class style. The *Breckenridge News*, of that city, says: "Having no longer to pay out half his income in rent, he has made a corresponding reduction in his prices, and can now truthfully boast that he has the prettiest store-room and sells the cheapest goods of any house in Kentucky."

At ten o'clock on Monday night fire was discovered in the four-story and basement building No. 183 Monroe street, Chicago, occupied by the Chicago Paper Company and others. The Paper Company's loss was \$80,000; insurance, \$75,000. Other minor losses, chiefly by printers, \$6,000; fully insured.

Pratt & Tracey, printers, Stratford, Ont., have dissolved partnership. C. G. Tracey retires from the firm, and J. A. Jameson has been admitted. The style of the new firm is Pratt & Jameson.

The stock of the estate of D. McMaster, bookseller, &c., Sarnia, Ont., was advertised to be sold by auction on the 26th inst.

The *Sun* Publishing Company, and the firm of Herbert & Jennison, Red Wing, Minn., have consolidated.

W. G. Robinson, Jr., stationer, Atlanta, Ga., has failed and sold out. He carried a stock of about \$5,000.

James Robertson, stationer, at Joplin, Mo., has made an assignment. His liabilities are about \$6,000.

Wilson, Smith & Darwin, publishers, Whitesboro, Tex., have dissolved partnership.

J. D. Smith & Co., bookbinders, Springfield, Ohio, have sold out to E. T. Thomas.

Alvord Brothers, subscription book dealers, Syracuse, N. Y., have been burned out.

Stephen Seldon, printer, Halifax, N. S., has sold out.

Van Campen & Johnson, lithographers, New York city, have assigned.

Powell & Sawtell, publishers, Chattanooga, Tenn., are advertised to be sold out.

James McHugh, bookbinder, New York city, has been sold out by the sheriff.

Steele & Wallace, newsdealers, &c., Talmage, Neb., are closing out their business.

S. E. Mitchell, bookseller, &c., Pembroke, Ont., offers to compromise with his creditors.

The goods of C. E. Woodbury & Co., dealers in pictures, &c., Boston, Mass., are advertised for sale.

The Carthage Company, wood-pulp manufacturer, Carthage, N. Y., has failed. It was incorporated at Albany with a capital stock of \$100,000, and erected works at Carthage about a year ago.

Henry Bush and Sam L. Crane have bought out H. R. Mills, Pittsfield, Ill., and have consolidated the stocks of H. R. Mills and Henry Bush & Co., stationers. The new firm is known as Bush & Crane.

Fire broke out on Saturday morning at Grand Forks, Dak., in the basement of the *Plain Dealer* printing house while the proprietor was away, and destroyed the whole concern and three business houses adjoining. Loss, \$25,000; insurance, about \$20,000.

The immediate cause of the failure of James W. Bouton, bookseller and publisher, New York city, was inability to meet a note of \$8,000 which was about to fall due. The assignee thinks that there are enough assets to pay the creditors in full and leave a surplus.

Evans & Darling show an appreciation of popular taste in their line of valentine cards. These goods are hand-decorated in oil-colors and are very tastefully and elegantly made up with a combination of satins and plushes. The designs run in bannerettes, hearts, cupids, circular card's with swan's-down edging, clover-leaf-shaped cards, &c. The goods should be examined.

Frederick W. Coffin, paper dealer at No. 76 Duane street, New York, made an assignment Tuesday to Frederick R. Coffin, giving preferences to Margaret Coffin for \$3,100, and the Chemical Paper Company for \$686. He was formerly of Coffin & Lyon, who failed in 1877. He afterward formed the firm of Coffin & Butler, which dissolved in March, 1883, since which time he has been alone. He claimed a

capital of \$10,000. Business has been very dull and payments slow.

Rubel Brothers, printers, Chicago, Ill., have been burned out.

The Times Publishing Company, Detroit, Mich., has sold out to J. L. Brezee.

George W. Boyington, bookseller, stationer, &c., Fergus Falls, Minn., has sold out.

The Silicate Book Slate Company is to have an exhibit at the World's Fair. It reports a flourishing trade in its line.

The New York News Company is bringing to the notice of the trade a new article called the "Common Sense" diary. It contains memorandum blanks for names, streets, &c., also cash account columns, besides the regular monthly calendar of the year and a daily memorandum calendar.

The Esterbrook Pen Company has purchased a large edition of the bound volumes of "Sunshine," a new book for juveniles, which it offers to the trade at a very low price. The book is of quarto size, and comes in a set of four volumes. It is bound in beautiful illuminated covers, and has an elegant chromolithograph frontispiece.

J. H. Bufford's Sons have a very handsome line of birthday cards, embracing many new designs and some twenty numbers. The firm has also a very fine display of Christmas cards, and out-of-town buyers wishing anything in this line would find it worth while to call and examine the firm's stock when they visit the city.

New York Stationery and Envelope Company, 62 John street, has an entire new line of silk plush cabinets. Its patent wax seal cabinet is said to be having an immense sale. Many new styles in stationery originate with the head of this house. The firm also manufactures wax seals in large quantities, and says that it is not to be undersold in anything it makes. Prices to suit the times is its motto.

One of the most appropriate holiday articles is the Globe music file, manufactured by the Globe Files Company. It is constructed of fine wood, substantially made, covered and lined with durable and elegant material and ornamented in gold. It is provided with an alphabetical, self-adjusting index, which classifies the music in such a manner that any piece can be found instantly. The agent for the sale of these files is C. M. Ward, 28 Bond street, New York.

Marcus Ward & Co. report a very encouraging improvement in their business during the past week or two. Their clerks are very busy receiving orders and attending to shipments.

The Dawn Publishing Company, organized to publish a newspaper called the *Dawn*, filed articles of incorporation on Friday 21st inst., in this city, with Thomas Noble, Frank Bellew, Louis F. Post and Abraham Hosier as incorporators.

The following-named members of the trade were in town during the past week: Mr. Johnston, of West, Johnston & Co., Richmond, Va.; B. B. French, Richmond, Va.

Carman & Co., stationers, &c., Emerson, Man., have sold out.

Glover & Dunn, stationers, Brunswick, Ga., have been burned out.

A. S. Tweed, bookseller, &c., Clinton, Ill., has assigned to A. W. Razey.

R. E. Martin & Co., publishers, St. Paul, Neb., have dissolved partnership.

A receiver has been appointed for Agrippa N. Bell, publisher, New York city.

The effects of George J. Gazzam, printer, Pittsburg, Pa., are in the hands of the sheriff.

Henry Meyer, bookseller, &c., Pittsburg, Pa., has been closed out by the sheriff on an execution in favor of J. E. Sonneberg for \$5,600.

J. E. Walden, publisher of the *Journal*, Napa, Cal., has admitted M. G. Morse to partnership. The style of the firm has been changed to Walden & Morse.

L. Prang & Co. are making arrangements to open a prize exhibition of designs for Christmas cards by eminent artists at Richards' Gallery, No. 226 Fifth avenue, opposite the Brunswick Hotel. The exhibition will be open from December 1 to the 6th, inclusive, and admission will be by tickets, which may be had on application.

The blackboard eraser made by French & Choate is said to be in great demand at this season. The manufacturers claim that it is one of the best erasers in the market. It comes in two styles, one of which is made of Body-Brussels carpet and the other of vel-

vet carpet. These erasers are not only cheap but well and substantially made.

Lawson M. Noyer, publisher of the *Republica*, Rochester, Ind., has sold out to F. M. Bitters.

E. F. Conklin, publisher of the *Pilot*, Clark, Dak., has been burned out. Loss, \$800; insured for \$500.

Herman Determan, publisher of the *Wochenblatt*, Evansville, Ind., has discontinued the publication of that paper.

J. W. Daughaday & Co., dealers in printers' materials, Philadelphia, Pa., have been sold out by the sheriff.

J. T. Kackley & Co., booksellers and stationers, Marysville, Ky., have been party burned out. Insured.

The United States Music Engraving and Printing Company, Limited, Philadelphia, Pa., has been sold out at auction.

The seventh volume of the third series of "No Name" novels has just been issued by the publishers, Roberts Brothers, Boston.

The L. L. Brown Paper Company, of Adams, Mass., has engaged George F. Barden, who is well known to the trade, having represented prominent paper manufacturers for some years. Mr. Barden was employed for ten years in practical paper-making at the company's mills as early as 1854. The brands of the L. L. Brown Paper Company were then, as they are now, "The Standard," and, with an experience of thirty years, they are likely to maintain the place that they have held for so many years.

The following cable despatch from Berlin was published in a morning paper on the 25th inst.: "A sensational suicide occurred here yesterday. Max Hamburger, a merchant doing business in New York, Paris and Berlin, visited his mother's grave, and there took his own life. Business losses are said to have led him to this step." Mr. Hamburger was a brother of I. H. Hamburger, of the firm of I. H. Hamburger & Co, publishers and importers, 332 Broadway, this city, and was formerly in partnership with his brother. When asked about his brother's death by a reporter of THE STATIONER, I. H. Hamburger said: "The statement in the newspapers was not a surprise to me. I received a brief cablegram on the 10th inst., informing me of the death of Max. Max was well known in trade circles. Up to a few

years ago, when he went into business with me, he held a very responsible position as buyer for the house of Aaron C. Kaufmann & Co., 366 Broadway, with whom he was connected for about five years. About four years ago he dissolved his partnership with me and became connected with S. L. Prager, 123 Mercer street, this city, who did a large export and commission business in general merchandise, having branch houses in London, Paris and Australia. He gave up all active business occupation about the end of September last and sailed for Berlin, where his wife and relatives reside. I am surprised at his committing suicide, and I can account for it on no other grounds except temporary insanity, caused by years of hard work and business losses. He had ample means to pay all his liabilities, and was paying them up as fast as they became due. How his affairs stand at this moment, of course, I don't know. Max was 39 years of age, and leaves a widow. He was to become my partner in January.

The story of the "Unconditional Surrender" at Fort Donelson, by Gen. Lew Wallace, the second paper in the War Series, appears in the December *Century*. The important series of separate illustrated papers on the civil war, begun in the November *Century* with General Beauregard's "Bull Run" article, is continued with Gen. Lew Wallace's "Fort Donelson." In the January issue the Mississippi gunboat service will be described by Admiral Walke and Capt. James B. Eads. In February appears General Grant's article on "Shiloh." The December *Century* contains a finely engraved portrait of General Grant, and an autographic copy of his famous "unconditional surrender" letter, written at Fort Donelson. The miscellaneous features include "Recollections of a Private," several beautifully illustrated articles, and a short story by Mark Twain.

On November 17 the compositors of the *Morning News*, Wilmington, Del., "struck" against a reduction of rates from thirty to twenty-five cents per 1,000 ems. The stringency of the times, general business depression, and other adverse circumstances are claimed to be the causes leading to the reduction. The "cases" of those who "went out" were promptly taken up by others, and the issue of the paper was continued.

RAPHAEL TUCK & SONS,
Fine * Art * Publishers.

PARIS.

LONDON.

BERLIN.

298 BROADWAY,

NEW YORK, November 24, 1884.

GENTLEMEN:

We have much pleasure in announcing to you the opening of a direct BRANCH ESTABLISHMENT for the United States and Canada, at the above address.

It has been obvious for some time that, in justice to the continually increasing variety and number of our Art Publications, a closer relationship with the American Continent had become a downright necessity; the requirements of so important a market justifying, nay necessitating, that close attention and study which only a direct intercourse can cultivate to advantage.

We point to our past record as an earnest of our future efforts in the matter of ARTISTIC and NOVEL PRODUCTIONS, and the various new lines such as EASTER and all branches of CONGRATULATORY CARDS; FLORAL and other ART STUDIES; CHROMOS, RELIEFS, SCREENS, TERRA-COTTA WARE, &c., with which our Representatives are making their debut on our behalf, may fairly entitle them to your favorable consideration.

Upon one subject we would lay particular stress, and that is, touching the matter of prompt delivery of samples and stock; and here it is that a direct intercourse with the American trade, which will henceforth be supplied in advance of the English market, will prove of immediate benefit, and avoid all unpleasant friction caused by lateness of deliveries.

In conclusion we would gladly bespeak for ourselves the good-will of our competitors, no less than that of the entire trade, and our actions, prompted as they will be by a careful solicitude for the best interests of the trade in general, will be calculated to secure and retain that good-will for us.

We are, gentlemen, yours faithfully,

RAPHAEL TUCK & SONS.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies.

10 Cents.

NEW YORK, THURSDAY, NOVEMBER 27, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE growth of the sentiment in favor of voluntary arbitration in Europe and the United States is one of those indications of progress which it is encouraging to note. Business men are evincing a desire to avoid the circuitous delays of courts and to do with the new courts established by and among themselves for the friendly arbitration of disputes. Such courts have made commendable progress abroad and in this city they are resorted to with increasing frequency. The New York Produce Exchange has long had such a court called the Arbitration Committee, and it is now sitting to hear evidence and determine what is justice in a large number of cases submitted. The committee is composed of a body of intelligent and honorable merchants. The general sentiment among business men is that the court is a great improvement on former methods, through law courts. The new system is gaining in favor because it reaches conclusions at once at a trifling expense and lawyers, judges and juries by whom generally the customs and unwritten laws of merchants are never properly understood, are avoided. The Court of Arbitration of the Chamber of Commerce of New York was established by an act of June 5, 1875, and was vested with all of the powers of a Supreme Court, and it has its code of procedure laid down. Other commercial bodies in the metropolis are entertaining the question of Arbitration Courts, and if our system of jurisprudence is not much simplified and the decision of business differences left to a better medium than that of ill-chosen and ignorant juries and political judges, we may be sure that the system of arbitration will become widely extended.

THE United States has been the safety-valve of Europe for the last forty years. Only for the facility which this republic offers to overcrowded Europe, the latter would have literally "burst its boilers" long ago. The discontented find it easier to emigrate than to struggle with discontent and conditions which offer no amelioration; the rebellious, driven to revolt by despotism, find refuge here as an easier solution of the social question than an eternal warfare against armed and powerful governments and a life of suffering and sacrifice. It is thus that Europe has looked upon the United States as its panacea for overpopulation and the dangers of revolution. There is, however, a point of danger even in remedial treatment—too much medicine kills as surely as none at all—and emigration, which has been looked upon by the powers of Europe as their safety-valve, has not only permitted the escape of high-pressure steam, but it has drawn off the steam which is necessary for the proper run-

ning of the machine. In Switzerland, the male rural population has emigrated so largely that the farmers can scarcely secure labor enough to save their harvests, and this labor is composed of women and weakly men. In Germany, the same condition exists in many districts. Our consul at Sonneberg says that the emigration from Thuringia during the first half of the current year amounted to about 1,800, all strong, able-bodied persons. Even the newspapers, adds the consul, complain of the scarcity of agricultural laborers, and call upon the Reichstag for some practical legislation that shall afford relief. They allege that the military system, emigration, and drift to the cities draw off so many males that only females are available for cultivating the soil. The question is: How long will this thing continue? The manner in which the United States is filling up, and the danger of a hegira of all races to this promised land, will render it necessary for the United States to regulate immigration—we must select our immigrants, and thus save ourselves from being overwhelmed. While it is true that active, industrious emigrants are desirable in opening up our territories, and in aiding the development of our wealth and resources, and are therefore welcome, we must not be blind to the fact that we are being loaded up with many of the most undesirable elements of population. There has been a large accession of paupers whose numbers are being constantly increased, and these, it is evident, do not, in most instances, come here with any anticipation of leading hardworking lives. They swell our population and produce nothing save misery, and really detract from the benefits which ought to be derived by the worthy poor. There are other features of this foreign immigration which demand public consideration, but which we cannot touch upon now.

Roundabouts.

BY THE TRADE LOUNGER.

Quite a cheerful feeling is apparent 'round among the folks. This is probably due to the approach of Thanksgiving, of which it is to be hoped every one will have due appreciation. Some people may not be thus inclined, having in view the results of the election. For myself I shall try and be in harmony with the coming day. Things might have been worse.

But it is grievous to note the suspension of labor at some of our manufacturing centres. Day after day the papers teem with reports of reductions of wages, the partial suspension of industrial production or the closing of large establishments until the advent of better times or the promise of renewed demand for goods. All of this does not indicate

favorably for trade. The winter outlook is not happy, for the poor and the destitute are likely to have their ranks largely reinforced if business activity is not revived.

Under the circumstances, it may be wondered why new creations are being placed upon the market. But we must recollect that while there is life there is hope, and perhaps the turn will come soon. It is well, indeed, to get goods before the public. I mean such as are not of an ephemeral character, because their time will come, and when it does they will be understood and appreciated.

People still expect novelties for the holidays. One of the most useful and least expensive is a handsome plush case, containing three pairs of scissors, one of which may be used for embroidery and minute work, another for button-hole work, and the other pair for general use. The case in which they are enclosed has a neat silver plated clasp.

Articles made of carved glass are now appearing in the market for the first time. The process of their manufacture is very laborious. "The glass," explains an exchange, "is actually carved with a tool in the same manner and effect as a Florentine cameo-cutter would carve his particolorized gems. A very small portion of the work is done on the wheel, and when the work is finished the effect is simply ravishing." The same authority further states, that there is nothing finer than these pieces of chiseled glass, and that a small pair of vases made of carved glass costs some \$700.

An improvement is made in ladies' hand-bags, by stretching across the bottom of the same a piece of stiff binder's board or other non-flexible material, which prevents the centre from bending or sagging. This device has been adopted by a Chicago firm.

A new design for holding and guiding the fingers when writing is thus described: A rod is provided with a swiveled ring, a sliding-ring and a ball at the lower end, adapted to rest on the paper, the rod being held in the hand horizontally, and the index finger and the little finger passed through the rings, the swiveled ring turning in various directions to accommodate itself to the position of the fingers in writing.

Some new designs in date cases are in the form of a horseshoe having a rest at the back, and passepartout mounts for cards. The horseshoe is made of nickel and makes a very pretty ornament for a desk or library table.

Some one connected with the stationery trade recently inquired what publishing houses issued Christmas annuals. The address of only one house could be obtained for him. It is singular that American publishers do not show more enterprise in this respect. That there could be created a good demand for Christmas annuals, there is no doubt, and

the regular publication of these annuals would likely be profitable.

Printers' ink is being manufactured from the lamp-black or soot produced by natural gas burned against sheet-iron. A New York firm proposes to lease or buy two gas wells in Pennsylvania for the purpose of engaging in the printing ink manufacture by the use of gas.

Some of the English booksellers complain of suffering from the dishonesty of their clerks. A correspondent of one paper in a lengthy communication on this subject attributes this evil to the rather questionable practice of employers instructing "their assistants to charge the published price of a book, when they can get it, but rather than lose the sale allow the discount." He claims that published prices are a delusion and that dealers who are in the habit of giving discounts, but charge the published price when they think a customer can afford to pay it, are guilty of cheating, and that they thus teach their assistants dishonesty. The latter, going from bad to worse, eventually rob the person who first taught them to do wrong.

Retail booksellers of England are uttering loud complaints against the practice of local wholesale book houses whom they charge with supplying co-operative stores and "tailors" with books and compelling them (the retailers) to pay the full rates on cash purchases. They also assert that the same houses retail books for the same prices at which they are compelled to pay for them.

A Southern paper states that one of the evils under which the entire South is laboring is the excessive rate of interest charged by banks and local money changers, the rates ranging from 2 per cent. a month to 10 and 12 per cent. a year. It adds that there are a dozen towns throughout the Carolinas and Georgia where capitalists could do a fine business in competition with the old banks. In justice to Southern banking institutions, it may be said, however, that these excessive rates are charged in towns of 6,000 or 7,000 inhabitants where there is only one bank, and not in the principal cities.

Answers to Correspondents.

S. W. & Co. ask where Stratona cement can be obtained.

Ans.—It is made by Bawo & Dotter, 30 Barclay street, New York.

J. wants to know who makes "duranoid" chips.

Ans.—We do not know. Edward Siegmann, 41 White street, makes a similar line of goods.

Subscriber asks: Has there been any test cast decided for or against the Carsely check protecting stamp.

Ans.—We ventilated this subject a long time ago. There was a suit brought in the United States Court in this city and we believe that Judge Blackford decided in favor of the Carsely patent and granted an injunction. But we believe that the suit was a friendly proceeding and that no real defense was

made. The court could not have been properly advised of the facts, for, if it had been and a determined contest had been made, we think that the patent would have been decided to have no bottom. We do not think that what can be called a "test" case has ever been adjudicated.

W. asks for manufacturer of "Shadene" ink.

Ans.—We understand that E. G. Soltmann controls its sale.

D. inquires for the manufacturer of "Century" ink.

Ans.—It is made, we believe, in Brooklyn and George J. Swain, corner Fulton and Concord streets, in that city, can probably supply you.

Market Review.

OFFICE OF THE AMERICAN STATIONER, 1
WEDNESDAY, November 26, 1884.

THE MONEY MARKET.—The monetary situation has been characterized by the same features that prevailed last week, and the only change has been that loanable funds have been in more abundant supply, with rates of interest easier and the demand for money comparatively light. Call loans have not been quoted above $1\frac{1}{2}$ per cent. and on the usual mixed collateral loans have been made as low as $\frac{1}{2}$ to 1 per cent. Commercial paper has ruled steady but quiet, with first-class indorsements easily negotiable at $4\frac{1}{2}$ to $5\frac{1}{2}$ per cent. discount. The stock market has developed improvement both in the tone and character of the business in progress. The trading has been fairly active and prices generally have moved up to a higher plane. Railroad bonds have been in active request at hardening prices, and large buying for investment of the better class has been a prominent feature. Governments again higher. The market for foreign exchange has undergone but little change. The demand for remittance has been moderate, as also the offerings of cotton and commercial bills. Posted rates are 4.82@4.86, and a firm tone has prevailed.

THE PAPER MARKET.—There has been a quiet trade in almost every department of commerce during the week just closed, and as yet there have been few or no indications of quickening in the disposition to trade. Although the Presidential question is virtually settled, a feeling of hesitation is still apparent, and the outlook is one of some uncertainty. In many instances, the possibility of a change in the policy of the government is not without its influence, particularly with respect to industrial enterprises, and this hesitation is no doubt due to the fact that many have not yet made up their minds how their interests may be affected thereby. With the manufacturers there is no appearance of any great anxiety to secure new orders; in fact, some in the fine writing branch of the trade have refused to take additional orders, in view of their agreement to close down during this week and for a like period in December and January. This lessening of the production cannot fail to exert a very salutary influence upon the market for this grade. Other lines of papers retain a very steady position, no changes in prices being reported.

THE STATIONERY MARKET.—The trade in various lines has shown very fair improvement during the past week, and the improvement has been of such a character as to encourage many dealers to believe that a healthy reaction has really taken place, and that the trade of the new year will open with increased vigor. The movement in envelopes and writing papers, which has been dragging slowly for several months, is perceptibly brisker. Prices have stiffened and it is probable that they will further advance. It is not likely that they will get any lower for some time to come. A few dealers report a falling off in the trade in holiday goods, but as a general thing there is still a very fair business in this line, notwithstanding this is the season when trade is mostly in the hands of the retailer. The movement in pens is rather quiet, the most of the trade having been done for this year. There is said to be a fair demand for book-slates, and the sale of these goods may be said to increase every year. There is a good demand for seals and fancy stationery. The use of seals was thought to be declining, but the demand for seals and wafers has never been greater than during the past season. The great number of holiday books brought out this season shows that publishers have confidence in the state of the market, which the recent active movement in holiday books has fully warranted.

The following-named new printing and publishing companies are about to be incorporated in the Province of Ontario: The Thunder Bay *Sentinel* Printing Company, to carry on a general printing and publishing business in the town of Port Arthur, with a capital of \$10,000; the Pembroke Printing and Publishing Company, for the purpose of printing and publishing a newspaper, binding and publication of books, pamphlets and periodicals, and carry on all business usually carried on in a general printing and publishing office. Application is also being made to incorporate a company to carry on "the business of printing and publishing at the city of Toronto, by Wm. D. Armstrong, John Jardine, Donald Ross, Robert J. Laidlaw, Patrick McFarlane McLeod, John M. Cameron, J. Allister Murray, George Bruce, James Robertson, Mortimer Clark, Wm. Barclay McMurrich, Hamilton Cassels, J. M. Gibson, and others, with a capital of \$50,000 in \$10 shares.

WHITTEMORE BROTHERS & CO.,
172, 174, 176 Lincoln Street, Boston, Mass.,
WHOLESALE MANUFACTURERS OF
SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), or gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

The new scientific paper recently started in this city is said to have met with hearty support. Each issue is filled with a number of excellent articles on important scientific topics.

Ceramic ware is not produced on a large scale in Austria. The porcelain industry, however, is of high repute; in Bohemia there are twenty-five manufacturing; in Hungary, Herend produces the best porcelain. Stone-ware, faience and majolica manufacture is carried on at Mahren, Znaim, Budweis, in Bohemia, Lower Austria, Styria and Silesia. The production of terralith goods is especially a North Bohemian industry; terra-cotta is made near Vienna; fireproof clay goods and stone utensils are produced in lower Austria, Bohemia, Moravia; and tiles near Vienna. In Hungary, pottery ware is largely produced, the best at Funfkirchen and Totis. As in old times, the glass industry, colored and cut, is carried on in Bohemia; in North Bohemia 13,800 persons are employed in connection with this branch. Hungary makes only a poor quality, which is exported to Servia, Roumania and Turkey.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIRS: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT, Consulting Actuary, New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours, THOMAS TENNENT, Mfr. Mathematical Instruments, 18 Market at., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10. Sold by all first-class Stationers. Send for circulars. ADDRESS JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

THE \$1.00 NEW YORK FOUNTAIN GOLD PEN.

A \$5 pen in appearance and usefulness for \$1. This pen can be carried in the pocket in any position without leaking, and will write 15,000 words without refilling. Any ordinary pen can be used by attaching to the fountain holder if desirable. The construction of the Fountain Pen is so simple that there is nothing to get out of order, and this simplicity of construction enables us to sell it at a low price. The most economical and useful pen in existence. Just the thing for business corresponding or school, as it is always ready for use. Sample by mail on receipt of price, with gold pen, \$1; one dozen, \$8. Sample with imitation gold pen, 50 cts.; one dozen, \$3.50. GOLLNER MFG. CO., 222 Centre Street, New York.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Nov. 25, 1884.

A tour among the commercial stationers of this city reveals the fact that very little is being done at present. At this season of the year the demands for commercial stationery are generally light, but dealers seem to think that trade is a little duller than usual for the time.

As the holidays draw nearer, jobbers of Christmas novelties find that buyers are growing more numerous. One thing is noticeable, however, and that is, dealers are not buying as largely as in former years. This is due, undoubtedly, to a distrustful feeling entertained by dealers relative to the purchasing power of the people at large.

At the Bromfield street establishment of Charles H. Whitney, many interior improvements have been lately introduced, that stock might be more advantageously displayed. Squandering wealth in such a lavish manner is not indicative of "dull times." Nor does Mr. Whiting stop to contemplate such a condition of trade. His stock of juvenile publications for the holiday trade is very large and quite varied and a good jobbing trade is being done by the house. Though orders for books are not as large as in past seasons, Mr. Whiting is filling more of them, which shows the advantage of working up new trade, especially in dull times.

This house is also carrying a good line of photograph albums, some of the samples shown being artistic works. One style is called the "Renaissance" album, every page of which is beautifully illuminated in different styles of Renaissance decorations. Another style, known as the "Ceramic" album, is handsomely embellished throughout with designs of Dresden china, Japanese pottery, &c. These albums are elegantly bound in leather, and are as fine a line of goods as are on the market.

Winkley, Dresser & Co., manufacturing and jobbing stationers, are offering the trade some cheap bargains in Vienna inkstands and glassware. These goods were imported direct by this firm for its own jobbing trade, and only a small stock of a large importation is left. Late buyers will find some choice goods at extremely low figures at the salesrooms of Winkley, Dresser & Co.

In the business columns of this week's STATIONER will be found an interesting announcement by Winkley, Dresser & Co., relative to Atlantic rubber bands. These bands are put up in ounce boxes or quarter-pound boxes, and in assorted sizes if desired; or they are sold in bulk by the pound or by the ton. The house already enjoys an extensive trade in these rubber bands among the stationers and druggists of the country. Some idea of its rubber-band trade may be gathered from the statement made that the yearly sales by this house are over 12,000 pounds. The strength and durability of the Atlantic bands are fully guaranteed by the house. Their increasing sales give proof of their merit.

William A. Davis, manufacturer of the Treasury brands of mucilage and ink, reports that business is not as brisk as it might be. Still, his factory is kept quite busy on orders for winter supplies. Owing to the fact that his goods are so universally handled by the trade, he is constantly doing something, and it is a dull day indeed when he does nothing. Mr. Davis has now in preparation a line of new goods which he will shortly introduce for the early spring trade.

In commenting upon the awards made to exhibitors of stationers' specialties (as published in my letter of last week) by the Massachusetts Charitable Mechanics' Association, at its late exhibition, I inadvertently failed to mention that L. Prang & Co., art publishers, of Boston, were awarded a gold medal "for improvement, and especially for success, in reproduction on satin, as indicated in Robie's flower piece."

Concerning the exhibits of L. Prang & Co. at the exhibition, I can truthfully say, and the reports of the city press indorse the statement, that such a display as this house presented of artistic chromo productions has never been equaled anywhere in this country. L. Prang & Co. have made lithograph work a "fine art." So true to the original oil-painting is the reproduction upon satin of Robie's artistic flower piece, that it is almost impossible to tell the oil-painting from the reproduction. As this work is being sold by subscription, and it is being largely subscribed to by art connoisseurs, it is not likely that the trade at large will have the pleasure of admiring the most magnificent piece of lithographic reproduction ever presented.

During my rambles yesterday I had the pleasure of meeting Wilbur F. Closson, the energetic representative of the Plimpton Manufacturing Company, of Hartford, Conn. Is it necessary here to state that the Plimpton Company are manufacturers of envelopes and writing-paper? Of course not. The quality and style of goods manufactured by this company are as well known to dealers throughout the country as they are to the Boston trade, and for this reason Mr. Closson finds no trouble to take orders. He reports the company as being well supplied with orders, the present output of the factory being not less than a million envelopes per day.

The New England division of the Mutual News Company has moved into more spacious quarters, being now located at 175 Devonshire street, with a rear entrance at 36 Arch street. The new establishment was formally opened to-day for business.

"From seven P. M. to midnight," so sayst he invitation before me, "a collation will be served at the company's office, and you (that means me) are cordially invited to partake thereof." Well, now that reads kind of social like. From 7 P. M. to midnight! Just think of it! five long hours for feed! And a free feed, too! No enterprising newspaper man would let such a "lay-out" as that slip him—not when he is in good health. In view thereof I think I need a little exercise, so I'll drop this and take a walk "round the block." I want to be in condition to act friendly by that collation.

No. 2,
\$25 Lantern
For \$12.

No. 4
\$12 LANTERN
For \$6.

THIS CUT
SHOWS
No. 2.

PATENTED.
P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical law governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all untried methods for LEARNING, AMUSEMENT and PROFIT. The transparent Slides for these lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the world. SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides), \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. For HOME USE the ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show lanterns in operation.

PUBLISHERS OF
Lithographic Etched Folds and Cards,
AND GENERAL COMMERCIAL LITHOGRAPHERS,

Soluble Black for Inks.

It has long been known that an inferior kind of ink can be made by boiling down spent tan liquors—that is, liquors out of which nearly all the tannin is already extracted—and treating with iron or ferruginous matters; but in practice these attempts have been failures, owing to the material having a strong acid reaction and largely precipitating in the process of boiling down. Now, it has been discovered that if to the spent tan-liquor sufficient caustic alkali, or even caustic lime is added to take up or neutralize the gallic acid and other acids present in the solution, excellent results are secured with little or no precipitate during the boiling. For this purpose caustic soda is preferred. The manner of operating is as follows: Add to the mixed tan materials or tan-liquor only sufficient caustic soda to combine chemically with all the acid matter present, whether in the liquid or in the solid spent material, and until after complete intermixture by any ordinary test the mixture is found to be slightly alkaline. If solid spent tan has been used, it must be well boiled with the caustic and liquor. Next filter or strain the liquor, so as to remove the insoluble refuse, then evaporate the liquid quickly by any suitable means to a density or specific gravity of from 40° to 70° Twaddle, the exact density depending upon the purpose to which it is afterward to be applied. Add to this liquor green vitriol (ferrous sulphate) or other soluble salt of iron (the more basic it is the better), sufficient in amount for its acid to combine with nearly all the soda present, and expose it to the air to get the necessary amount of oxidation. The result is a thick, dense black product—the soluble black required. It is, in fact, a mixture of gallate of iron and salts of soda with extractive matter from tan products. If a ferric salt has been used, the desired blackness is obtained at once without oxidation or exposure to air. It would be possible to reverse the process—boil down first and then add the iron salt and the caustic—and the result would be a somewhat similar but inferior material; but it would be a very troublesome operation, owing to the precipitate that forms in boiling and the difficulty in again dissolving that precipitate, or of preventing it caking or burning while the liquor is being boiled down. One main point to be considered, if the best results are desired, is to add no more iron than the vegetable acids present in the liquor when free are capable of combining with, and to add only such quantity of caustic to the liquor as shall be just sufficient to chemically combine with all of the acid of the original iron salt, leaving the iron free to combine with the vegetable acids. First, the iron, second, the mineral acid of its salts; third, the soda and other alkaline base present; fourth, the vegetable acids present, are consequently all chemically equivalent proportions to each other. This is patented.

Bronze may be renovated and recolored by mixing one part of muriatic acid and two parts of water. Free the article from all grease and dust, and apply the diluted acid with a cloth. When dry, polish with sweet oil.

WHITE'S EYE SHADE,

—*WITH AUTOMATIC SPRING.*—

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium; and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 per doz...\$24.00 | Extra Pads.....per doz...\$3.60
Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | DISCOUNT TO TRADE.

Improvements in Clay Molds.

The *Schweizerische Gewerbe Blatt* recommends the following method of rendering more durable molds for plastic casting (which lose their clearly defined shape after repeated use) by coating them with a thin layer of vulcanized india-rubber. The plaster model which is to be molded is strewed while damp with talc powder, and is carefully brushed so that the surface appears smooth. It then receives a number of coatings of india-rubber dissolved in sulphuret of carbon or petroleum ether, until a thin but uniformly adhering skin has been formed. To the last coating of india rubber is added about a quarter to a third of ordinary copal varnish, so that it retains its stickiness during half an hour, and thus can allow the adhesion of dried hard-wood sawdust applied by means of a fine hair sieve. After drying, the superfluous non-adhering dust is removed with a soft brush. The clay is applied, and is removed after hardening. The india-rubber coating then adheres firmly to the interior of the mold. To increase its resistance to lubricating substances it can be painted with a solution of one part chloride of sulphur in forty parts sulphuret of carbon, and can thus be vulcanized by a cold process. After some hours, the mold is ready for use. In plaster casting, an unctuous solution of soap can be used as a lubricant.

To write in silver, mix one ounce of the finest pewter of block tin and two ounces of quicksilver together till both become fluid; then grind it with gum water and write with it. The writing will then look as if done with silver.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY** AWARD given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double-Sized*, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE** and **REWRITE** FOUR TIMES on same spot. Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 126 and 128 Duane Street, cor. Church, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 23. NEW YORK, DECEMBER 4, 1884. WHOLE NO. 493

Correspondence.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, November 29, 1884.

Stationers, as a rule, express themselves as very well satisfied with the present condition of trade. Prices are fair, and a large volume of business is constantly coming in. What loss of business has been entailed by the election has been more than made up since.

A visit among the fancy goods and novelty manufacturers here finds them in the midst of a very prosperous holiday trade.

The stock of J. B. Clarke, proprietor of the Novelty Card and Advertising Company, is one which cannot be surpassed in point of beauty and elegance. An attempt at a description of the various holiday goods, New Year cards and plush and satin Christmas novelties could not do them justice. They are all marvels of art. Mr. Clarke is making a feature of silk-fringed Christmas cards, which are put up assorted, fifty in a box. There are four sets of these cards.

The Chicago house of J. H. Bufford's Sons is showing a handsome line of satin novelties and New Year calling cards. A very large holiday trade has been done by this house, especially in its satin goods.

Keen & DeLong report a largely increasing demand for their well-known inks. This firm has produced an ink which will create quite a stir among the trade when placed upon the market, which will not be until next spring. It writes a very handsome light-blue color, which changes to a deep black. The production of this ink is the result of a long era of experimenting.

E. P. Donnell & Co., manufacturers of bookbinders' machinery and tools, have invented a new paper cutter which has met with instant success among the printers, binders and lithographers of Chicago. Regarding the paper cutter, Mr. Donnell states that it is the only paper-cutting machine yet introduced to the trade which dispenses with the cutting-stick entirely, and to accomplish this it has required great expense, hard labor and valuable patents, and at the same time Mr. Donnell, being

thoroughly acquainted with all of the objectionable points in other makes of cutting machines, is confident that the advanced improvements will be duly appreciated by all using a paper cutter. The cutter is running by steam-power in Mr. Donnell's warerooms, and as to its worth, he refers to any printer, binder or lithographer in Chicago. Noz.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Dec. 2, 1884.

One week ago to-day the Mutual News Company of New York, opened its New England branch at 175 Devonshire street, this city, and it was a glorious opening too.

The collation, to which were invited the many hundreds of newsdealers and stationers of New England, was served in good style, and was very heartily enjoyed by the numerous guests.

On the evening of the following day another spread was served for the city newsboys at which some five hundred assembled. Many of these little "arabs" partook so hugely of the good things before them that they were unable to attend their annual Thanksgiving dinner—three days later.

The cause of these "gastronomic entertainments" was to acquaint the vendors of periodicals and daily publications that the Mutual News Company was a business concern which had entered the field, and that the new company had come to stay, being backed financially by some of the most enterprising publishers of New York city.

The effect of those "entertaining spreads" is already observed by John J. Daly, manager of the city branch, who has, during the past week, received by every mail numerous orders for supplies.

Thus has the New England branch of the Mutual News Company been successfully opened. And now George F. Williams, president of the company, is in Philadelphia, where will be opened the central branch office. Headquarters will also be established in New Orleans, Chicago, Pittsburg, Toronto and other trade centres.

To my fellow scribes, whose pencilings from those cities oft serve to entertain the readers of THE AMERICAN STATIONER, I would say,

"Note ye the coming events and be ye prepared for the feed."

To-morrow, December 3, at the exhibition building of the Massachusetts Charitable Mechanics' Association, will be opened what is styled "an electric exhibition." There will be displayed the wonders of electricity. Such appliances or inventions as have been devised for the utilization of the electric fluid will be presented and the *modus operandi* fully explained to uninitiated visitors.

One of our Boston printing firms will print, fold, stitch and bind a work on electricity, doing all the work that is done by power and mechanical means on machinery run by an electric motor, the plates of the paper being electrotyped. Visitors to this novel exhibition will undoubtedly be very much electrified.

Getting down to facts more identical with trade topics, I am pleased to state, upon the authority of a number of dealers and jobbers of stationery, that the volume of trade for the six months ended with October was much greater than for the same period of last year.

Among the firms to endorse this statement is that of Ward & Gay. Mr. Ward, speaking for the house, claimed that his books would show a most satisfactory increase of trade for that time. Though November was apparently very quiet, the actual status for that month cannot as yet be positively stated, but as dealers are now busily engaged in figuring up the footings, last month's returns will not be long in doubt.

For the holiday trade this house is well stocked with a varied line of staple goods and novelties, and though the holiday season is a little late in opening, the house is confident of doing a good trade.

In the card department, over which Mr. Gay presides, considerable activity is noticed. So numerous are the designs, so extensive and varied is the stock, and so systematically are samples displayed that buyers find no trouble in making selections, while orders are promptly filled. The demand for novelties in the card line is fully up to the business of last year. Of the plush thermometer series the demand is such that the increased facilities of the house are taxed to their utmost to fill orders.

Another large jobber of card specialties, J. Baird, of Essex street, reports that the volume of trade up to November 1 done by his

house was very large. During the past month, owing partly to political excitement and uncertainty, trade was fairly quiet, but for the past week orders have been more numerous. For December an extra large trade is looked for, and when the year winds up an increased showing over last year is among the certainties.

In looking over the card display of this house I find a very full collection of those beautiful, hand-painted, satin puff, holiday souvenirs, published by George C. Whitney, of Worcester, Mass. Mr. Baird tells me that he finds these artistic productions the most salable of his collections.

To those of the trade having calls for low-priced cards, J. Baird is offering a line of very choice goods and at extremely low figures. He is jobbing these cards at five dollars a hundred. The line embraces a varied assortment of designs, floral, landscape and figures, finished in bright colors, and printed upon fine bristol board. The greater part of this lot are "folders," having a cloth back. They are big bargains.

In my last week's gossip I called the special attention of the trade at large to the business announcement of Winkley, Dresser & Co., relative to Atlantic Rubber Bank. But, lo and behold, upon minute investigation the same was "*non est inventus*." Some of the trade are looking for that "ad." yet, so I told them that it would be "continued in our next."

Leaving the "bank" question with this little "rubber," I would further remark that the trade of Winkley, Dresser & Co., is taking on vast proportions, reaching up high into the thousands, and extending into remote territory. Besides its growing trade in staple goods, the house does a large business in commercial printing and blank-book manufacturing. One of the largest blank-books ever made is just finished by this firm, it being made to order for the Centennial Bank, of Philadelphia. The book is over six inches thick, the size when closed being 26x40 inches. The ruling of the book is what makes it of special value to banking houses, as it is ruled for special daily bank balances. Weston's bank ledger paper is used for this book. The binding is strong, durable and artistic. Upon such a work as this Winkley, Dresser & Co. can well afford to rest their reputation as blank-book manufacturers.

There seems to be some trade doing in mucilage, and Whittemore Brothers & Co. are having a share of it. The brands of mucilage manufactured by this house is known to the trade as the "Triumph." The manufacturers claim that the quality of their mucilage is kept right up to standard, which fact the growing demands endorse. No change in their list prices.

While interviewing a member of the firm I noticed that a number of cases of the "Triumph" mucilage were being shipped to distant points. They were marked for stationers in Charleston, S. C., Nashville, Tenn., and New Orleans, La. I might be more minute, but I was requested not to go into further details. Or in other words not to give

it away, for drummers are wide awake and looking for pointers. A. L. D.

PHILADELPHIA GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, PA., December 2, 1884.

The stationery trade is generally quiet; the principal sales made are in holiday, rather than staple goods. The retail trade in holiday goods has opened, and jobbers are disposing of considerable stocks, and are buying small lots to patch out with.

A matter that may be of some interest to fancy stationers is, that in the cleaning out of the old Ivy Mills of Willcox & Co., in Chester County, which is the oldest mill standing in the country, and the second one ever built in the United States, after the bulk of the paper had been taken out, the remainder and the rubbish was sold to a junk dealer, who discovered among it a quantity of paper, slightly damaged, which had been made by hand about one hundred years ago. This was sold to Molten and Münch, of 12 and 14 S. Seventh street. There are several grades of this paper, and as a curiosity—it being impossible to duplicate it anywhere, excepting such stock as Willcox & Co. may still have—it is likely to find favor as fancy note paper, for programmes for old folks' concerts, &c. Allen, Lane & Scott, of S. Fifth street, have already printed some very neat programmes on this paper, using old style type, and the forms and arrangement which were popular a century ago.

Jonas Langfeld, of 18 South Sixth street, seems undecided as to what will be the best disposition to make of his large stationery business. As was reported in this paper some time ago, he intends to go out of business. He has received an order from H. P. Blackburn, and has it now under consideration, but it is probable that he is waiting for a better offer, so that it is not likely that anything definite will be announced until about the first of the year.

Among the fancy goods handled by some of our large stationers this season, are mediæval clocks, in which the dial clock is inserted in the centre of a shield, and supported on the wall by a spear, halberd, &c.

The old paper mill of W. W. Harding, will soon be in operation again. This is the season for placing the contracts for municipal stationery. Bids for stationery supplies for the controllers' office were opened last week, by a sub-committee of the Finance Committee of Councils, and the bids were ordered to be scheduled. Fifteen stationery firms received orders for stationery supplies for the Receiver of Taxes' office.

The trade will be glad to learn that their old friend, J. G. Ditman, of Philadelphia, has been very favorably spoken of by a large number of friends and business men in connection with the postmastership of this city. If Mr. Ditman succeeds to that position, as he certainly ought to, the business community of Philadelphia will have reason to rejoice that one of its most honest and capable business

men is in a position where he can be of needed service to the public.

The death of William G. Perry, a well-known stationer of this city, has just been announced. It occurred on Saturday evening very suddenly. Mr. Perry was about fifty years of age, and seemed to be in vigorous health, but his death was caused by disease of the heart. His place of business was at 728 Arch street.

Some of our Philadelphia merchants have been interviewed by your correspondent on the subject of arbitration referred to in the last issue of THE STATIONER. E. G. Hancock, President of the Philadelphia Commercial Exchange, speaking in regard to the advantages of settling disputes by arbitration as compared to adjustment by law, said "that the difficulties which occurred between the members of the Exchange had been for a long time settled by their board of arbitration, which consisted of nine gentlemen of known business ability and integrity, and that in ninety-nine cases out of a hundred, the decisions of this board were accepted, though either party had the right of appeal to the courts, within ten days after the decision of the board. It was much better to submit cases of this kind to a body of business men, who would know the rights and wrongs of a dispute much better than a jury, chosen hap-hazard from the community, and often would be better informed than even the lawyers, or perhaps the judge himself. The services of the board had not been called for, except to settle the differences of the members, though he did not see why others might not be willing to leave the decision of matters pertaining to any business to such gentlemen as composed their board from year to year. In his estimation, such an arrangement in any line of business would be in many cases far preferable to the tedious delays of the law in our overcrowded courts.

Joshua L. Bailey, 210 Chestnut street, was asked his opinion upon the subject, but declined to be quoted as an authority, saying that he had not given the subject sufficient consideration to pass a decided opinion. No organization of the kind existed among the dry-goods trade, and yet it seemed to him that the matter was worthy of the attention of the business community. The delays of the law were very vexatious, and persons fully qualified to act as jurors were often objected to by the lawyers, while those entirely incompetent to form a correct opinion were allowed to fill the juror's seats. Any plan that would tend to a simple and impartial settlement of business difficulties, he thought, would not be objected to by honest, reasonable business men.

Horace W. Pitkin, of the firm of Pitkin & Thomas, 45 South Second street, gave it as his opinion that such a plan was decidedly preferable as far as city disputes were concerned; but he did not know how it would work when disputes arose with parties residing in remote points. It probably, however, could be easily effected, with proper management, as the carrying on of a lawsuit in similar

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- 1st.—It can be set to lap any sized head in half a minute.
- 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.
- 3d.—It will lap any size from half note to imperial.
- 4th.—The pens do not lift, but rule continually as in feint lining.

- 5th.—There are no cogs 10,000 sizes can be had from one wheel.
- 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.
- 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch.
- 8th.—The lift and drop of the pens is just the same as in hand-work.

MR. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickock Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double-cap, or over one thousand sizes, against ten from the gear wheels on our Hickock O. A. By lapping headings we save from fifty to sixty per cent. of time in settings, pens alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filling-in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,
DAVIS & FITZGERALD, 24 Liberty Street, New York

cases. There was one point which some might offer as an objection, and that was that even an honest, upright business man might be involuntarily biased by what would tend indirectly to his own interests; but this possible error of judgment was so slight that it was hardly likely to be offered as a radical objection to arbitration. In all difficulties where differences of opinion had occurred between employers and employees, arbitration had always proved the most satisfactory way of settlement, and he saw no reason why it should not be equally adaptable to general business. Even though a certain sum be paid to each of the arbitrators by the litigants for their services, as has even been done in the adjustment of the losses of some of our insurance companies. If the fees are not too large, the expense would be less than that of going to law, and the loss of time would be considerably less. P.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 1, 1884.

Here's some news for you! It's Cincinnati news. You shan't be kept waiting long for it—no longer than it takes to tell it. Well, ahem! perhaps you don't know that A. H. Pounsford & Co. have slipped along east of their old place two pegs. They make by the operation in every respect—some \$1,500 a year in rent; get a better store room, with entrances both on Main street and on Fourth street. It was a loss of sales to them while they had things upside down in consequence of moving, but they get the trade of two streets instead of one, and show off a 100 per cent. better than they did in their former quarters.

But here is more news. To be sure for the present it is based on rumor, but the rumor is pretty solid and is likely to crystallize into a public announcement within a very few days. It is that Peter G. Thomson, the Arcade bookseller will retire from the book and stationery trade and devote himself exclusively to the printing and publishing of illuminated toy-books, and to that end has rented the splendid printing house on Race street, south of Seventh street, recently vacated by Russell, Morgan & Co.

Connected with the rumor just enunciated is something between a report and a fact; indeed, it is a nascent fact, that Peter G. Thomson has either sold out or has agreed upon the terms of selling out his bookstore with its contents and the good-will of the concern, to Edward Woodruff, Jr., William E. Beard and Charles F. Bragg. It is further reported that this new firm will occupy a fine room in a splendid new building, now nearly finished, on the north side of Fourth street, a few doors west of Vine street. That being the case, this quarter of Fourth street will be well supplied with bookstores—Robert Clarke & Co.'s on the south side of the street, confronted on the opposite side by two rival establishments, that of J. F. Shumate and that of the new firm just named. Ed. Woodruff, Jr., is now and has been a sales-

man at Robert Clarke & Co.'s book store. Wm. E. Beard has for several years been the manager of Peter G. Thomson's Arcade book store, and Charles F. Bragg, a son of a member of the firm of Van Antwerp, Bragg & Co., has been a clerk for several years in the establishment last named.

The W. E. Dibble building, on the west side of Main street, next north of the splendid new government building, is now under roof and is seven stories high. It is one of the most attractive buildings in the business portion of the city and would be a noted edifice in any city on the American Continent.

There is a feeling here that Cincinnati is suffering less from the distressing business dullness which by general report pervades the country than any of her sister cities in the West. Retail trade is fairly good—almost brisk—in fact, in brisk times there have been periods of much greater dullness. An expert explains the recent lively sale of counting-room outfits by the manufacturers of mercantile stationery and blank-books on the ground that merchants are generally going to abandon the ancient style of bookkeeping to which they have clung in the past, and adopt for the future modern methods, whereby they can by inspection learn at the

close of each day how their business stands. Manufacturers of blank-books have been not a little surprised at the numerous calls they have had recently and are still having for complete new sets of books. If it means a revival of business, why that is good—but if it means reforms in the keeping of accounts, why that is just as good.

Stationers and book sellers are having encouraging signs of a good Christmas trade. Their sales to the country have been quite large already. Now the retail trade for the holidays has already begun, which is earlier by a week than is usual in Cincinnati. Christmas cards are having a fine run and so are toy-books and the thousand and one dainty little notions that a stationer carries in stock. Book buyers go in for quantity—that is, they want their money to buy as much as possible, and care much for typography and subject matter and little for showy binding. Now and then a finely bound book is bought for a present and occasionally—though rather rarely—a show lot of expensively bound books is sold to set off Mrs. "Nouvelle riche" Shoddy's library. Yet, after all, to most men the outlook for the future has much the appearance of a riddle.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

GEO. H. SANBORN & SONS, BOOKBINDERS' & MACHINERY,

MANUFACTORY: STANDARD MACHINERY COMPANY, MYSTIC RIVER, CONN.

E. P. DONNELL & CO., CHICAGO, ILL.

— MANUFACTURERS OF —

Bookbinders' ♦ Machinery ♦ of ♦ Every ♦ Description.

THE CHICAGO PAPER CUTTER.

✦ CUTTING STICKS MUST GO! ✦

THIS PAPER CUTTING MACHINE HAS A FLAT edge lower blade placed in the table bed. The upper knife on descending makes a shear cut on every part of the paper cut; the knife passes below the Table Bed and throws part of the front table out as the knife ascends; the front table is thrown back automatically, thus making a solid surface of the table. We do away with the set-screws that are used generally to take up the ware in the Knife Bar, as we use a simple bevel gib that is screwed up by one nut on top, which always keeps the Knife Bar firm and true.

There is no dulling of the knife as the knife-dulling surfaces are dispensed with; it saves the expense of the knives, saves grinding, sticks, &c., which are a great annoyance and expense as used on the other cutters.

The Knife Bar can be adjusted to any angle by the side steel rods.

It is supplied with our new patented clutch, which is simple and noiseless and combines the balance wheel pulleys and clutch all in one. Can be stopped instantly at any point and is acknowledged the simplest and most powerful cutter ever offered.

There is no drawing out of any kind of paper by our hand-clamp; has quick acting back gauge.

Price 34-inch Steam and Hand Power, \$600
Price 44-inch Steam and Hand Power, 1,000

No Cutting Sticks used on this Cutter, it has a Shear Cut that trims ALL the sheets CLEAN.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE "CHICAGO" PAPER-CUTTER.

Herewith is given an illustration of what is said to be the only paper-cutting machine which dispenses with the cutting-stick entirely. This cutter has a flat edge lower blade, placed in the bed of the table, and the upper knife (which is just the same as any ordinary cutting-machine knife) is drawn down with a draw or sliding cut, and in cutting through the paper, as in any other cutter, the knife-bar is placed on an angle, so that when the knife reaches the bed or flat blade, the knife gives a shearing cut in the last sheets cut, and cuts them as clean as the top sheets, the knife passing below the bed of the table without even touching the lower flat knife, and causing no wear whatever. The knife then throws part of the front table out, which allows it to pass below the bed, and on the knife ascending, is thrown back into position by means of a self-acting spring which makes a solid and even surface of the table. The knife having a shearing cut, saves grinding of the knife and also the expense of cutting knives and sticks; it saves the time

of adjusting the knife to the stick, and in every cut made the knife is not drawn over a knife-dulling wooden surface. As the knife always gives a shear cut on every part of the paper cut, it takes less power to run the machine and less clamping to hold the most difficult paper, as there can be no drawing out of any kind of paper.

Another advantage is that the set screws usually used to take up the wear on the knife-bar are substituted by a simple beveled gib inside of the frames, and to take up any wear whatever, one nut on top is screwed which always brings the bevel gib parallel with the knife-bar, and keeps the cutter in true cutting trim.

This machine has powerful steel rod-arms, and the knife-bar can be adjusted to any angle by means of right and left-hand threads on the side-rods, with resulting equal pressure on both ends of the knife-bar. The power clutch is simple and powerful. It has a noiseless pin, which is thrown by a very simple device. The pulley-wheel is a combination of tight-and-loose pulley, clutch and balance-wheel. By this new clutch, the cutter can be stopped instantly at any point of the cutting, either go-

ing up or down. The clutch can also be locked off, so that only the operator can throw on the power, thus avoiding any accident that may be caused by knocking against the handle and starting the cutter in motion without warning. The gauge is quick acting and operated by a positive link-chain belt, which does not expand. There are side gauges on both sides.

This cutter is built in two standard sizes by E. P. Donnell & Co., Chicago.

RAPHAEL TUCK & SONS,

Fine * Art * Publishers.

PARIS.

LONDON.

BERLIN.

298 BROADWAY,

NEW YORK, November 24, 1884.

GENTLEMEN :

We have much pleasure in announcing to you the opening of a direct BRANCH ESTABLISHMENT for the United States and Canada at the above address.

It has been obvious for some time that, in justice to the continually increasing variety and number of our Art Publications, a closer relationship with the American Continent had become a downright necessity; the requirements of so important a market justifying, nay, necessitating, that close attention and study which only a direct intercourse can cultivate to advantage.

We point to our past record as an earnest of our future efforts in the matter of ARTISTIC and NOVEL PRODUCTIONS and the various new lines, such as EASTER and all branches of CONGRATULATORY CARDS; FLORAL and other ART STUDIES; CHROMOS, RELIEFS, SCREENS, TERRA-COTTA WARE, &c., with which our Representatives are making their debut on our behalf, may fairly entitle them to your favorable consideration.

Upon one subject we would lay particular stress, and that is touching the matter of prompt delivery of samples and stock; and here it is that a direct intercourse with the American trade, which will henceforth be supplied in advance of the English market, will prove of immediate benefit, and avoid all unpleasant friction caused by lateness of deliveries.

In conclusion we would gladly bespeak for ourselves the good-will of our competitors, no less than that of the entire trade, and our actions, prompted as they will be by a careful solicitude for the best interests of the trade in general, will be calculated to secure and retain that good-will for us. We are, gentlemen, yours faithfully,

RAPHAEL TUCK & SONS.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

S. H. Foster, publisher, Marianna, Ark., has sold out.

William G. Perry, bookseller and stationer, Philadelphia, Pa. is dead.

A. C. Perry, stationer, &c., Winnipeg, Man., has assigned in trust.

Glover & Dunn, stationers, Brunswick, Ga., have been burned out. Insured.

A. C. Hand & Co., booksellers, &c., Girard, Kan., have removed to Lawrence.

Wright & Sharp, booksellers, &c., Springfield, Ohio, have sold out to Barr & Pierce.

An assignment has been made by Wilson Brothers, printers and stationers, Winnipeg, Man.

J. H. Murphy, publisher, Grand Forks, Dak., has been burned out. Loss, \$19,000; insured for \$10,000.

Ragan & Evans, publishers of the *Independent*, Waynesburg, Pa., have been burned out. Insured for \$2,000.

George H. Sanborn & Son have issued a new catalogue of their bookbinders', printers', paper-making machinery, &c.

The style of the firm of Patrick, Weaver & Co., publishers, Columbus, Ohio, has been changed to F. L. Patrick & Co.

John Gibson is getting up designs of Easter and valentine cards, and expects to show as fine a line of these goods as anybody in the trade.

Amelia E. (Mrs. Edwin A.) Ervin, dealer in paper hangings, stationery and toys, Philadelphia, Pa., has sold out her stationery and toy business at auction.

Clevenstine & Heinly, printers, Reading, Pa., have dissolved partnership. J. B. Clevenstine continues the business, and W. O. Heinly goes into the engraving business.

The preferences of Van Campen & Johnson, lithographers, New York city, who assigned on November 22 to George W. Hoping, are \$6,437. There was a chattel mortgage on the plant for \$5,000.

On November 28, Lloyd Brezee, formerly proprietor of the *Evening Journal*, Detroit, Mich., bought the *Morning Times*, a united press paper. Editor Tomlinson, of the *Journal*, on the 29th inst., secured a preliminary injunction restraining him from the publication of the paper as an afternoon daily, as had been announced. The injunction was conditional, Brezee being allowed to publish if he furnished \$3,000 bail to reimburse Tomlinson in case the suit finally went against him. The first issue of the paper came out at three o'clock as a thirty-two column folio, with full Associated Press reports. It will have three issues daily. The change to an afternoon paper was announced on the 29th by a parade of several hundred newsboys headed by a brass band.

Lawrence & Baxter have a new pattern in "J. A. P." papers. It has a narrower stripe than that hitherto shown and is preferred by many for printing purposes. The Silicate Book Slate Company has a large stock of blackboards suitable for the holiday trade. Its line of blackboards, with drawing cards, is especially adapted for children, and will instruct and amuse when other toys are thrown aside. The silicate blackboards come in all sizes, and for a variety of purposes.

Notwithstanding the depressed condition of trade, there is a very fair business being done in holiday goods. One of the most busy tradesmen is F. H. Loss, jun., who reports that he is having an unusual demand for his goods just now. His line this season embraces some of the most desirable novelties to be found either in the American or European market.

The clasp envelope made by the Clasp Envelope Company, 39 and 41 West Broadway, is intended for mailing samples. The clasp is made from the best quality of sheet brass and it keeps the flap of the envelope securely fastened and will not break or become loose like many other fasteners made of twine, tape, &c.

S. T. Smith, 14 Park place, New York, makes a specialty of the manufacture of type-writer and calligraph materials such as ribbons, carbon and manifold tissue-papers, fine linen papers, &c. Catalogues and price-lists of these goods will be sent free to applicants.

Colin S. Cohen, of London, England, is a young gentleman on his first visit to this country to look up American specialties for introduction in the English market.

Louis Marx, dealer in picture-frames, New York city, has assigned.

I. S. Maddox, dealer in picture-frames, Louisville, Ky., has assigned.

A. L. Lee, stationer, North Adams, Mass., has sold out to O. J. Copeland.

R. A. Tanner, bookseller and stationer, San Buena Ventura, Cal., has sold out.

C. D. Ulmer, newsdealer, &c., Sterling, Kan., has sold out to George Dryland.

Kalter & Hersh, dealers in wall-papers and picture-frames, Dayton, Ohio, have assigned.

Robert Morrison, publisher of the *Ouray Times*, Ouray, Col., has sold out to Andrew & Wonderly.

F. H. Thomas & Co., dealers in law books, St. Louis, Mo., have made an assignment. The assets are placed at \$76,000; liabilities not stated.

Cutter & Wilson, publishers of the *Adin Argus*, Adin, Cal., have dissolved partnership. Charles H. Cutter retires from the firm, and S. A. Wilson continues the business.

The Acme Stationery and Paper Company is making up a cheap line of school exercise books. It is having a very good trade in its various grades of writing tablets.

R. H. Salter & Co., manufacturers of legal blank-books and job printers, Cleveland, Ohio, have been succeeded by the Legal Blank and Publishing Company, with an authorized capital of \$20,000.

The publishers of the *Svenska Folkets Tidning*, Minneapolis, Minn., have recently purchased the *Svenske Arbetaren*, a Scandinavian paper in Chicago, and will consolidate the two, with headquarters in Minneapolis.

Cassell & Co., Limited, have issued an illustrated and beautifully printed catalogue of their fine art and juvenile publications for the holidays. This attractive presentation induces the wish for the realities; and the trade will be able to form a just estimate of the taking qualities of the books offered by this medium.

A. A. Weeks is producing some very attractive novelties in glass inkstands. One of his latest designs is of a semicircular shape, with the figure of a horse in a reclining position at the back and a removable ink-well, with cap on either side, in the front. Between the ink-wells there is a place for a sponge, stamps or loose pens. The inkstand is made in two styles, one plain and the other with the figure etched. The material is the

best of flint glass, and the price of the article is very low.

D. B. Wilson, stationer, &c., Tyrone, Pa., has been closed out by the sheriff.

Rolston & Bowes, publishers, Yarmouth, N. S., have dissolved partnership.

Dickenson & Cranston, wholesale and retail stationers, Woodstock, Ont., have been burned out.

A. N. Brice, publisher of the *News*, Sudbury, Pa., is advertised to be sold out by the sheriff.

The *Leader* Publishing Company, Eureka, Nev., has been sold at auction to R. Sadler, for \$1,650.

Among the new publications by T. B. Peterson & Brothers is a society novel entitled "Married Above Her." The story is one of mixed pride, prejudice and passion, illustrating the weaknesses and superficiality of society life.

James Sheehy, dealer in subscription books at No. 33 Murray street, New York city, made an assignment on Monday to Samuel W. Murphy, giving preferences for \$698. He has been in business for over thirty years, but has had only limited capital.

The Mutual News Company, 54 Beekman street, New York, and 175 Devonshire street, Boston, has issued a price-list of newspapers and periodicals which it handles. The company makes a special announcement of its cigar list, and will soon issue a catalogue in its cigar and its stationery departments.

L. Prang & Co.'s line of cards this year is marked with many notable examples of artistic effort. Among the artists who have contributed to this season's productions are: Miss Dora Wheeler, Mrs. E. T. Fisher, Miss Fidelia Bridges, Mrs. O. E. Whitney, Miss L. B. Comins, L. B. Humphrey, Mrs. M. B. O. Fowler, Miss V. Gerson, Mrs. Sarah E. Whitman, Harry Beard, E. B. Bensell, H. Giacomelli, W. Hamilton Gibson, G. B. Le Fanu, J. W. Champney, Walter Satterlee, A. Sandier, A. F. Bellows, W. L. Taylor, G. Merwanjee White, J. T. Murphy, Wm. H. Beard, H. Winthrop Peirce.

A fire at New Haven, Conn., on Sunday morning, gutted the lithographic press-room of O. A. Dorman in the Quinipiac Building, corner of Chapel and Union streets. The stock of the New Haven Paper Box Company was also badly damaged by water. The firms lose about \$2,000 each; insured.

The schedule in the assignment of James H. Bouton, bookseller, at 706 Broadway, to William H. Post, which were filed Saturday in the Court of Common Pleas, show liabilities, \$133,056.90; nominal assets, \$158,579.60, and actual assets, \$71,840.18.

The Chicago (Ill.) Paper Company, which was burned out November 24 carried a total insurance of \$63,350 in a large number of companies in policies of from \$2,500 to \$350 each.

The stock of A. W. Hitchcock & Co., paper dealers, Glens Falls, N. Y., was damaged by fire \$1,000 on November 26; insured.

An execution has been issued against H. J. Goth & Brothers, paper-hangers, &c., Bethlehem, Pa.

John Shearn, Jr., & Co., booksellers, &c., Houston, Tex., have sold out to N. D. McDonald & Co.

An assignment has been made by Spaulding Brothers, wholesale paper-stock dealers, Providence, R. I.

Eugene W. Randall, publisher, Morris, Minn., has been burned out. Loss, \$1,000; fully insured.

McCreary & White, newspaper publishers, Gainesville, Fla., have dissolved partnership. E. J. White & Co. succeeds to the business.

The Ideal Pen Company (not incorporated), New York city, has dissolved. L. E. Waterman continues the business under the same style.

William C. Cozzens & Co., dealers in paper-hangings, &c., Newport, R. I., have lost a member of their firm by the death of H. A. Kaull.

Buyers of tracing-cloth are invited to address George Ryder Ousey & Co., 1 Church court, Old Jewry, London, E.C., England. This firm wishes to enlarge its American trade, and offers to fill orders at 5 per cent. advance on cost prices.

A private view of the competing designs for prize Christmas cards, exhibited by L. Prang & Co., was given at 226 Fifth avenue on Saturday night. The public exhibition of these designs continues throughout this week. Four prizes are offered, and the list of competitors in-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

cludes the names of twenty-two well-known artists.

A new illustrated weekly periodical has appeared in this city. It is devoted to family and household reading, such as cookery, fashion topics, juvenile literature, &c., and is well filled with illustrations. It is issued from the Frank Leslie publishing house.

With its next number the *Magazine of Art* opens right royally its new volume. Not satisfied with giving a handsome etching by R. W. Macbeth as a frontispiece to the number, the publishers present to each subscriber to the new volume a beautiful etching, by J. A. S. Monks, after his popular painting, "Crossing the Pasture." This etching is a companion in size to Mr. Farrar's "Evening by the River," and is suitable for framing or the portfolio. Mr. Macbeth's etching, "Here it Is," shows a young woman sitting at the breakfast-table, looking over the morning papers. The opening paper of this number, describing "The New Forest"—that wild, picturesque region in the south of England—is by Millicent Garrett Fawcett, wife of the late Postmaster-General of England. Helen Zimmern, translator of the "Epic of Kings" and author of "Maria Edgeworth" in the famous women series, writes of Benjamin Vautier, the painter of peasants; and Andrew Lang lays down the pen of the rhymester to write of "Some Japanese Bogies." A page is devoted to R. L. Stevenson's poem, "A Visit from the Sea," and Alice Haver's illustrations of it, printed in a delicate sea-green tint. F. Mabel Robinson writes of the "Romance of Art," and "Hatfield House," the residence of the Marquess of Salisbury, is described by J. Penderel-Brothurst. Other papers are devoted to Meissonier. "Greek Myths in Greek Art," "Illustrations of Moliere" and "Some Portraits by Hogarth" are described by Austin Dobson. Every page of the number bears an illustration. A feature of this issue is an article on the Cincinnati Art Museum, in which the history of the museum is given, with several illustrations showing its different stages in building, and a sketch from the architect's drawings, showing how it will look when completed.

Janentzky & Weber, 1125 Chestnut street, Philadelphia, Pa., have been paying special attention to the importation of Limoges ware

during this fall season. The vases are partially decorated, or, in other words, have mineral backgrounds covered with a potter's glaze, and are essentially pieces of Fayence. The background colors are a happy combination of green, brown, blue and ochre. Upon these backgrounds the average amateur artist can build a very pretty and harmonious ensemble. The after-colors are laid on with oil-colors, in combination with the I. U. G. Limoges glaze, a medium which has given general satisfaction with the unglazed barbotine ware. No less than fifty different patterns have been designed, comprising vases of every variety and description, slippers and umbrella-stands. The advantage in this kind of ware is that it can be decorated in ordinary oil-colors, and affords especial advantages to amateurs. The firm also has a very full line of barbotine ware, and it will prove an interesting visit to those who feel that they have time to inspect the handsome stock which this enterprising firm has secured for its customers. The patterns range from four inches to twelve inches in height, and every variety of shape and style imaginable is offered to tempt the ever-varying taste of the American public. No less than sixty-one different designs are offered in all, and if the average man cannot suit himself out of these, he deserves to go without anything.

Fire broke out on Wednesday in Elias & MacDonald's blank-book factory, on the fourth floor of No. 89 Ann street, New York. The losses of the tenants are as follows: Elias & MacDonald, \$1,000; Weinser & Dormitzer, printers, \$100; George H. Adams, publisher, \$100; O'Neil & Sullivan, bookbinders, \$100; William Shepard, cards, \$100.

Resolution of the International Literary and Copyright Congress.

The International Literary and Copyright Congress, recently held at Brussels, adopted a resolution declaring that the right of reproduction of a work belongs to the author independently of its material property. It was further resolved that any such reproduction, without the author's permission, constitutes an infringement of his rights. The King of Belgium was present during a portion of the session when the following resolutions were adopted:

1. Musical works are protected as regards their publication, reproduction and performance, by the same rights as literary and artistic works.
2. Works of art should be subjected to no impediment nor to customs formalities.
3. A proprietor of works of art is not permitted to exhibit them in public without authority.

A Local License Decision.

A decision of much interest to commercial agents has just been rendered by the police magistrate of Washington city, D. C., Judge Snell. The national capital has obtained an unpleasant reputation among commercial travelers for the severity with which the local license law is enforced. There seems to be some local detectives who have little else to do than to seek for violations of the law. A Baltimore salesman was recently charged before the police court with being an unlicensed commercial agent. The evidence was to the effect that he had been in the habit of visiting Washington each week and soliciting business there. When arrested he had no license. He showed a card from a merchant of Washington, who had a commercial agent's license, authorizing him to transact business for him. It was also proved that the Baltimore commercial traveler paid the Washington merchant for the privilege of selling under his license. The court held that a man who takes out a license of this character can allow another person to sell under it, provided that not more than one person sells under the license at the same time. The defendant was released and no appeal was taken.

George C. Greene offers a new line of oil board for copying-press books. It comes in both manilla and linen.

WANTED.

As Partner, a practical stationer, with from \$6,000 to \$8,000, to extend the business of a well established Stationery Store and Book and Job Printing house in a very eligible location in Philadelphia. Address "Printer and Stationer," care of American Stationer.

A GENTLEMAN

Well known, reliable, and with the best references, would like to arrange to represent in Chicago and the Northwest, a good house, in either the Stationery, Paper, book or kindred line; will give all or part of his time, as desired. Address "READY," care of The American Stationer.

WANTED.—A SALESMAN WHO THOROUGHLY understands the Stationery, Blank-Book and Printing business, for city and near trade.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

FOR several sessions Congress has approached the question of a national bankrupt act, very much as a cat does a chestnut bur, only to touch it and retreat. A vast amount of shilly-shallying has been gone through with, and although the Senate bill "to establish a uniform system of bankruptcy" now awaits the action of the House, it would be a difficult matter to say just what we may expect from the present Congress. One thing, however, is not to be gainsaid—the professional and business men of the country all agree, that a well-devised national bankrupt act is fast becoming one of the commercial necessities of the day. The advent of a new *régime*, after nearly a quarter of a century's continuance in power of the old one, naturally begets some feeling of distrust in commercial circles, more especially in regard to possible modifications of the tariff. But, in addition to this feeling of uncertainty, the times have not been uniformly prosperous during the past five years. And, as is usual in such cases, depression in business circles and shrinkage in values have engendered a speculative spirit, which has, without doubt, worked widespread harm. Railway and iron interests, above all others, have suffered from the reaction consequent upon overproduction and undue stimulation. In a word, the country finds itself in somewhat the same condition as in 1867 and '68, and the same remedy should be applied. Although the last national bankrupt act outlived its usefulness, it did good service in its day, and we are led to give a hasty glance at the bankruptcy bill before Congress, with a word of comment and criticism here and there,

THE bill shows evidence of genuine hard work, and a studied endeavor to give the country the best in this line. The first point which attracts attention occurs in Section 12. The provision that commissioners shall be "practising attorneys" should be amended by adding the words "of at least three years' active practice." The proposed appointment of supervisors (Section 15) seems to be entirely superfluous, and its only recommendation is that it creates a large number of very pleasant positions. Let the commissioners be lawyers of standing and ability, equal to the usual standard of our district judges, and there will be no need of "supervising" them. In fact, these "supervisors" would be sure to work more harm than good, and would be a source of constant irritation, introducing an element of discord into proceedings too often signalized by embittered feelings. To give any official the right to interfere with the action of a judicial officer is certainly a startling innovation. Appeal is the only logical

manner of procedure. Making the commissioners officers of the government paid out of the Treasury is a step in the right direction. They should be forbidden under heavy penalties to accept any gift, fee or gratuity whatever from the bankrupt or creditor. In the matter of fees (Section 20), the fee of \$60 is too large for small debtors. When the estate is under \$1,000, it should not exceed \$30, and in small estates the percentage payable by the trustee should be entirely abrogated. Section 2, relating to copies of papers, should be so amended as to permit any debtor, creditor, attorney or person whomsoever, upon payment of a small fee, say, ten cents, to make a copy of any paper filed in the bankrupt court, as is now practised in our State courts, and not be obliged to pay for labor which he may be willing to perform himself. Section 31 provides that the voluntary bankrupt must owe \$300. It would seem hardly necessary to burden the district courts with voluntary proceedings. Upon a proper showing, the commissioner should have the authority to adjudge the petitioner, a bankrupt, and proceed accordingly, merely filing the proceedings in the bankrupt court. By Section 32 involuntary bankruptcy is to be confined to "traders" owing \$1,000. The term "trader," as used in the act, will exclude persons who buy goods for sale only to their tenants, employees and laborers. It will also exclude mechanics and farmers (without a place of business in any village or town, &c.). The wisdom of this restriction is not apparent. It would seem to be quite unnecessary to limit the application of the act to technical "traders." It might not only be expedient but very desirable to pursue "any person" who committed an act of bankruptcy.

WHY should the debtor in involuntary cases have ten days' notice (Section 35) to show causes, and such notice be required to be served not less than five days before return day? Should not the court have power upon a proper showing to make the order returnable forthwith, or in forty-eight hours? It would seem that such a favor ought to be lodged in the court for extraordinary occasions. The reply that the supposed bankrupt may be reached by "warrant" is not the point. Emergencies arise when creditors must act with the greatest promptness, and certainly it would seem that when a debtor is a "*prima facie* bankrupt," and there is danger of his doing, or suffering to be done, some act prejudicial to the interests of the creditors, he should be at once obliged to face his creditors in person or by attorney. If all debtors were honest, such a provision might be unnecessary. The provision that cred-

itors may choose "one or more trustees" is too indefinite. (Section 37). Estates should be confined to "one trustee," unless their assets exceed \$50,000. Section 40 provides for a Committee of Direction. This is an excellent provision; but would it not be unsafe to go outside of the creditors for such a committee? Their powers are admirably set forth, and are none too general. The "Committee of Direction" has proven an efficient factor in the operation of our State bankrupt law. Such a committee constitutes the best and only "supervisor" needed to spur the derelict and check the extravagant or careless trustee. That the "committee" should be chosen solely from the creditors, however, and from the largest ones, goes without saying. The provision allowing the bankrupt a sum of money, not to exceed \$500, for support pending proceedings, gives too great discretion. The court should be authorized to pay to the bankrupt a weekly allowance, to be graduated in proportion to the estate. Section 53 should be stricken out entirely. No person with delegated powers should be allowed to submit any controversy to arbitrators to be chosen by himself and the other party to the controversy. The commissioner is the proper person to whom to submit any controversy. Section 54, it strikes us, should be amended by absolutely forbidding the continuance of a bankrupt's business, unless two-thirds of the creditors in value approve such a proceeding, and not a simple majority. It is always a dangerous experiment to continue the business of a bankrupt by means of "receiver or trustee," and it should be resorted to only under extraordinary circumstances, when the chances of accruing advantages are beyond question. We would amend Section 56 by making it the duty of every trustee not only to keep a regular account of all moneys, but to write up such account weekly from the date of entering upon his trust. It suggests itself to every thinking business man that something should be done to put an end, so far as possible, to the setting up of *fictional claims* in behalf of the debtor by zealous friends, more inclined to help him out of a "bad scrape" than to guard their consciences from hurt. The creditor should be obliged to set forth his claims with great particularity as to the items of the account, dates, amounts, credits, &c., and to swear positively that the same are *bona fide* and not made with intent to secure any illegal advantage for the debtor. It is not plain why the bankrupt should be forced to apply for his discharge before the expiration of six months after adjudication. This seems needlessly arbitrary. The act does not attach any conditions to the "discharge,"

as, for instance, payment of a certain dividend. Fraud, of course, would prevent. The certificate shall be given under the seal of the court and shall "forever discharge him from all debts and claims." Section 88 provides, very wisely, that no promise or covenant of a bankrupt before or after discharge to pay a provable debt shall be valid unless in writing and signed by the party. The provisions of the act are made by Section 93 to apply to all moneyed business or commercial corporations and joint-stock companies, and they may proceed in their own behalf or be proceeded against like other debtors, but no discharge shall be granted to any corporation or joint-stock company. Sections 95 to 100 provide for proposals for composition to be made any time after filing of the schedule and inventory. All debts, costs and charges entitled to priority by this act must be paid, and there must also be a payment to the general creditors of fifty cents on the dollar, provided that the assent of at least a majority in number and value shall be obtained, or of a less payment than fifty cents on the dollar, provided that the assent shall be signed by three-fourths of the creditors in number and value. The Court of Bankruptcy retains jurisdiction over a "compounding debtor" and all proceedings until the composition is complete. Such are some of the salient provisions of the "bill to establish a uniform system of bankruptcy" now before Congress. That it will be passed in its present form is hardly possible, but that the Forty-eighth Congress will, before its expiration, make a genuine effort to give the country a bankrupt act so benignant in its provisions as to meet with general approbation, there should be little doubt. It is a much-needed measure.

Roundabouts.

BY THE TRADE LOUNGER.

Congress having resumed its session, there is anxiety as to what measures of legislation it may or may not attend to. There are a number of matters of public interest pending and which ought to be pressed. The tariff, it is hoped, is out of the ruck, and the people will be glad enough if it is let alone for a while. Only a few brief weeks remain for action and work must be hurried. Can much that is desirable be effected?

But let us hope for the best in all things and trust to that power which "doth shape our ends" in all things. Believe with courage firm and faith sublime that not the worse but the better future is in store for us, even in the shape of legislation and all other things which tend to make us happy.

I have looked in vain for something of unusual character in Christmas-card fancies this season, and have failed to discover the

first striking novelty. There are plenty of pretty things—bright, joyous and otherwise—but nothing that bids one pause. We want a design from some artist whose depth of expression comes from a deeper source than the desire to gain popular applause or a prize in a competition—in fact, we want something from the soul.

A Pittsfield (Mass.) man has devised a new form of check tags, which, it is claimed, will be of great convenience to railroad baggagemen. Heretofore the tags have been printed in blank, and when checking a piece of baggage the baggageman has been compelled to whip out his pencil and fill in the blank with the name of the destination. The tags designed by the party referred to have the names of the several stations printed thereon, and all that is necessary in using them is to take from the rack the particular tag wanted.

"It is not generally known," says an English paper, "that the elaborate imitation of frost and ice on Christmas cards is done by scattering particles of thin glass over gummed cards. These tiny atoms penetrate the lungs of the poor girls employed in the manufacture and either kills them or renders them very soon helpless invalids. The danger is so well understood that few English girls can be found to undertake the business." No, it is not generally known. I have heard that mica was used instead of glass. Will my friend, F. G. B.—a man who knows Xmas cards—give us a little information?

An ingenious arrangement is a combination paper-cutter and stamp lately patented by a California inventor. The paper is contained in a continuous roll attached to the stamp and cutter. It cuts any size sheet for wrapping up packages and at the same time stamps on the sheet the name of the firm.

A very novel blotter arrangement "consists of a squared block of wood in thickness equal to that of an ordinary block of note-paper. The leaves are hinged to the corners of the head by means of flaps. The object of this is to enable a series of leaves to be opened as desired—that is, either of the leaves may be the undermost or the uppermost of the series. The block of wood can be inserted between either two of the leaves and the leaves be opened or closed upon the block, or when more than one sheet of note-paper is being used at the writing, the first is detached from the block and inserted between two of the leaves, while the block remains in position for further use."

Answers to Correspondents.

B. S. S. wants to know who makes screw-cap inkstands of good quality.

Ans.—A. A. Weeks, 82 John street, New York.

M. A. C. asks: Who has the scissors case mentioned in THE STATIONER of November 27?

Ans.—C. B. Barker & Co., Broadway and Ninth street, New York.

L. P. C. wants the address of parties making paper bedspreads.

Ans.—Try Julius A. Pease, West Medford, Mass.

AMERICAN PAD CO., HOLYOKE, MASS.

Alles & Conant are getting ready a desirable line of goods for the new year and jobbers are invited to examine it before placing their orders. The firm manufactures a large line of portable writing-desks and new additions are frequently made to it.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready to use*, and is the *only Mucilage* that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), or gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1832.

Obituary.

HENRY IVISON.

The founder and, until his retirement about four years ago, the head of the largest school-book publishing house in the world, died at his home in West Forty-eighth street, New York, on November 26.

Mr. Ivison was in his pew in the Rev. Dr. John Hall's church on Sunday morning, complaining only of a slight cold on his lungs. On Monday he was taken ill. Tuesday evening he felt so much better that he sat up in his library and read the newspapers. During the night he grew rapidly worse, and early in the morning he passed away.

Henry Ivison was born in Glasgow, Scotland, in 1808. Had he lived he would have been seventy-six years old next Christmas Day. Mr. Ivison's parents came to America in search of a fortune when he was a lad twelve years old. After they had been here a short time they went back to Scotland again, leaving the boy behind them apprenticed to William Williams, of Utica, then the largest bookseller west of Albany. Partly on account of a fancy he had taken to the boy, but mainly from sympathy with his being left alone in a strange land at so tender an age, Mr. Williams took young Ivison into his family and treated him as his own child. In 1830, a year after he was out of his time, Mr. Williams was asked by a prominent friend in Auburn if he could not send out a reliable young man to open a bookstore. The better class of people, especially the professors and students at the Auburn Theological Seminary, would be sure, the friend said, to encourage and patronize him. Six months afterward, when he had been instructed in the details of the salesroom, Henry Ivison left his early friend and employer, and, with the pecuniary assistance of the friend who suggested the enterprise, began business life for himself in Auburn.

After a moderately successful business of sixteen years in Auburn, Mr. Ivison removed to New York city. He had become acquainted with Mark H. Newman, a successful book publisher, and received from him a proposition of copartnership. Mr. Ivison was loth to leave Auburn, but left the matter for his wife to decide. She advised him to come to New York. In 1846 the firm of Mark H. Newman & Co. was established. The most important books published by it were Sander's Readers, the first consecutive set of readers published in America, beginning with the primer and grading upward five volumes. The sale of these readers was very large at the outset, steadily increased, and now is something enormous. When he was in London, in 1866, Mr. Ivison told a gentleman from whom he had purchased large quantities of paper that they never put to press less than 100,000 copies of Sanders' Pictorial Primer.

In 1852 a new partnership for three years was founded under the firm-name of Newman & Ivison, but the senior partner died before the end of the first year, leaving the business entirely in Mr. Ivison's hands. By consent of Mr. Newman's executor, he carried it on in accordance with the copartnership articles. Later, Mr. Ivison bought out the entire in-

terest of the concern and took in as partner H. F. Phinney, of Cooperstown, an experienced bookseller, a son-in-law of J. Fenimore Cooper. The firm of Ivison & Phinney is perhaps better known than any other with which Mr. Ivison has been associated. In 1866 Mr. Phinney's health failed, and Birdsey Blakeman, Augustus C. Taylor, and Mr. Ivison's eldest son, David B., were admitted to the firm, which was carried on under the name of Ivison, Phinney, Blakeman & Co.

After his retirement, Mr. Ivison divided his time between his house in New York and his summer residence in Stockbridge, Mass. He was at one time an Elder in the Madison Square Presbyterian Church, but when he moved up town about eight years ago, he joined the Rev. Dr. Hall's congregation. He was at the time of his death a trustee of the Union Theological Seminary. He leaves a widow, one son, David B. Ivison, and two married daughters. One of them is the wife of A. B. Hoadley, of New Haven, and the other the wife of James A. Parsons, of this city. The funeral took place last Friday afternoon.

ELISHA CLARKE.

Elisha Clarke, a leading citizen of Bath, Me., died on Sunday, November 22, being nearly seventy years old. He was publisher and editor of the *Lincoln Telegraph* forty-five years ago, and until he sold to Chamberlain, Haines & Plummer, who changed the name of the paper to the *Northern Tribune*. He soon after was in the book trade—first with Clarke, Sawyer & Magoun, and later by himself. For a long time his death was almost hourly expected. He partially recovered, but has never since been able to do any business.

H. N. TINKHAM.

H. N. Tinkham, one of the oldest and most respected business men of Springfield, Mass., died on Thursday, 27th ult. Mr. Tinkham was born at Sandwich, sixty-two years ago, and moved to Windsor, Vt., with his parents when quite young. Mr. Tinkham has been connected for a number of years with the dry-goods trade. Mr. Tinkham had an interest in the Springfield Paper Company, of Rainbow, Conn., of which he was a director and the secretary. O. H. Greenleaf says of him: "He was one of the best and truest men I ever knew." Mr. Tinkham leaves a widow, a sister of his former partner Mr. Wilson, and one daughter.

The New York Blank-Book Company, 29 and 31 Beekman street, has ready for the trade its "Common Sense" diary, which contains a variety of useful information, together with headings for memoranda, insurance record, bills payable and receivable, record of addresses, &c., aside from the form itself, which is a weekly journal, with a cash account, separate, on each folio, arranged with a space for each day. This diary is made in the best size for pocket, and in five styles of binding; size $5\frac{3}{4}$ inches long by 4 inches in width. The company has made only a limited supply, as introductory for another season, and can furnish small sample lots only.

THIS CUT
SHOWS
No. 2.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliant illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all-unsurpassed methods for

LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard. ART—copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Slide Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides), \$12 each. No. 4 Lantern produces a Four Foot picture. Price, (with 12 Slides), \$6 each. Our Descriptive Circulars and other printed matter are so arranged that Merchants can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. For Home Use the ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

J. B. COLT & CO., Sole Mn'fr's, 254 & 256 Canal St., & 104 Elm St., New York, U. S. A.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, December 3, 1884.

THE MONEY MARKET.—The demand for loanable funds has been quickened to some extent by the more active condition of the Stock market, and slightly higher rates for call loans have prevailed. As high as 3 per cent. has been paid, but $1\frac{1}{2}$ to 2 per cent. represents the bulk of the transactions. Commercial paper continues quiet with moderate offerings, and the best endorsements easily negotiable at $4\frac{1}{2}$ to 5 per cent. The Stock market has again been characterized by a buoyant tone and a further advance of the whole list, with the dealings comparatively active and the feeling decidedly bullish. Railroad bonds have been fairly active and higher. Governments easier. Foreign Exchange has ruled firm, owing to the small supply of Commercial bills and an improved demand for remittance. Posted rates for Sterling $4.81\frac{1}{2}$ to $4.85\frac{1}{2}$.

THE PAPER MARKET.—Presents a little more cheerful aspect, although the volume of general trade has not materially increased since last week. Conservatism in operations of almost every character is still the rule and not the exception, or, in other words, buying and selling of merchandise in almost all departments of trade is on the hand-to-mouth principle. Manufacturing industries are still coping with overproduction, and values, with scarcely an exception, are lower than they have been in many years, but it is to be hoped that through the restriction of production so generally in progress at this time in nearly every industrial pursuit, that at no distant day it will result in restoring equilibrium to the law of supply and demand. Production is being so curtailed that surplus stocks of paper are being more readily absorbed than was the case a month ago, and this is particularly so in the line of fine writings, manufacturers of which started up their mills on Monday, after a week's shut-down, and in some instances supplies are so near actual daily requirements that even a small increase in the demand would produce a temporary scarcity and a stiffening up of prices. Print papers, as compared with the market early last month, are scarcely as strong, although this weaker feeling is more pronounced in news and the lower grades of book than in the higher grades, and is no doubt due to the lessened demand caused by ending of the political campaign, and from the book publishers. We hear of a moderate order having been taken recently to supply the New York Tribune at $5\frac{1}{2}$ ¢, which is slightly lower than the existing contracts. Manillas hold their own fairly well. Selling prices for straw boards are \$32.50 for No. 1 steam dried, although quoted up to \$35, with trade very quiet.

THE STATIONERY MARKET.—Although trade in all lines is still more or less depressed, in holiday goods a fair amount of business is doing. The feeling, too, among dealers of staple goods is much better than it was a few weeks ago, notwithstanding no business of any amount is expected to be done until the opening of the new year, when it is generally believed that there will be a decided improvement all round. In some lines of school stationery the demand is quite active and taken altogether, the trade in this direction has been very fair for several weeks. This remark does not include inks, which have been moving slowly. Dealers in these report sales hard to make, and in fact, do not expect to do much business until after the holidays. They report, moreover, that collections are slow even of small amounts. The trade in manifold paper, typewriting materials, &c., has shown a decided improvement since October, compared with what it was a few weeks previous. This is easily accounted for, as the courts are now in operation, and the lawyers are great consumers of these goods at such times.

GUM FOR BACKING LABELS.—Mix pure dextrine with boiling water until it assumes the consistency of ordinary mucilage. Apply with a full, evenly made camel's-hair brush. The paper should not be too thin or unsized.

Fire! Fire! Fire!!

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 ..per doz ..\$24.00 | Extra Pads.....per doz...\$3.60

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE that has yet been invented. It is made in three sizes—No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is made of material handsomely finished in muslin, green on one side and brown on the other. The edge next to the forehead is bound with leather, and the outer edge with metal, making a complete automatic spring, which fits heads of all sizes. The material is at once the lightest and strongest, so that while the Shade rests on the head as lightly as a strip of ribbon and firmly as a cap, it has all the elements of durability. There is a large demand for this Eye Shade.

WILLIAM B. WHITE, Patentee and Manufacturer, No. 29 High Street, Boston.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasp toward ends until tight. In moving Clasp always press the Ends or Jaws as close together as possible.

Just the
ARTICLE
WANTED;
Handy,
Durable
and Cheap.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY AWARD** given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 126 and 128 Duane Street, cor. Church, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 24. NEW YORK, DECEMBER 11, 1884. WHOLE NO. 494.

Correspondence.

WILMINGTON WISPS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., December 8, 1884.

At this writing the Xmas season is well advanced, and a visit among our stores disclosed to your correspondent the liberal preparations for meeting the wants of the generous-hearted gift-buyer. The show-windows are clothed in holiday attire, and the elegance of the goods displayed attracts many wishful admirers.

Eager little eyes, peeping from chubby, and from wan faces, feast upon the lovely dolls, and myriad of toys, and wonder if, on "the night before Christmas," Santa Claus would come to *their* homes, while the knowing ones smile when the hints dropped to papa, mamma or beau is remembered.

Our stationers are inviting a share of attention, as usual, and from their large and varied stock of choice goods, suitable for holiday gifts, no one need have any difficulty in making a selection.

The Xmas card counters are well stocked with beautiful foreign and domestic productions, comprising satin and silk bannerets, sachets, plain and fringed cards, and padded novelties, and at prices to suit all pockets.

Will the season be profitable? is a query now agitating the minds of the trade, and it is difficult to find any one among them willing to predict large results. All, however, are engaged in the work with their customary vim, expecting to receive a share of the "Bland's" generally handed around at this period. They will be glad and ready to receive those who wish to aid in extending happiness, but say, "Do not come all at once." If the tired clerks had a voice in this matter they would appeal for early buying. Procrastination is a fault possessed by average human nature, and few who make presents are wise enough to avoid crowds and depleted stock by purchasing early in the season. As a rule, now, the business of the season is transacted inside of ten days, closing with Christmas eve as the great shopping day of the year.

C. F. Thomas & Co. had their "holiday opening" on November 28. The usual display

of books, albums, Rogers' statuary, fancy inkstands in wood and metal, gold goods, novelties of brass and bronze, opera-glasses, &c., was worthy of inspection.

Porter & Co., while having no special opening, have spared no pains in providing, as their counter and shelf exhibits indicate, handsome and valuable goods, to meet the wants of the season. Their window display this week of Christmas cards and novelties attracted considerable notice. George is no novice at window decorating and displays taste and judgment in utilizing them as a medium to reach the purse.

On December 4 the James & Webb Company invited a public inspection of its holiday "lay-out." Upon the counters are tastefully arranged a well selected stock, consisting of autograph and photograph albums, in leather and plush, scrap-books of endless designs, pocket-books, wallets and ladies' satchels, in alligator, seal and calf; Oxford Bibles, gold pens and pencils, stereoscopes and views, writing-desks, games too numerous to mention, books for adults and juveniles and Xmas and New Year cards and novelties. The flattering reception last year of the *Holiday Visitor*, published by this company, induces its issue this year, considerably enlarged and beautified. The *Visitor* is recognized as one of the best mediums in this section for advertisers to reach the general public at this season, as its columns, representing our leading houses, will attest. One appreciated feature is that its columns are, with one exception, restricted to local advertisers, hence its popularity. The circulation is 25,000 copies, and it is faithfully distributed in this city and small towns adjacent.

Many of our leading manufacturers are looking forward with much interest to the coming Exhibition at New Orleans during the present month, when productions of their skill and enterprise will be shown. Exhibits are being shipped daily from here, and, from past records, your correspondent feels assured that Wilmington's display will score a favorable notice from the vast crowds who will attend the great show of our Southern brethern. It is a matter of regret that none of the Wilmington stationers are manufacturers or jobbers of sufficient magnitude to warrant representation at this Exposition.

Our citizens are promised another morning daily—the *Times*. Unlike the present and only morning paper—the *Morning News*—it will be sold at one cent. Circulars announcing its advent, and soliciting subscribers, are being freely distributed.

The following-named firms have been lately represented here: Pomeroy & Son, Newark, N. J.; Cooke & Cobb, Keuffel & Esser, William S. Hicks, Tower Manufacturing Company, Boorum & Pease and Eagle Pencil Company, all of "Gotham;" Charles Moritz and Guarantee Chemical Company, of Philadelphia.

In closing this, let me mention the words of praise bestowed on your holiday number. The trade were delighted with it, and profuse in their expressions of admiration and for the future success of THE STATIONER.

TRACY

CINCINNATI CLIPS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 8, 1884.

Sure enough! Peter G. Thomson did sell out as announced in my last letter. The notice of the change appeared in the daily papers after the last letter from Cincinnati was well on its way to New York. The story of the change was quite correct, only the list of members of the new firm should have read with four names, thus: Edward Woodruff, Jr., William E. Beard, Charles F. Bragg and Samuel C. Cox, the last named having been omitted from the first statement of the story. It should be further stated that the new building which this firm will occupy as soon as it is ready is on the north side of Fourth street, a few doors east of Vine street. It will be ready not later than the first of next March for occupancy.

Now for business. In general, it is dull. Business men do not like to speak out and say precisely how the outlook impresses them. A candid expression of opinion is likely to discourage timid or low-spirited people, and thus aggravate the unpleasantness of the situation. Yet, after all, the outlook is not all black, even to the most despondent. Some lines of goods have ready sale, and the shrinkage in values out here in this part of the West does not affect everything.

Every iron mill in the city is running with

no talk of closing up. The shoe factories are running light, but expect to employ full forces after the first of January. They are not pushing out for orders now according to custom, but are waiting till after the new year. The greatest activity is in the building line and all mechanic builders are steadily employed at good wages. The planing mills have announced their purpose to keep running all winter. Money shows a strong tendency to invest in real estate and all building materials are in strong demand at fair prices. This applies to Cincinnati.

Now, as to the banks. These have been drawing in their lines for nearly a year. Certainly they have been ultra conservative for six months. It is said that they are making no money, but there is a general impression that they are as solid as timely prudence and wise forethought could make them. It is charged that some of the banks continue to count as assets the paper they hold on firms which have made assignments. But this is not peculiar to Cincinnati and in Cincinnati there have been no heavy losses affecting the banks so far as the public knows. They aggregate of their loans is very light and in every respect they have been apparently making their condition safe. At all events that is the impression they make on the general public.

The retail trade in all sorts of goods and wares is fairly good at present. People demand articles of a good quality. It is characteristic of panicky times for purchasers to accept inferior goods for the sake of low prices. Nothing of the sort characterizes trade here at present. Indeed, buyers on the contrary are fastidiously exacting in favor of goods of the best quality. Mere luxuries are dull, but for staple goods buyers are willing to pay the market price for the best.

Then experts in financial matters say that a real panic never comes except as a surprise, and that business all over the country has been preparing for more than a year for the pinch that surplus production always brings.

Snider & Hoole, dealers in binders' materials and machinery, have had a house in Chicago and one in Cincinnati, and have treated the Chicago house as the branch. Their principal office has been in Cincinnati. The tail has so outgrown the dog that the firm has concluded to pack up and put off for Chicago, and make the Cincinnati house the tail to the concern should any tail be needed. The loss of Edwin Hoole to the Cincinnati business community will be felt very sensibly, and Chicago is to be congratulated on the acquisition of a man of such energy and ability.

John Holland reports that the trade in his staple gold pens is keeping up admirably, and that he receives orders freely from remote parts of his field in this country, and that his export trade is unusually good.

The Globe Files Company reports steady and even increasing sales in a rapidly widening field.

All dealers in such holiday goods as are sold by stationers and booksellers report that this trade has set in very encouragingly, and much earlier than usual. Near as Christmas

is a few days later will be a better time than the present for gauging the trade in this line of goods.

PRINCE WILLIAM.

CHICAGO CHAT

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, December 6, 1884.

THE stationery and book stores all present a very attractive appearance. Not only do the quantity and quality of their goods help to make up this appearance, but the throngs of handsomely-dressed ladies and gentlemen who are besieging the stores in search of mementoes for the holidays, go a great way toward enhancing it. Handsomely bound volumes appear in the show-windows, together with choice Christmas cards, engravings and novelties, while inside the array is still more beautiful. From appearances, the stationers and booksellers will have no cause to complain of their quota of the Christmas trade. The wholesalers are about through with it, and express themselves as more than satisfied with the result, while the broad smiles and contented looks of the retailers attest the fact that they are in no way apprehensive of anything different.

A visit was paid to several of the book stores, and everywhere was seen evidences of prosperity and a brisk trade.

Jansen, McClurg & Co. have a fine stock of books on sale, and the salesmen have their hands full in supplying the wants of their numerous customers.

C. M. Barnes has a large stock of sound and serviceable second-hand school books at 60 per cent. discount, and also carries a fresh stock at as low prices as can be had at any house in the city.

The latest production of E. P. Donnell & Co. is their new index shears. They do away with all of the trouble and annoyance of the old method, as they work as simply as an ordinary hand-shear. They cut out a round corner, making the index much stronger. By these shears you can always get a clean cut. There is a gauge to adjust the shears to the size of the index required, and this gauge can be used on either side for right or left-hand cuttings; the indexes are always of uniform size, and the simplicity, durability and price recommend the shear fully. Mr. Donnell has already filled numerous orders for these shears. His books show orders from Philadelphia, Pittsburg, Toledo, Columbus, and several other points, besides numerous sales to the stationers of this city. Donnell's combined index-roll is made of brass and is supplied with rubber bands, which are easily put on the roll ready for use, and at one-third the price of the brass index-roll. It gives a clear impression.

Mr. Donnell also issues free to the trade a complete scale for cutting index-books, showing the number of pages to be given to each letter, in proportion to the number of pages contained in the book.

A. H. Andrews & Co. report a constant increase in the volume of their business, their sales being considerably over one million in

their departments of bank counters, office and school desks, opera chairs, church seating, globes and maps. The well-known quality of their goods and their reputation have combined to crowd them with orders. Their latest specialty, which has been introduced for the holiday trade, is their new "Home Blackboard, with easel and writing-desk combined." The first appearance of this handsome article is that of a drawing-table or child's desk, with inkstand, pencil and book-rack. Reverse the table and there is a kindergarten table with inch squares; close up the hinged table and you have an easel, at which an adult may sit or a child stand. A blackboard can be placed firmly in the fork at the top, and an adult can use either side, as the board assumes the proper slope on both. The apparatus can be used on either side for an artist's easel and for pictures.

Dunn & Co., artistic printers, are prepared at their elaborately furnished and provided headquarters to do anything and everything in the way of job, book and circular or catalogue printing. The firm has every modern appliance in the shape of presses and material. It employs about fifty workmen—all experts—and does not permit any other printing house in Chicago to underbid it in price or to do more thoroughly artistic work.

Rand, McNally & Co. have issued a new sectional map of the State of Florida, size 36 by 48 inches, scale ten miles to one inch. This is the only map published which shows the entire State on so large a scale. Great care has been taken to accurately locate the section lines, railroads, towns, villages, rivers, creeks, &c. The map will also be mounted on rollers to hang on the wall.

A visit was paid this week to the Great Western night and day press room and edition bookbindery of J. L. Regan & Co. This firm claims to have no competitors in the country who can successfully compete with it in the three great essentials that all publishers require, time, quality and price, in the production of fine press-work and elegant bindings.

F. G. Yungblut & Co., electrotypers and stereotypers, report a very good trade. Their facilities for electrotyping and stereotyping all kinds of book and job work in a first-class manner, and at reasonable rates, are unsurpassed. Printers and publishers who have not yet received their new specimen book can obtain it on application.

A. J. Cox & Co., publishers and binders, call the attention of persons using books to "Webb's Automatic Book-mark," a simple yet effective device, which being automatic, requires no manipulation and cannot get out of order. It is the only thing of the kind yet invented, and by merely closing the book, it marks the place, or any number of places that may be desired. It is out of sight when the book is closed, yet preserves the reference intact. It does away entirely with the turning down of the leaves, placing anything between the pages and other slovenly and damaging practices. The marks can be removed from between the pages when desired, leaving them in their normal condition and the mark is ever

(Continued on page 792.)

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF NO. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 per doz...\$24.00 | Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | **DISCOUNT TO TRADE.**

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, Full weight, as marked in figures on bundle.
- 2d, Absolute uniformity as to quality and color.

ready to act when next required. It has been highly commended by those competent to judge of its merits, and can be examined at the principal book stores in Chicago. A. J. Cox & Co. have purchased the right to apply the mark in this city.

One of the most enterprising, as well as most successful railroad companies in the country, is the Chicago and Northwestern. The road is rightly named. It is distinctly of Chicago and the Northwest. Its lines stretch north, northwest, and west from the city for hundreds of miles through the States of Illinois, Wisconsin, Iowa and Minnesota, and into the Territory of Dakota and the northern peninsula of Michigan, the terminus being Chicago on the east, Ishpeming, Mich., on the north, St. Paul and Minneapolis, Minn., and Pierre, Dak., on the northwest, and Council Bluffs, Ia., on the west. The total mileage of the Northwestern system, including the Omaha line, is 5,024 miles. Its various lines traverse the rich agricultural regions of the Northwest, and are literally lined with the flourishing cities and towns, in which there are heavy manufacturing interests. The division running north to Lake Superior taps the wonderful iron mines of that region, and that which runs due west from Chicago to Council Bluffs forms a direct line between the lakes and the Missouri River, connecting at Council Bluffs with the overland route. The two divisions which stretch northwest into Minnesota and Dakota traverse the centre of the State of Wisconsin, passing through many attractive summer resorts, and drain the famous wheat-fields of the far Northwest. The equipment of the Chicago and Northwestern road is unsurpassed, and consists of 593 engines and 18,687 cars of all kinds. The passenger trains of this road are models of elegance and comfort. The cars are supplied with Miller's platform and coupler, and the Westinghouse automatic air-brake, and on the Chicago and Council Bluffs and St. Paul Lines the celebrated Northwestern dining-cars are run, as well as the most improved pattern of sleeping and drawing-room cars. Noz.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, December 10, 1884.

The ascertained number of exhibits in the stationers' trade at New Orleans will be, so far, sixteen. One or two have withdrawn and one or two have taken their places. Your correspondent called on all to-day, and found in several instances the displays all shining and ready, and in some they had been shipped. Each exhibit will have a representative with it. Those still here are very tastefully arranged and are calculated to attract the eye of the general public as well as the eye of the specialist.

J. P. Lippincott & Co. will have a very fine display of books and stationery material. The firm is doing a fair amount of business in view of the near approach of the holiday season. Its home holiday display will be very fine and

comprise everything new and novel in the stationery line particularly, and its book display will represent all branches of the higher literature, besides special and technical branches.

John L. Smith, 27 South Seventh street, will display the latest improved appliances for hanging and using maps. Mr. Smith will exhibit a map of Philadelphia, a railroad and commercial map of the United States and Canada and several other very finely executed maps.

Wm. F. Murphy's Sons will have on exhibition an immense blank-book, on which will be printed "Customers' Register." The largest blank-book ever made. Size, when open, 25x 52 inches, 12 inches thick; weight, 175 pounds; containing 3,000 pages and space for 126,500 names. This book was awarded the gold medal at the Paris Exposition in 1878 and also the gold medal at the Louisville Exposition last year."

The Philadelphia Novelty Company reports that business is very good, especially in its export trade, which is increasing steadily. It has introduced in the market a new adjustable paper-board clip, also its N and P clips, the combination paper-weight and clip in bronze and nickel plate; also the standard pen rack, and quite a number of novelties. The company will have an attractive exhibit at New Orleans, and will ship it soon.

F. M. Simpson reports trade very good. He has some fine fringed cards which sell well, and is now crowded with orders for holiday delivery and later delivery. His card and paper trade is also good.

Bartelson, 825 Arch street, reports trade fair, especially in the new line of Christmas holiday goods. He has just received an order for his fine fringed cards from Central America.

S. H. Quint & Sons, 14 South Fourth street, will have a display of metallic letters and plates, showing their use; also metallic steel dies and stamps and stencils. The head of the firm started on December 1 for New Orleans.

Walker, Tucker & Co. have their display of three cases—two upright and one oval—all ready. The displays are in pyramidal form, and include the finest specimens of workmanship in check protectors, steel stamps, ribbon stamps, wax seals, society seals, dating stamps, and numbering stamps.

E. M. Bayne, 521 Chestnut street, will start in a few days with a display of stamps and stamp material, and will show a new self-inking rubber roller which he has recently perfected. Mr. Bayne has built up a reputation and business well worth extending.

McCreedy & Co., 502 Commerce street, have not yet prepared their exhibit, but intend making a display of paper bags.

E. J. Howlett & Co. have reconsidered their former purpose with reference to the Exposition.

Among other exhibitors who have interesting exhibits prepared are Plumley & Ritchie, 3015 Chestnut street, adhesive labels; Williams & Son, 68 North Third street, labels, and George W. Plumley & Co., North Eighth street, paper boxes. All these exhibits will

possess points of interest to people in the trade.

To all appearances at least trade in our line is picking up and the outlook for the next two or three weeks is particularly bright. The stores are fuller than usual, and the display of goods are certainly very fine. Your correspondent encountered Lorin Blodget this afternoon and found him full of exposition and full of confidence in what Philadelphia and Pennsylvania would do for themselves.

Labor agitations are increasing in the carpet manufacturing and shoe-making trades. An unusually large number of persons are idle at this time. Wages are declining, but an improvement seems to be generally looked for early next month.

The Richmond Paper Manufacturing Company, Richmond, Va., has reached "the climax" in the manufacture of a superior quality of blotting-paper, but to cap "the climax," this is being very generally found out by our dealers, and in it consists "the climax" of success attained by this enterprising house. N. H. Furness, the New York representative of the Richmond Paper Manufacturing Company, was in the city last week and made this office a visit. He represents business satisfactory, and reports large sales here of the celebrated Climax blotting-paper by many of our dealers, notably R. H. Forestal & Co., who handle it on a very extensive scale. It is an excellent blotting-paper and deserves special mention.

P.

NEW ORLEANS NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

NEW ORLEANS, La., December 8, 1884.

THE general activity in all lines of industry here at this gala season of the year is such that it would in itself furnish an endless fund of interesting detail for a lengthy epistle, of which I would avail myself at this time were it not for the promise I made in my last to give your many readers a more vivid outline sketch of the "Grand Climacteric Attainment of the Nineteenth Century," which culminates in our city in the "World's Industrial and Cotton Centennial Exposition," to be formally opened on the sixteenth of this month. This grand opening having been postponed for two weeks (from the formerly announced date) in order to accommodate the wishes of the presiding dignitaries of two distinguished Republics. President Arthur, of the United States, and President Diaz, of Mexico, together with their Cabinets, and also a number of foreigners of renown will be present at the invitation of the managers of this exposition, who design making it a grander occasion than any similar undertaking ever attempted in the annals of great expositions.

The great Exposition chimes—by the by, the largest complete chimes ever molded, and which were made by the Deshane Bell Foundry, of Baltimore—are to be managed by Professor Widdows, of Washington, who is here at present, placing them in the high tower over the grand entrance to the main building. The enormous organ, costing \$30,000, which is being put up, is the largest ever used in any exposi-

tion and one of the largest ever made in the world. The Mexican brass band, numbering nearly a hundred pieces, has arrived and is encamped in the Exposition grounds. This is one of the most celebrated bands in existence. Besides this, the Atlantic squadron, of our navy, is to be anchored directly opposite the Exposition grounds, in the Mississippi River, the great father of waters, whose mighty current washes the shore of the City Park. The great chimes, the enormous organ, the famous and wonderful Mexican brass band, the fleet with its many guns, together with innumerable whistles from the many manufactories, cotton presses, rice mills, sugar refineries and numberless other factories, will lend their noises when the throttle is pulled and the mammoth 30-foot fly-wheel, which runs the tremendous line of shafting within the main building, revolves and sets in motion the vast collection of machinery to magnify the hallelujah which will go up in so tremendous a volume of sound from the City Park that it doubtless may invade the sanctum of THE STATIONER and break in upon the ears of its many readers.

There are many circumstances which go to furnish this World's Exposition with numerous attractions, such as will exert a lasting influence upon the people of our own country and also in foreign countries, particularly those situated south of the United States.

The choice of locating the Exposition in New Orleans was indeed exceedingly happy and very appropriate, for this city is the natural gateway to the Gulf and the very portal to the richest granaries of earth. No system of interior navigation can compare with that radiating from her wharves. New Orleans seems to be looming into merited pre-eminence. Deepening the channel of the Mississippi River has developed at once her commercial importance, and ships of all nations can be seen plying her waters, laden with our exports, contributing to the needs of mankind. The construction of many grand trunk railways has also added much to this development. But aside from its many material claims to a general interest, there is a quaintness, a charm and a life peculiar to this Franco-American city which almost instinctively attracts a stranger and affords alike a gratifying experience. To visitors from the far North the time is propitious, for our climate is to them only springtime. Vernal foliage clothes the earth, fragrant flowers give their sweet perfume, delightful fruits ripen, balmy winds prevail.

The cosmopolitan characteristics of the Crescent City beside make it an inviting resort for people of all countries and there are varied attractions peculiar to itself, such as shell roads, orange groves, magnolia groves, a Spanish fort, French market, big cotton boats, sugar refineries, cotton presses, a Canal street, and many sights well worth seeing, all of which we hope every reader of THE STATIONER will see this winter during the Exposition. I wish it were so that all interested in this gigantic enterprise could only take a glimpse at what has been accomplished at the Upper City

Park—the place wherein the “big show” is to be held.

This park, I should state, contains 250 acres of ground, and many years ago was the home of a rich sugar planter, and the massive oaks of great age still remain, and in one locality form a most magnificent avenue, with a vista unsurpassed. At this season they are festooned with the gray moss, giving this beautiful avenue of trees a weird and enchanting appearance.

The centre of attraction in the park is the “main building,” which an army of workmen has finally pushed to completion. Such a building for size was never before seen in this world, all under one roof.

We, as a nation, boast of the Capitol at Washington as a monster, but the Exposition building is nearly eight times as large, or while the Capitol covers about four and one-half acres, the Exposition building occupies thirty-five acres, and is, notwithstanding, quite handsome. It is 1,400 feet long and 900 feet wide and offers 1,500,000 square feet of floor and exhibit space, and has ample and improved arrangements for fire department, police, public comfort, and rooms for the different national organizations. In the centre is the music hall, with comfortable seats for 11,000 people. There has been reserved about a quarter of a million square feet for exhibits from foreign nations, and although this building is the largest ever erected, it is found to be inadequate for the demands for space.

Some fifteen or twenty countries have engaged space for grand and complete exhibits of their products and manufactures. What a sight this will be! China, with her teas, silks, ceramics, and a thousand other articles; Japan, that wonderful country which has bloomed forth from an effete Oriental despotism and is the most progressive of Asiatic nations, will be represented in a show of curious and interesting objects, both useful and ornamental, for which that nation is so famous. England, our glorious mother country, the nation which all lovers of law and liberty admire and respect, will be with us, and the British Lion in all his majesty will display to the American Eagle innumerable specimens of its manufactured articles which his people are daily producing and which their enormous marine service is continually conveying to every nation under the sun. France, la belle France! whose regal capital is so vividly brought to mind by a stroll through the French quarters of the Crescent City, has been assigned a large space in the main building for the display of her exquisitely wrought silks, tapestries, porcelains, &c., and samples of her wines will fill the hearts of the connoisseurs with pleasure, and the art gallery will be resplendent with the choicest gems of her ancient and modern masters, to view which collection will in itself amply repay a visit from the remotest section.

Spain and Italy, with their works of art, will gladden the hearts of the lovers of the beautiful.

The million sons of Germany who have found a home in our land of freedom will find,

upon visiting the Exposition, that the grand old empire occupies as prominent a position in that palace of wonders as she does among the nations of the earth, and there they will be proud to see that their “Fatherland” is as glorious in works of peace as in achievements of war.

Most of the South American countries will be represented in a novel and interesting way, and the visitors will have an opportunity of seeing and examining the products and manufactures of countries which heretofore, to the majority of people, have scarcely been known except by name.

The exhibit of our sister Republic of Mexico will be one of the most unique and interesting attractions of this great gathering of the nations. The Mexican Government has very wisely appropriated the sum of \$200,000 in order that their display may be worthy of the land of the Aztecs and the descendant of the proud Castilians. A tract of several acres of ground in the beautiful park has been especially set apart for a Mexican garden, which, from its present appearance, will be one of the most exquisitely arranged spots of earth that has ever cheered the hearts of man with its loveliness since the famous hanging-gardens of Babylon contributed to make that city one of the wonders of the world. In this Mexican garden of Eden will be erected a chaste and fairy-like structure, in which will be arranged to the best advantage her display of textile and manufactured articles and works of art of all kinds too numerous to mention at this time. The two hundred Mexican soldiers of the national army who will be in attendance during the entire six months which the Exposition will continue, have arrived with the famous brass-band heretofore mentioned.

Every State and Territory in our Union has demanded space for representation, and although this main building is so immense to gratify the many desiring exhibits the management has had erected a separate structure, called the “Government Building,” especially for the United States and State exhibits. This government exhibition will be complete of itself—almost a mammoth exposition—occupying a building 885 feet in length by 565 feet in width. Each department will have its distinctive exhibit. The Post-office Department, the Treasury Department, the War Department, the Navy Department, the Interior Department, &c. The Bureau of Education will be located in this building, as also the Women's Department and the Colored People's Exhibit.

The Horticultural Hall is very interesting, filled as it is with tropical and semi-tropical plants and shrubs, and delicate flowers from the far South, nurtured and made to bloom in their natural brilliancy. It is said to be the largest conservatory in the world; is made of iron and glass, and becomes in the arrangement a permanent feature of the park.

I have mentioned only three of the many buildings erected within the park for exhibits, and can give you only an estimate of the space under roof, by stating that seventy-five acres are covered over.

This intermingling of our people and their vieing with each other for the common good and advancement of our country's best and truest interests, will do more to bind our people together in love and harmony than any event that has occurred since the foundation of our national Government. CRESCENT.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

GEO. H. SANBORN & SONS, BOOKBINDERS' & MACHINERY,
69 BEEKMAN STREET, NEW YORK.

MANUFACTORY: STANDARD MACHINERY COMPANY, MYSTIC RIVER, CONN.

E. P. DONNELL & CO., CHICAGO, ILL.

— MANUFACTURERS OF —

Bookbinders' ♦ Machinery ♦ of ♦ Every ♦ Description.

THE CHICAGO PAPER CUTTER.

✦ CUTTING STICKS MUST GO! ✦

THIS PAPER CUTTING MACHINE HAS A FLAT edge lower blade placed in the table bed. The upper knife on descending makes a shear cut on every part of the paper cut; the knife passes below the Table Bed and throws part of the front table out as the knife ascends; the front table is thrown back automatically, thus making a solid surface of the table. We do away with the set-screws that are used generally to take up the ware in the Knife Bar, as we use a simple bevel gib that is screwed up by one nut on top, which always keeps the Knife Bar firm and true.

There is no dulling of the knife as the knife-dulling surfaces are dispensed with; it saves the expense of the knives, saves grinding, sticks, &c., which are a great annoyance and expense as used on the other cutters.

The Knife Bar can be adjusted to any angle by the side steel rods.

It is supplied with our new patented clutch, which is simple and noiseless and combines the balance wheel pulleys and clutch all in one. Can be stopped instantly at any point and is acknowledged the simplest and most powerful cutter ever offered.

There is no drawing out of any kind of paper by our hand-clamp; has quick-acting back gauge.

Price 34-inch Steam and Hand Power, \$600
Price 44-inch Steam and Hand Power, 1,000

No Cutting Sticks used on this Cutter, it has a Shear Cut that trims ALL the sheets CLEAN.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

ABBOTT'S PRACTICAL ELLIPSOGRAPH.

The large engraving shows the design of an instrument designed for the use of draughtsmen, architects, engravers, designers, sheet-metal workers, pattern makers, machinists, engineers, marble and soapstone workers, &c. This ellipsograph is said to provide the only method of making a perfect, mechanical ellipse or oval, of innumerable varieties and sizes. From $5\frac{1}{2}$ inches long and $2\frac{3}{8}$ inches wide, it can be reduced to one-eighth of an inch long and one-sixteenth of an inch wide. Circles can be made from $2\frac{3}{8}$ inches in diameter to one-sixteenth of an inch; straight lines three inches long, and curves of any desired shape. A perfect ellipse, oval, curve or semicircle can be produced in one minute. The smaller cuts show the forms which this instrument is capable of producing. This ellipsograph is manufactured by Stevens & Snow, 169 High street, Boston.

No. 307,291. Envelope for Mailing Samples, &c.—William Goodbody, New York, N. Y.

An envelope constructed with a tongue made to project from the back and to extend toward its open end, and with transverse slits to receive said tongue, cut, the one in the body of the envelope between the tongue and the open end, and the other in the flap adapted to close said open end, and in position to register with the first when the flap is closed.

RAPHAEL TUCK & SONS,

Fine * Art * Publishers.

PARIS.

LONDON.

BERLIN.

298 BROADWAY,

NEW YORK, November 24, 1884.

GENTLEMEN:

We have much pleasure in announcing to you the opening of a direct BRANCH ESTABLISHMENT for the United States and Canada at the above address.

It has been obvious for some time that, in justice to the continually increasing variety and number of our Art Publications, a closer relationship with the American Continent had become a downright necessity; the requirements of so important a market justifying, nay, necessitating, that close attention and study which only a direct intercourse can cultivate to advantage.

We point to our past record as an earnest of our future efforts in the matter of ARTISTIC and NOVEL PRODUCTIONS and the various new lines, such as EASTER and all branches of CONGRATULATORY CARDS; FLORAL and other ART STUDIES; CHROMOS, RELIEFS, SCREENS, TERRA-COTTA WARE, &c., with which our Representatives are making their debut on our behalf, may fairly entitle them to your favorable consideration.

Upon one subject we would lay particular stress, and that is touching the matter of prompt delivery of samples and stock; and here it is that a direct intercourse with the American trade, which will henceforth be supplied in advance of the English market, will prove of immediate benefit, and avoid all unpleasant friction caused by lateness of deliveries.

In conclusion we would gladly bespeak for ourselves the good-will of our competitors, no less than that of the entire trade, and our actions, prompted as they will be by a careful solicitude for the best interests of the trade in general, will be calculated to secure and retain that good-will for us. We are, gentlemen, yours faithfully,

RAPHAEL TUCK & SONS.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

ADDRESS
JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

TRADE * OPINIONS.

In Use 9 Months.

Government Printing Offices,
Prujean Square, Old Bailey, London, Feb. 11, 1884.

To MR. E. W. BLACKHALL: *Dear Sir*—The Perforating Machine you supplied is giving satisfaction. It does either stop-work or run through expeditiously and well, and with care is not liable to get out of order.

The Combination Striker is also a very ingenious and valuable appendage to our Ruling Machine. We are, Sir, yours very truly,

WM. P. GRIFFITH & SONS.

2 Years in Use.

NEW YORK, 1884.

Your Combination Striker is a valuable addition to our facilities: we cheerfully recommend it as a labor-saving invention.

BEATTY & STEVENSON.

SEND FOR CIRCULAR, CONTAINING FULL DETAILS, TO

E. W. BLACKHALL, 83 Wood St., Toronto, Canada; or 13 West Swan St., Buffalo, N. Y.

THE \$1.00 NEW YORK FOUNTAIN GOLD PEN.

A \$5 pen in appearance and usefulness for \$1. This pen can be carried in the pocket in any position without leaking, and will write 15,000 words without refilling. Any ordinary pen can be used by attaching to the fountain holder if desirable. The construction of the Fountain Pen is so simple that there is nothing to get out of order, and this simplicity of construction enables us to sell it at a low price. The most economical and useful pen in existence. Just the thing for business corresponding or school, as it is always ready for use. Sample by mail on receipt of price, with gold pen, \$1; one dozen, \$8. Sample with imitation gold pen, 50 cts.; one dozen, \$3.50. GOLLNER MFG. CO., 222 Centre Street, New York.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Thomas M. Watkins, publisher, Vienna, Mo., is dead.

W. G. Robinson, Jr., dealer in wall-paper, Atlanta, Ga., has sold out.

The Modesto Publishing Company, Modesto, Cal., has suspended business.

Walter Powell, dealer in gold pens, St. Louis, Mo., is closing out his business.

William Elder, of the firm of William Elder & Son, printers, Boston, Mass., is dead.

Gustav Bode, dealer in photo materials, Milwaukee, Wis., has sold out to Paul & Shape.

J. N. Young, dealer in pictures, Omaha, Neb., is advertising to close out his business.

D. J. (Mrs. R. P.) Crapo, dealer in pictures, Cleveland, Ohio, has assigned to Samuel S. Marsh.

Savage & Savage, publishers, Jewell Junction, Ia., have leased their business to Robert Rodearmel.

The stock, &c., of C. W. Ray & Brother, dealers in picture frames, &c., Montreal, Que., is advertised for sale by tender.

S. S. Davis & Co., paper-box manufacturers, Nashua, N. H., have dissolved partnership. S. S. Davis continues the business.

P. G. Thompson, bookseller, Cincinnati, Ohio, has sold out his book business and will continue to publish toy books and do color printing.

A dissolution has taken place in the firm of Deem & Brewington, publishers of the *Banner*, Knightstown, Ind. T. B. Deem continues the business.

John M. Pomeroy & Sons, publishers *Repository*, Chambersburg, Pa., have dissolved partnership. Pomeroy Brothers succeed to the business.

The liabilities of F. H. Thomas & Co., booksellers and stationers, St. Louis, Mo., who assigned last week, are about \$45,000; the assets, as stated before, are about \$76,104. Mr. Thomas has been in business since April, 1878.

Charles H. Wright, for five years with Ph. Hake, has connected himself with James D. Whitmore & Co., and will represent them in the Western territory after this date. He will shortly visit his friends and the trade West generally, with a full line of staple goods and also an elegant line of Easter offerings. This house purposes to present to the trade on January 1 a new and elegant line of fine writing papers, in three different weights. These papers will, it is said, be of the finest quality that can be manufactured and of an entirely superior quality to the prevalent grades of supers and extra supers which are now being offered by almost every manufacturer in the country. The trade are asked to inspect these papers before placing their spring orders, as they are promised to be superior to anything now in the market.

Stylographic ink, like everything else, varies in quality with the different makes, and one is not always sure of getting a good article when buying an ink of this character. Carter, Dinsmore & Co. have a very superior brand of stylographic ink that has stood the rigid test of years of use, resulting in a wide sale for it. The firm feels confident that it will suit the most exacting. It makes a clear black mark, which becomes coal-black on drying.

Reynolds & Merriam, agents for the American Pad Company, have in stock three or four cases of writing-pads bound in glazed paper, which they offer cheaper than the regular line of goods of the company, the latter being bound with marble-edged paper. Reynolds & Merriam are also agents for a brand of bankers' linen paper, for which they are having a big sale and which the manufacturers claim is the best in the market.

A fire broke out on Friday morning, December 5, on the fourth floor of No. 323 Pearl street, occupied by the Franklin Photo-Electrotype Company, whose stock was damaged \$3,000. The fire was confined to their loft. Damage was done by water to the property of other tenants as follows: Pioneer State Company, \$800; Universal Library Company, \$1,500; E. F. Lamphear, printer, \$500; the Hub Printing Company, \$500.

E. O. Clark & Co., printers, St. Louis, Mo., have dissolved partnership. E. O. Clark continues the business under the same style.

Duncan McNeil, bookseller and stationer, Port Elgin, Ont., has removed to Paisley.

T. G. Swatts, newsdealer, &c., Hinton, W. Va., has sold out to R. E. Sydnor & Co.

Thomas P. Montgomery, newsdealer, Harrisburg, Pa., is dead.

C. S. Bragg and Mr. Vail, of Van Antwerp, Bragg & Co., Cincinnati, are in town.

Miss E. M. Rose, newsdealer and stationer, Hartford, Conn., has sold out to S. W. Barrows & Co.

Louis Marx, dealer in picture frames, New York city, assigned December 2 to Harry B. Rosenthal, giving preferences for \$4,564.

An execution to recover \$7,000 has been issued against A. N. Brice, publisher of the *News*, Sunbury, Pa. Brice is advertised to be sold out at sheriff's sale.

Fritzius & Park, paper dealers, Pittsburg, Pa., were burned out on Sunday, together with several other occupants of the same building, causing a loss of about \$10,000, which is fully covered by insurance.

Brearley & Stoll, Trenton, N. J., have removed their office to the rear of their store, and have now a fine exhibition-room for their art department. Their store is in very hand some shape, and indicates taste and refinement in its settings. Their business is reported to be excellent.

C. A. Crocker, manager of the East Hampton Paper Company's mill, East Hampton, Mass., has filed a petition in insolvency, and the first meeting of his creditors is called for the 20th inst. His liabilities are made up mostly of loans from the East Hampton and Chicopee banks, and \$12,000 due Watson & Chamberlain on the property, while the assets are made up of 150 shares of the concern's stock.

Brooks & Co., Cleveland, Ohio, have got out a finely executed pocket-map giving a bird's-eye view of the Mississippi River from the mouth of the Missouri to the Gulf of Mexico. Section 1 comprises the mouth of the Missouri to Memphis; section 2, Memphis to Natchez; section 3, Natchez to the Gulf of Mexico; covering 1,352 miles and giving over 5,000 names on the river and the tributary country. It is a very useful *vade mecum* for anyone contemplating a trip on the Father of Waters.

W. H. Hill, Worcester, Mass., forwards a copy of the highly-interesting memorial sheet issued in last October on the occasion of Worcester's celebration of her "Bi-centennial." This publication consists of twelve pages, printed on yellow paper in imitation of "ye olden tyme," and filled to overflowing with cuts and portraits of men and places famous in 1684, and descriptions of things common and uncommon in the history of the city. in all, it is a very unique publication. It is for sale by Blanchard & Co., Worcester.

John Bickler, of J. Bickler & Brother, paper-box manufacturers, New York, is dead.

Zeno Young, publisher, Madisonville, Ky., has sold his paper, the *Times*, to Givens & Hill.

E. J. Livernash, publisher of the *Sonoma Index*, Sonoma, Cal., has sold out to H. H. Granice.

Schuyler Brothers, dealers in wall-paper, &c., Denver, Col., have been succeeded by Schuyler & Co.

De la Rue & Co., London, have issued the December number of their illustrated circular of trade novelties.

H. P. Crafts, of Fort Collins, Col., publisher, has removed to Cheyenne. His successor is H. A. Crafts.

The Whiting Paper Company will shortly issue 5,000 price-lists and sample-books of its fine stationery, nicely bound.

Fosgate & Halsted, manufacturers of paper boxes, Davenport, Ia., have dissolved partnership. L. W. Halsted continues the business.

Newton S. Briggs, of New York, formerly engaged in the paper and stationery business, died on Monday. He was forty-eight years old.

The business of J. W. Ragsdale, publisher of the *Russian River Flag*, Healdsburg, Cal., has been consolidated with that of William Ruffner's, publisher of the *Healdsburg Enterprise*, of the same place.

Several changes have already occurred among the salesmen of some of our city houses, and there are a number of others talked of as likely to result with the incoming year. Charles S. Plummer, late of the firm of Evans, Plummer & Co., has gone back with Phil. Hake. Charles H. Wright, who was five years with Mr. Hake, has entered into an engagement with J. D. Whitmore & Co., and will make his headquarters at Chicago. L. S. Iliff, formerly with Koch, Sons & Co., has just connected himself also with the last-named house. T. S. James has left Daniel Slote & Co. and will enter into another engagement on January 1. Among other changes which are not as yet accomplished facts, but which are talked about, are that Mr. Morton, formerly with Hard & Parsons, will go with Evans & Darling, and Mr. Davis may leave M. A. Reay and go with George B. Hurd & Co., and that W. R. Deming, now with Brown & Sanson, is to take Mr. Davis' place at M. A. Reay's.

The copartnership between Rufus Adams and Wm. H. Hasey, stationers, New York, has been dissolved, Rufus Adams continuing the business. Mr. Hasey has connected himself with the house of William Mann & Son, 88 Maiden lane.

Longshore & Whiffle, printers, have opened a book and stationery store in Leadville, Col.

Daniel B. Wilson, stationer, at Tyrone, Pa., has been closed out by the sheriff.

Louis J. Stahl, dealer in fancy goods, Boston, Mass., has failed.

H. D. Post, stationer, Holland, Mich., has sold out.

J. A. Payn, publisher of the *Corry Telegraph*, Corry, Pa., has been burned out.

Hering & Tappan, printers and publishers, Bloomfield, Cal., have dissolved partnership.

The Middleport Paper Mills Company, Middleport, N. Y., has been succeeded by the Hartland Paper Company.

The Kerner Stylographic Pen Company reports that it is over a thousand pens behind its orders, and that it cannot receive an order to be filled in less than three weeks.

W. F. Askew & Son, paper manufacturers, Neuse, N. C., have dissolved partnership, C. T. Askew retiring from the firm. The business will be continued by W. F. Askew, with office at Neuse, the Raleigh office being discontinued.

Jones Brothers & Co., Cincinnati, have sold to Van Antwerp, Bragg & Co., their entire list of school text-books, comprising Ridpath's Histories of the United States and English Grammar, Milne's Arithmetics and Algebra, Forbriger's Patent Drawing Tablets, &c.

There has been only a limited number of out-of-town buyers visiting the city during the week, most of them coming from near-by points, including Oliver S. Clay, H. W. Schwickendiek, and Mr. Weil, of Guggenheimer & Weil, of Baltimore, Md.; Mr. Morse, of Preswick, Morse & Co., Elmira, N. Y.. Mr. Christy, of William M. Christy Sons, Philadelphia; R. S. Frary, Westminster,

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

Conn.; S. A. Clarke, Pittsburg, Pa., and Mr. Sanford, of Worcester, Mass.

Hille & Co., dealers in toys, Minneapolis, Minn., have made an assignment.

R. E. Bennett, formerly with McLoughlin Brothers, has gone with Evans & Darling.

The New York Stationery and Envelope Company, 62 John street, reports a very satisfactory holiday trade in progress at this time, and also says that its business has extended so much beyond its expectations that it is compelled to seek additional salesmen.

F. A. Markert, of the "Pioneer" news depot, Guaymas, Sonora, Mexico, asks book publishers, manufacturers and dealers in fancy goods and stationery to send him their catalogues of goods specially adapted to the Spanish-American trade.

A fire on Tuesday night at 526 and 528 North street, Philadelphia, caused a loss to the Scott Paper Company, Limited, of \$30,000; Edwards & Docker, printers, \$5,000, and R. H. Heppe, paper-box manufacturer, \$5,000. The building was damaged to the extent of \$10,000; insured.

The regular monthly meeting of the Stationers' Board of Trade was held on Tuesday afternoon. Among other routine business which came before it for action was the application for membership of White, Corbin & Co., of Rockville, Conn., which under the by-laws was laid over for final action until the next meeting.

George B. Hurd & Co., in addition to carrying a full line of Z. Crane, Jr., & Brothers' unexcelled papers in all of their latest qualities and tints, also have a fine line of goods for the holiday trade, embracing plush goods, toilet boxes, writing desks, &c., all of which contain superfine and extra superfine paper and envelopes to match.

The schedules of F. W. Coffin, paper dealer, 76 Duane street, who made an assignment about three weeks ago to his son, Frederick R. Coffin, were filed on Tuesday, and show liabilities of \$9,141.11, nominal assets \$4,493.12 and actual assets \$2,568.62. As he made preferences in favor of his wife for \$3,100 and to the Chemical Pulp Company, of Stroudsburg, Pa., for \$686, the assets are not sufficient to pay the preferences by \$1,218, leaving nothing whatever for the general creditors.

Composition for Sealing-Wax.

A new patented composition for sealing-wax is designed to produce a sealing-wax which shall possess to a large extent the qualities of wax composed largely of beeswax, but which shall be more tenacious and much cheaper. This wax is especially applicable to sealing cans containing fruit, vegetables, meat and the like. It consists of a composition of resin, oil or tallow, or other oily substance or substances, and a fibrous material—such as cotton or hemp fibre, asbestos, or agatite finely ground—and mixed for ordinary purposes in the proportion of 16 parts of resin, 1 to 2 parts of tallow or oil, and 2 parts of the fibrous material. The resin and tallow are first well mixed, after which the fibrous material is added and the whole is thoroughly mixed, and the mixture is then poured out into molds of any desired size and shape and allowed to cool, when it is ready for use.

If the wax is to be used in the manner most common for sealing cans, it is molded into sticks, in which shape it is placed in the market; but if it is to be used in the form of waxed strings, the strings are properly coated with the wax while it is in a molten or liquid state and allowed to harden on the strings.

The resin preferably employed is that known as "pine-tree resin," and the preferred grades are E and F. For the lower grades a greater amount of oil or tallow or other oily substance will be required. The objection to the lower grades of resin is, that they make a dark-colored wax, which is not so handsome or salable as the lighter-colored wax made from the higher grades of resin.

The preferred description of oil or oily substance or substances which enter as an ingredient or ingredients into the above-described composition are what are known as "non-driers," and of these non-driers the preferred are such as tallow, lard, paraffine oil and cotton-seed oil.

The precise proportion of resin or oil may be somewhat varied in case it is desired to make the wax harder or softer. By increasing the proportion of resin the wax is made harder, and by increasing the proportion of oil it is made softer, and it may thus be made of any desired degree of hardness. The fibrous material employed imparts to the wax a very

tough and tenacious property, which causes it to adhere very firmly to the can, and prevents it from being drawn in by the cooling of the contents of the can.

The ingredients of this wax are all very cheap, and therefore the finished wax may be produced very cheaply.

A Remarkable Mosaic.

A remarkable mosaic has just been discovered at Nîmes. It contains more than 150 square feet, and represents a Roman emperor seated on a throne, beside which stands a female figure. There are also two figures of men, one of them leading a lion and the other a wild boar. A warrior with a Roman helmet completes the group. The work has escaped injury, and the lines and colors are said to be as fresh as though they dated from yesterday. "It is declared by competent judges," says the *St. James Gazette*, "to be the richest mosaic yet discovered, no museum in Europe possessing one to match it. As for its value, they decline to name a definite sum, though they express the opinion that it cannot be worth less than a million of francs at the lowest. The unfortunate owner of the house in which this treasure has been discovered had just sold the property to the municipality for less than £2,000. This body will frame the mosaic and place it in the museum of the town, already so rich in local relics of the Roman period."—*New York Tribune*.

RICHMOND RIPPLES.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., December 8, 1884.

In the world of traffic the stationery and paper business here is keeping pace with other interests. Trade is fair on all sides and will continue to improve as the holiday season approaches. In the wholesale line business is almost confined to filling country orders, the city dealers having long since gotten their supplies. Retailers are well stocked with all of the latest novelties, and until the close of the year, at least, expect to do a thriving business.

The paper-mill men are enlarging their territory, and some drummers are now operating in Southern sections never visited before. The signs of enterprise are heard on all sides; sometimes it may be as small as a grain of mustard seed, but the line is always cast in a seemingly productive direction.

Your correspondent was handed a "Climax" blotter to-day by one of the many friends of THE STATIONER, who kindly informed him that the printing on it was done by the Lockwood Press. The style of the work is entirely new to this city and is commended by all judges who have examined it. The Richmond Paper Manufacturing Company has just added a feature to its establishment, which enables it to compete in every way with any paper mill in this country. It sank an artesian well some time ago, and after boring through clay, gravel and granite for four hundred feet, reached a fine vein of water, clear, pure and sweet, enough to satisfy even an advocate of St. John, the lately defeated. The company has for years been seriously inconvenienced by the kaleidoscopic color of the water of the noble James, at times when least expected, and it determined to ignore its presence, although at its very door. This it has seemingly done and with the result as stated above.

The Randolph paper-box factory has sent to New Orleans the handsomest sample assortment of its goods that it has ever put up. Those who have seen any of its exhibits in America or in foreign countries can form some idea of what it has there. It won't be excelled—no, nor equaled either.

Simons & Brother and Randolph & English, binders and blank-book manufacturers, have also shipped to New Orleans some of the most unique and beautiful specimens of their work ever made in the South. Some persons who examined some of the work prior to its departure were loth to believe that it had been made in Richmond.

Readers of THE STATIONER who may visit the New Orleans World's Fair will find it pleasant and profitable to view Virginia's exhibit.

What the Old Dominion has there is second to no other State in material, whether raw or wrought. SENTINEL.

"GET THE BEST."

ESTABLISHED ELEVEN YEARS.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, DECEMBER 11, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE trade report is quite cheery this week. Our various correspondents in different parts of the country seem to have hit upon a unison of expression and a harmony of circumstances which enable them to speak in a very pleasant way of current trade and prospective business.

A PAPER dealer and stationer in a large interior city, wishing to sell out his business on account of broken health, writes to THE STATIONER, saying: "I have built up a trade on the basis of an honest count, fair dealing and truthful representations, and I don't want to sell to anyone who expects to do, or has the name of doing, anything else." With what satisfaction a man with such a principle can lay down the reins of business! There is the essence of commercial integrity and honor which all ought to preserve.

DOUBTLESS another attempt will be made this winter to induce the Legislature to pass the proposed "Civil Code." It will, if it becomes law, be a necessary handbook upon the desk of every business man, for it will contain the "whole body of the law" reduced to a systematic code, divided into chapters, with proper titles and numbered sections. It has four general divisions: 1st, relating to persons; 2d, to property; 3d, to obligations; 4th, general provisions relating to persons, property and obligations. The merchant and manufacturer will be enabled, at a glance, to know the law on any particular subject; for instance, as to warranty: Section 885 provides that "one who sells or agrees to sell merchandise inaccessible to the examination of the buyer, thereby warrants that it is sound and merchantable; or as to ownership in land." Section 266 provides that "the owner of land in fee has the right to the surface, and to everything permanently situated beneath or above it." This code will by its simplicity tend to instruct the business-man in the law, and will narrow the lawyer's calling down to strictly litigated matters.

By the enterprise of a daily paper, the public has been made acquainted with the text of the lately negotiated treaty of commerce between Spain and the United States. Under the terms of this treaty, printed papers or lithographs, periodicals, pamphlets, books and music paper exported from the United States will be admitted into Cuba, free of duty. On print papers, the Cuban tariff will be \$1.80 per 100 kilograms; on writing-paper, lithographic and plate-paper and cardboard, \$4; the same in sheets for letters, ruled or unruled, \$6.50; cigarette paper, \$6.50; printed sheets or publications in Spanish,

\$5.40; same in foreign tongues, \$2; prints, photographs, maps and 'playing-cards, 25 cents; wall-paper, \$6. The same duties will prevail in Porto Rico without any exception. But greater interests than those of the paper and stationery trade are concerned in the adoption of the commercial agreement with Spain, and to these the question whether or not the treaty shall be ratified is exciting. It is undoubtedly true that certain lines of our production and manufacture will profit to a considerable extent by the reciprocity proposed, but the sugar planters and refiners and the tobacco growers and manufacturers of the United States, will be unfavorably affected, and to an extent which they may be unable to withstand. The loss to our customs revenue will also be very great, so that on the whole the chief advantage of the proposed treaty is on the side of Spain. What is, perhaps, remarkable, although founded on opposing opinion, is the concurrent objection of free-traders and protectionists to some, if not all, of the details of the treaty. It will not, therefore, be surprising should the Senate fail to ratify it.

Roundabouts.

BY THE TRADE LOUNGER.

A chat just had with one of those indefatigable fellows who are "here to-day and there to-morrow," yclept ye commercial travelers, resulted in a pleasant suggestion of change in business life, and renewed activity in trade. He told me that he had taken a number of large orders, and that where he had been there was plenty to do. Of course, he said that he represented goods which would sell anywhere, but "as that had no bearing on the subject, I took no note of it."

* * * *

But there is an appreciable change in the commercial atmosphere, and it has come as suddenly as it was, perhaps, unexpected. If report is true, the increase in trade is not wholly of an ephemeral, holiday character, but extends to the solid staple lines in which progress has of late been slow and in consonance with the emergency of demand.

* * * *

The treaty of commerce with Spain has been one of the uppermost subjects of talk for a few days past. It doesn't seem to meet with a great deal of favor. Indeed, public opinion—as indicated by the talk of people whom I have met—seems to be running counter to the treaty. It is a little odd to find free-traders and protectionists agreeing on this point, but arriving at their conclusions by different processes of reasoning.

* * * *

A new salesman just entered into an engagement with a city house is authority for the statement that the house will sell twice as many goods next year as it has sold during the past twelve months. In view of the fact

that the concern referred to is one of the largest fine stationery houses in the trade in the city and has done a large business this year, if the sanguine expectations of this new salesman are realized, the firm met with a streak of luck when they came across him, but then it is not always best to count your chickens before they are hatched.

* * * *

A new use for paper has recently been adopted by making the floor of a roller skating rink of it. It is said to make a better surface for roller skating than anything than has heretofore been used for this purpose.

* * * *

The latest thing in mechanical toys is called the "Flying Indian." It consists of the figure of an Indian sitting astride of a grasshopper. It makes a leap of over ten feet.

* * * *

The use of white bronze is rapidly extending as its peculiar properties of durability, &c., for decorative purposes are being found out. It is said that the material is practically indestructible, and being non-corrosive and unchangeable, it is claimed to be equal to gold, silver or platinum, and superior to copper or antique bronze.

* * * *

Paper wafers, in imitation of wax seals, with an embossed monogram, are said to be meeting with quite a good sale this season; and sealing wax is also in great request. The paper seals, in various fancy colors, seem to be preferred to the red.

* * * *

The new wallet-shaped envelopes are meeting with considerable favor, and the linen cloth papers are also among the taking novelties of the season, the plain, unruled cream linen being very fashionable. The favorite among ladies is the octavo with the baronial envelope.

* * * *

A very pretty conceit is to be seen in a John street fancy-goods house. It is a flower-basket made of light reed and filled with almost every variety of artificial flowers, which make a bouquet in appearance equal to nature. The basket is ornamented with blue satin ribbon.

* * * *

Quite an influx of foreign commercial travelers has been noted in this country of late, especially in some of the Western towns. One newspaper, commenting on the fact, says: "Many English and French manufacturers make a specialty of supplying the American market with certain kinds of goods. Heretofore they have sold to New York, and the merchants of that city have enjoyed the monopoly of supplying the rest of the country, but the appearance of foreign drummers in Western cities means that the foreign manufacturers are hereafter to avoid the agency of New York, and deal directly with their American customers. The latter will have the advantage of a 10 per cent. reduction."

* * * *

Says the *Slate Trade Journal*: "A number of machines have been invented for the purpose of shaving or finishing the surface

of the school slates, and the question is a pertinent one: must the hand-shaved slate go? In order to make these machines pay, it is necessary to manufacture a very large quantity of slate—more than any one establishment, now engaged in the business, and until any one establishment can secure control of such a proportion of the school-slate business as will warrant the use of expensive machinery for shaving slate, the hand-shaved slate will remain in the market."

JEWELER'S OR ARMENIAN CEMENT.—Put in a bottle two ounces of isinglass and one ounce of the best gum-arabic; cover them with proof spirits, cork loosely, and place the bottle in a vessel of water and boil it till a thorough solution is effected; then strain it for use. When carefully made this cement resists moisture and dries colorless. Keep in closely stoppered vials.

Answers to Correspondents.

S. K. & S. wish to know who makes a bag machine for making folded grocers' bags, like sample forwarded.

Ans.—Your sample is a square-bottom bag, the machine for making which is controlled by the Union Bag and Paper Company, Philadelphia.

Subscriber asks: Are chalk crayons put up otherwise than in gross boxes and by whom?

Ans.—Ordinary blackboard crayons come only by the gross. Small pastel crayons are put up 7 and 12 to the box. Address any of the well-known manufacturers of crayons.

W. wants to know: 1. Where to get Bramah's letter-press. 2. Who makes good hydraulic presses.

Ans. 1. We don't know. 2. John Robertson & Co., 127 Water street, Brooklyn, N. Y.

D. & Co. ask for the address of the maker of Hickok's "marking" pens.

Ans.—We don't know it. Do you mean "ruling" pens?

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, December 10, 1884. }

THE MONEY MARKET.—Rates of interest, which were a trifle firmer last week in consequence of a better demand for loanable funds, have again receded to the low figures recently current. Commercial paper quiet, with prime endorsements readily negotiable at $4\frac{1}{2}\%$ per cent. discount, but the offerings continue comparatively moderate on account of the small amount of first-class paper that is making. The stock market has ruled quiet and irregular, with prices generally easier than at the close of last week. Railroad bonds have been moderately active and steady. Governments a shade lower. The market for foreign exchange has ruled quiet. Posted rates for sterling were advanced early in the week to $4.84\frac{1}{2}\%$ @ $4.86\frac{1}{2}\%$, but were subsequently reduced to $4.82\frac{1}{2}\%$ @ $4.86\frac{1}{2}\%$. The supply of commercial bills, although moderate, is in excess of the demand for remittance.

THE PAPER MARKET.—Business in the paper trade has developed little change during the past week, but considering the well-known disposition of most buyers to reduce rather than to add to stocks at this time of the year, trade has been tolerably well sustained. As usual, on the approach of the end of the year, the volume of business has a tendency to contract, yet prices in the paper trade, as a rule, are so low that the market generally may be quoted steady, and without much activity or new features. There is no occasion for alarm because failures in general business are beginning to increase in number, the past week having been quite prolific of numerous business embarrassments; but it will be noticed that only few of them are for any considerable amount. It would not be surprising if these should multiply as the year draws to a close. It is only the natural outcome of the annual closing up of accounts and the weeding out of those who have been unable to stand up against shrinkage and severe competition, and is in the nature of an application of the law of the "survival of the fittest." This element, together with the existence of a good many bad debts which are thus uncovered, is an influence against which trade has to contend.

THE STATIONERY MARKET.—Reports from several of the leading distributive points during the past week are somewhat of a mixed character. In some portions of the North and Southwest a good trade is reported, and in the Southern cities, notably New Orleans, there is likewise more or less activity, but in the Middle States the movement is restricted chiefly to the supply of immediate requirement. From Boston and the East, however, the accounts given by traveling salesmen and others are on the whole quite encouraging. The cooler and more seasonable weather has imparted quite an impetus to city trade in holiday goods, and almost every house in the trade report a very marked improvement in this direction. Holiday goods of every description appear to be moving in a very satisfactory manner, although prices are unusually low. Christmas and New Year cards show a great deal of activity, and so do toys and juvenile books; in fact, the holiday trade is experiencing something in the nature of a "boom."

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1862.

Lipman's "INDISPENSABLE" Is THE Eyelet Machine. Also, the "Improved" and the "Tri Patents." New, LIPMAN'S UNIT Punch, for Punching, not Eyeletting.

Hover's MANUSCRIPT Paper Saves your Eyesight and leaves a Blacker Manuscript.

BOSTON BOILINGS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 DEVONSHIRE STREET,
BOSTON, December 9, 1884. }

"I've had wrongs enough to stir a fever in the blood of age,
Or make the infant's sinews strong as steel."

M-I-S-T-E-R EDITOR! Such was the language of Cataline when he stood before the Roman Senate defending himself from the machinations of conspirators; and though Cataline is long ago dead, I share his bitter feelings as I view a paragraph of my letter as published in last week's issue.

With perspiring brow and with conscientious feelings of duty have I for two weeks past endeavored to impress upon the trade the fact that Winkley, Dresser & Co. were prepared to offer big bargains in rubber bands—Atlantic rubber B-A-N-D-S—but owing to "a conspiracy among the types," I was made to say that this house was interested in a "Rubber Bank."

I desire to "check" that "bank statement," as the house refuses to "indorse the note," it being without "interest" to the trade. But any drafts upon Winkley, Dresser & Co. for Atlantic rubber bands will be "accepted at sight." "Cash deposits" for these goods are entitled to big "discounts."

William B. White, manufacturer of "White's" patent eye shades, is preparing to have the goods placed on exhibition at the New Orleans World's Fair. Since these eye shades were placed on the market, some three or four years ago, their sales have steadily increased from year to year. The demand for these eye shades is not confined to this country, as many thousands of them are annually shipped to foreign cities. During the past two years over 75,000 of them have found their way to dealers in Europe. Persons having occasion to work under a strong light find these eye shades very beneficial in protecting their eyes from the heat and glare of the light. Those accustomed to the shade would not be without it. Their use will become more general as the eye shades become more widely known.

As dealers in stationery supplies are the ones to supply this demand, they should inform themselves concerning White's eye shades. Write the manufacturer for descriptive circular and price list. A gross of eye shades costs only a small amount, and there is a handsome profit to dealers. Let customers see the eye shades and they will sell.

The Hub Card Company is making rapid strides. Where one floor formerly sufficed for the transaction of its trade, three floors are now in use. In the publishing and printing of cards the Hub Card Company does not propose to be undersold by any similar concern in the country. Besides its card trade, which embraces autograph cards, cards of all styles for advertising purposes, chromo cards and bevel-edge address cards, the Hub Card Company is doing a good business in printing presses and printers' supplies, being selling agent for several manufacturers. In this department the company is also carrying a line of second-hand material, which is offered to buyers at low

figures. Printers in want of supplies could save a dollar here.

For the holiday trade the Hub Card Company is filling numerous orders for its "three French dolls." In explanation of the "dolls" I would say that they are lithographed upon cardboard, as are also the many different costumes. They are intended for the amusement of children, who will find much pleasure in dressing the dolls in their various gaudy costumes.

Henry A. Young & Co., who recently moved from Arch street to No. 55 Franklin street, are very much pleased with their new location.

Their present quarters are better situated for transient trade, as well as being more spacious. Increased business demanded the change.

This house seems to have escaped the depressing influences incident to November, for a member of the firm stated that his house was unusually busy during last month, doing more business than for the same month of last year.

In obedience to the demands of the season, this house is carrying a varied line of choice goods in staple articles and holiday novelties for which trade so far has been very good.

This firm is also selling agent for several lines of juvenile publications. Among them are children's exhibition books. These books contain appropriate selections in verse and prose for Sunday-schools, primary schools and kindergartens. The demand for these exhibition books is reported to be very good just now, as thousands of little children are getting ready to learn their little piece for Christmas Eve.

C. P. Buckman & Co. is the name of a new firm just starting in the stationery trade, being located at No. 40 Hawley street, which stand was formerly occupied by D. B. Brooks. Mr. Brooks, it will be remembered, died in July last. C. P. Buckman was for six years associated with the late Mr. Brooks in the stationery trade, representing the house on the road, and during those years sold large quantities of the Congress Record Ink. Mr. Buckman's acquaintance with the trade is quite extensive, and there is no reason why his efforts in this direction should not meet with success. This firm is now the sole owner of Congress Record Ink, and the house proposes to push it. Just as soon as the new firm "gets things to rights" the trade will hear from C. P. Buckman & Co.

Coburn Brothers & Snow, whose Summer street establishment is well stocked with the choicest selections of stationery goods and art novelties, report trade as quite flourishing. This firm caters to the wants of the best class of trade, and does only a retail business. In connection with stationery the firm runs a printing establishment.

This house issues occasionally a little journal, called *The Quill*, which besides descriptive notes of specialties carried by the house, gives the latest freaks in "stationery fashions."

James Logan, of Logan, Swift & Brigham, envelope manufacturers, of Worcester, Mass., was in Boston last week and favored the Stationers and Printers' Exchange with a call.

He reports the demand for envelopes good and couldn't suggest a thing to find fault about.

As the season advances, out-of-town dealers are finding their way to the city in greater numbers. All such, including printers, stationers and paper makers, manufacturers of trade specialties and drummers, should drop

into the Stationers and Printers' Exchange and partake of the good cheer provided. All the daily papers are on file, pen, ink and paper in abundance, good, light, and steam heat—all without charge. Make a note of this, and remember the location, 250 Devonshire street, right over the salesroom of Carter, Rice & Co. A. L. D.

For \$6.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on one point, whence the light is reflected with brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can use it to great advantage, and is enabled by giving Part Sunday School, Academy or Public entertainment. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack a poster to the wall, and the people will flock to see the picture. You are ready to begin the exhibit. \$10.00 were paid for the use of our patent by the railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of reflector, Lenses and Slides, is so simple that any one can adjust them with accuracy. Optical laws govern such adjustments, and we have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of

all unsurpassed
methods for
LEARNING
AMUSEMENT
and **PROFIT**.
The Transpa-
rent Slides for
these Lanterns
embrace views
illustrating
WONDERFUL
NATURAL
SCENES from
different parts
of the World.
SCRIPTURE

Subjects from both the Old and the New Testaments. TEMPERANCE—showing the folly and misery of the Drunkard. ART—copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at will. The Slides are made of thin glass, and are simple devices, each Slide packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides) \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides) \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS CAN HANDLE THE FINEST ASSORTMENT OF knowledge and entertainment without the least trouble. Patented and made in America. For more information, apply to the ADDRESS BEYOND MEASURE ATTRACTION.

To intending purchasers or their agents
we will cheerfully show Lanterns in
operation.

How Sponges Are Caught.

The sponging fleet is composed of small schooners ranging from ten to forty tons, or even smaller. Each schooner carries from four to six men, and makes periodical trips out to the sponge beds. Around Abaco, Andros Island, and Exuma are some of the principal fisheries; there are hardly any of value in the immediate vicinity of Nassau. The men do not dive for them, as sponge fishers in the Mediterranean do, but use long-handled things like oyster-tongs to fish them out of the water. They do not "go it blind" and probe in the mud like oystermen; in this clear water they can see every inch of the bottom, make up their mind what sponges to take, and seize hold of each one carefully, detach it from the rock to which it clings, and lift it into the boat. They are not the nice, delicate and light-colored things we see in shop-windows.

When first taken from the water they look and feel more like a piece of raw liver than anything else. They are slippery, slimy, ugly and smell bad. Their color is generally a sort of brown, very much like the color of gulf weed, only a little darker. Most people are taught, in the days of their freshness and innocence, that the sponge is an animal, and when they visit Nassau they expect perhaps to see sponges swimming about the harbor, if, indeed, they do not surprise some of the more athletic ones climbing trees or making little excursions over the hills. But they are disappointed when they learn that the animal part disappears entirely long before the sponge reaches a market, and that the part we use for mopping up fluids is only his house, the many-roomed residence in which he sheltered himself while at sea—a regular marine tenement house, built with great skill and architectural precision, in which many of the little beasts lived and died. After the sponges reach the deck of the vessel they are cleaned and dried, and go through a curing process. They then become the sponges of commerce, and are divided into eight varieties in the Bahamas.

Some, called "lambswool," or "sheepswool," are as fine and soft as silk and very strong. Others, although large and perhaps tough, are coarse and comparatively worthless. There are, too, bouquets ponges, silk sponges, wire sponges and finger and glove sponges. The process for curing them is to keep them on deck for two or three days, which "kill" them. Then they are put in a crawl and kept there from eight to ten days, and are afterward cleaned and bleached in the sun on the beach. When they reach Nassau the roots are cut off, and the sponges are trimmed and dressed for exportation. Nearly every ducky in Nassau understands how to do this trimming part. The symmetry of the sponge must be preserved as much as possible, and if there are any places where coral sand has adhered to the sponge, those places must be cut out, for no amount of skill or care will get rid of sand in a sponge, and the sand is sure to scratch anything it touches. The trimming is generally done very expertly, so that a novice would hardly see that a sponge had been cut.—*New York Times.*

STYLOGRAPHIC PEN CO., Providence, R. I.

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- | | |
|--|---|
| <p>1st.—It can be set to lap any sized head in half a minute.
 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.
 3d.—It will lap any size from half note to imperial.
 4th.—The pens do not lift, but rule continually as in feint lining.</p> | <p>5th.—There are no cogs. 10,000 sizes can be had from one wheel.
 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.
 7th.—It will drop and lift in one-sixteenth of an inch, or ten times in one inch.
 8th.—The lift and drop of the pens is just the same as in hand-work.</p> |
|--|---|

Mr. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

NEW YORK, November 13th, 1894.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickok Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double-cap, or over one thousand sizes, against ten from the gear wheels on our Hickok O. A. By lapping headings we save from fifty to sixty per cent. of time in settings pens alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filling-in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,

DAVIS & FITZGERALD, 24 Liberty Street, New York.

WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE
 that has yet been invented. It is made in three sizes—
 No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is
 made of material handsomely finished in muslin, green on one
 side and brown on the other. The edge next to the forehead is
 bound with leather, and the outer edge with metal, making a
 complete automatic spring, which fits heads of all sizes. The
 material is at once the lightest and strongest, so that while the
 Shade rests on the head as lightly as a strip of ribbon and
 firmly as a cap, it has all the elements of durability. There is
 a large demand for this Eye Shade.

Novel Registering Machine for Printing-Presses.

A firm in Chicago is the patentee of a novel instrument combining a register and alarm. It registers the number of movements imparted, mechanically or otherwise, in printing-machines, &c., and can be adjusted to sound an alarm when the registration reaches any predetermined number, and will indicate at all times the remaining numbers to be registered before the sounding of the alarm. The front of the case has openings through which single numbers on the faces of indicator-wheels can be viewed. The front of the case has its upper portion hinged, in order that it may be opened to afford access to the upper series of indicator-wheels for adjusting them. Within the case upon horizontal shafts are mounted two series of indicator-wheels, each having ten numerals in succession upon its periphery. The wheels have an appliance by which each will be caused, on completing a revolution, to move the next one so as to bring the next succeeding number into view. The lower wheels are designed to register the numbers consecutively from one upward, while the lower wheels are designed to commence at the highest number to be recorded and register downward. Motion is communicated to the wheels by combining with the first or right hand wheel of the series a pawl attached to an oscillating sleeve, which is mounted loosely upon the shaft by which the wheels are sustained, and is extended outward through the end of the casing to receive an operating lever. The vibration of this lever causes the pawl to be advanced and retracted in such manner that at each movement the lower indicator-wheel is advanced one tooth. The other wheels have motion imparted to them in like manner by a pawl acting in the teeth of the first or right-hand wheel of the series.

In operating the apparatus the upper wheels are first adjusted by hand to indicate the number which it is desired to register, the wheels of the lower series meanwhile standing at zero. Upon setting the parts in action, the lower wheels gradually register upward and the upper ones downward, until finally, when the predetermined number of registrations has been effected, the wheels of the upper series stand at zero and those of the lower series stand at a given number.

For the purpose of giving audible notice when the registration is completed, an alarm mechanism is so arranged as to be operated automatically at the proper time. The alarm device consists of a bell and a striker, the latter being secured upon one end of a rock-shaft acted upon by a coiled spring, tending to turn the shaft when released in such manner as to sound the bell. Near one end the rock-shaft has a cross arm, one end of which is in such position that when the rock-shaft is released the end will be acted upon by the teeth of the first wheel. The teeth in passing the end of the arm force it backward and turn the rock-shaft so as to lift the bell striker against the action of the spring. As the tooth is carried past the end of the arm by the rotation of the wheel the arm is released, when the spring causes the bell to be sounded.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

The Trade supplied by the
NEW YORK NEWS COMPANY and NEW ENGLAND NEWS COMPANY.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY** AWARD given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE and REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 126 and 128 Duane Street, cor. Church, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.—NO. 25. NEW YORK, DECEMBER 18, 1884. WHOLE NO. 495.

Correspondence.

BALTIMORE DOTS.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, December 16, 1884.

There have been no very noticeable or important developments during the past week in any branch of our trade. Supplies in most cases are well in hand, and dealers are quite determined to offer moderately. Buyers are in about average attendance, and with a fair sprinkling of mail orders, business has been above the general average. Many interior points still fail to call for the supplies expected of them.

Competition is telling very severely, not only upon manufacturing industries, but the general trade as well, and it would seem as though it was not yet determined how cheaply many classes of goods can be made that for years have sold for double the prices now asked, and until this is determined definitely liquidation in this direction will not cease.

The refining process is causing many to leave the ranks and fall by the wayside, but the result must be inevitably the survival of the fittest, and while it bears hard upon some, in the end it brings the greatest good to the greatest number.

Our book and stationery trade is now fairly active and purchases of holiday goods are our leading feature, the mild and pleasant weather acting as an impetus to the work of laying in novelties while the sun shines.

Baltimore has been particularly favored during the past month, by being the centre for the assembling together of various bodies, political and ecclesiastical. During the past three weeks the Plenary (Catholic) Council of the country has been in session, bringing together strangers from all parts of the world to assist in its deliberations.

This week the celebrators of the centennial of Methodism are assembling, and no doubt several days will be consumed in their deliberations also.

All of this helps Baltimore a great deal and dealers are not slow to appreciate this fact from the sales already made.

A visit to many of our leading stationers and book stores reveals the very satisfactory

fact that they can accommodate every purchaser, and close sales at figures astonishingly low for the class of goods they offer.

We are now on the home run for the coming Xmas-tide. The bright and beautiful, the gay and happy, the poor and humble, all vie with each other in the bustle and hurry to lay in their toys, jimcracks and holiday gifts. The great event is only ten days off. Within that period the children will be brim full of excitement and anticipation, while the elders will catch the enthusiasm and unbend to a present reminder of a living memory. The chief toys will be purchased and hid away at home. The presents will be put aside, and the useful, ornamental and valuable gifts duly labeled for the culminating hour.

Among the many novelties in the stationery trade, I find that to enumerate them all would cause you to issue an extra edition of your valuable periodical. The most noticeable, however, is the variety in stock of D. W. Glass & Co., of this city, whose immense establishment is complete with every line of holiday goods. This firm has just issued a second edition of "Buttercups and Daisies." The first edition was completely exhausted five weeks after publication, and orders are coming in from all quarters for copies of the original or first edition.

Glass & Co. have opened in the western section of this city a "twenty-one-day store" for the accommodation of the up-town trade and have supplied it with a choice stock of Christmas novelties. Mr. Kidwell is still on the rampage "away down South in Dixie," and large orders are pouring in through his ministration.

G. A. Ogle & Co. report a decided improvement in their general sales, and more especially in the paper trade, in which their sales have increased, and profits have been more satisfactory than during any previous month.

Lucas & Co. report heavy business in printing and blank-book manufacturing, with many large orders yet to fill. Their business being confined exclusively to these branches, they do not find time for holiday knick-knacks. They report their trade far above the average in the wholesale department, while their retail trade has been very slow.

Guggenheimer & Weil exhibit also a choice and beautifully selected stock; both for gen-

eral and holiday uses. Their general trade has been about up to the average with no very notable difference. Their orders for fine printing and engraving are well up, and, as they remark, they "are chock full," with more than they can conveniently attend to.

Wm. J. C. Dulany & Co., the well-known booksellers and stationers, have a beautiful and elegant stock, and the latest holiday novelties suitable for the coming festivities.

J. H. Medairy & Co. have also on hand a beautiful and well selected stock, including papeteries, photograph and autograph albums, pocket-books, clocks and gold pens.

In fact, the entire trade is looking up, and I think that after the holidays all general trade will take on a more hopeful aspect. Wishing you and your many readers a merry Christmas and a happy New Year, I am, as ever,

VEXCES.

CHICAGO CHIPS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, December 12, 1884.

The stationers have abundant cause for self-congratulation; the season has been one of uninterrupted prosperity in all branches, and the holidays close at hand are attended by the usual heavy demand on the stationery trade. Not only do the dealers in fancy goods reap the benefit from the holidays, but the commercial stationer finds it the most welcome season of the year.

Mr. Marshall, of Geo. E. Marshall & Co., during a conversation with your correspondent, stated that their business this year far exceeded that of any other year, each month's sales amounting to more than the month preceding.

Mr. Stuart, of the Skeen & Stuart Stationery Company, reports a large commercial business. He states that the orders for blank-books keep them continually on the rush to keep up. This house has introduced a special line of holiday goods which are being disposed of very rapidly. Business is reported as exceedingly good with them.

Brown, Pettibone & Kelly also report a very good trade. Their orders for blank-books are coming in thick and fast.

Cameron, Amberg & Co. are in no way be-

hind their neighbors in the amount of business done, and are very well satisfied with the volume of business for the past season.

The Besly letter file, which was put on the market a short while ago, by Brown & Besly, has met with a phenomenal success. "It has met with a much greater success than I expected," said Mr. Brown, "though not greater than it deserved. Everyone, dealers, consumers and even competitors, unite in saying that it is the best file on the market."

Brown & Besly have just issued a trade catalogue of their letter files, in presenting which they announce that since securing the exclusive license to manufacture the Brown's "Perfect" letter files, indexes, filing or transfer cases, formerly made by Culver, Page, Hoyne & Co., they have improved the quality of the goods very much and will spare no expense to make them superior in every respect and one of the standard lines in the trade.

One of the youngest in point of age and at the same time one of the most enterprising firms in the city, is that of E. A. Snell & Co., who succeeded to the business of Keen & Snell last March, when J. B. Keen withdrew, leaving E. A. Snell in possession of the business and store. The firm now consists of E. A. Snell and F. B. Gibbs, the latter-named gentleman having been admitted to the firm on the 1st of September last. The new firm has made many improvements and additions to its place of business until now it has one of the most tasty and attractive stores in the city, filled with a large stock of carefully selected commercial stationery. Mr. Snell has had eight years practical experience in every branch of the stationery business, having been at one time connected with the well-known house of Skeen & Stuart, serving in the capacity of city salesman for about six years. Mr. Gibbs has had a valuable experience in financial circles prior to his entry into the firm, having held various responsible positions in connection with banking and financial institutions in this city and in the East. Aided by the conservative policy which it has adopted in financial matters, liberal advertising and a generous quantity of perseverance, push and energy, combined with a strict and untiring personal attention to its business, this firm is rapidly working its way to the front rank of the trade, and has upon its books some of Chicago's best banks, railroads and business houses. Owing to the youth and enterprise of the firm it is ever ready to take up any new article of merit, and has already introduced in this market, with success, several novelties in the way of stationers' supplies. The principle, that anything worth doing at all is worth doing well, is identified with all of the business transactions of this firm.

The Dennison Manufacturing Company reports a large business and an increased demand for its "Escritoire" wax, which comes in neat paper boxes and satin-lined plush cases, containing besides tapers and seal all complete. The number of ladies who put a seal on their letters is increasing rapidly, consequently the escritorio meets with a good, steady sale.

The Sanford Manufacturing Company con-

tinues to meet with the success it deserves. Its Pneumatic Mucilage bottle gives satisfaction wherever used. It is a wide-mouth bottle, in which, by a screw on the neck, is inserted a metal tube passing nearly to the bottom of the vessel, forming a tight joint at the neck. By this combination the mucilage is confined in an air-tight reservoir, supplying only enough at the bottom of the well made by the tube to keep the brush moistened sufficiently for use. It entirely prevents evaporation from the main supply of mucilage, and the little that is exposed to the air at the bottom of the well must be the first taken up on the brush, thus always keeping it fresh. As the mucilage is used a new supply is admitted, by allowing a little air to pass under the tube, the atmospheric pressure always keeping the mucilage at the same depth in the well. It is supplied with a bar across the tube on which to wipe the brush when only a little mucilage is required.

The Western office is the recipient of a bottle of Sanford's Premium fluid, a first-class ink for bookkeeping and fine writing. It writes a bright blue and changes to a perfect black. It does not change color in the inkstand and flows very freely.

Ed. Hoole, of Snider & Hoole, will take up his residence here, as the headquarters of the firm have been removed from Cincinnati to Chicago, the change to take effect January 1, a just tribute to Chicago's greatness as a commercial centre.

Noz.

PHILADELPHIA ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, PA., December 17, 1884.

A suit has developed out of the refusal of our commissioners to award a contract of stationery supplies to John R. Senior, for which he was the lowest bidder. This bid was refused on January 23, on the plea that he was not a responsible bidder, and on February 6 his bid was scheduled under an order of court; but the commissioners refused to award the contract to Mr. Senior, who appeared to be the lowest bidder, and he accordingly, on February 11, filed a bill in equity to restrain the awarding of a contract to other than the lowest bidder. The trouble over the Senior bid is that it is alleged that supplies formerly furnished were not up to sample. The case has been in the hands of a referee, and he is about ready to report to the court. The Senior bid for 150 deed and mortgage books was \$5.75; P. F. Mullen bid \$5.90; James Arnold, \$6.90; H. P. Blackburn, \$8; Burke & McFellridge, \$10.50; Dunlap & Clark, \$10.50. Four parties testified before the referee that considering the books were bought in open market, without advertising, that \$10.50 charged by Dunlap & Clark was a fair price. Exception was taken to this bill because the firm of Dunlap & Clark had offered to furnish the same work to the County Commissioners for some \$5.76 less. The investigation was over the justness of the higher price.

In this city each department advertises for its own stationery supplies. An improvement

is suggested, so that one department will make all purchases, and base them on requisitions made. Much useless cost and trouble would thereby be saved. The same business-like rule should prevail in all city departments. Our political rulers seem to take pride in departing, as far as possible, from ordinary business rules, methods and precedents in carrying on municipal government.

This week's reports from our stationers, large and small, afford in the main some encouragement. The rush of customers is quite noticeable during the afternoons. The displays are quite attractive. The amount of business done by some retail houses shows a marked improvement. The wholesale stationers have no special improvement to boast of. The display of holiday cards is particularly pleasing to all kinds of taste, and the demand for this class of goods is growing wonderfully. "We have done a big week's business;" "We are increasing our sales every day;" "Business is looking up," were the replies made by three of the larger retail houses on Chestnut street to-day. The smaller stores are improving their stocks, and displays and shipments of stationery during the past two or three weeks to the near-by, and, in fact, to the far-off trade reveals a very satisfactory trade condition in the general dullness. The stationers are not troubled over striking workmen and Spanish treaties and threatened tariff reductions and a host of evils which keep some classes of business men in hot water. Manufacturers are troubled over the growth of labor agitations, narrow profits and uncertain trade during the coming winter, and the like. The industrial condition is depressed throughout the State, but the foundation is being laid for a steady improvement. The consumption of paper and stationery is increasing as the masses grow in intelligence; as education extends and expands the mind it shows itself in more mills, more stores, more production. Paper is the foundation of our progress.

"When will we have another boom?" asked a small stationer to-day.

Never, it is to be hoped. Why? The reason is plain. The stationers are making no money to-day because of the boom in 1880-82. To stimulate production unduly is to unsettle trade foundations. But moralizing is unnecessary. From this out whatever progress is made will be legitimate. The strongest houses here to-day came up by patient pushing and waiting. The failures in the stationery trade over the country are chiefly the failures of upstarts. Another class is in danger of failure, viz., the fogies who have lost enterprise and who imagine advertising is a foolish waste of money, and who think that buyers will come to them because they are old. We have old houses here, but none of them are fogies; in fact, the oldest are full of young blood, and are making the younger concerns burn the midnight oil over counting-room desks to keep near even.

There has been a great deal of rivalry over the "Big Book" race at New Orleans. A St. Louis man thought he had, and perhaps still

(Continued on page 824.)

HENRY BAINBRIDGE & CO.,

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF NO. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz...\$9.00 | Japanese Finish, No. 3 per doz...\$24.00 | Extra Pads.....per doz...\$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 } **DISCOUNT TO TRADE.**

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

(Continued from page 820.)

thinks that he has, the largest book, but Wm. Mann's book will take the cracker and a box of them.

Chas. J. Cohen is doing a good business in his wide line of specialties, including bronze goods, imported and domestic. The season just closing has been very good. Love of ornamentation and of artistic devices combining utility is growing among the people, as is shown by Mr. Cohen's increasing sales. He has a long list of novelties and attractions. Imelard E. Heise, the general Western agent of the house, has just returned from a fairly successful trip. The stocks in store have been largely depleted, and additional supplies have been recently ordered. P.

AUGUSTA ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., December 10, 1884.

The excitement pertaining to the Presidential election has passed away and everything has settled down to its usual quietness, and to look at the streets, from the amount of business there is doing, you might think it was a cool summer day, for the weather is quite moderate, and in the middle of the day quite warm; in fact, we have had very little cold weather so far. The stationers have been fixing up their stores for the display of their Christmas goods, and there seems really to be as fine stocks, or finer, than are generally seen in good times. The drug stores and some of the dry-goods, as usual, have gone into fancy goods and stationery, and even silverware, quite largely. It is not right, I think, that dealers, especially in a city as large as this, should stick to their legitimate business.

Daly & Armstrong, large dry-goods dealers, have one large window filled with velvet frames, workboxes, albums, papeteries, clocks in plaques, silver cups, and almost everything. Another large dry-goods house does the same. Some of the drug stores are nearly as bad. It shows a weakness in their own business, and I hope that they will lose by it, for you may be sure that the book and stationery stock suffer from it. I remember in old times that no one but booksellers kept such articles, and then it was a pleasure to keep a good assortment, for you could get prices that would remunerate you.

Some of the holiday goods are really beautiful. Brass goods especially seem to be the rage. The excitement of last week and this has been a fair given by the lady friends of the Richmond Hussars, a very popular cavalry company of this city which has been reorganized and want new uniforms, which it will succeed in getting, as the ladies made upward of \$2,000 last week. When the ladies begin anything like that they generally make a success of it. They are always fond of the military.

The Hayne Club is prospering. It elected officers for next year lately. Lawton B. Evans, our Public School Commissioner, is president, and Dr. L. W. Fargo, a young physician of considerable merit, is vice-president. It has had several very interesting meetings this season, and many of the original articles were

well worthy of publication in the current magazines of the day.

Our Young Men's Library Association is getting to be quite an institution, having a large collection of valuable books and owning a large handsome building, the greater part of which is fitted up for offices which bring in considerable income. It is pretty well patronized, but I cannot say that Augusta is a reading community. It is nothing to compare with what it was "before the war," either in fine arts, music or literature. I have found that out by my own experience as regards the sale of works of art and music, which is a pretty good test. The fact is, the late war changed things considerably; those who have the taste lost their money, and now a different class of people have the money, whom I am very sorry to say have very little taste.

Pendleton thinks that the trade in fine books and Christmas cards and fancy articles will be pretty good, from present appearances. I notice that he has laid in quite a stock of the latter.

I stepped into Richards & Sons' store a few days ago, and they were making a good stir in getting their windows, counters and tables ready for a grand display of Christmas goods. I can't see where they expect people to get the money to buy them with; but I generally notice that people will have something for Christmas, even if someone else has to pay for them. I often presented fine books in old times to young ladies, without getting the least credit for it, the young men who gave them not letting on that they had not paid me for them. So the world goes; one-half lives off of the other.

George A. Oates is beginning to be found out, and will be able to do something after a while. Having plenty of time, he would like to have some agencies, and will attend faithfully to them. He would be pleased to receive some goods on sale. MILL BANK.

ROCHESTER OCCASIONALS.

[CORRESPONDENCE OF THE STATIONER.]

ROCHESTER, December 15, 1884.

On reading your rich number of THE STATIONER of the 11th inst., I was reminded of the promise I made of a report for the holidays. Snow is beginning to come and our stationers' windows are filled with new and attractive goods, fine books, all of the new designs of Christmas cards, albums, attractive juveniles, paper put up in new boxes, diaries for 1885, &c.

Steele & Avery, Scrantom, Wetmore & Co., Williamson & Higbie, E. Darrow & Co., Jackson & Burleigh, C. E. Morris and the American Tract Society, all carry an attractive line of holiday goods. Business is reported good, although not up to some flush years.

E. Darrow & Co. have published a large holiday catalogue, and have nearly ready the fine edition of Dr. Baldwin's Pocket Homœopathist, carefully revised by the author.

The one-cent-a-mile fare on the railroads running to Rochester attracts a host of customers to our stores from all of Western New York every day, and if snow comes, so

that Santa Claus can ride in his sleigh, we feel sure of a paying trade.

Representatives of Eastern houses have been plenty and have taken liberal orders which, in some cases, have been duplicated, and representatives of our local houses have been kept busy. Now we will sell out our stocks as nearly as possible. GENESEE.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS, 1
250 Devonshire St., BOSTON, Dec. 16, 1884.

He that giveth is twice blessed,
It blesseth him that gives and him that receives.

The soil has given forth its harvest, the thrifty husbandman has safely garnered the fruits of his toil, and rejoicing thereat has tendered to God, the giver of all things, his devout thanksgiving. From the plow the husbandman is now at rest, while his mind, guided by the "Star of the East," is carried centuries back to the "Babe of Bethlehem," and he hears the glad tidings, "Peace and good will on earth to men," and sees the dawning of the Christian era.

Eighteen hundred and eighty-four years have been gathered with the ages of the past since the "wise men of the East" sought the birthplace of our Saviour, bringing with them presents of oil, frankincense and myrrh. But the flight of time does not dim the halo of Christ's natal day, nor does man forget that God gave His only begotten Son that the world might be saved.

And man, not unmindful of the many gifts to him, consecrates his life and his labor to the enlightenment, the advancement and the happiness of his fellow-man.

While the broad acres are made to yield a harvest through the care of the faithful husbandman, that his fellow man may be fed, industrial workers in workshop and factory are giving to the world the fruits of their hand and mind, that the comforts and pleasures of Christian civilization can be more happily enjoyed.

And these are gathered by the merchant and dealer; from the four quarters of the earth and from every clime, do they collect the fruits of man's handiwork, displaying them in attractive marts that the labor of one may be exchanged for the labor of the other.

As the husbandman plants his seed that it may spring forth "an hundred fold," so does the merchant put in his "plant," stocking his shelves and counters with goods and wares in endless variety, but he does not count his increase by "an hundred fold."

And then the time cometh with the husbandman when his crops are gathered, and the President of the nation appointeth a thanksgiving day and calleth upon all mankind within the realm of his domain to give thanks for the plentiful harvest and to eat hearty of the many good things which the husbandman has prepared, and none rejoice more thereat than the husbandman, for turkeys go up to 25 cents a pound, and he counteth even more profit.

And now cometh the harvest time of the many merchants and dealers throughout the

land, and as they gather in the "shekels" they rejoice again, but more earnestly, and their thanks are even louder than before.

But they rejoice not alone, for all mankind, and womankind likewise, share the fruits of this harvest time. Nor does it take a presidential proclamation to inspire feelings of joy among the people.

Christmas is the day of all days, and the most happy day throughout all Christendom. Then it is that hearts open one to another, and are made glad by offerings of love and affection—and then, too, it helps trade wonderfully.

To my many friends in the city trade I wish a "Merry, merry Christmas!" coupled with prosperity and health. Remember, "it is more blessed to give than to receive," and remember also that my stocking is hanging at 250 Devonshire street. I wouldn't like to lose that stocking, either!

Making a tour of the trade this morning, dealers were found too busily engaged attending to the numerous wants of eager buyers to disturb them for the purpose of gossip, and so I left them "alone in their glory."

The salesroom of Ward & Gay was among the crowded ones, and if one could judge from the continued rolling of the "cash cars" along the numerous wires overhead and from the huge bundles going out the doors, the house was having a pretty good holiday trade.

After working my way through the crowd of buyers at No. 3 Beacon street, I caught a glimpse of H. H. Carter, the genial proprietor of this popular resort. His card counters were crowded, and all the while his stock of cards was growing less. "Stray Leaves from John Ruskin," a very pretty Christmas publication which this house is handling, is having an extra large sale. This house, like that of Ward & Gay, finding its daily retail trade so steadily increasing, has introduced Osgood's patent cash carrier system, by which time and trouble are saved to both the salesmen and the buyers.

Dropping into the art publishing house of George C. Whitney, during a short stay in Worcester last week, I had the pleasure of examining his extensive line of valentines which is now being presented to the trade. Among them are many rich samples, and they are most artistically finished. One style is in plush and figured satin, upon which is mounted decorated gothic doors, which open upon a hand-painted landscape. Another shows floral designs lithographed on satin with hand-painted mottoes in gold. Others are in panel shape, of figured satin and bordered top and bottom with colored plush and mounted with double folding cards. A palette of figured satin and fringed, having a hand-painted card in the centre, is also a taking design. An octagon plush mount, with double folding, hand-painted card in the centre, is among the new styles which this house has just brought out. Of the best productions for the valentine season the house shows a line of thermometer-mounted cards, and they are certainly very unique. All of these valentines are daintily perfumed, and every one is neatly put up in a separate box. These goods sell

all the way from ten cents to five dollars each, but it don't matter how high they come, we must have 'em—for valentines are the emblems of love, and "Love it is that makes the world go round."

A. L. D.

TORONTO TROTS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, December 12, 1884.

Hum, haw! Let me see. I think my last scribble bears date October 24, and as more than a month has intervened I suppose I must shake myself up, stump around a little, and see if I can scare up any trade notes. I am not sanguine as to the result. However, we shall see. But before we set out for a paddle through the mud—we can spare some if you are short down your way—let me say a few words anent that much-talked-of question, the bankrupt law, which you refer to in THE STATIONER of the 4th. You appear to be in the happy state that we are in; that is, you have no such law, and want one. But you had one for years, and so had we. Why was it done away with? I cannot speak for you; but I can say something about the reason why the law was annulled in Canada. It was too cumbrous, and enormous expenses followed in winding up estates as a collateral result. They were eaten up by assignees and law costs, and the unfortunate creditor, in most cases, found himself in much the same position as the two contestants over the oyster—the assignee and the lawyer gobbled up the delectable portion of the bivalve, and passed the shells out in settlement. And hence it came to pass with us for a time that a creditor would accept almost any proposition that his recalcitrant debtor might offer rather than have his affairs go into the bankrupt court. I have attended many creditors' meetings, and have invariably found that most creditors are not hard to deal with when the debtor showed up a fair, honest statement, and could give a reasonable account for his trouble. A proper bankrupt law is a necessity in any country. The whys and wherefores I shall not enter into; they must be apparent to every business man. But the question is how to get at it. I cannot understand why a simple and inexpensive law cannot be framed to wind up bankrupt estates. It certainly does not speak much for the commercial intelligence of the United States and Canada, that such an important matter should be dragging along, affording facilities for dishonest men to give preferential claims, &c., &c. Give us a law stripped of clauses, legal technicalities and all that for lawyers to fight over, and to furnish such a law set a half-dozen clear-headed practical commercial men at it, such men as you can count by the thousands, and we in lesser numbers, and let them frame a bill which might be embodied on a sheet of cap paper. Put bankrupt estates into the hands of parties interested and let them have the say as to how they are to be closed up. I am afraid you will say that I have got off my track, which may be very true, but I feel very much better since I relieved my mind of the above, and now let us see if we can shoot over

into the old track and go on as we are accustomed to do.

Hum, haw! again. Well, how's trade? "That's the question." And I can only repeat what your Philadelphia correspondent says, "trade is generally quiet," and I might emphasize it, but there is no need, for, as far as I can see, it is not by any means confined to America, and whatever people may say to the contrary, there is a kind of satisfaction in knowing that other people are no better off than you are. "Misery likes company," and I am afraid from the present outlook all round we shall have all the company we want. But let me say that I do not think under all the circumstances that we are in a bad position in Canada. It is true that produce is low; but, then, we have a superabundance of it, and most of the necessities of life can be had from 25 per cent. to 50 per cent. less than last year, and hence living expenses are proportionately reduced. If the case was reversed we should have a hard time of it this winter; as it is there is no uneasiness, and we hope to pull through without any serious difficulty.

The first man I came across to-day was Mr. Irving, of the Toronto News Co., who is a clear-headed, practical man, and to my question as to business he replied, "Our trade this year has been good. There has been some disturbance about the Campbell failure, which a good many of us have reason to know, but nothing serious will come out of it—that is, it is spread around, and while we shall all suffer less or more, directly and indirectly, the position of the house was so well known to the trade for many years that very few were caught with large amounts here. The principal sufferers are outside, and knowing the parties pretty well, we have exercised considerable caution in executing orders in all these cases. Our sales of Christmas goods this season are considerably in advance of last year."

Mr. Ellis, of Barber & Ellis Company, left for England, via New York, two weeks ago, and Mr. Spence, of W. J. Gage & Co., the following week. Both of these firms report to me that trade with them is good.

Mr. Reid, of Buntin, Reid & Co., on inquiry, said that trade was quiet, and collections not up to the mark. But there is one thing about this old and well-known firm; its customers know that there is a good, solid backbone behind it all and are not backward to make use of it when a pinch comes, and many have reason to be grateful to Mr. Reid; but, whether Mr. Reid reciprocates this sort of thing or not I did not ask, but I have my own opinions about it. This reminds me of an old friend of mine years ago, who inherited a vein of Irish humor. I met him coming out of the bank one morning, with a handful of notes. After the usual greetings, I said, "You seem to have done quite a stroke of business this morning." "Oh yes," he said, "thank God, these are all paid," and, in an aside, "I renewed the whole lot." I am afraid a good many bills are being paid in the same way just now.

Davis & Henderson said that trade with them was good. Mr. Richardson, of the Standard Publishing Company, this morning said the same thing, and that their trade was rapidly increasing.

I must break off here, for I have quite outstripped my bounds. Pardon me, please, because these are subjects we like to dwell over, dream about and expand. We shall meet again, I hope, whether at Ephesus or not, who can tell?

C. H.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

GEO. H. SANBORN & SONS, BOOKBINDERS' & MACHINERY,
69 BEEKMAN STREET, NEW YORK.

MANUFACTORY: STANDARD MACHINERY COMPANY, MYSTIC RIVER, CONN.

E. P. DONNELL & CO., CHICAGO, ILL.

— MANUFACTURERS OF —

Bookbinders' ♦ Machinery ♦ of ♦ Every ♦ Description.

THE CHICAGO PAPER CUTTER.

✦ CUTTING STICKS MUST GO! ✦

THIS PAPER CUTTING MACHINE HAS A FLAT edge lower blade placed in the table bed. The upper knife on descending makes a shear cut on every part of the paper cut; the knife passes below the Table Bed and throws part of the front table out as the knife ascends; the front table is thrown back automatically, thus making a solid surface of the table. We do away with the set-screws that are used generally to take up the ware in the Knife Bar, as we use a simple bevel gib that is screwed up by one nut on top, which always keeps the Knife Bar firm and true.

There is no dulling of the knife as the knife-dulling surfaces are dispensed with; it saves the expense of the knives, saves grinding, sticks, &c., which are a great annoyance and expense as used on the other cutters.

The Knife Bar can be adjusted to any angle by the side steel rods.

It is supplied with our new patented clutch, which is simple and noiseless and combines the balance wheel pulleys and clutch all in one. Can be stopped instantly at any point and is acknowledged the simplest and most powerful cutter ever offered.

There is no drawing out of any kind of paper by our hand-clamp; has quick-acting back gauge.

Price 34-inch Steam and Hand Power, \$600

Price 44-inch Steam and Hand Power, 1,000

No Cutting Sticks used on this Cutter, it has a Shear Cut that trims ALL the sheets CLEAN.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

INDEX ROLL AND INDEX CUTTER.

Herewith are given drawings of two new bookbinders' tools manufactured by E. P. Donnell & Co., Chicago.

The combined index roll is made of brass and is supplied with rubber bands which can be easily put on the roll, ready for use and at low cost. It is said to give a clean impression.

The new hand index cutter shown does away with trouble and annoyance and marks as simply as an ordinary hand-shear, cutting out a round corner and making the index much stronger. These shears always give a clean cut; they have a gauge to adjust to the size of the index required, and this gauge can be used on either side for right or left-hand cutting. The indexes are always of uniform size.

NEW PATENTS.

No. 307,317. Ornamentation of Glass Vessels.—Arthur H. Merrill, Cromwell, Conn.

No. 307,365. Drawing-Board.—Rudolf Schmitz Werotte, Finborough Road, County of Middlesex, England. Patented in England, April 28, 1884. No. 6,091.

No. 307,392. Inkstand.—Frank W. Hutchins, Warren, Ohio.

An inkstand provided with one or more bottles or wells, a hinged or pivoted cover for each bottle, a rest or support for the pen, a lever pivoted to the stand and resting in close proximity to the pen support and devices, connecting said lever and cover.

No. 307,395. Ornamental Tile.—Robt. G. Jones, Washington, D. C., assignor to William W. Curtis.

A glass ornamental tile having the design in intaglio or relief, and the colors applied on the under surface of the tile.

No. 307,402. Game Apparatus.—Michael J. Lynch, Pawtucket, R. I.

No. 307,408. Pencil-Holder.—Lewis B. Myers, Fremont, Ohio.

No. 307,417. Type.—Henry H. Thorpe.—Cleveland, Ohio.

No. 307,427. Clip-Board.—Joseph B. Bloomingdale, New York, N. Y.

No. 307,430. Paper-Box Machine.—Isaac T. Brown, Columbus, Ind.

In a machine for making paper boxes, the combination of the following elements, namely: A pair of feed-rolls, a cylinder, a series of scoring disks arranged to cut against said cylinder, means for giving an intermittent rotary motion to said feed-rolls and cylinder, a frame adapted to move transversely across the line of movement of said scoring-disks, and carrying a cutting-disk having a having a positive rotary movement, and scoring-disks rotated by frictional contact with the box material, and means for moving said frame intermittently, all acting in co-operative relation to each other.

No. 307,445. Type-Writing Machine.—Merritt H. Dement and Austyn W. Granville, Chicago, Ill.

1. The combination of a series of rods in a continuously-revolving holder with cams, by means of which the rods are pressed endwise upon the material operated upon. 2. The combination of a series of rods in a revolving holder with a series of cams of different lengths or widths operating directly upon the rods, by means of which the rods are pressed for different lengths of time upon the material operated upon.

No. 307,446. Apparatus for Putting Matrix Strips in Form and Preparing them for Stereotyping.—Merritt H. Dement, Chicago, Ill.

COMBINED INDEX ROLL.

No. 307,468. Music-Sheet Binder.—Lawson P. Keech, Brooklyn, N. Y.

No. 307,469. Stylographic Fountain-Pen.—Marion I. Kerner, New York, N. Y.

No. 307,488. Blank Book.—John W. Nagle and Tous-saint Chalifoux, Chicago, Ill.

No. 307,549. Machine for Dotting Slates.—Charles M. Hyatt, Albany, N. Y., assignor to the Hyatt Slate Company, Slatington, Pa.

No. 307,559. Box for Changing Photographic Plates.—Hieronimus Mader, Isny, Wurtemberg, Germany. Patented in Germany September 6, 1882, No. 22,569; in Belgium, January 16, 1883, No. 60,184; in France, February 14, 1883, No. 153,704, and in Austria-Hungary, April 20, 1883, Nos. 5,045 and 16,709.

HAND INDEX CUTTER.

No. 307,613. Pencil-Sharpener.—John Williamson, Camden, N. J.

No. 307,636. Telluric Globe.—R. Henry Ferguson, Providence, R. I.

A telluric globe having one hemisphere of its surface dark and opaque and the other hemisphere luminous, and mechanism for imparting rotary motion to such globe.

No. 707,647. Machine for Cutting and Printing.—Clarence W. Hobbs, Deering, Me., assignor to the New England Box Company, Waterbury, Conn.

On the platen are placed cutting and scoring knives, which act against a metal plate adjustably mounted on the nipper-frame. The plate is perforated for the passage of the types on the bed to the paper placed over the knives on the platen.

No. 370,662. Copying Press.—Richard E. Kidder, Worcester, Mass.

No. 307,705. Information Tablet.—Edward S. Boynton, Bridgeport, Conn., assignor to the Wheeler & Wilson Manufacturing Company, same place.

No. 307,735. Fountain Pen.—Lewis E. Waterman, Brooklyn, N. Y.

A fountain pen consisting of a barrel or

reservoir having a bar in a tubular piece in the extremity of the barrel, said bar having a longitudinal groove in its side, which is to be in proximity to the pen, and an additional longitudinal groove on the other side, whereby air may be admitted to the reservoir independently of the ink-conveying groove.

No. 307,746. Composition for Scaling-Wax.—George W. Coddington, Middletown, Ohio.

No. 307,764. Inkstand.—Isaac W. Heysinger, Philadelphia, Pa.

No. 307,768. Artist's Color-Holder and Palette.—Isaac W. Heysinger, Philadelphia, Pa.

No. 307,798. Twine-Carrier.—Homer W. Prindle, Fort Dodge, and Charles H. Prindle, Humboldt, Ia.

No. 307,817. Metallic Binder or Fastener.—Jesse F. Tapley, New York, N. Y.

No. 307,850. Bookkeeper's Chair or Stool.—George B. Edwards, Charleston, S. C.

No. 307,883. Cover for Books, &c.—Savillion Van Campen, Jersey City, N. J.

No. 307,897. Paper Box.—Chas. M. Arthur, Morris, town, N. Y.

No. 307,922. Printing Press.—Peleg S. Dodge, Stanton, Mich.

No. 308,040. Drawing-Board and T-Square.—Clifford H. Prescott, Lawrence, Mass.

No. 308,043. Stereotype-Matrix and Method of Making the Same.—Wm. J. Shaw, Covington, Ky.

No. 308,045. Toy.—William Vogel, Chicago, Ill.

No. 308,100. Inkstand.—Jasper S. Ross, Braceville, Ohio.

No. 308,105. Ticket-Holder.—Jas. H. Stewart, Newark, N. J.

No. 308,119. Paper-Feeding Machine.—Geo. White, Boston, Mass.

DESIGNS.

Nos. 15,501 and 15,502. Printing Type.—Henry H. Thorp, Cleveland, Ohio, assignor to the H. H. Thorp Manufacturing Company. Term of patents, 14 years.

PARIS.

LONDON.

BERLIN.

298 BROADWAY,

NEW YORK, November 24, 1884.

GENTLEMEN :

We have much pleasure in announcing to you the opening of a direct BRANCH ESTABLISHMENT for the United States and Canada at the above address.

It has been obvious for some time that, in justice to the continually increasing variety and number of our Art Publications, a closer relationship with the American Continent had become a downright necessity; the requirements of so important a market justifying, nay, necessitating, that close attention and study which only a direct intercourse can cultivate to advantage.

We point to our past record as an earnest of our future efforts in the matter of ARTISTIC and NOVEL PRODUCTIONS and the various new lines, such as EASTER and all branches of CONGRATULATORY CARDS; FLORAL and other ART STUDIES; CHROMOS, RELIEFS, SCREENS, TERRA-COTTA WARE, &c., with which our Representatives are making their debut on our behalf, may fairly entitle them to your favorable consideration.

Upon one subject we would lay particular stress, and that is touching the matter of prompt delivery of samples and stock; and here it is that a direct intercourse with the American trade, which will henceforth be supplied in advance of the English market, will prove of immediate benefit, and avoid all unpleasant friction caused by lateness of deliveries.

In conclusion we would gladly bespeak for ourselves the good-will of our competitors, no less than that of the entire trade, and our actions, prompted as they will be by a careful solicitude for the best interests of the trade in general, will be calculated to secure and retain that good-will for us. We are, gentlemen, yours faithfully,

RAPHAEL TUCK & SONS.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIRS: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.
ADDRESS

ENNE MFG. CO., 178 Devonshire St., Boston, Mass.

TRADE * OPINIONS.

3 Years in Use.

INDIANAPOLIS, IND., 1884.

Your Combination Striker works admirably, gives perfect satisfaction, is the best striker we have ever used. Your Perforator is indispensable and does all you claim for it.

WM. P. BURFORD.

3 Years in Use.

CHICAGO, ILL., 1884.

With your machine we perforate with ease eighty reams per day, one to six perforations to a sheet; we tried four different makes of Perforators, but found none to work right till we got yours.

J. S. McDONALD & CO.

2 Years in Use.

CINCINNATI, OHIO, 1884.

We are greatly pleased with your Combination Striker and Lapper. We are using it along side of a latest improved Hickok, and we greatly prefer yours.

MALLORY & WEBB.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

M. Miller & Co., printers, Knoxville, Ia., have failed.

Uplegrove & Dayton, dealers in books, &c., Harlan, Ia., have sold out.

W. J. Stone & Son, wall-paper dealers, &c., Atchison, Kan., have failed.

C. B. Barney & Co., printers, Omaha, Neb., have dissolved partnership.

Dell & Knapp, bookbinders, Baltimore, Md., have made an assignment.

Wisdom & Garland, publishers, Fort Smith, Ark., have sold out to Cruce & Naylor.

M. B. Carlisle & Co., dealers in books, &c., La Fayette, Ala., have sold out to P. M. Rowland.

J. W. Denmark & Co., booksellers and stationers, Raleigh, N. C., have dissolved partnership.

Schuyler Brothers, publishers of the *Economist*, Milton, Pa., have sold out to A. S. Hotenstein.

Newbury & Stevens, dealers in books and stationery, Astoria, Ore., have sold out to Griffen & Reed.

Alfred D. Bowen, publisher of the *Pacific Journal*, Oysterville, W. T., has sold out to Thurlow Sperry.

William P. Stanley, bookseller, &c., Hastings, Minn., is closing up his business; said to be going to Oregon.

An attachment for \$1,300 has been issued against W. B. Alford, dealer in books, stationery, &c., at Ferndale, Cal.

Henry P. Heppe, manufacturer of paper boxes, Philadelphia, Pa., has been burned out. Loss \$3,000 to \$5,000, partly insured.

Judgment for \$8,616 has been entered against Minor C. Kerbaugh, wholesale and retail dealer in paper-hangings, Philadelphia, Pa., and execution has been issued.

Judgments to the amount of \$2,990 have been entered against Samuel S. Woolever, printer, Allentown, Pa. Execution has been issued and the sheriff has taken possession.

Joseph Koehler, 120 Chatham street, has bought out the business of the late G. W. Turney, deceased, of 77 Chatham street, and all of his rights for publishing motto verses, motto papers, &c., a complete line of which he will constantly keep on hand. Mr. Koehler has brought out some new designs in playing-cards, but his holiday trade has been so driving that he has not been able to give them much attention. Some of his newest things are frosted palette and bevel-edged cards, of which a series represents Arctic scenery, and is having a good run as a New Year card. He also keeps a full supply of law-blanks, rent-receipts, "to let" bills, motto paper, &c.

T. P. Wales has associated himself with J. C. Olmsted in the stationery business at Los Angeles, Cal., the firm name being Olmsted & Wales.

A. N. Brice, publisher, Sunbury, Pa., was not sold out by sheriff. Debt was paid by sureties, who took transfer and stayed the execution.

The San Jose (Cal.) *Mercury* Publishing & Printing Company has been succeeded by C. M. Shortridge, publisher of the *Times*.

A meeting of the creditors of F. H. Thomas & Co., dealers in law books, &c., St. Louis, Mo., has been called for to-day.

J. E. Curren, Kingston, N. M., publisher of the *Kingston Clipper*, has sold out to Childers & Farley.

Anson H. Smith & Co., publishers of the *Miner*, Mineral Park, Ariz., have dissolved partnership.

J. W. Buckley, publisher of the *Record*, Evening Shade, Ark., has sold out to E. G. Henderson.

Attachment for \$1,991 has been issued against W. B. McKenney, publisher, Salida, Col.

A receiver has been appointed for A. C. Kalt, dealer in wall-paper, Fort Wayne, Ind.

Henry H. Baumgarten, manufacturer of stamp pads, New York, has been attached.

A receiver has been appointed for the Exchange Publishing Company, New York.

Reade & Stercus, music dealers, Kansas City, Mo., have made an assignment.

William H. Jones, dealer in stationery and notions, Hudson, Wis., is dead.

R. D. Squire, fancy-goods dealer, Addison, N. Y., has made an assignment.

R. D. Squire, fancy-goods dealer, Corning N. Y., has made an assignment.

W. H. Hartley, dealer in books, stationery, &c., Brainerd, Minn., has sold out.

E. W. Barnes, publisher, Wellsville, N. J., has made an assignment to A. S. Brown.

C. Fitzgerald & Co., fancy goods dealers, Oneida, N. Y., have made an assignment.

Dudley, Homer & Co., publishers, Buffalo, N. Y., have sold out to C. L. Sherrill & Co.

A receiver has taken possession of the estate of Sigmund Loeb, fancy goods dealer, New York.

Childers & Farley, Kingston, N. M., have recently begun the publication of the *Sierra County Advocate*.

Fuller & Jarden, wall-paper dealers, &c., Baltimore, Md., have dissolved partnership. Geo. F. Fuller succeeds.

Grauer & Almstedt, printers, St. Louis, Mo., have dissolved partnership; the business is continued by J. J. Grauer.

Edwards & Decker, manufacturers of paper boxes, Philadelphia, Pa., have been burned out. Loss about \$9,000, insured for \$7,000.

The business of H. J. Geth & Brother, dealers in paper-hangings, Bethlehem, Pa., has been advertised for sale by the sheriff.

A. Weidman, 306 Broadway, is making extensive preparations for the campaign in masks, which is expected will start up pretty lively after Christmas.

A one-legged man, named Henry N. Baumgarten, who did business at No. 60 William street, New York, as an agent for rubber marking stamps and later as a diamond broker, has disappeared, to the great sorrow of numerous persons whom he has defrauded. Baumgarten sold diamonds and jewelry to many persons in the neighborhood of his office, obtaining from them considerable sums of money. He lived in style, drove fine horses and kept a flat at No. 153 West Sixteenth street. After his mysterious disappearance, two weeks ago, L. Tannenbaum, a Nassau street diamond merchant, visited Baumgarten's customers and informed them that the diamonds belonged to him; that Baumgarten had obtained them on credit and that he must either have the price or the jewels. Mr. Tannenbaum then levied on all the property of the swindler, including the furniture in his flat and his stable. The missing man is said to have been accompanied by his wife, although since his flight another woman claim-

ing that relation has been around looking for him.

James Ferguson, paper-stock dealer, Philadelphia, Pa., is dead.

E. W. Barnes, publisher, Wellsville, N. Y., has made an assignment.

The annual meeting of the Stationers' Board of Trade will occur on January 6.

Rebecca Friedenborg, fancy-goods dealer, Bradford, Pa., has made an assignment.

George H. Power, bookseller, &c., Annapolis, Nova Scotia, has made an assignment in trust.

Spalding Brothers, paper-stock dealers, Providence, R. I., are reported to have assigned.

The Achert Lithographing Company, of Cincinnati, Ohio, has increased its capital from \$25,000 to \$35,000.

R. C. Squires, dealer in fancy goods, at Corning and Addison, N. Y., has made an assignment to C. B. Ellison, giving preferences for about \$5,000.

Execution was issued on Tuesday against the wall-paper manufacturing firm of Trout, McIlvaine & Elder, of 706 Market street, Philadelphia, upon judgment amounting to \$42,493.

The schedule in the assignment of William H. Woodcock, dealer in printers' supplies, doing business at 78 and 80 Murray street, to Joseph A. Taylor, were filed on Wednesday. They state: Liabilities, \$9,636.01; nominal assets, \$19,612.62; actual assets, \$5,641.21.

A meeting of paper manufacturers and importers of paper-stock was held on Tuesday afternoon at 3 o'clock, at the office of *The Paper Trade Journal*, to take action upon the circular of the Secretary of the Treasury in regard to the disinfection of rags. Augustine Smith presided, and the different interests of the trade were well represented. A resolution was adopted indorsing the action of the Treasury Department, and appointing a committee of seven to visit Washington, with power to consult with the authorities in relation to the circular, and to try to secure an extension of the time for receiving rags shipped and on the way, and such other concessions as might be desirable. The committee is composed of Senator Warner Miller, Hon. William Whiting, Hon. William A. Russell, Charles E. O'Hara, Augustine Smith, Edward Goodwin, Jr., and John H. Lyon. It was voted as the sense of the meeting that no objection existed to the disinfection of rags in this country or abroad by any method satisfactory to the sanitary and treasury authorities, and practicable for the manufacturers and the importers. It was also resolved as the sense of the meeting that disinfection of rags subsequent to their arrival in this country is not practicable or desirable.

Chadsey & Clarke, printers, North Kingstown, R. I., have removed to Providence, R. I.

Mrs. M. F. Fenton, fancy goods dealer, Kaukauna, Wis., has been burned out.

R. F. McCoy, music dealer, Chattanooga, Tenn., has made an assignment.

J. B. Goode, bookseller and stationer, Gilmer, Tex., has taken a partner in his business.

Mr. Pratt, of J. L. Fairbanks & Co., Boston, was circulating around among the trade this week.

The Mutual News Company, Limited, Pittsburgh, Pa., has succeeded to the business of A. W. McCloy, stationer, of that city.

A fire at Braddock, Pa., yesterday destroyed Sherwin's book store and other property. The loss is \$6,000, partly covered by insurance.

The stock of George M. Cummings, dealer in card material, at 33 Federal street, Boston, was damaged by fire \$2,000 on December 11.

A. & J. Wallach, 442 Broadway, offer to close out the remainder of their stock below the cost price, now that the season is so nearly over.

A fire occurred in the six-story building, Nos. 165 to 171 Grand street and 224 and 226 Centre street shortly after midnight on Tuesday, and the Giles Lithographic Company, occupying the upper two floors, was damaged about \$4,000. It is insured. Jenkins & Thomas, printers, on the third floor, had their stock damaged about \$800 by water.

The schedules in the assignment of James M. Hurd, advertising agent, to John P. Craighead, were filed on Wednesday. They state: Liabilities, \$12,543; nominal assets, \$12,537.17, and actual assets, \$183.04. Some of the debtors of Mr. Hurd have failed, and his claims against them are worthless. Most of his liabilities are amounts due for advertising. The assignor was forced to make an assign-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

ment by reason of the failure of George E. Hutchinson & Co.

S. F. Dawson's leather-board mill at Shirley, Mass., was burned on Sunday night. Loss, \$20,000.

The paper-hanging business of Minor C. Kerbaugh, Philadelphia, Pa., is advertised to be sold out to-day.

M. Calisher, stationer, at Oakland, Cal., has been attached. His liabilities are about \$5,000; assets about the same.

The Wire Goods Company, Worcester, Mass., manufacture bright wire goods, picture cord, suspension rings for calendars, &c., and a variety of other wire articles.

A fire in Joseph Harper's stationery store, at No. 233 Greenwich street, New York, on Tuesday evening, did \$1,000 damage to the stock. The loss is covered by insurance.

R. G. Hutchinson is offering a nice line of sealing-wax in beautiful tints. The assortment of colors is very large, and the quality and finish of the wax are said to be first-class.

Edward Posen & Co., 437 Broadway, report a very satisfactory trade in their albums. This is the first year that they have been directly represented on this side, as heretofore they have been represented entirely by jobbers.

C. F. A. Hinrichs, according to his usual custom, is retailing goods, and his friends or others desiring anything in his immense bazaar of toys and fancy goods, are invited to make him a visit, and they will be cordially received and their wants supplied. His store is alive with customers and resplendent with the most elegant goods to please both the young and old.

William Mann, Philadelphia, has on exhibition at New Orleans his "Big Book," which was entirely made up—ruling, printing, binding and finishing—in his own establishment. This is thought to be the largest blank-book ever made. It is 29 inches long, 28½ inches wide, 16 inches thick, weighs 306 pounds, has 3,416 pages, with 1,816,137 square inches of paper surface and will register 170,800 names. It is made from the L. L. Brown Paper Company's linen record paper. Other exhibits made by this house are twenty-five large books for banks, bound in full russias and thirty copying books made from thin parchment paper.

R. R. Stevenson, printer and publisher, Curwensville, Pa., has been sold out by the sheriff.

The Globe Files Company, C. M. Ward, agent, 28 Bond street, New York, has brought out an improved form of its bank-check file. This is smaller and lighter than the first style of the file and is more convenient to handle.

The Babylon (N. Y.) *Budget* is a weekly newspaper, and has had rather an eventful history. It was started as a personal organ, but after a time it fell into the hands of David S. Sammis, proprietor of the Fire Island Hotel, who unloaded it on Stephen A. Titus and took the latter's notes as security. Mr. Titus has now placed the burden on Mr. Sammis' shoulder, and under the following circumstances: Brinkerhoff Meyer, a paper merchant of New York, obtained a judgment against Mr. Titus for \$327.45 for printing paper. Execution was issued to the sheriff of Suffolk County, who proceeded to levy, but he found that a chattel mortgage had been given to Mr. Sammis to secure the purchase notes, and that later Mr. Sammis had taken a bill of sale of the concern and recorded it in the Town Clerk's office. The sheriff was a few days too late.

Henry Levy & Son, 477 Broadway, made an assignment on Monday for the benefit of their creditors to William H. Gelshenen. They had obligations to the amount of about \$20,000 to meet during the present week, and foreseeing their inability to meet them, it was deemed that the best course for them to take was to make an assignment, which was not executed until a late hour on Monday afternoon. The firm was founded in 1844 by Henry Levy, and a brother of his was a partner, and the present firm succeeded Henry Levy & Brother in 1873. It has stood well in the trade and always paid in full heretofore, and claimed a capital of \$150,000 in the business. Besides importing fancy goods, the firm manufactured fine plush and leather goods. The attorney for the firm makes the following statement: As near as he could estimate, the liabilities were about \$200,000, and he thought there were enough assets to pay in full. The assets consisted of a large stock of merchandise, and bills receivable and cash to the extent of \$5,000 to \$10,000 had been turned over to the assignee, which was something unusual. The failure was unexpected, and the firm hoped

to get an extension. The causes were the general stagnation in business, poor collections and depreciation. They carried a large stock of goods which have greatly depreciated in value, and trade being so dull they became discouraged and thought it best for the interests of all concerned to make an assignment. There are preferences aggregating about \$70,000—to William H. Gelshenen, the assignee, for \$4,300; S. Ullman, \$15,000; R. Fuchtwanger, \$46,354.09, and to their clerks in the store, \$2,500. The unsecured liabilities are mostly foreign, comparatively little being due to the trade here, and are placed chiefly in Berlin, Paris, Cologne, Vienna and London. The assets are estimated at about \$325,000 or \$330,000 in stock and open accounts, there being about \$125,000 outstanding in accounts. Last year at this time the firm is said to have owed \$200,000 more than now. The firm last year did a business of \$300,000, but up to November 1 of this year there was a decrease of \$60,000, and through November only about one-half the sales as compared with the same month last year.

Dell & Knapp, bookbinders, Baltimore, Md., made an assignment on Monday to Charles E. Hill. They failed in 1879, and compromised at thirty cents on the dollar. They had about \$5,000 invested in machinery. The trustees' bond is \$10,000. Lawrence G. Dell and Theodore Knapp composed the firm.

William G. Robinson, of Atlanta, Ga., who sold out and failed several weeks ago, has offered 20 cents on the dollar, but some of his creditors are taking vigorous measures for prosecuting him.

The Acme elastic composition is designed for printers' use in making up pads. It comes in five-pound cakes in different colors.

The rumor that D. L. Davis is about to leave M. A. Reay, to be succeeded by W. R. Deming, is denied.

Fishel, Adler & Schwartz, chromo and fine art dealers, were elected to membership in the Stationers' Board of Trade at the meeting last week.

FIREPROOF CEMENT.—A very tenacious and fireproof cement for metals is said to be made by mixing pulverized asbestos with water glass; it is said to be steam-tight and resists any temperature.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12S.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

It is hinted about by people, who claim to be familiar with the inner thoughts of Senators in Congress, that the new treaty of Commerce with Spain will not be ratified and upon this action, it is said, depends the fate of every other reciprocity treaty now pending. We don't see why this should be so. There must be different conditions, and to defeat every measure looking to the extension of our commerce merely because one does not happen to fall in with public opinion is very poor legislation.

ENGLAND has her free-trade club, which has assiduously tried to impress its principles by various methods, lavishly applied, upon the people of this country. We have long thought that the system of one-sided education and free-trade coercion which has been going on in our midst ought to be met and disputed. Our colleges and schools—some of them—employ teachers who make a business of instilling free-trade doctrines into the minds of our growing youth, and without presenting the opposing phase of opinion. If the study of matters of public policy of so great moment is to be included in the curriculum of any of our higher educational institutions, it is only just that it should not be one-sided; but if money and missionary effort in this line are expended on the one side, there ought to be some effort made to meet them. We are glad, therefore, to note the proposed formation of a tariff club, which it is proposed to establish on "the broad foundation of adherence to protection and opposition to free trade and its synonym—tariff for revenue only." A preliminary meeting for the purpose of starting an organization will be held at Reading to-morrow. The movement has been initiated by the iron trade, but it is not proposed to confine it to any interest, party, class or geographical limit. Those who are in sympathy with the project of such a club ought to unite with it at once and help to put it on a sure and permanent footing.

WHAT effect the creation of partial monopoly in the manufacture of German slate-pencils may have upon the market for these goods we are yet unable to judge, but the facts set forth by the United States Consul at Sonneberg show that if enhanced prices for slate-pencils will improve the condition of the people making them, it is about time that values were advanced. The manufacture of these pencils is mainly carried on by families in the neighborhood of Steinach, and competition among themselves, together with the severe terms offered by buyers, and the habit of many families accepting various articles of food and

clothing in pay for the year's product, had combined to demoralize the trade and to reduce prices to a ruinous figure. A firm in Döschnitz has contracted with about four hundred families in Steinach and vicinity for all the pencils they may make up to 400,000,000 annually, at a fixed price. It is stated that the producer is thus assured of an advance of from 44 to 50 per cent. on the prices at which he previously sold his goods, while the production goes on regularly, with none of the injurious effects of former competition. For each 1,000 pencils produced 10 pfennigs (about 2.3 cents) go to create a fund for the benefit of the work people. The consul remarks: "One cannot witness the hard lives which these people lead without recognizing the need of some movement to improve their condition."

Roundabouts.

BY THE TRADE LOUNGER.

You reported last week some changes likely to occur among the salesmen of different houses. The list isn't large and I have been expecting to hear of more, but the moving about may not amount to much. Why should it?

* * * *

A well-known firm has sought relief from pressure during the past week. This is a surprise. I hope that the suspension is not to be permanent.

* * * *

Rumors of a change in a well-known up-town house are current. It is said that one of the partners will withdraw and take \$100,000 out of the firm. As the statement is not authoritatively vouched for I refrain from mentioning names.

* * * *

There are a great many tempting things, some of them of late introduction, in the market. I hardly dare go the rounds now. I see so much that I would like to have and which exceed in value the plenitude of my wealth.

* * * *

There are a few trifles which claim passing attention. One of the new silk folding cards this season is called the "Music Satchel," and has a sentiment or motto set to music imprinted upon it.

* * * *

A very pretty satin card has a moon-light scene. A spray of blossoms embellishes the foreground and an appropriate verse is displayed in one of the corners.

* * * *

It is promised that a new type-writer, lately brought out in Germany, will be introduced in this country. It is said to combine the advantages of other machines with easy working capacity, and to be powerful enough to print a dozen manifold copies at once, the price—in Germany—being about \$11.

* * * *

Looking over an English paper I saw a description of a "propelling pencil, with

vulcanite body, chased or plain, and nickel ends, fitted with best quality copying ink lead, to retail at four pence." Now, how do they do it? Is there any American manufacturer who can make a pencil of that sort which can be sold for eight cents? That ought to take in any market.

* * * *

There is a copying paper, which is said to be of Japanese manufacture. It is being offered in the English market. It is said to be stronger than any other copying paper and to have other advantages. It retails for 54 cents per ream up, according to size.

* * * *

There is a run on penwipers made in oak-leaf designs. Five or six plain cloth oak leaves are cut out, with silk, and tie together at the top with a ribbon bow.

* * * *

A collection of Crown Derby, Royal Worcester and Selantine ware, and other choice selections in fine pottery, such as are shown by several city houses, affords great opportunity for securing useful as well as elegant holiday presents.

* * * *

Among the numerous articles from which choice Christmas gifts may be selected are bronze, brass and copper ornaments, oil paintings, toilet sets, work boxes, nail sets and traveling cases. Umbrella stands in hammered brass are elegant.

* * * *

Some of the manicure sets, or, as they are better known, nail sets, displayed on the counters of the fancy-goods houses are works of art and beautiful to behold. One set on exhibition is of gold-plated steel and ivory. The glittering scissors, file, knife, and the dark-colored brushes and polisher rest in a satin-lined case, which is covered with bronze leather. It is said of this set that there is no counterpart, and it is valued at \$180.

* * * *

There are elegant dressing-cases, costing as high as \$75, and beautiful sachets, which range in price from half a dollar to \$8.25.

* * * *

Glass flowers in fancy baskets, pots and boxes, each of which contains a bottle of cologne or perfume for handkerchiefs, are among the fancies of the season.

Answers to Correspondents.

J. & W. want to know where to buy muslin-lined rubber pads for letter books.

Ans.—Leonard Bailey, Hartford, Conn.

D. & Co. say that the Hickok marking pen is a rubber spear-head on a holder, and want to know where to get it.

Ans.—We know now what you mean. It is said that this implement is no longer made. We have one which we find useful.

J. P. wants to know where to get an improved paging and numbering machine.

Ans.—John McAdam's Sons, Brooklyn, N. Y.

E. A. C. wants to know where to get sheet copper, unfinished, as used by manufacturers of plates for engravers' use.

Ans.—Ansonia Brass & Copper Company, 19 Cliff street, New York.

TABLET PAPERS.

AURORA SPRINGS, MO., December 20, 1884.

To the Editor of *The Stationer*:

There are a few stationers who are putting up very thin papers in tablets, to the unspeakable convenience of a large and increasing class of customers.

French folio, 17x22 inches, retails at about \$1.50 per ream, and contains four reams of commercial note, or 480 sheets folio. 17x22—(1) 1,920 large letter heads, 11x8½; (2) 3,840 commercial note heads, 5½x8½; (3) 2,880 hotel note heads, 5½x11; (4) 5,760 pocket note heads, 4¼x7½; (5) 2,880 sermon note heads or sermon letter heads, 7½x8½; or No. 1=20, 192 page tablets; No. 2, 40; No. 3, 30; No. 4, 60; No. 5, 30, 192 page tablets.

Seven-pound manilla folio makes a most admirable thin writing paper, and would cost you, I presume, about fifty cents per ream, or from five-sixths of a cent to five-thirds of a cent per tablet.

A cheap engine-sized writing paper also makes a fine tablet, if thin enough, while a thin linen paper, of seven pounds, at 20 cents, would cost no more than a fourteen-pound cotton paper at 10 cents.

Double the amount could be carried in the pocket or trunk, or kept on hand, with the same trouble and inconvenience.

The saving of postage, whenever more than one letter rate is required, would be 64 cents a pound.

In your own business, if you would use seven-pound linen hotel note heads, 5½x11, it would save more than its cost in postage.

Another idea: If you would have some of your paper manufactured for you and have it strongly waterlined every quarter inch, French quadrille or only one way, it would save the expense of ruling and be far more desirable. Such paper is very attractive to a large class of customers.

If five sheets of thick manilla to the ream are placed, one at the bottom and four at intervals in the folio ream, before cutting and, after cutting, the butts are all smeared with printer's glue, the blocks are made almost without cost.

If blotters are also wanted, on top of each block put a sheet of blotting-paper and also one underneath each of the four sheets of manilla, and the work is done, with only occasion to cut the blocks apart.

Tablets are among the special conveniences of the day. They go into homes and schools where very little paper has heretofore been used. They are educating youths and adults to use more paper and greatly promoting the sale and use of stationery.

The more varied and attractive they can be made, the greater will be their use and sale.

Many are made of the thickest and poorest paper and the thickest of pasteboard, so as to be as disgusting as possible, by stationers who wish a customer to buy only once.

A much better way is to get as much value

attractiveness and use as possible for the same money, or for less money, and let the retailer have the benefit of the saving, and the customer the benefit of the quality.

This business is in its infancy, and those who really serve and please the best, will, in the long run, get the advantage of their skill and honest dealing.

I have tablets with permanent memoranda on them that I would give double the cost of to have made thinner and less cumbersome.

A 7, 8 or 9 lb. manilla or linen folio is as good for writing on one side by practiced writers as a 24-lb. cotton paper.

There is a difference of (24-7=17 and 17x64=) \$10.88 in postage per ream, and a great advantage in convenience every way to writer and recipient.

I am in receipt of letters of unusual length and value from a correspondent in Montana, and the 24-lb. paper that he writes on is quite an inconvenience, as I preserve all his letters.

CERPHAS A. LEACH.

TRANSPARENT BLUE FOR STEEL.—Damar varnish, ½ gallon, finely pulverized. Prussian blue, ½ ounce; mix thoroughly; makes a splendid appearance, and excellent for bluing bright steel.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, December 17, 1884. }

THE MONEY MARKET.—The money market has not reflected any improvement in the condition of financial or commercial affairs during the week, local banks being still burdened with money seeking employment. The rate for call loans has continued at 10½ per cent., and commercial paper continues to rule quiet, with prime endorsements easily negotiated at 4½ to 5 per cent. discount. The stock market has been irregular and unsettled, the trading having been of a see-saw character, indicating that the fluctuations have been due to the manipulation of cliques rather than to any material change in the situation. Railroad bonds have been irregular, and generally lower. Governments steady. Foreign exchange has ruled lower. The easier tendency is due in part to a more liberal supply of bankers' bills, and in part on account of recent purchases of securities here on foreign account.

THE PAPER MARKET.—Very little change has been developed in the market during the past week, and the trade is now experiencing that period of quietude so usual near the close of the year. Most manufacturers appear to have orders enough to keep them well employed for a month or so to come, and it is only in exceptional instances that we hear of any mills closing down for the lack of business. Although our city dealers as a general thing complain of very dull trade, prices generally have a steady feeling if we except straw and Manilla wrappings, which show a little weaker tendency. The proposed action of the Treasury Department in requiring the disinfection of all rags coming into the country will have the effect of limiting the supply of rags somewhat and advancing the price on the manufacturers.

THE STATIONERY MARKET.—Not only is trade in staple goods reported equal to last year at this time, but some of our largest houses say that they are ahead, although profits may be closer. In the line of holiday goods most of the large wholesale houses are closing out the remainder of their stocks at retail, and crowds of anxious buyers are in their stores from early in the morning to late in the evening. What little trade is now doing in Christmas and New Year goods is of a retail character. Some of the new samples of Easter cards have been shown, and others will make their appearance after the Christmas and New Year holidays are over. Prices of staples remain steady, as a general thing.

At the monthly meeting of the Board of Trade and Transportation held on Wednesday, the following resolutions in regard to the exactions on commercial travelers were adopted:

Whereas, The Supreme Court of the United States has declared unconstitutional the laws of the several States and Territories under which taxes or licenses are imposed on commercial travelers traveling from one State or Territory to another; and

Whereas, Notwithstanding said decision, the said States and Territories continue to exact, or permit the towns and villages within their limits to exact licenses, to arrest, and in other ways annoy citizens of other States or Territories selling goods therein; therefore,

Resolved, That it is the duty of Congress to enact such a law as shall preserve the rights contemplated by the Constitution among the citizens of the several States and Territories.

John Gibson, 82 and 84 Beekman street, is very busy working on a large line of Easter novelties, which he expects to have ready to show the trade early in January.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), *er gross*, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), *per gross*, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 16, 1884.

The reports from stationers are not so easy to-day as they were a week ago. Christmas sales are not quite up to what was expected at the beginning of the holiday season. Purchases are numerous, but they do not bring in much money as they are of low-priced goods. Even Christmas cards are not finding their usual sale, beautiful as they are this season. But then you know the Cincinnati trade in holiday goods is capricious. Sometimes it begins early and runs all the season, while at other times it begins dull and keeps on dull till a week before Christmas, and then goes with a rush and gives a splendid account of itself. So, after all, there is no telling yet but that the trade here this season may turn out all right yet.

The traveling men have all taken to cover, and it is well for them that they have. Dealers in the intervals between sales of Christmas goods are taking account of stock, and are not in the sweet temper of mind that makes them pleasing companions for the traveling salesman.

By the way, the style of the firm which is the legitimate successor of Peter G. Thomson is Woodruff, Beard & Co. It will continue the book and stationery, but not the publishing business of the firm it has succeeded.

Book buyers laying in Christmas books are sticklers about prices and are paying nothing for show. The cheap books sold at next to no margin at all by the greatest dry-goods store in the city is affecting the legitimate book trade here injuriously—at all events that is what some of the dealers think about it.

General trade is very quiet. Everybody is taking account of stock, and preparing generally to make a fresh start in the New Year. In some lines of trade there seems to be considerable life, but on the whole there is a good deal of inertia lying around loose, to speak slangwise, and somewhat extravagantly to boot.

Among the manufacturing stationers there is much the same state of inactivity in the shops as there is in the salesrooms. A general disposition prevails among dealers and customers to be content with present use transactions until after the new year. There is a mere speck of suspicion impeding the free movement of the motive machinery of trade just now. If the New Year passes and leaves things no worse than they are now, why that very fact will make things better. Is that a paradox? Well, let it be so, but mercantile men believe that it describes the facts of the situation. Cincinnati financiers believe that if there are no crashes in the East about the New Year there will be none here, and that business, that has been sluggish so long, will take heart and brighten up again.

There are a great many idle mechanics in Cincinnati—carriage makers, for instance—who are idle because there is no work for them to do, and shoe operatives who, less than a

year ago, were making trouble about wages. There are idle stove molders and idle cigar makers who, nearly a year ago, with a deal of trouble and great sacrifice, managed to cut off their bread and butter supply by a long strike, and are suffering in consequence.

The advent of better times would be hailed with joy by many in the city who are honestly idle—that is, by no fault of their own. The weather has been mild for the season thus far, and the Board of Public Charities, which does thorough work, has not found as much distress as one might expect under the circumstances.
PRINCE WILLIAM.

Charles H. Leeds, the new Secretary of the Stationers' Board of Trade, although he has only occupied the position a short time, performs its multifarious duties with as much ease as if he had been accustomed to the routine through years of experience. The trade having business with his office cannot fail to be favorably impressed with him, as he is courteous and obliging to everybody and a painstaking official. He was formerly engaged in the manufacture of straw goods, and was one of the firm of Buttle & Leeds, and succeeds Henry L. Boordem, the late secretary.

96 Farringdon Street, London, E. C.

American Paper Manufacturers' Association.

The secretary of the writing division of the American Paper Manufacturers' Association has sent out the following circular:

SPRINGFIELD, MASS., December 13, 1884.

Confirming circular of November 17, 1884, the committee kindly request you to shut down your machines and engines (both washing and beating) December 22 to 27 inclusive, also for the last week of January.

None can doubt the great good to both manufacturer and jobber which was occasioned by the non-production of 600 tons, more or less, of writing paper during the last week of November. And if good was accomplished then, we may hope for greater relief on account of the mills producing nothing the last week in December, when many manufacturers at the close of the year are too anxious to reduce stock on hand even at a sacrifice of the price; but when they remember that during this month they had only about three weeks in which to produce anything, they will keep the prices firm and be ready for a good business at the beginning of the new year with fair prices. Per order committee,

E. C. ROGERS, Secretary.

Raphael Tuck & Sons have just displayed their samples of valentine cards for the coming season. These are in an endless variety of designs, embracing one of the largest lines of cards of this character and of the most refined taste ever seen, each card being a work of art in itself. No cost has been spared to make it just what it is claimed to be, the most artistic collection ever offered the trade. All that can be said of valentine cards applies equally as well to their birthday, Easter, wedding, floral study, relief and congratulatory cards, &c. Their collection of birthday cards alone embraces 300 sets, comprising about 1,000 designs. In folding cards there are thirty different sets, including two-fold, trifold and four-fold screen cards, which come in very tasteful and pretty designs. One of the leading specialties of the firm is a heavy satin panel card, of which it claims that no house publishes a similar line of goods. This comes in forty separate sets, made of a heavy card-board, with a chromo-lithograph design on satin, the effect, owing to the softness of the material, being very much like a hand-painting. The cards are in different shapes, one of which is cut in the form of a diamond, and is said to be very popular. A number of the designs are said to be by the celebrated artist Baroness Beckendorf, and all of the sentiments on Raphael Tuck & Sons' cards are claimed to be written by the best writers. The firm has a full line of plush cards, which are produced for birthday, Easter and valentine presentations, and are to be seen in an endless variety of designs. Its sachet cards have designs both on the back and the front. There are also grained silk cards, with mounts of satin flowers; silk book-cards, two-fold and interleaved. The Easter card line is one that has not yet been as much developed as it will be in the future. Raphael Tuck & Sons intend to make this a very important part of their business, and will try to excel in it as they do in their other branches. The present line embraces 100 different series. A very beautiful design is an angel card, by James Sant, R.A., the copyright of which cost £200. In congratulation wedding cards there are satin and plush single and folding cards in numberless designs, all of a very chaste and delicate character.

For \$6.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used. The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustment of Reflector, Lenses, Tubes, Slide-Rest and Cone are made with mathematical nicety, optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all methods for LEARNING, AMUSEMENT and PROFIT. The Transparent Slides for these Lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World, SCRIPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard, ART—Copies of famous Statues, Bas-Reliefs and Engravings, MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight Scene, Moonlight, &c. HISTORY—Landing of Columbus, Declaration of Independence, &c. COMIC—Slide Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides) \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides) \$6 each. OUR DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. For HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

The *Magazine of Art* for January has a striking frontispiece—the balcony scene from "Romeo and Juliet," engraved from the original drawing by Frank Dicksee, A.R.A. The opening article of this number is a second paper on the "New Forest," by Mrs. Fawcett, which was on the press at the time of her lamented husband's death. A. W. Henley's illustrations to this article are characteristic and graceful. Mr. Stevenson's verses, "It is the Season," are set to pictures by Alice Havers, and printed in a delicate tint. The color-sense of poets, by Alfred St. Johnston, is a suggestive paper. Madeline A. Wallace-Dunlop begins a series of practical papers on "Some Oriental Brass Work," illustrated with some excellent examples of the art. The French painter, Puvis de Chavannes, is written of by Claude Phillips. A page picture, called "Parting," by Hugo König, is very suggestive of Meissonier, the figures of the cavalier and his horse bring quite in the Frenchman's manner. Miss Cartwright treats of a famous gem, a cornelian intaglio, once the property of Nero, in her paper on the "Romance of Art," "Early Sculptured Stones in England," by G. F. Brown, and "Profiles from the French Renaissance," by A. Mary F. Robinson, follow. Cosmo Monkhouse closes the body of the magazine with "A Dead March," which is followed by some very live notes on American and foreign art.

A steel color is developed on brass by using a boiling solution of arsenic chloride, while a careful application of a concentrated solution of sodium sulphide causes a blue coloration. Black, generally used for optical instruments, is obtained from a solution of platinum chloride to which tin nitrate has been added. In Japan the brass is bronzed by using a boiling solution of copper sulphate, alum and verdigris.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H. IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

The Trade supplied by the
NEW YORK NEWS COMPANY and NEW ENGLAND NEWS COMPANY.

NEW LIST AND DISCOUNTS OCTOBER 1, 1883.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE
that has yet been invented. It is made in three sizes—
No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is
made of material handsomely finished in muslin, green on one
side and brown on the other. The edge next to the forehead is
bound with leather, and the outer edge with metal, making a
complete automatic spring, which fits heads of all sizes. The
material is at once the lightest and strongest, so that while the
Shade rests on the head as lightly as a strip of ribbon and
firmly as a cap, it has all the elements of durability. There is
a large demand for this Eye Shade.

STYLOGRAPHIC PEN CO., Providence, R. I.

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

1st.—It can be set to lap any sized head in half a minute.

2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.

3d.—It will lap any size from half note to imperial.

4th.—The pens do not lift, but rule continually as in feint lining.

5th.—There are no cogs 10,000 sizes can be had from one wheel.

6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.

7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch.

8th.—The lift and drop of the pens is just the same as in hand-work.

Mr. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

NEW YORK, November 13th, 1884.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickok Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double-cap, or over one thousand sizes, against ten from the gear wheels on our Hickok O. A. By lapping headings we save from fifty to sixty per cent. of time in settings pens alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filing in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,

DAVIS & FITZGERALD, 24 Liberty Street, New York

The Nation's Highways.

I.

There are motives and influences with and without the demands of business and commercial intercourse so recondite and powerful as that they are determining, as matters of fact in our political organization, questions which in theory have been subjects of discussion during the whole life of the nation. Our people see with pleasure the energy of the government securing great lines and means of communication, obliterating the artificial boundaries of States, without so much as remembering that there was a period in our political history when the subject of "Internal Improvements" bid fair to become a party measure. The Cumberland Road, the first great enterprise of the kind, met with many mishaps before it became a success. Behind it, however, was the irresistible force of advancing civilization. We look back in wonder at the opposition made to a scheme so modest in the estimate we now put upon it, and we find but little in it which should have aroused antagonism, much which, in the relation it then held to progress, to have justified enthusiastic support.

The questions then bearing upon the project are constantly recurring; they must do so as long as development continues, for, with the advancement and complexity of the interests of the people will come, perhaps unformulated, but as persistent, the demand for means to meet and further public needs, and here, as everywhere else, necessity knows no law. The great change which has occurred in the relation of the people to the works of internal improvement has been in the scope to be given them. Our civil war broke down many barriers. The Potomac, which so long seemed a bar to movements north and south, presents now not a political problem, but one of engineering only. No consideration of the artificial boundaries it marks arises in any project to which it may be related; how and where shall it be crossed to the greatest advantage is all that concerns business or politics, and if we put aside the element of "jobbery" which enters into so much of national effort in these directions, there is a ground upon which all meet, and there is only one subject calling for serious discussion, the expediency—the real value—of any such measure proposed.

There are few projects, however, now before the people, outside of the average river and harbor improvements—all of which, save those of the large seaports, have only local relations—which do not so clearly touch and so directly influence the general welfare as to commend them to general approval and earnest support. Among those which have been urged without success thus far, none ought to command more public interest than the improvement of our great waterways. Doubtless, as to one of them, the Mississippi, much of the opposition or lack of interest is due to the injudicious support of its friends. Without entering upon the discussion of the limitations which should be imposed upon the action of the government, there is a wide difference in principle between the expenditure of public means upon the river as a highway of commerce and for the protec-

tion of circumjacent lands from overflow. To promote the navigation of any stream, which from its connections may procure competitive aid to commerce, is a motive which falls within the strictest construction of the province of the Federal Government. In the practical administration of this duty, the tendency, too, is to lose sight of the question as to whether or not operations shall be limited to those cases only in which the projected measure passes from the territorial bounds of one State into or through another. We are fast losing the narrow spirit which fixes the sphere of our effort and ambition by State lines; and in the greater facility for their accomplishment under national auspices State pride yields.

The temporary failure to carry out the elaborate projects of the early history of the country, has led to somewhat curious results. The scheme which Mr. Gallatin, as Secretary of the Treasury, proposed pursuant to a resolution of the Senate, February, 1807, was very suggestively comprehensive. It included, first, a series of works, mainly by canals, cutting Cape Cod, New Jersey, Delaware, Maryland and North Carolina, making a great coast-line route, with a turnpike road from Maine to Georgia. Second, a system running east and west, by the improvement of river navigation and roads. Third, a system north and northwest, of roads and canals, including connecting the Hudson by Lake Champlain with the great lake system. Fourth, local improvements at different points. The estimated cost was twenty million dollars and the time ten years—an annual expenditure of two millions. It is a curious commentary on the fitness of things, that this scheme, which then seemed so conducive to public convenience, and in relation to the prevailing methods and means of transportation so aptly conceived, so broad and comprehensive as to commend it to the favor of all sections, should have then failed of support, and now, after nearly eighty years, and the wondrous march of improvement, it will again, for the most important part—the coast features—come before the people for their approval. The necessity, in order that coastwise commerce may be relieved from one of its most serious drawbacks—the interruption and danger of coast navigation—will very soon press it with successful force upon public attention. Beyond this is the consideration of a line of communication entirely defensible, and, in case of war, wholly free from ocean attack; the additional and increased facilities for local trade thus relieved from harbor and in part weather contingencies with the increased competition thus procured—these and many other considerations, must soon lead to the connection of our large streams on the Atlantic slope in an inland line of communication, offering every facility for local traffic that is now found in our railroad system. How little is required to make continuous inland water communication from the St. Lawrence to Central Florida, having, in the northern section, two parallel lines!

Possibly divisions along political lines, involving intense feeling, during so long a

period, tended to repress direct effort in behalf of lines running north and south; with this was the fact that the tide of development was westward, and so, for more than half a century, aside from the great channel, the Mississippi and its tributaries, all effort was in behalf of communication with the West. The Cumberland road, the pioneer, was only little in advance of the railroad projects, the very magnitude of which gave the force and persistence needed to overcome the seemingly insuperable barriers. The completion of one was only the prelude to the undertaking and speedy construction of three great continental ways, and yet the old Cumberland road has not lost its usefulness as a civilizing power, nor is its influence upon trade wholly lost. Along its route, and in part by its side,

another of the pioneer enterprises, the Chesapeake and Ohio Canal, takes its sinuous way. Its glory has departed, never to be revived; not because it has not a definite mission, but the age of steam will yield to nothing, and it is doubtful if it could be adapted to such steam traffic as the times require. In all of the plans of the future steam enters as a factor. The Suez Canal has solved all of the problems involved in the subject of ship-canal movements; so that by merely widening the scheme submitted by Secretary Gallatin to the larger needs of our larger vessels the project of 1807 has everything of merit to commend it to the progress and enterprise of the present.

There is, therefore, substantial and practical value in the discussion of the subject of coastwise and ship-canal communication.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY AWARD** given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE and REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.

PHILADELPHIA ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE LOCKWOOD PRESS,
504 WALNUT STREET,
PHILADELPHIA, PA., December 23, 1884.

The retail stationers complain of dullness since the setting in of bad weather. The wholesale stationers are all doing a good and improving business, and a goodly number of orders have been placed within a few days for books, cards, paper and material of one kind or another.

Alvah Bushnell, 105 South Fourth street, who represents a large retail trade, reports business greatly depressed, but looks for a sudden improvement when fair weather comes. There is plenty of business in the public, he says, and the trade will get it all as soon as the weather permits.

The house of William Mann is extremely busy in all departments, and the prospects are encouraging. The firm learned this morning that it had been awarded ten items to furnish to the various city departments. All of the contracts have been awarded, but the announcements will not be made for a day or two. The bidding was close.

W. M. Christy's Sons report quite an active business in books and stationery supplies, with the out-of-town demand fairly good. Buyers have put off purchasing later than usual, and some are now crowding in their requirements.

A. M. Collins, Son & Co., 527 Arch street, have done a large amount of business this season in card specialties.

Clark & Sons, 230 Dock street and 136 South Sixth street, preserve their old and well-established reputation, and report a steady demand for Christmas goods.

The retailers are praying for a few bright days. The public are ready; the money is saved up; urchins and matrons are looking hopefully forward to cold weather in which to enjoy the holidays in the good old-fashioned style.

Langfeld, Turner & Andrews, Arch street, have been running for three months night and day. Business sales amount to full what they did last year, and the firm is in correspondingly good spirits. Its winter prospects are

encouraging. Its specialties are pocket-books, ladies' satchels, &c. The demand for this line of goods has grown rapidly of late, and several new varieties are out, one of which has the outside pocket on the inside—saving the Irish bull.

Turner & Harrison, the pen manufacturers, Twelfth and Buttonwood streets, will have a new and improved catalogue out within a few days, showing colors, numbers, sizes and prices of pens. The firm, years ago, made its pens known by a liberal distribution of pen-cards through the mails.

Janentzky & Weber, dealers in artists' materials, 1125 Chestnut street, report a steady demand for their Limoges vases. This ware is quite attractive in its appearance, and is meeting with favor among the lovers of art and pottery ware. The firm is quite busy with a more than active holiday trade. Its wax flowers and painting materials for china ware are among its specialties.

Mr. Loughhead, of Dreka's, 1123 Chestnut street, was the designer of the tablets and invitation cards used at a supper given by the Democratic members of the social arts club to the Republican members to solace them in their defeat. The cards and tablets evinced the very fine taste of their designer. Dreka's enamelled plaques are meeting with an active demand. They are novel, attractive and cute. Mr. Loughhead is also the designer of these.

Charles J. Cohen, Chestnut street, reports a free movement in his various lines of goods to the local and near-by trades. The distribution of goods has been quite satisfactory, and continues later than usual. P.

TORONTO TALKS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, December 19, 1884.

In continuation: My interview with R. Brown, of Brown Brothers, brought out the following: "We are moving on quietly, and considering the way business is, have no reason to complain. In general stationery we are doing fairly, but prices are very low. Competition very keen. In our manufactory we are unable to keep up with orders. Our diary trade this season has been good. Collections moderately good. The late unfortu-

nate failure—Campbell's—demoralized trade a little, but now that the worst is known, does not look so bad. As a rule, the majority of our business men understand sound business rules, but there are some who think that so long as they can keep on renewing bills they are all right. But we are getting tired of it, and when the screw is put on these are the first to go. The men that pay promptly and take their cash discounts, are the men who succeed. The fact is, we all give too long credit, and this thing should be remedied at once. It would be far better for everyone to hasten this end and get their trade on a cash basis." I commend these few items from Mr. Brown to the serious consideration of our trade.

Mr. Hutchison, of Rowsell & Hutchison, in response to my call, said: "We are very busy. We have, as you can see, a very large stock of gift books, and especially of Sunday-school libraries, prize and miscellaneous books. We are the agents for the publications of the Society for the Promotion of Christian Knowledge, London, and handle a large number of their books, and also for the Church of England Sunday School Institute, London. In our printing and binding department we are more than usually busy."

The alterations which have been in progress for three or four months at the Methodist Book and Publishing House are completed, and this concern is enabled to turn out a much larger amount of work, but the pressure upon it keeps pace with the improvements. It is always on the rush. Its recent publications are: "William and Mary, a Tale of the Siege of Louisburg, 1745," by David Hickey; "From Wealth to Poverty," by Rev. Austin Potter; "Honest John Stallitsbrass," by J. Jackson Wray, &c.

Mr. Clark, of Copp, Clark & Co., intimated to me that they had no reason to find fault with this season's business. They had about got through with the rush of their fall orders. Collections have been fair. They have just published the thirty-eighth edition of their Canadian Almanac, a very valuable publication in its way, and having a large circulation. I have much pleasure in posting you a copy which Mr. Clark handed me for you.

Donald Bain, of James Bain & Son, says

that their trade is about as usual. They do not observe much difference.

Grand & Jay, dealers in stationers' sundries, &c., are pushing ahead and building up a fine trade. They are energetic and pushing, two important elements of success.

Alexander, Clare & Cable, lithographers and engravers, are crowded with work and cannot keep up with their orders.

Hart & Co. report business fair. Globe files are going off well. They have a fine stock of Christmas goods, and anticipate a satisfactory result.

Williamson & Co., booksellers, &c., are, as I have intimated before, the leading people for general literature in the trade here. There are few books of any importance at all to the general reader or to the student, varied as this class undoubtedly is, but what can be had of them. They also carry a fine stock of stationery, cards and all that. They are very busy now, and expect to be so through the winter.

In all of the houses named I have said nothing about Xmas cards and all that sort of thing. Well, in my walks about the city, I find about the usual display in the windows and on the counters of these goods, and while I noticed new things, there are a good many old friends through the collections. I suppose that ere Christmas day comes around, about the usual quantity will be sold. I cannot help thinking, however, that this is wearing out, and it remains to be seen whether an inventive genius will arise who shall give the world a novelty that will supersede them. For a good many years now the Xmas card has been a prominent feature on Christmas day, and how glad many of us have been over the receipt of a few little cards, some of which have journeyed hundreds and thousands of miles to reach us on that glad day, and bore on their faces the cheerful greeting, "A Merry Christmas." Many a mother's heart has been made glad by this simple reminder from her boy far away. And many a one has said, I am not forgotten, I hold a place in my old friend's heart still. But, nevertheless, I cannot help thinking that their mission is nearly fulfilled.

I am afraid my letter would be altogether incomplete if I had not a word or two about the weather. We have had very mild and open weather up to date. A few cold, raw days and two or three moderate flurries of snow.

Everyone is anxious now for sleighing and colder weather. This would have a cheering effect on trade. There are indications of snow while I write, and if it will only come and remain—that is, a sufficient quantity—until after the holidays, everybody will be glad.

In conclusion, I shall not probably lay another contribution on your editorial table this year. What did you say? "Thank the —!" Very well, that's all right! We shall both breathe freer in the meantime. But, before bowing myself out, let me say, I wish THE AMERICAN STATIONER a merry Xmas and a happy New Year, and many of them.

C. H.

CINCINNATI CRISPS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 22, 1884.

A Merry Christmas to the whole world! It is safe to send that greeting from the trade in Cincinnati to the trade everywhere else in this mundane sphere. One incurs no risk in assuming the responsibility of thus speaking for the stationers of Cincinnati, knowing the magnitude and the high thermal condition of the hearts of those included in the term "stationery trade." Yes, a merry Christmas and a happy New Year, especially the latter. There is nothing the business man hereabouts desires more ardently than a happy New Year for himself and for all other business men. Just stop and think for a moment what a humanizer and civilizer business is—how it clasps men together with the strong bond of a common interest. There may be blemishes in business, but they are not in sight at the present moment. It has beautiful examples of noble unselfishness in many men who have prospered greatly by it and whose characters business pursuits molded. So with the purest of motives the wish goes out here to all the world for a happy New Year.

But why specify the New Year? Is it an object of suspicion? Yes and no. It is not for mortal man to know what the future "hides in it of goodness and sorrow." If men had such knowledge of good and evil, that white-winged angel Hope would fly away from the world and never return. There would be no resting-place here for the sole of her feet. But this coming new year is believed to have in store a special fate of some sort for the business of the country. That belief, which is pretty general, lends a special interest to the coming new year, and makes the wish that it may be happy—a truly kind-hearted wish. The Cincinnati man of business scarcely tries any longer to conceal the fact that he is a little timorous about what the new year will bring to the business of the country. Most men are hopeful; a few are very apprehensive; all are more or less anxious. The reasons given most frequently for this anxiety and apprehension are not that business men by unbusinesslike management have gotten themselves into bad shape, but that the shrinkage of values, something that they could not foresee, has shaken the foundations of certain lines of business. What causes apprehension is that possibly the underpinning has been shaken out from under some business houses and that after New Year's there may be a little crash caused by the simultaneous falling of such houses. Many hopeful men scout the idea of any such danger.

On all hands it is admitted that if something actually shocking does not happen to trade about the New Year that all suspicions will vanish and business will be much more active. But the New Year is at hand, and we shall soon hear its official report on the subject, which is a sufficient excuse for not dilating further on this topic.

Coming to the actual business of the last week in holiday goods, one hears from busi-

ness men queerly contradictory reports. Some dry-goods men have, right in the holiday season, dismissed portions of their clerical force. Others report trade equal to that of former years. In the jewelry line many of the shop-keepers say that their sales have been exceedingly good and large; a few report sales light and chiefly of cheap articles. The book and stationery stores are thronged all day long. From some of these the report comes that people are looking a great deal and buying only a little, and that of very cheap goods. Others report brisk and large sales, quite as satisfactory as the average Christmas trade.

There have been a few trade visitors here within the last fortnight, among whom were the following-named: James T. Watkins, of American Lead Pencil Company; William Saurwalt, of Caterson & Brady Company, playing cards; T. S. Buck, of Lambertville Rubber Company; Charles J. Ritter, of Koch, Sons & Co.; H. L. Dewey, National Blank-Book Company; Mr. Cooke, of Cooke & Cobb; Mr. Hymen, of Eagle Pencil Company; Mr. Hill, of Holyoke Envelope Company; Mr. Whitcomb, of G. H. Whitcomb & Co., Worcester, Mass.

PRINCE WILLIAM.

CHICAGO CAROLS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 EAST MADISON STREET,
CHICAGO, December 20, 1884.

To the publishers and numerous readers of THE AMERICAN STATIONER, and to the trade throughout the country, the stationers of Chicago join your correspondent in wishing all a merry Christmas and indulging in the hope that the coming season will find you enjoying a continuance of the prosperity so richly merited.

Christmas is close at hand at this writing, but Jack Frost got in one lap ahead. He came down upon us with a suddenness and severity almost unparalleled in the weather lore of Chicago. The advent of really cold weather is noted with varying emotions by those occupying different stations in life. The business men and the wealthier classes, who can utilize the frost for pleasure, hail its presence with satisfaction, while the poorer classes, and those suffering from actual poverty, are looking forward to depleted pocketbooks, and in many cases to hunger and serious discomfort.

"This is overcoat day," is a sign frequently encountered, and the traffic in those garments has been immense. One glance at the thermometer, and one blast of the keen northwest wind are enough to satisfy any sensible man that he must choose between a warm woolen coat and a wooden one, four feet under the ground, and he generally chooses the former.

The ear-muff man is happy in the consciousness that he is a public necessity. The large-eared individuals who caught the cold wind like sails were his especial prey, and many were the sharp bargains he drove with them.

"'Ere's your ear-muffs; solid comfort for
(Continued on page 856.)

MANUFACTURERS AND PATENTEES.

NEW YORK.

THE DAILY MEMORANDUM CALENDAR

Consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December.

They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and for the convenience of business men in figuring interest, on every date how many days of the year have passed and how many are to come.

HALF-SIZE CUT OF No. 1.—PAD PLACED IN POSITION FOR WRITING.

THE back, or last leaf of the pad, is made of cardboard, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, is to be removed from the stand and the new pad for the ensuing year put in its place.

This Stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod, so that it can be brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the Calendar of the ensuing year on the back.

The file, combined with this stand, is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

PRICE LIST. { Pen-Rack Stand, No. 1.....per doz... \$9.00 | Japanese Finish, No. 3.....per doz... \$24.00 | Extra Pads.....per doz... \$3.60
 { Paper-Weight Stand, No. 2.. " .. 8.10 | Mounted on boards..... " .. 4.80 | **DISCOUNT TO TRADE.**

15 cents," was a familiar cry, and the lusty, red-faced young man who braved the cold did not yell and freeze in vain.

The stationery stores are less crowded this week owing to the extremely cold weather, but the next few days will undoubtedly make good all discrepancies in that direction. The holiday trade has been very good this season, and, taking it as a criterion, one would be led to believe we were enjoying the best of good times instead of being in the midst of a general depression of business.

The fancy goods stores keep open far into the night to accommodate their customers, and as a rule they are thronged with sightseers and purchasers from the time the doors are thrown open until they are closed.

Orders are coming in very heavily for commercial stationery, and a great many houses are compelled to run overtime so as to keep up with their orders.

Chas. Eneu Johnson & Co., manufacturers of printers' inks and varnishes, are on the eve of celebrating the eighty-first anniversary of their house. This is an old-time firm, and in some respects possessed of old-time ideas. For instance, although it is hard to believe, it takes no stock in advertising, does not believe in it. But we must give it time, and it will learn to know better after it has been in business a few years longer.

The Weaver Merchandise Envelope and Packet Company, formerly the Weaver Mail Packet Manufacturing Company, is the sole manufacturer of Weaver's improved pliable metal mailing packets, "metal clasps," merchandise envelopes, phial packets, book-corner protectors, folding-boxes, photograph, catalogue and circular envelopes and perfect sample-boxes, embracing more than 50,000 sizes, officially approved and their use fully authorized by the Postmaster-General after a careful examination and test of their merits. These packets, &c., are calculated to fill a want long felt by merchants and others, and a description of them will be given later.

A fire occurred yesterday in the building occupied by Thomas Kane & Co., dealers in school furniture, entailing a damage upon the firm of about \$1,000. The insurance could not be ascertained.

Vandercook & Co. have issued an illustrated guide to Florida and New Orleans, Texas, Mexico and the World's Exposition, with all information for the tourist. The book will be sent postpaid for 50 cents.

On October 26 last, the establishment of A. G. Spalding & Brothers suffered a fire, entailing a loss of \$80,000 worth of sporting goods and damaging the building to the extent of \$6,000, which compelled them to vacate their store. To-day they moved back to their old quarters at 108 Madison street. A visit to the establishment to-day found it crowded with visitors and friends, who were inspecting and admiring the store in its new dress. It presents a much handsomer appearance than it did prior to the fire, and an entirely new stock having been placed therein gives the store a bright, fresh appearance, cheerful to behold.

Mr. Spalding states that, being re-estab-

lished with an entirely new and complete stock of sporting goods, they are again fully prepared to meet the demands of their numerous customers, from all of whom they will be glad to hear.

Noz.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Dec. 23, 1884.

Friday last brought the expected cold wave, and the day was too utterly cold for shopping. Saturday, the day following, was even colder than before; the very paving stones huddled closer together, and Christmas buyers were somewhat less numerous.

But the snow-storm of Sunday tempered the winds and more agreeable weather is now in order.

The severe weather was certainly very discouraging to city tradespeople, whose heavily stocked counters and attractive show-windows had no charm for the few frozen pedestrians who chanced their way.

Although the number of purchases during the two cold days was very limited, the crowded stores and streets, so far this week, indicate that an immense retail business is being done. Those who have money to spend for Christmas presents can without doubt get rid of it in three days, though it does compel the storekeepers to crowd five days work into three.

In bidding for the patronage of the people, the dry-goods stores, as usual, make the biggest announcements, and are the loudest in their claims to satisfy the wants and tastes of Christmas buyers.

Traveling about among the leading dealers of fancy stationery goods and holiday novelties I find that such wares are sold at extremely low figures—much lower than ever before. And it is hardly possible that dry-goods stores sell the same line of goods for less money. The great trouble with the majority of Christmas buyers is that they do not know when goods are offered at certain advertised figures whether the price is cheap or not, nor have they the time to satisfy themselves on this point by a comparison of prices from store to store.

Some of the leading retail stationers of the city are using the daily papers this week more largely than in former years to acquaint local buyers with what they have to offer for Christmas uses, and with good results.

At a certain establishment, whose goods and firm-name are too well known throughout this wide country to need any mention, I noticed yesterday an unusual number of buyers about the counter, and ventured to remark to this extensive and well-known dealer that he seemed to be having an extra run of trade. "Yes," said he, "we want to close out what we can of the holiday stock and so we run a half-column announcement in the morning papers." Now, I'll wager the entire contents of my Christmas stockings, that among the buyers that I saw in the salesroom of that well-known house, over one-half never before saw the establishment or ever heard tell of it;

and yet there are people who will abuse the poor printer.

Carter, Rice & Co. are doing a very fair business for this season of the year. Of strictly holiday goods this house had but little to offer, its extensive trade being confined almost entirely to staple goods, such as the stationer and the printer have constant call for; and when it comes to this line of goods, a more varied stock than this house carries is not to be found in this section.

Talking with Mr. Carter, the senior member of the firm, relative to the business outlook, I find that gentleman quite sanguine on the prospects for the coming year. "Though I do not look for a boom," said he, "I do anticipate a little more activity, not only in the paper trade, but in trade generally. Confidence is becoming more manifest among the people, and now that the general lines of merchandise have reached bottom figures, tradespeople will not fear to handle them. Like some people with bad habits who intend to 'swear off' on the first of the new year, there are numbers of business enterprises which have been talked over and arranged to start in for business, but they are waiting to start with the new year. So, I do not think I am far from right when I say that next year will bring an increased volume of business."

The writing-paper mills are all shut down again this week, this being the second installment of non-production, so that the product of writing-paper for December is lessened several hundred tons. This lessened production, together with the advanced cost of rags promised, will have a tendency to elevate the quotations on all grades of writing-paper.

During a recent tour among the envelope factories of Worcester, Mass., I had a long and interesting interview with G. Henry Whitcomb, of G. H. Whitcomb & Co., relative to the conditions of that special line of industry.

For the past few weeks this firm has been running off large quantities of envelopes, the greater proportion being for odd sizes, such as are used for Christmas cards. As these orders were for immediate delivery, considerable activity was observed throughout the different departments of the extensive factory.

The quotations on envelopes are very low—in fact, the prices are from 5 to 10 per cent. lower than they were in the spring of 1879. Envelopes were then so low that manufacturers were unable to continue making envelopes at the prices then ruling, so the envelope combination was formed for mutual protection. Then followed the boom, prices went up and manufacturers made some money.

During the past five years valuable improvements have been made in envelope machinery and greater economy is exercised in every branch of labor, and to these conditions alone are manufacturers able to meet the depressed market.

Paper for the manufacture of envelopes costs just as much now as it did in 1879, while gum has advanced ten cents a pound. With a factory using 500 pounds of gum per week, the advance of ten cents per pound, now paid, is an item.

As the importation of rags is being quite

generally discussed at Washington, it being feared that rags from abroad may bring cholera into this country, there is a strong probability that the Government regulations relative to rags will tend to increase the cost of raw material. With an advance in rags, paper must go up, and, as a consequence, future quotations on envelopes will show higher figures.

At present, the market is in favor of buyers. Lower prices cannot be looked for, while those who delay too long in stocking up are not going to reap any further benefit from the rise than their ordinary small profits.

With the close of the holiday trade dealers' attention will be given more to staple lines of goods. The shrewd buyer should give envelopes and writing papers some careful study; as the causes which give promise of advanced quotations are not the results of trade manipulations. The advance in raw material will force the prices of the manufactured goods up—a natural sequence.

A. L. D.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS,
LONDON, E. C., December 6, 1884.

Those of your readers who have ever experienced the sensation of taking up the pen to resume a long-neglected epistolary duty will sympathize with the writer when, after a long silence,

"At his work again in the very shop,
Where, months before, he had let it drop,
He follows his ancient calling."

Well, there is some consolation in knowing that, for a portion of the time at any rate, you have been well supplied with information as to the doings of the Old World by your excellent special correspondent, Mr. Cohen, who so admirably expressed in two European letters the very sentiments and opinions which I myself hold as regards the condition of trade and manufactures in this country and in Europe generally. With all of the impartiality and freshness of an inquiring mind, Mr. Cohen has laid bare facts which I, in my little way, have from time to time referred to. Nor was the picture one whit overdrawn, but, on the contrary, an even gloomier one could be painted now.

The season of 1884 was, according to the *Standard*, one of the best informed London newspapers, "the deadest, dullest and most unprofitable of recent years; there was absolutely no heart, no earnestness in the business or the pleasure of the season." Trade everywhere is sluggish. The time when "commerce went on by leaps and bounds" is past and gone, and all of the skillful manipulation of big numbers will not hide the fact that there is a constantly diminishing national profit.

Meanwhile tens of thousands of men are out of employment in all of the centres of industry. Strikes and lockouts are so common as to attract no attention; labor is at war with capital; consequently both seek but do not always obtain better employment in other countries. As a result of all this, the amount of poverty, verging on absolute pauperism, is appalling, and, from a political and social point of view, most dangerous. As showing

the condition of large bodies of workmen, I may cite the evidence of a friend who is not unknown in political life in this country and who on a recent visit to a district of Staffordshire, where both mining and manufactures have till recently flourished, found every butcher's shop closed, meat having become an unattainable luxury, except for a few well-to-do people, who had to send ten miles for a beefsteak. With such facts before me, I am not at all surprised that the condition of the working classes in this country and on the Continent should have presented to the eyes of your special correspondent a strong contrast to that of their American brethren.

Now, the natural result of all this is that the manufacturer, the wholesale dealer, the shopkeeper and the artisan alike suffer; money is "tight," so expenditure is cut down in every possible way, and when purchases are made they consist of cheap imitations and shoddy-fied catch penny substitutes for the genuine article. A glance at the windows of the shops in prominent streets will convince anyone that the "cheap and nasty" is the order of the day.

For a long while every possible attempt was made by interested politicians to hide the ugly fact of the decay of trade, but it is now no longer possible, and so we are being treated to various suggestions for remedying the evil, among which a return to protective duties finds most advocates. Whether rightly or wrongly, a "protectionist" is no longer ridiculed as a madman in this country. On the other hand, an appeal has been made to government to find employment for the thousands of shipwrights and others who are idling and half-starving on the banks of the Tyne and the Clyde, with the result that four and a half millions sterling have been voted for extra ship building, ostensibly to strengthen the navy, but really to give employment to those who unemployed might become dangerous. On the whole, it must be admitted that the outlook is not particularly encouraging.

The year has not been remarkably fruitful in novelties, either in stationery or fancy goods, but the position of chromo-lithography has been advanced as regards its application to purposes of general decoration, as a visit to the show-rooms of the large German and semi-German houses would show. Raphael Tuck & Sons have made remarkable advances in this respect, both in the number of their productions and in the quality of their work. I have seen nothing finer in color work than some of their landscapes and lake scenes, while their card-board plaques, fire and hand screens and numerous other productions of their fertile brain and vast resources are characterized by an admirable attention to harmony of color and perfection of finish.

The Palestine cards recently introduced by Charles Goodall & Sons have been received with great favor by those who prefer as mementoes of Christmas something in harmony with the religious character of the season. These cards consist of ferns, grasses and moss gathered in the Holy Land, together with shells and other natural objects, the tasteful arrangement of which on tinted cards,

with appropriate inscriptions, forms a novel and essentially appropriate Christmas greeting.

Another novelty in cards is that offered by Ormiston & Glass, of Edinburgh, in the form of Scottish subjects, which have been very effectively introduced. Highland scenes, fishwives and kilted figures pleasantly vary the monotony of ordinary Christmas cards, and as they are very cheap, they will probably meet with success on both sides of the Tweed. They have, however, been brought out rather too late in the season to become widely known.

The demand for relief scraps still continues, and is well supplied. Mr. Jones, of Barbican, has some capital cheap lines in these goods.

Letts, Son & Co., of King William street, London Bridge—a firm as well known in its particular line of business as Cassell & Co. in the domain of general literature—are now issuing a series of county maps of England and Wales, in twelve parts. Each part contains four maps, and costs one shilling. This series will be of especial service to Americans visiting Great Britain, and really desiring to learn something of the country. Considering the amount of information given and the admirable expedients employed to secure its ready acquisition, the size and general get-up of the maps, they may without exaggeration be called a marvel of cheapness.

W. F. C.

WASHABLE COATING FOR GYPSUM FIGURES.—According to C. Puscher, 3 parts caustic potash are dissolved in 36 parts hot water, 9 parts of stearic acid are added, and the obtained soap paste is diluted with the same quantity of water and 95 per cent. of alcohol. The warm solution is applied upon the warm gypsum cast, and this, after a few hours, is repeated with wet sponge. The casting becomes still handsomer if, in place of potash, a corresponding quantity of ammoniac is used. Old casts are first cleaned with a 3 per cent. caustic potash solution.

CLEANING-RAGS.—A French druggist transacted quite a lucrative trade with the sale of cleaning-rags, excellent for polishing metallic surfaces, which he prepared as follows: Dip flannel rags into a solution of 20 parts of dextrine and 30 parts oxalic acid in 20 parts logwood decoction, wring them gently, and sift over them a mixture of finely pulverized tripoli and pumice-stone. The moist rags are piled upon each other, placing a layer of the powder between each two. They are then pressed, taken apart, and dried.

TO COLOR BRASS BLACK.—To very handsomely color brass black, mix 180 grams carbonate of copper, 400 grams aqua ammonia, and 400 grams water. The cleansed brass articles are to be dipped into this mixture, frequently withdrawn to inspect them, rinsed in water, and dried in sawdust, and the process is repeated twice; the articles are then feebly rubbed in with a little linseed oil; the color will then be that of ebony. The old process of silver is somewhat dearer, and another one of dipping, hot, into nitrate of copper, is, ruinous to delicately soldered articles, wherefore the first mentioned method is preferable.

Sanborn's All-Iron Table Shears,

EXTRA HEAVY, WITH WHEEL FRONT-GAUGE.

THESE are for cutting the thickest and hardest kind of boards used for large Blank Books, Folio and Quarto Bibles, and similar work. They are the only Shears that will do heavy work easily and in a satisfactory manner. The table has four different gauges, is lined, and has brass measuring-rules set in. Our new and improved wheel front-gauge is of marked advantage. By the hand-wheel the gauge can be moved to the desired point in a second. It is operated by means of cut racks and cut pinions, placed on inside and underneath top of frames. This arrangement insures perfect accuracy in the working of the gauge, and the working-parts being out of the way and covered, will not collect the dirt. The gauge can be run out 20 inches.

The pointer shows on the rule the exact distance, in inches and fractions, the gauge is from the blades. By the one clamp-screw on top of gauge the latter is instantly and firmly set, and to adjust it the workman has not to move from his position while cutting. This new gauge will save trouble and time, and is destined to supersede all the Shear Gauges now in use. Our lighter iron shears also have our wheel front-gauge.

GEO. H. SANBORN & SONS, BOOKBINDERS' * MACHINERY,

69 BEEKMAN STREET, NEW YORK.

MANUFACTORY: STANDARD MACHINERY COMPANY, MYSTIC RIVER, CONN.

E. P. DONNELL & CO., CHICAGO, ILL.

— MANUFACTURERS OF —

Bookbinders' ♦ Machinery ♦ of ♦ Every ♦ Description.

THE CHICAGO PAPER CUTTER.

♦ CUTTING STICKS MUST GO! ♦

THIS PAPER CUTTING MACHINE HAS A FLAT edge lower blade placed in the table bed. The upper knife on descending makes a shear cut on every part of the paper cut; the knife passes below the Table Bed and throws part of the front table out as the knife ascends; the front table is thrown back automatically, thus making a solid surface of the table. We do away with the set-screws that are used generally to take up the ware in the Knife Bar, as we use a simple bevel gib that is screwed up by one nut on top, which always keeps the Knife Bar firm and true.

There is no dulling of the knife as the knife-dulling surfaces are dispensed with; it saves the expense of the knives, saves grinding, sticks, &c., which are a great annoyance and expense as used on the other cutters.

The Knife Bar can be adjusted to any angle by the side steel rods.

It is supplied with our new patented clutch, which is simple and noiseless and combines the balance wheel pulleys and clutch all in one. Can be stopped instantly at any point and is acknowledged the simplest and most powerful cutter ever offered.

There is no drawing out of any kind of paper by our hand-clamp; has quick-acting back gauge.

Price 34-inch Steam and Hand Power, \$600

Price 44-inch Steam and Hand Power, 1,000

No Cutting Sticks used on this Cutter, it has a Shear Cut that trims ALL the sheets CLEAN.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 308,138. Ink and Paint Mill.—Linus P. Clawson, Hamilton, Ohio, assignor to the Black & Clawson Company, same place.

No. 308,141. Copy Book.—Edward P. Cornor, Alameda, Cal.

No. 308,144. Stylographic Pen.—Louis E. Dunlap, Boston, assignor of one-half to Herbert W. Thayer, Franklin, Mass.

No. 308,147. Game Apparatus.—Jas. A. Fitzgerald, Salt Lake City, Utah.

No. 308,150. Printing Press.—Thomas Forknall, Manchester, England, assignor to Joseph Watson, Newark, N. J.

No. 308,157. Inkstand.—Morris Herzberg, West Point, Ga.

No. 308,164. Decorative Painting on Glass.—Emile J. Irlande, New York, N. Y.

No. 308,190. Paper Box.—Edward B. Munson, New Haven, Conn.

No. 308,214. Paper-Folding Machine.—John H. Stonemetz, Erie, Pa.

No. 308,285. Device for Feeding Paper.—Alonzo Sedgwick, Poughkeepsie, N. Y., assignor to the Sedgwick Manufacturing Company, same place.

No. 308,295. Pocket Memorandum-Book.—Harrison T. Whipple, Portland, Me.

No. 308,296. Blackboard.—William H. Whittemore, Deering, Me., assignor of one-half to Edmund S. Hoyt, Samuel Fogg and Grenville M. Donham, Portland, Me.

No. 308,309. Hand Stamp.—Joseph P. Ellacott, Chicago, Ill., assignor to the Union Brass Manufacturing Company, same place.

No. 308,339. Advertising Device.—John C. Blevney, Newark, N. J.

No. 308,353. Gumming Machine.—Thomas Furnival and George Daniels, Reddish, County of Lancaster, England.

No. 308,369. Tag.—J. Fred Miller, Shelbyville, Ill.

No. 308,378. Blotter.—Newton O. Pyles, Coronado, S. C.

No. 308,382. Paper-Hanging Device.—George W. Schock, South Bend, Ind.

No. 308,418. Paper Satchel.—Charles L. Lockwood, Philadelphia, Pa.

No. 308,440. Letter Scale.—John E. Smith, New York, N. Y.

No. 308,457. Stencil-Holder.—John W. Bennett, Halifax, Nova Scotia, Canada.

No. 308,462. Blotting Thimble or Pad.—Alice B. Browne, Washington, D. C.

No. 308,478. Seal and Railroad Ticket for Milk Cans.—Geo. Wm. Evans, Baltimore, Md.

No. 308,499. Adjustable Book-Support.—William O. Johnson, Kaufman, Tex.

No. 308,528. Adding-Machine.—Andrew Stark, Chicago, Ill., assignor to L. W. Noyes, same place.

In an adding-machine, in combination with the number rollers mounted side by side on a single arbor, a gear-sector on the same arbor, a segment rack meshing therewith whose centre of motion and curvature is on the side of said arbor opposite said rack, a driving-pawl mounted on a rigid radial extension of said gear-sector, and the key-bar rigid with segment rack, all co-operating to make the angular motion of the key-bar less than the resultant angular motion of the number wheels.

No. 308,535. Easel.—Thomas E. Vail, Topeka, Kan.

No. 308,554.—Combination Letter Sheet and Envelope.—Daniel W. Clegg, Pleasantville, N. Y.

A combined letter sheet and envelope, consisting of a sheet of paper folded in legal-paper form, and provided on one edge with a sealing-flap and on the edge adjacent thereto with a marginal flap not overlapping the folded section of the sheet, the two sections of the said marginal flap adapted to be sealed together so as to close the end of the folded sheet.

No. 308,555. Combined Reversible Letter Sheet and Envelope.—Daniel W. Clegg, Pleasantville, N. Y.

A combined letter sheet and envelope having the reversible letter-leaf, the reversible marginal flap not overlapping the said leaf, and the inclosing flap, provided with means by which the folded sheet is secured in closed condition both before and after it is reversed.

No. 308,570. Adding Machine.—La Verne W. Noyes and Andrew Stark, Chicago, Ill.; said Stark assignor to said Noyes.

In an adding machine, in combination with the registering mechanism and its actuating mechanism and with the finger-keys, a helical sheave connected to the actuating mechanism, and a series of cords wound thereon and departing therefrom at different tangents to the finger-keys.

No. 308,624. Machine for Creasing Sheet-Music.—James Morgan, Brooklyn, N. Y., assignor to J. Stewart Morgan, same place.

In an apparatus for creasing music-sheets and other articles, the combination of dies provided with ribs and grooves, the latter being furnished with moistened, soft or yielding material.

No. 308,626. Method of Ornamenting Paper Articles.—Wm. A. Pike, New York, N. Y., assignor to Hard & Parsons, same place.

The process of ornamenting cards and the like, which consists in first producing thereon in gold or colors an unfinished representation, and then cementing to the unfinished portions separately-formed pearls or ornaments.

No. 308,627. Wall-Map.—George A. Poole, Chicago, Ill.

No. 308,672. Envelope for Photographs.—Daniel H. Howd, Paterson, N. J.

The combination, with an envelope, of an interior layer of pasteboard corresponding in size to the oblong body or main part of the envelope, and of a covering-layer of paper extending over the stiffening-layer of pasteboard and attached to the flaps of the envelope.

Composition and Mold for Artificial Slate.

Great difficulty has been heretofore experienced by persons engaged in the manufacture of articles from quick-setting cement, by the molds (which are usually made of wood) becoming saturated, warped, and distorted by the absorption of water from the plastic or semi-plastic composition deposited in them to form the articles, so that in order to carry on a large business in this industry a considerable amount of money is necessarily tied up in molds. Where metal molds are used the action of the moisture together with the chemicals used in the composition tend to rust or corrode the same and make them unfit for use. These difficulties are overcome by lining the inside portions of the molds with suitable ma-

terial which will not only protect the main portions of the mold from the destructive effects of water and acids, but will keep the inside of the molds true and smooth at all times, and the molds can be used continuously, and as soon as one article has been formed the molds can be filled again and again without having to keep a large stock of molds on hand.

The main body of the mold may be made of wood, iron or any suitable material, and of the desired form to produce the article required. The molds are provided with a lining of natural slate, thin slabs of natural stone or marble, glass or non-corrosive metal, such as granitized sheet metal.

The material mentioned is specially adapted for the lining of molds made of wood, and the lining may be secured to the inner surfaces of the molds by screws, or in any suitable manner. This material may also be used for the lining of metal molds, if desired; but it is preferred to line the metal molds with a vitrifiable substance which fuses below the melting-point of iron, and such as is used in the manufacture of granitized sheet metal, as is well known in the market.

It is often desirable to produce designs in relief or in depression on articles made of artificial slate, stone or marble, and where such are to be produced in relief the desired design is cut into the bottom or sides of the mold, so that when the articles are molded therein the designs or ornaments will be produced in relief on the article. If, on the other hand, the design is to be produced in depression, the design may be struck up from sheet iron, brass, lead, or other suitable material, and the plastic or semi-plastic composition is poured over it, and the molds are filled to the desired height to form the articles. This will produce in depression the required design or ornamentation. Where entablatures or inscriptions are to be produced, they are struck up from sheet metal, either in relief or in depression, as is preferred, and the sheet metal is coated with the vitrifiable composition, baked to the required degree, and placed in the bottom or side of the mold. This will be found to be very effective, and will produce the best of results.

The ingredients used in the manufacture of a new artificial slate are: To one barrel of Portland or other suitable cement, take one pound oxide of iron, three pounds metallic red, one pound drop-black, two pounds lamp-black, one pound Venetian red or other mineral color, six pounds pulverized alum mixed dry with the cement, and one gallon soluble glass in thirteen and one-half gallons of water.

These ingredients are all thoroughly mixed and reduced to a plastic or semi-plastic condition by the incorporation therewith of a sufficient quantity of the solution of iron-rust in vinegar, one gallon of the solution to one barrel of water. The articles are then cast into the desired form in the molds of the character described, and when thoroughly set are removed from the molds and allowed to dry. The articles are then finished with a coat of boiled linseed-oil or glycerine well rubbed in with French putty-powder or finely-ground litharge suitably colored.

RAPHAEL TUCK & SONS,

Fine * Art * Publishers.

PARIS.

LONDON.

BERLIN.

298 BROADWAY,

NEW YORK, November 24, 1884.

GENTLEMEN :

We have much pleasure in announcing to you the opening of a direct BRANCH ESTABLISHMENT for the United States and Canada at the above address.

It has been obvious for some time that, in justice to the continually increasing variety and number of our Art Publications, a closer relationship with the American Continent had become a downright necessity; the requirements of so important a market justifying, nay, necessitating, that close attention and study which only a direct intercourse can cultivate to advantage.

We point to our past record as an earnest of our future efforts in the matter of ARTISTIC and NOVEL PRODUCTIONS and the various new lines, such as EASTER and all branches of CONGRATULATORY CARDS; FLORAL and other ART STUDIES; CHROMOS, RELIEFS, SCREENS, TERRA-COTTA WARE, &c., with which our Representatives are making their debut on our behalf, may fairly entitle them to your favorable consideration.

Upon one subject we would lay particular stress, and that is touching the matter of prompt delivery of samples and stock; and here it is that a direct intercourse with the American trade, which will henceforth be supplied in advance of the English market, will prove of immediate benefit, and avoid all unpleasant friction caused by lateness of deliveries.

In conclusion we would gladly bespeak for ourselves the good-will of our competitors, no less than that of the entire trade, and our actions, prompted as they will be by a careful solicitude for the best interests of the trade in general, will be calculated to secure and retain that good-will for us. We are, gentlemen, yours faithfully,

RAPHAEL TUCK & SONS.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

ADDRESS

JENNE MFG. CO., 178 Devonshire St., Boston, Mass.

TRADE * OPINIONS.

6 Months in Use.

MR. E. W. BLACKHALL:

HARTFORD, Conn., 1884.

We have given your Perforator many severe tests, and find that it fulfills in every respect all that you claim for it; for stop-work it cannot be excelled, and for rapidity and neatness of execution is unequalled.

THE PLIMPTON MANUFACTURING CO.,

M. Shea, bookseller, &c., San Francisco, Cal., has made an assignment.

R. W. McMoran, stationer, &c., Paisley, Ont., has sold out to Mrs. M. A. Clark.

George W. McCoy, printer, Portland, Ore., has been damaged by fire \$400; insured.

Hayes W. Grier, publisher of the Columbia (Pa.) *Herald*, has sold out to Eugene Miller.

Layng & Wellington, printers, San Francisco, Cal., have applied for relief in insolvency.

The Savannah Art Company, dealer in pictures, &c., Savannah, Ga., has been sold out at auction.

The estate of W. S. Lingle, late publisher of the *Courier*, La Fayette, Ind., has sold out that paper.

The news depot of George Sherwin, Brad-dock, Pa., has been burned out. Loss, \$1,800; insured for \$1,300.

The Frankling Printing and Publishing Company, Columbus, Ohio, has transferred its business to H. T. Chittenden.

A paper and stationery business in an interior city is offered for sale in another column. This is thought to be a good opportunity for a good man.

W. Atterton & Co., 76 Milton street, London, E. C., are preparing a line of novelties in stove ornaments. They have also added the manufacture of plain and fancy boxes and pattern cards to their business.

Thomas R. Knox & Co., New York, have just issued in handsome form the series of papers by James McQuade, entitled "The Cruise of the Montauk." This book is a pleasant companion for a waiting hour.

The meeting of the creditors of the Sandford Universal Fibre Company is postponed to Wednesday, December 31, at 2 o'clock, at the office of R. A. Springs, 55 Nassau street. E. Owen, the receiver, reports that there are no funds.

An injunction has been granted by Judge Truax, in the Superior Court of the City of New York, restraining and enjoining M. B. Pollard and Charles Moss from "publishing, issuing, circulating or selling an edition of Dante's *Inferno*, translated by Cary, illustrated by Gustave Doré, which from size, form, color and illustrations upon the cover; size, color and form of case in which the same are offered for sale; arrangement of text and notes upon pages, and of illustrations, shall tend to mislead the public into the belief that in purchasing the defendant's book they are getting the book as published by Cassell & Company, Limited."

Some months ago the trade were asked to place their orders early in the season with the National Publishing Company, Philadelphia, for the holiday trade. The company's invitation has apparently been appreciated, as it is running to its full capacity in the manufacture of fine plush and leather albums and the finer grades of bindings of family and pulpit bibles. See the advertisement.

The establishment of Charles Deviere, dealer in wall-paper, &c., San Antonio, Tex., was destroyed by fire on the night of December 14. The stock was valued at \$9,000, which is covered by \$6,000 insurance. The building, owned by W. H. Maverick, was partly destroyed. The loss is covered by insurance.

Copp, Clark & Co., Toronto, Ont., have published the Canadian Almanac for 1885. It is a publication containing a list of all the post offices in Canada, the Canadian tariff, and a variety of other useful information.

The pulp department of the Dominion Paper Company's mill, at Kingsey Falls, Canada, was burned on Saturday last. The loss has not been ascertained, but is said to be covered by insurance.

The second number (January) of the American edition of the *Quiver* is out. It is a taking Sunday magazine. Cassell & Co., Limited, publish it.

The January issue of *Our Little Ones* is a bright, cheery holiday number for the wee ones. It is issued by the Russell Publishing Company, Boston.

E. L. Hoffman, publisher of the *St. Mary's Express*, St. Mary's, Kan., has been burned out. Type and press were saved.

A receiver has been appointed for the stationery business of Cornelius Daheney, New York.

W. T. B. Schermerhorn, publisher of the Hudson (Mich.) *Gazette*, is dead.

Frederick C. Nicolai, wall-paper dealer, &c., St. Paul, Minn., has been attached.

Mrs. M. Stiebel, fancy-goods dealer, &c., Louisville, Ky., has made an assignment.

The leather-board manufactory of S. F. Dawson, Shirley, Mass., has been damaged by fire.

H. B. Parker, paper dealer, Detroit, Mich., is advertised to be sold out under chattel mortgage.

H. S. Chabin, publisher of the *Star* (owned by Mrs. O'Flanigan), St. Mary's, Kan., has been burned out. Loss total.

Wardwell & Clark, paper manufacturers, Newton, Mass., have dissolved partnership. Charles P. Clark, Jr., will continue the business.

Minor C. Kerbaugh, dealer in paper-hangings, Philadelphia, Pa., is advertised to be sold out at sheriff's sale on executions for \$8,301.

A fire at Machias, Me., on December 20, destroyed the building owned and occupied by Charles A. Forbush, publisher and proprietor of the *Republican*. Loss on building, \$3,000; on stock and fixtures, \$3,000; insurance, \$2,000.

The H. B. Hill Manufacturing Company, Philadelphia, Pa., in addition to a full line of stamp goods, has completed and put on the market a variety of fancy wax seals, put up in a neat case and called the wax-seal cabinet, containing the seal, wax and tapers. As the former custom of sealing letters with wax is coming into use, these goods are made to meet the demand. Their style and finish are said to be superior. The "Blotter Bath," representing the most rapid and perfect process for letter-copying yet invented, is rapidly taking the place of the old methods, and the large demand for it is unabated. Among the new specialties which this house is introducing to the trade this season is a new line of hand-stamp pads, for which there is a large requirement. They will be found superior to the common gelatine in general use, being unaffected by the weather or climate. Of these, several qualities and styles are made. Some are for common desk use and others are adapted to railroad offices as well as many other places of business where stamp goods are required to meet the heaviest kind of service. The stamp pad is a commodity which

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

is now handled to a considerable extent by the stationery trade, and of which nearly all business men are consumers.

George H. Haynes, fancy-goods dealer, &c., Camden, Me., is advertising to sell out.

C. E. Hatfield, Boston, Mass., has sold out his printing business to J. H. Dows & Co.

W. Raplee's toy manufactory, on Fourth street, Louisville, Ky., was totally destroyed by fire on Saturday morning. Loss, \$50,000.

M. Calisher, stationer, Oakland, Cal., has been attached for \$529. The liabilities are about \$5,000, and the assets are about the same.

A receiver has been appointed for A. C. Katt, bookseller and dealer in wall-paper, Fort Wayne, Ind. Liabilities about \$3,500; assets, \$3,000.

Kane Shields, wholesale and retail dealer in wall-paper, at Dallas, Texas, has made an assignment to James Maroney. His liabilities are estimated at about \$5,000.

E. W. Barnes, publisher, Wellsville, N. Y., has assigned to A. S. Brown. Liabilities estimated at \$20,000; actual assets probably \$0,000 in real estate, and fixtures mortgaged for \$11,000.

The Riverside Paper Mills, at South Toledo, Ohio, with all their stock and machinery, including one Fourdrinier machine and four pulp engines, were burned on the night of December 18. Loss, \$10,000; insured for \$6,500. The mills were owned by G. D. Claffin, Jr.

James D. Whitmore & Co. are getting up a new line of hand-painted papeteries, adapted for the jobbing trade, which can be sold at a very low figure, and are also coming out with a new line of papers on the first of the year, which they claim, in point of style of putting up, will surpass anything in the market. A new line of orders of dance is also in course of preparation, which, it is claimed, will come up to their previous efforts.

A fire broke out, on Sunday evening, from some unknown cause, on the second floor of 25 Park place, and among other losses caused by it were the following: First floor, Holmes, Booth & Haydens, manufacturers of McGill's paper fasteners and other brass goods, \$1,000; second floor, E. Steiger & Co., publishers, \$10,000; third floor, rear, Manzel & Smith, publishers, \$1,000.

The body of Robert Crouse, of the firm of Beard & Crouse, paper makers, Fayetteville, N. Y., who had been missing since December 16, was found on Monday morning in the storeroom of Huntington & Beard's foundry at Fayetteville. He had a revolver in his hand and a bullet wound in his right ear.

J. N. Sinclair, printer, 314 East Seventy-fifth street, New York city, suffered \$200 damage on stock and machinery by fire on Sunday night.

The Kansas City Paper Company, wholesale paper dealers, Kansas City, Mo., has been incorporated, with a capital stock of \$20,000 paid in.

C. O. Furbush, publisher of the *Republican*, Machias, Me., has suffered loss by fire.

Jacob Wise, paper-stock dealer, 207 Staunton street, New York, suffered a loss from fire on Saturday last to the extent of \$500; insured.

Mr. Iliff, with J. D. Whitmore & Co., hopes to meet his friends in the West and Northwest early in the new year and to find them rejoicing over an immense holiday trade.

C. S. Plummer, with the assistance of G. A. Raisbeck, with Ph. Hake, is busy originating novelties to meet every demand of the trade, and will shortly have ready a large and exquisite line of spring novelties.

Ph. Hake will have in about a week very large line of Easter novelties to offer, which he claims will surpass all of his previous efforts. One of his most recent novelties in the card line is the opalescent, so-called from its having all the shades of an opal.

G. T. Lothrop, of New Orleans, La., asked an extension of his creditors about eighteen months ago, claiming assets of nearly three to one of liabilities, but finding himself unable to pay his extension notes he went into insolvency. The assignee is now paying off the creditors with about twenty-five cents on the dollar.

An incendiary fire occurred in the American Worsted Block, Woonsocket, R. I., on Saturday morning, causing a loss on the building of \$10,000. Among other losses sustained were the following: Fred. Colwell, paper-box manufacturer, \$1,000; L. B. Pease, *Evening Reporter*,

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

loss on type, library and files, \$1,500. They were insured.

T. J. Walker, publisher, Visalia, Cal., has failed.

W. T. Christopher, printer, Atlanta, Ga., has sold out.

J. W. O. Moles, publisher, Tuscumbia, Mo., is closing out.

Maguinis & Crosby, printers, Forth Worth, Tex., have sold out.

J. P. Redick, stationer, &c., Telluride, Col., has made an assignment.

Mr. Wells, of Wells & Co., Bridgeport, Ohio, was in the city, this week, buying goods.

Young & Shepherd, Shreveport, La., have sold out the Shreveport *Times* to Andrew Curfe.

Bremner Brothers, stationers, &c., Charlottesville, P. E. I., are reported to have closed up.

Jacob Lang, Jr., stationer and printer, Louisville, Ky., is selling out his stationery business at auction.

Martin & Jackson, publishers of the *Stockman*, Springer, N. M., have dissolved partnership. C. F. Martin continues.

The Raplee Manufacturing Company, manufacturer of toys, &c., Louisville, Ky., has been burned out. Partly insured.

E. E. Lovelace, publisher of the *Chronicle*, Essex Centre, Ont., is advertised to be sold out under mortgage on the 30th inst.

Blake, Moffit & Towne, stationers and bookbinders, San Francisco, Cal., have filed articles of incorporation, the old firm of Blake, Robbins & Co., wholesale paper dealers, being merged therein.

The assets of the estate of the late William Terry, Galveston, Tex., deceased, are so dwindling away under probate administration that what was in the lifetime of Mr. Terry a good and solvent concern will now, it is said, pay nothing more than a moderate dividend.

Henry Bainbridge & Co. are filling a great many orders and some of them of pretty good size, for their patent daily memorandum pad calendars for 1885, and they desire the trade to know that the edition is not entirely exhausted and that they have facilities to meet every demand made upon them.

Minor C. Kerbaugh, dealer in paper-hangings, Philadelphia, Pa., has been sold out by the sheriff.

A chattel mortgage has been foreclosed against E. L. Heath, publisher, David City, Neb.

H. W. Young, publisher of the *Star*, Independence, Kan., has been burned out.

W. H. Wallace, Salida, Col., has sold out the Salida *Mail* to Crawford & Erblen.

Gus. Shrauge, dealer in notions and wall-paper, Fremont, Neb., is selling out.

M. H. Hall, stationer, Woodstock, N. B., has had his stock damaged by fire.

J. D. Armstrong, publisher, Rockfort, Ind., has sold out to John Wytenbach.

N. Spillman, publisher, Oakland City, Ind., has sold out to Walter A. Cowan.

Guy Adams, publisher, Rosita, Col., has been succeeded by C. Johnson.

Paul Gebhard, printer and publisher, New Haven, Conn., has sold out.

To Make Rubber Stamps.

Procure a vulcanizing apparatus provided with a thermometer and lamps such as dentists use. Have an iron printing frame or "chase," in which to lock types, and of such a size that the plaster mold made from it can be placed inside the vulcanizer. Having set in the frame with ordinary types the words desired, a plaster cast is taken of them like an ordinary stereotype mold, that is, by first oiling the types, and pouring liquid plaster over them. When set, the mold is carefully taken off, and before it has had time to dry a piece of sheet rubber, vulcanized and mixed with sulphur and soapstone, is placed on top of the mold and backed with a few sheets of paper. Then, with two iron plates provided with screws, the rubber is squeezed against the mold, the whole is immersed in the water in the vulcanizer, and the cap being screwed on the heat is applied till a temperature of about 300 is reached. When the apparatus has cooled down, the mold and rubber are taken out and the rubber is carefully removed. This is properly trimmed, and on being fastened with cement to an appropriate handle, forms a hand stamp ready for use. A solution of virgin caoutchouc in bisulphide

of carbon makes a good cement for wood and rubber.—*Ex.*

It is found that canvas can be made as impervious to moisture as leather by steeping it in a decoction of one pound of oak bark with fourteen pounds of boiling water. This quantity is sufficient for eight yards of stuff. The fabric has to soak 24 hours, when it is taken out, passed through running water, and hung up to dry. The flax and hemp fibres, in absorbing the tannin, are better fitted to resist wear.

WASHINGTON WAIFS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., December 23, 1884.

Taking a sort of bird's-eye view of trade in this city at this time, you correspondent is glad to relate that the prospect is pleasing. Everybody seems to be hard at work and things are moving along nicely and at a good pace. Notwithstanding the predictions of many that this Christmas would be very dull and despondent for the stationers and others in business, the dreary time has not as yet materialized. The stores are crowded with buyers and money is being spent quite freely.

Yesterday the weather was disagreeable and of the very worst kind for shopping—the snow having been converted into mud and slush by the moderated temperature, and the rain continuing to fall throughout the day, made it “perfectly awful,” as many a girl was heard to say while she daintily sought the dry places along the way.

Your correspondent braved the elements, and hunted around for a few facts of interest to the readers of THE STATIONER.

At Chapman's, on the Avenue, there was a store filled with handsome Christmas goods and a goodly number of customers (considering the weather), pulling, hauling and purchasing the wares. Mr. Chapman didn't have much time to talk, but he stopped long enough to say that things were booming, and that he had as much as he could do.

At Whitaker's there were several new faces among the clerks—additional force, which had to be brought in to help out during the rush for the dainties of Christmas time. There was but little opportunity to get in a word with Mr. Whitaker or any of his clerks, owing to the rush about them. Whitaker, during a lull, told me that after a slight stagnation for the past two or three weeks the season had opened brisk and lively, and it is expected to boom from now on.

John C. Parker, on Seventh street, was also visited and I found him busily engaged at his desk, but he kindly gave me a word or two concerning things in his neighborhood. With him business was brisk and sales were increasing over those for the past week or two and from the present indications he was of the opinion that there would be a good holiday trade. Mr. Parker has been in the stationery business for a long time, and, being thoroughly conversant with its details, he is always very conservative and careful in his views. He admitted that while trade was good yet it was not as lively by a good deal as it was for the same period last season and I have no doubt this is true in all branches of business just at this time, notwithstanding the opening of the holiday trade is lively.

John F. Paret, on the Avenue, has a fine lot of fancy goods and was also favored with a spirited number of buyers yesterday when I called. He told me that business was very good, but that most of the sales made were in the smaller articles, such as the finer grades of account-books, pen-wipers, inkstands and such novelties of new design.

Brentano Brothers received a glance and a call, and here I was informed that business was very good, particularly in the stationery line.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 25, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WITH heartiest good will and kindest feeling, THE STATIONER wishes all of its friends and readers, a Merry, Merry Christmas.

THE rapidity with which the telephone system is extending throughout the Argentine Republic speaks well for the progressive spirit of that country. In Buenos Ayres there is, it is estimated, one instrument for every one hundred and fifty inhabitants. The service is divided between the "Bell-perfected," the "Gower-Bell" and the "portable." The system is well perfected in every city in the republic, and in nearly every town of any importance. We are surprised that it is not more extensively used here. If the charges for service were reduced there is no doubt that it would be.

PUBLIC sentiment is generally averse to consummating the treaty of commerce with Spain, and the pressure of opinion is so great that it can scarcely be expected that the Senate will disregard it. The advantages offered to the United States for the exceptional concessions made to Spain in nowise compensate for the exchange, and while we are earnest in advocating the extension of our foreign trade by special commercial conventions where necessary, we do not believe in hazarding the prospects of any of our home industries for the sake of gaining an advantage in foreign markets. It is of importance to remark that while the efforts of the advocates of free trade are being concentrated on the United States, and that a systematic pressure is made to induce a modification of our tariff in the interest of foreign manufacturers, the strongest tendency in other countries is toward resisting the encroachments of American trade. Referring to our London letter in this issue, it will be seen that our correspondent, who at one time scorned the idea that "protection" could gain any headway in the United Kingdom, concedes that this political principle is gaining adherents and commands respect in England. Our correspondent has been, and we presume is now, an advocate of free trade; but we think that we discover in his communication a *souffron* of changing opinion and an indication of wavering faith. Under existing circumstances, we think that it is best that we should "go slow" in making commercial treaties or in modifying our tariff to meet the purposes of outside nations.

WHILE people find fault with us for our tariff, we are in other respects the most accommodating nation in the world. Where our Europeans friends might suffer some disadvantage in direct trading with Mexico, we kindly open our ports

and give them a short route across our territory, so that they may be enabled thereby to dispute that market with us, or drive us therefrom altogether, if they are as able as they are willing to do so, all that we require being that they shall lock their cars in passing through American territory. How the unsentimental old merchants and manufacturers of Europe must laugh in their sleeves at our chivalry in trade, which is altogether a field of hard, practical efforts for supremacy. We are in this regard somewhat like the polite Western frontiersman, who gave his bed to the bear and slept on the floor. He took cold and died, and was then eaten by Bruin. Our Consul at Paso del Norte reports that the business in foreign bonded goods (coming through the United States) is extensive. From March 15 to June 30, 1884, the value of foreign bonded goods entering Mexico at that point was \$568,704.15; prior to March 15, the records of the consulate do not show the value of bonded foreign goods. The Consul says that the "foreign goods entering Mexico in bond from transit through the United States embrace nearly every class of goods sold to Mexico from the United States. That the American goods, with the advantages derived from the reciprocity treaty, will in a large measure drive foreign goods out of the Mexican markets can hardly be doubted." It is satisfactory to know that our goods can, so to speak, "take care of themselves," for certainly our legislators do very little in that way.

Roundabouts.

BY THE TRADE LOUNGER.

Now, with the closing year comes joyous greeting. To all who read THE STATIONER the Lounger wishes a Merry Christmas, and for those who don't he expresses a fervent hope for peace and joy.

Days come and go. Life is changeable in its griefs and joys, its pleasures and pains, but its silent movement toward the hereafter, where eternal sameness reigns, is like that of the glacier which at last breaks loose from its hold on earth and drifts into the unknown sea, leaving behind it the débris of a long procession of years and monuments of its course, whether of good or evil.

What shall be our record? And shall there be no memories of good or joyousness left behind us? There is a sadness about the closing year which it seems to me mankind has tried to dispel in an atmosphere of merry-making. And yet the end of one year and the beginning of another is only an institution by man, derived from his perception of natural changes. Why should we be sad at all, or why merry?

But I don't believe in croaking. People are glad enough to close accounts, particularly if they are unpleasant, and in taking up a fresh start they are only casting off ceremonies. It is well to have a time for putting off the old and investing with the new, when hope and anticipation bring cheerful faces. I have often thought that the New Year ought to come with the budding spring, when all nature seeks rejuvenation.

* * * *

Perhaps I have said something—a little, not much—that hasn't anything to do with the stationery trade. I was led to it by the thought that the trade expect a "new deal" after the turn of the year, and I got off—way off, perhaps. Let me return to my ancient lambs.

* * * *

Having been going about on a sort of preparatory donation experience within a day or two past, I have been much impressed with the difference between different pieces of bank-note paper imprinted on in green, black and red, with diverse vignettes and engravings thereon. It is quite apparent that the breaking strength of these pieces of paper—tensile strength I may say, which also involves the idea of stretching—has certain peculiarities. For instance, a note with X on it doesn't hold out as well as one bearing the symbol C. This is not mentioned as being at all remarkable, but—it is painful. If goods are cheap, they take a good deal of money, even in homoeopathic disbursements.

* * * *

I was much taken with some handsomely enameled palettes on brass easels. Each palette is designed for use as a clock, the hands passing over the horal indexes on its face, while a small clock work at the back supplies the time-keeping power.

* * * *

What a wealth—speaking about brass—of objects there are in bright metal! Antique and modern forms, applicable to a wide range of use and ornament, are to be found. Charming pieces in clocks, plaques, tables, vases, paper-knives, kettles and, I might almost say, thousands of other devices present attractions hard to pass by. What surprises the most, however, is the fact that the trade who are known to import and make specialties of such goods are so undersold by some of the leading dry-goods houses—say, from 50 to 70 per cent. This is a fact. I have priced the goods.

* * * *

There are other incongruities in the trade. One could go around and write up a book full of them. As a rule, I hate shopping around, but believe now that it is a necessity; but why it should be let some one else tell.

* * * *

But for another digression. The paper makers who depend on rags don't know but they will have to edge up a little on prices of papers. After January 1 all old rags imported will have to be disinfected. It doesn't make a cent's worth of difference where the rags come from, they have got to go through a process for killing bacteria, bacilli, microcosms or anything else that may be thought capable of

being transported in rags to the detriment of the public health.

* * * *

The Treasury Department has just said that "so-called marble paper, which is simply paper in various colors, is dutiable as paper not otherwise provided for, at 25 per cent. ad valorem. So-called lace paper, which is paper manufactured into the form of lace, intended for use in the manufacture of valentines, is dutiable at 15 per cent. ad valorem as a manufacture of paper." Cut that out and paste it up.

* * * *

It is reported that Albany and Troy are making an advance in the direction of blank-book making and that they promise to become important centres for this branch of the trade. This is scarcely to be believed. It may be asked: Why? I will tell you. I don't see that any blank-book maker from either of those rural towns advertises and the inference is obvious.

* * * *

New Year greeting reserved for next week. "Please, mister, give me a New Year cake."

* * * *

C. W. Cook, of the firm of J. D. Whitmore & Co., has just "cut a six-pound note from No. 1 stock." Congratulations are in order. All are doing well.

Answers to Correspondents.

S. C. W. wants to know where to buy paper wafers in imitation of wax seals and bearing an embossed initial.

Ans.—Chas. T. Bainbridge's Sons, 114 William street, New York.

J. asks: Where are headquarters for the hydraulic copying press?

Ans.—We really don't know what you mean. We never heard of anything by that name before and some of the best informed men in the trade are equally at a loss. Is it possible that you refer to the pneumatic copying press made by the United States Pneumatic Copying Press Company, New Haven, Conn.?

S. wants to know where to get paper flooring for a roller-skating rink.

Ans.—Write to the Hamilton Straw Lumber Company, Temple Court, Beekman street, New York.

Subscriber wants to know who makes round inkstands with glass stopper, style 308; inkwell in form of inverted cone with aperture at bottom.

Ans.—This style is known as the "Air-tight." It is out of the market, and has been "improved on," it is said, by several parties. Henry Bainbridge & Co. control an inkstand which comes nearest to this pattern. A. A. Weeks, 82 John street, makes an inkstand something like it, but the cavity is not open at the bottom.

W. W. R. wants to know who has the pocket price-book for stationers.

Ans.—We have given this address once before. C. N. Ayres, Detroit, Mich.

CEMENT FOR GLASS AND METALS.—Brass letters may be securely fastened on glass windows by the following recipe: Litharge, 2 parts; white lead, 1 part; boiled linseed oil, 3 parts; gum copal, 1 part. Mixed just before

using, this forms a quickly drying and secure cement.

A paint for blackboards which has been much used in schools and elsewhere, and is found very satisfactory, is composed of 4 ounces of common glue, 3 ounces flour of emery, and sufficient lampblack to give the preparation an inky color. The glue is first dissolved in 1½ pints of water, the lampblack and emery are then put in, and the mixture stirred until all lumps have disappeared. The board should be given two or three coats, the paint being applied with a woolen rag smoothly rolled.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, December 24, 1884.

THE MONEY MARKET.—Loanable funds continue in abundant supply both here and at other important trade centres at the low rates of interest that have been so long current, nor is there any prospect of immediate improvement. Commercial paper dull, with prime indorsements easily negotiable at 4½@5 per cent. discount, but the supply is light; four months' acceptances, 5½@6, and four to six months' single names, where given for merchandise, 6@7. The feature of the stock market has been the weakness of all the anthracite coal stocks and the Vanderbilts, and the business transacted, however, has been almost wholly of a room-trading character, none of the large speculators being interested, and there being no outside buyers. Government bonds are lower. Railroad bonds quiet and generally easier. Foreign exchange has ruled dull and easier, the posted rates for sterling having been reduced to 4.81@4.83.

THE PAPER MARKET.—No one has expected to see any activity in this market during this week, the time being devoted largely to relaxation and the closing up of the operations of the year. The course taken by the manufacturers of writings in shutting down has been found to have been wise, prices being well sustained in consequence. The second shut-down for a week is now in progress and will continue to the end of the week, and it is estimated that the three weeks shutting down, including the last week in January, will keep out of the market from 1,800 to 2,500 tons of writing paper. It would have been well for the book-paper manufacturers if they had followed the example of the writing men, as they would have by this time found a different condition of things ruling than is the case to-day. Book papers are weak and are being offered at lower prices. The supply of rags is large and production large—circumstances which do not aid to keep prices of book papers well sustained. We hear of an order for 200 cases of writings at prices ruling some time ago, but the mill refused the order and asked one cent advance. News may be said to be steady, but manillas and straw wrappings are very irregular, and the former may be said to be somewhat nominal in price.

THE STATIONERY MARKET.—Outside of the local trade in holiday goods there is only a moderate business doing. The wholesale houses report a good lively trade in a retail way in fancy goods, toys and everything suitable for holiday presents, and although the bulk of business in Christmas and New Year cards has already been done, there has been a good brisk demand for these goods during the past few days. In the way of staples dealers report a better business than they had a right to expect at this time. There is a quite a fair local demand for gold pens, pencils, charms, &c., on account of these goods being so well adapted for holiday gifts. Orders for blank-books are generally very small at this time and there is only a little trading, buyers as a general thing being very conservative in their purchases. Stocks of goods of every description in the stationery and fancy-goods line are everywhere regarded as light and this gives encouragement to the belief that with any revival of business generally there must be quite a general restocking, and the trade are very hopeful that better things are in store at no very distant day.

Ivory from Zylonite, &c.

This invention pertains to the production of an article which closely resembles and is adapted for being used as a proper substitute for ivory, the grain of which is still distinct, or at least has not been removed by artificial means, and designated as "grain ivory." In the manufacture of fictitious grain ivory from a pyroxyline base—such as zylonite—at least two lots of zylonite are prepared, differing from each other in color to such an extent that when combined and subsequently reduced to the ultimate and desired articles to be formed the general shade or color of the article and the individual characteristic of the integral parts forming the grain shall be such as to best approach the appearance of a fair average of the natural ivory as found in articles of a similar form. It will be recognized that the procurement of these degrees of shade and translucency is a matter of great nicety and judgment. Furthermore, the base or pyroxyline is in practice never white or even sufficiently opaque, but possesses a similar shade to horn, and this horn shade varies to such an extent in different "bleaches," from various causes, that it becomes necessary to take it into account, and it becomes a factor in determining the proper amount of coloring-pigments and foreign agents required to be added to the several lots of zylonite out of which it is intended, by combining together, to form the grain-ivory imitation. In this manner, then, having obtained the two or more integral parts which are to constitute the layers or grain of the product, their assembling, combining, and mechanical manipulation require to be governed with regard to the form or nature of the articles intended to be manufactured therefrom, and this part of the total process forms the chief feature of this invention—that is to say, a prior process contemplates all that is herein stated relating to the preparation and combining of the several layers and their subsequent subdivision, but it goes no farther. The earlier process is a method of obtaining successive sheets or slabs of zylonite ivory, each possessing great similarity and uniformity of the grain formation, and quite essential where a certain class of articles is to be manufactured therefrom—such as brush and mirror backs—and wherein the upsetting of the grain caused by the small amount of flow of the material in taking the form of the mold by the aid of heat and pressure yields sufficient disturbance to the initial regularity of the grain to avoid monotony, and give a waving and pleasing effect. That process may therefore be called the "positive" one, while that now described may be designated the "accidental" or "inferential" one. Two lots of semi-transparent horn-colored pure pyroxyline or zylonite base are required. With one is incorporated, either prior to or at the rolling operation, sufficient pigment—say of oxide of zinc about five per cent., and of coloring matter say one-half of one per cent., or such pigment without coloring matter. These ingredients for giving the desired "body," "depth" and color, and destroying the horn-

like appearance of the pure material, having been thoroughly incorporated and the whole sufficiently worked on the rolls to the consistency found best adapted to the purpose, occupying about thirty minutes, the rolls are set, say one-sixteenth of an inch apart, and the "batch" is run through while it is yet warm, and emerges in a long sheet. This sheet is either subdivided into small areas or not, depending upon subsequent requirements. With another lot of the semi-transparent horn-colored pure pyroxyline or zylonite base is incorporated, either prior to or at the rolling or grinding operation, sufficient pigment—say of about ten per cent. of oxide of zinc or other suitable pigment, and of coloring matter, say, about one-quarter of one per cent., or such pigment without coloring matter. These ingredients for giving the desired depth, body and color, and destroying the horn-like appearance of the pure material, having been thoroughly incorporated, and the whole sufficiently worked on the rolls to the consistency found best adapted for the purpose, occupying about thirty minutes, the rolls are set, say, one-sixteenth of an inch apart, and the batch is run through while it is yet warm, and emerges in a long sheet. This sheet is either subdivided into small areas or not, depending upon subsequent requirements.

Having thus provided what is to constitute the layers representing the grain of the ivory, we now come to the arranging and combining of these together. This may be accomplished in various ways. For instance, the several layers may be placed upon each other and closely coiled together in scroll form, either when fresh or aided by a little warmth, after which sections of such roll or rolls may be taken and placed in what is termed a "stuffer" in this industry, and similar to a lead-pipe-forcing machine; or it is obvious that, having arranged the several layers as desired, they may be assembled in other ways than strictly the scroll form herein described, and subsequently manipulated in the stuffer, and all of which is subject to the variety of nozzle used for ultimate effect. By the aid of heat and pressure the layers will become thoroughly welded or united, and the whole emerge from the outlet or nozzle of such stuffer in a solid form, and possessing not a homogeneous uniform color, but having a grain and variegated effect. This variegated effect is obtained whether the material emerges in a rod, tube, sheet, slab or bar form, and all of which is subject to the variety of nozzle used for the purpose. The grain effect will in this way preserve in sufficient regularity its original characteristics without being too uniform, and neither being as heterogeneous as is the case when a lot of pieces of different colors are placed in the same stuffer and run through in the same manner. When no occasion exists for forming this grain product into rods or tubes, and it is still desired to disturb the uniformity of the layers resulting from the method of amassing them together, lengths of each of the two grades before mentioned, of say, a yard, may be cut, and then rolled up together tightly by hand, and when sufficient of these hand-made rolls are ready they are to be placed in a mold, and by the aid of heat and pressure consolidated into a solid cake. When this is sheeted or cut into blanks and finished, it will be found to possess a wavy grain, which is due to the amount of flow of the stock in its movement to fill up the blank spaces left in the mold. It is clear that the larger the rolls are made the greater the flow and the coarser the result, and the reverse.

TO CLEAN PLASTER-OF-PARIS BUSTS.—To clean casts of gypsum (plaster-of-paris), bas-reliefs, &c., which have stood for a time and

have become dirty and dusty, several methods are employed, all of which, however, tend to injure the sharp corners of the cast, and occasion loss of time. The writer was required to do much of this work, and he hit on the following excellent plan: Boil a quantity of

starch into a thick paste, and with a soft brush spread it on the article to be cleaned. Then expose it to an airy place, and, when dry, the paste will peel off, together with all the dirt and dust, and the cast will appear as white as when new.

J. Q. PREBLE & CO.

Nos. 54 & 56 Franklin and 77 White Sts., New York,

MANUFACTURERS OF

Blank Books, Envelopes, Writing Papers.

AND A FULL LINE OF PAPETERIES.

Sole Proprietors, J. Q. PREBLE & CO.

Improvement in Chromographic Printing.

In the art of color-printing, impressions from different relief-plates or engraved wood blocks have been combined by printing with colored inks, one upon the other, in a continuous series upon the same sheet. To produce successful results in this way, it is necessary that the ink from one relief-plate should be dried before another design is printed upon it, and accordingly presses have been constructed in which the several relief-surfaces having been adjusted as for typographic printing, the sheet of printing, after being fed to the press, is presented to each form inked with its appropriate color in succession, and finally discharged from the press bearing the complete chromographic design. This procedure is possible because the sheet upon which one impression is printed is capable of taking an additional quantity of ink from each following typographic printing-surface, and the latter cannot be injuriously affected thereby, because only those parts of the freshly-printed design which are meant to receive additional color come in contact with the raised surface furnishing it; but if we now try to substitute the lithographic for the typographic manner of printing, the case is different. It is then necessary to dry the ink on one impression very thoroughly (several days being usually required for this purpose) before proceeding to the next following impression. If this were not done, the fresh ink upon the sheet printed from one stone would offset where it overlapped upon the non-printing parts of the stone which followed in order, producing there a greasy smear, which would continue to become worse and worse as the printing proceeded. The reason of this is the fact that in printing lithographically the sheet comes in contact with all parts of the printing-surface, and, if consecutive printing be attempted in that manner, the clean parts of the second and following stones, after the damping-water upon them has been dissipated by the previous rolling in of ink, will, in that very sensitive condition (characteristic of stone, zinc, and collographic plates), immediately lay hold of the fresh ink upon the printed paper and take a part of it exactly as it would take ink from a fresh inking-roller. As this would be obviously destructive of the work upon a stone or similar surface, the printing of chromo-lithographs in continuous sequence or in rapid succession without drying has been regarded by practical men as a problem offering insurmountable difficulties.

A means for overcoming these difficulties has been devised, and which permits of the combination of lithographic and typographic printing in the same press without any restrictions; and although the construction of the heavier parts of chromatic presses must undergo some modification when lithographic stones take the place of type-forms, still, when flexible zinc plates are used on which to make the printable drawings and transfers, even this change is unnecessary, and the same may be said if collographic plates are employed, when such productions are on a flexible base.

In practice, mechanism is provided for damping the stone or its equivalent a second time. The first damping precedes the inking in the usual way, to prevent the clean parts of the stone taking ink from the inking-rollers. The second damping precedes the printing, to prevent those same parts taking ink from the sheet which has been previously printed.

It is not necessary that all of the colors which together form the design should be printed from stone, zinc or collographic plates. Two or more of the impressions may be printed from stone or zinc and one or more from relief plates; or the series may be begun with one or more relief-plate printings and ended with one or more from stone or its equivalent; but in every case the final damping of all surfaces which print in the lithographic manner is necessary when the sheet on which the impression is taken has been already printed upon in

any manner, and in whatever order the printing surfaces upon the form cylinder follow each other the cams or analogous devices which govern the damping mechanism are so adjusted as to bring about the final damping at the proper time and where it is required to prevent an offset.

Lithographic pens for writing on stone are now made by the best steel-pen makers, and are used to a limited extent. Such pens are exceedingly small and fine, even finer than a crow-quill, but the best lithographic pens are yet made by the artists themselves. They are of thin steel ribbon, very slightly hollow-shaped, and slit by a fine pair of scissors made specially for the purpose. These pens are not fitted for working on paper, but on the surface of the stone they give lines of extreme fineness unattainable in any other way.

THIS CUT
SHOWS
No. 2.

PATENTED.

P. O. BOX 2773.

ELECTRO RADIANT MAGIC LANTERN.

The body of the ELECTRO RADIANT is a cone-shaped reflector which gathers each divergent ray of light and concentrates them all on the main reflector, whence the whole mass of brilliancy illuminates and projects the picture with startling clearness. No combination of lenses, however ingenious, has ever been known to produce equal effects with the light used? The cost of an outfit to enable you to do a PROFITABLE BUSINESS is small compared with the amount of money it takes to do any other business. Any one of ordinary intelligence can operate it, and \$10 to \$50 can be made nightly by giving Parlor, Sunday-School, Academy or Public entertainments. FOR PUBLIC ENTERTAINMENTS the possessor of an ELECTRO RADIANT has something that will "draw" with the combined power of the THEATRE, the CIRCUS, the PRESTIDIGITATEUR, the COUNTRY FAIR, the TEMPERANCE CRUSADE, and the CAMP MEETING. A room that will hold 100 persons may be filled nightly and a good profit cleared. You have only to tack sheet to the wall, darken the room, place Lantern on stand, and you are ready to begin the exhibit. \$10,000 were paid for the use of our patent by Railroad companies for LOCOMOTIVE HEADLIGHTS, it being considered the most wonderful light ever produced for the purpose. We have retained the exclusive right to make MAGIC LANTERNS on the same principle and the ELECTRO RADIANT is the result. The adjustments of Reflector, Lenses, Tubes, Slide-Box and Cone are made with mathematical nicety. Optical laws governing such adjustments have been accurately calculated, so that you have in our lanterns far more than appears, and we are placing within the reach of all unimpaired methods for LARKING, AMUSEMENT and PROFIT. The Transparent Slides for these lanterns embrace views illustrating WONDERFUL NATURAL SCENES from different parts of the World. SCULPTURE.

Subjects from both the Old and the New Testaments, TEMPERANCE—showing the folly and misery of the drunkard. ART—Copies of famous Statues, Bas-Reliefs and Engravings. MISCELLANEOUS—Such as Ships at Sea in a Storm, Steamboat Race, Fort Sumter, Daylight scene, Moonlight, &c. HISTORICAL—Landing of Columbus. Declaration of Independence, &c. COMIC—Side Splitters without number. You can add to your assortment at any time. Full and simple directions and list of extra Slides packed with each lantern. No. 2 Lantern makes a picture EIGHT FEET in diameter. Price, (with 12 Slides) \$12 each. No. 4 Lantern produces a Four-Foot picture. Price, (with 12 Slides) \$6 each. Our DESCRIPTIVE CIRCULARS AND OTHER PRINTED MATTER ARE SO ARRANGED THAT MERCHANTS can handle the full line without previous knowledge and with very little trouble. Patented mechanical and other Slides in stock and made to order. For HOME USE THE ELECTRO RADIANT LANTERNS ARE BEYOND MEASURE ATTRACTIVE.

To intending purchasers or their agents we will cheerfully show Lanterns in operation.

To GILD STEEL.—Steel may be gilt by a solution of gold in ether. Dissolve pure gold in nitro muriatic acid and boil it until the latter has been expelled; then dissolve the residue again in water, adding thereto a triple volume of sulphuric ether. Let the liquid stand for twenty-four hours in a well-corked bottle, and etherized solution will be seen to float on the surface. If polished steel is plunged therein, it will be immediately gilt, and if designs are drawn upon its surface with an optional varnish, a handsome surface, both steel and gold will result. For other metals, use the galvanic process.

To PREPARE CHALK.—Pulverize the chalk thoroughly, and then mix it with clean rain-water, in proportions of two pounds to the gallon. Stir well, and then let it stand for

about two minutes. During this time the gritty matter will have settled to the bottom. Slowly pour the water into another vessel, so as not to stir up the sediment. Let stand until entirely settled, and then pour off as before. The settling in the second vessel will be prepared chalk, ready for use as soon as dried. It may be perfumed and colored.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the *only* Mucilage that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), *ex gross*, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), *per gross*, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

NOTICE.—THE TRADE IS HEREBY CAUTIONED AGAINST PAYING ANY MONEY OR CASHING DRAFTS FOR ANYONE ON OUR ACCOUNT. OUR TRAVELING SALESMAN, MR. JACOB L. HANO, IS PROVIDED WITH OUR ENGRAVED CHECKS, WHICH WILL BE HONORED BY US. WE ANNOUNCE THIS FOR THE PROTECTION OF THE TRADE.

SAMUEL HANO & CO., BOSTON, MASS.

SCHOOL BOOKS!

I have a large stock of SECOND-HAND SCHOOL BOOKS, sound and serviceable, at 60 per cent. discount. Also School Books, more or less shelf-worn, at SPECIAL BARGAINS. Also, FRESH STOCK as low as other houses in this city. Orders from the trade respectfully solicited.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

THE READY BINDER.

Patented
Oct. 23, '83,
and
Jan. 29, '84.

Slide the Clasp (1) as near the centre as the twist in the wire will allow; open the Jaws or Ends (2) and insert the papers or pamphlets, then move the clasps toward ends until tight. In moving Clasps always press the Ends or Jaws as close together as possible.

NEARLY everyone has felt the need of something that would bind loose papers and pamphlets in a substantial manner without unnecessary expense or undue labor. Many Binders have been invented, the most of them cumbersome or complicated. Their cost has also been an impediment to their ready sale. Many papers and magazines are worth keeping, yet the possessor does not care to be at the expense of having them bound. Many other needs are constantly arising, of which everyone who handles papers is cognizant. These wants are supplied by the Ready Binder. It is not cumbersome; it is not expensive; it is ever ready; will hold one sheet or more; sheets or papers can be added or removed in less than a minute's time without detaching those already in place; does not mutilate the paper; furnished with or without covers. Send for Price List.

The Trade supplied by the
NEW YORK NEWS COMPANY and NEW ENGLAND NEWS COMPANY.

NEW LIST AND DISCOUNTS OCTOBER 1, 1883.

A REWARD OF \$100.

We are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. WHITE'S EYE SHADE,

— WITH AUTOMATIC SPRING. —

Self-Adjusting, Ventilated, Easiest to the Head, Handsomest, Most Durable, Cheapest.

THIS IS BY FAR THE MOST PERFECT EYE SHADE
 that has yet been invented. It is made in three sizes—
 No. 2, wide; No. 3, medium, and No. 4, narrow. The Shade is
 made of material handsomely finished in muslin, green on one
 side and brown on the other. The edge next to the forehead is
 bound with leather, and the outer edge with metal, making a
 complete automatic spring, which fits heads of all sizes. The
 material is at once the lightest and strongest, so that while the
 Shade rests on the head as lightly as a strip of ribbon and
 firmly as a cap, it has all the elements of durability. There is
 a large demand for this Eye Shade.

STYLOGRAPHIC PEN CO., Providence, R. I.

SOMETHING NEW!

BLACKHALL'S PERFECTION LAPPER AND AUTOMATIC LIFTER.

(ENTIRELY DOES AWAY WITH THE STRIKER FOR ALL SINGLE STRIKE WORK.)

This invention is of importance to every one who uses a Ruling Machine. The following will show some of its advantages:

- 1st.—It can be set to lap any sized head in half a minute.
- 2d.—It saves 50 per cent. in pen-setting alone. As the lap forms the head, there is no careful adjusting to do; so it pays on smallest quantities of job work.
- 3d.—It will lap any size from half note to imperial.
- 4th.—The pens do not lift, but rule continually as in feint lining.
- 5th.—There are no cogs. 10,000 sizes can be had from one wheel.
- 6th.—There are no cams used. Setting for stops or springing can be done in quarter the usual time.
- 7th.—It will drop and lift in one sixteenth of an inch, or ten times in one inch.
- 8th.—The lift and drop of the pens is just the same as in hand-work.

NEW YORK, November 13th, 1884.

MR. E. W. BLACKHALL, 13 West Swan Street, Buffalo, N. Y.

DEAR SIR: We are pleased to say that after two months' trial of your Patent Regulating Lapper, applied to our 48-inch Hickok Ruling Machine, we find it far in advance of anything we have yet seen for the purpose. Our ruler, who had never handled a striker before, worked it at once without trouble, producing results equal to the best hand-work on his first job. We find that with your one roller, we can get any required size in a few seconds, from half note to double cap, or over one thousand sizes, against ten from the gear wheels on our Hickok O. A. By lapping headings we save from fifty to sixty per cent. of time in settings alone; so your invention saves time where it can't be saved in any other way, and the work is always perfect. We find the setting for striking can be done in much less time than on the other strikers, as you have done away with the cams and have no filling-in to do, so we can strike in a space of 1-16 of an inch, while your Springing device can be worked with ease, giving two patterns or rulings together. We are well satisfied with the machine, and will be pleased to show it to the trade at our ruling rooms at any time.

Truly yours,

DAVIS & FITZGERALD, 24 Liberty Street, New York.

Mechanical Stenography at the Turin Exhibition.

BY P. LE NEVE FOSTER.

Among the most important novelties at the Turin Exhibition, the stenographic machine of Signor A. Michela merits special notice.

Signor Michela has succeeded in grouping into various series, and in representing by means of certain combinations, all the phonetic sounds emitted in any language, and has formed a notation of language perfectly similar to that of musical sounds. As soon as they are pronounced, the different words, so to speak, are decomposed by the ear of the operator at the instrument, and a graphic representation of the syllables is printed upon a slip of paper which is drawn through the machine, and from this they can be read afterward, and transcribed into ordinary writing, in order to reproduce the speech, such as it has been delivered, in whatsoever language it has been spoken.

The machine, which in form somewhat resembles a small harmonium, is about 18 inches in length, by 10 inches in width, and 8 inches in depth, and is mounted on a portable stand. It consists essentially of two parts. 1st. The printing mechanism. 2nd. That referring to the automatic drawing forward of the paper. The first consists of two key boards, similar to that of a pianoforte or harmonium, arranged in a symmetrical manner, and having each 10 keys (6 white and 4 black). These keys, when depressed by the fingers of the operator, press on 20 studs, and through them a similar number of corresponding rods, and these lower the ends of 20 metallic levers, the arms of which have a constant ratio, and at the same time the opposite end, which carries a style, is lifted upward, and a sign or character engraved upon it is reproduced upon the slip of paper. It is, therefore, only necessary to depress one of the keys in order to raise the style corresponding to it, and if several keys are depressed at one time, the corresponding combination of signs will be printed upon paper. The machine may be arranged as an "embosser," or as an "ink writer," which latter is the most preferable form, as the printing can be read off quicker, and with less fatigue to the eyesight than is the case when the signs are produced in relief.

The mechanism referring to the drawing forward of the paper is also exceedingly simple, and this motion can be produced in a variety of ways. In the machine exhibited, however, it consists of a small lid placed horizontally underneath the twenty keys, and which, when any one of them is pressed down, moves the end of a lever, which acting by means of a catch on a ratchet wheel causes it to revolve; a spring on the underside of the lever brings this latter back to its original position when the pressure is removed. The ratchet wheel, which is fixed on the same axis with a friction roller, gives motion to another roller placed above it, so that the paper band on another roller placed between the two key boards, when caught between the two friction rollers which pull it forward, is moved automatically

at each impulse of the ratchet wheel caused by depression of one or more of the keys. The pressure of these friction rollers on the paper is regulated by a screw, and guide bars are provided for the printing styles.

The essential feature in this invention is the manner in which the graphic representation of the various phonetic sounds is obtained, and the various combination of signs which correspond to the different syllables and words could not be explained clearly here without special diagrams. The manipulation of the key board of this instrument differs from that of an ordinary piano, inasmuch as the same finger always operates upon the same two keys, a circumstance tending to facilitate its use, especially among the blind. A skilled operator can take down 200 words per minute in any language he knows, which speed is more than sufficient to follow the fastest orator, as the delivery of speech varies from 80 to 180 words, or averaging 130 words per minute.

This machine has been lately adopted in the Italian Senate.

It will be readily seen that this apparatus can be applied with telegraphy to the rapid transmission of short hand messages; and from experiments that have been made, there is every reason to believe that the paper bands can be printed with the same rapidity at distant stations by the simple manipulation of the key board at the one end of the line, as they are now printed at the Exhibition.

CHINESE CEMENT.—Take clean glass, powder it very fine, and pass it through a silken sieve. Rub this on a marble slab with the white of an egg, and add glass to thicken sufficiently. It is an extremely tenacious cement, and the parts will never separate again. Good for porcelain, glass, &c.

Nos. 162 to 172 Columbus Ave., Boston; and No. 62 Cliff Street, New York.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection**At PARIS, 1878,**This being the **HIGHEST** and **ONLY AWARD** given for**LINEN RECORD & LEDGER PAPER**

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double-Sized*, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.
